From winners, Great Harwood, Nottingham, Hanley, Leek and District; also Leek Ornithological Society's Show, with 6 Norwich classes. I bred 5 of the 1st prize-winners, which is proof of quality; pairs, from 15s. upwards; approval.—W. Whetstone, 8, Parker Street, Leek, Staffs. x265

THE GREATEST BARGAIN ON RECORD.

Monster 1905 bred clear yellow Plainhead cock, Bishop's strain, cost £3, matched to a clinking clear buff hen, Vardy's strain, 1905 bred, this pair are very stout and chubby, ideal standard type, and bred over £26 worth last season, including four winners; first order 32s. 6d. gets them, honestly worth £5.—Address, Geo. Cubley, 3, Standard Terrace, Long Sutton.

WM. BOWYER.

Buy from the man that breeds his own winners; 40 years' exhibitions. Probably more winners have been supplied by me than any man living. Can spare well matched pairs Norwich from 15s.; few the right type yellow hens from 5s. to 20s.; odd cocks 10s. to 30s.; no better blood in the Fancy; approval.—Wm. Bowyer, Gladstone Street, Leek.

F. EATON,

Breeder of Norwich and Yorkshire Canaries.—I have won this season at Parkgate, Bramley, Sheffield, Goole, Carr Vale, the following prizes:—Four firsts, nine seconds, seven thirds, six fourths, and other cards. I have now a few birds for disposal, same strain as my winners; prices reasonable; can be seen any Saturday or Sunday; stamp reply.—147, Freedom Road, Walkley, Sheffield.

Not Clearing Lines, but Bargains.

I am offering this week, on approval, Norwich Plainhead pairs at 10s. 6d., and Norwich songsters 7s. 6d., specially selected; other enquiries invited for Plainheads or Crests.—F. Yallop, Alexandra Road, Norwich. Established 1869.

NORWICH CANARIES.

If you require a good Norwich Canary, Crest or Crestbred, winning strain of Crystal Palace, 1906, Nottingham, Cambridge and Norwich, give us a trial.

LATEST OPINION OF MACKLEY BROS.' BIRDS.

"High Street, Uppingham, Rutland. Jan. 12th, 1907. Dear Sirs,—The two Birds arrived safe, in the PICTURE OF HEALTH; they are the BEST TYPE of Norwich Plainhead I ever saw. I am HIGHLY DELIGHTED with them. I shall certainly recommend you to all I have the opportunity of so doing. I never had the favour done me from any one FIRM but yours by sending birds on approval without the Deposit System. Trusting the Firm of MACKLEY BROS. may live and reign for the sake of their customers.—Yours faithfully, J. Waddingham to Mackley Bros."

Postal and Telegraphic Address: **MACKLEY BROS., (Jacob Mackley), NORWICH.**

NORWICH—continued

NORWICH PLAINHEADS.

Pairs, correctly matched for breeding, 8s. 6d., 10s. 6d., 15s, 20s., upwards. Travelling cages, 3d. extra. Extended list free.

W. RUDD, The Bird Specialist, **NORWICH.**

WILL YOU, PLEASE?

Will you please send me your name and address on a post card, upon receipt of which I will forward you, post free, my New Illustrated List of Canaries and British Birds? I have some of the best Norwich in England, including many winners and matched pairs for breeding winners, all at reasonable prices; state requirements. I offer exceptional good value in typical cocks at 6s. 6d., 7s. 6d., 8s. 6d., 10s. 6d., 12s. 6d., 15s., 20s. each; hens, 3s. 6d., 4s. 6d., 5s. 6d., 6s. 6d. to 15s. each; matched pairs from 8s. 6d., 9s. 6d., 10s. 6d., 12s. 6d., 15s. upwards. See what customers say:—"Cercy Street, Cork, January 18th, 1907. Received the bird on 15th, and am highly satisfied; it is extraordinary good value for the money.—B. Bramhald to Miss Storey."—"Memock, Dumfriesshire, January 19th, 1907. I am exceedingly well pleased with the birds you sent me. They give every satisfaction.—T. Cross to Miss Storey."—"Victoria Road, Hatherleigh, January 18th, 1907. Bird received quite safe, in best of health. I am more than pleased with the quality of the bird.—C. Short to Miss Storey."—"36, Long Causeway, Perth, January 19th, 1907. Bird received safely, and gives every satisfaction, for which accept my thanks. R. Taylor to Miss Storey."—I have thousands similar to the above open for inspection. New Illustrated Price List post free. Travelling cages, 2d. each; all Canaries sent carriage paid on 7 days' approval at my risk.—Miss E. L. Storey, Crowle, Doncaster.

If you require reliable Stock Birds give me one trial order. I guarantee satisfaction to all. Kindly note this week's prices, which are the best value ever offered at prices asked, and only want seeing to prove that.

W RUDD, The Bird Specialist, **NORWICH**

SILK'S CHAMPION NORWICH.

My name and fame as breeder of Norwich Plainheads is so well known to every fancier that my birds need no paper recommendation. I breed to sell. Most of the leading champions have been bred and sold by me, my vast business having been built purely upon recommendation, not on paper bounce. If you were disappointed last year with Norwich purchased elsewhere, try a pair from a strain of many years' standing. Success certain. Every pair on approval, money returned if unsatisfactory, or deposit with Editor. Satisfaction guaranteed. Champion pairs, 15s. 6d., 20s. 6d., 25s. 6d., 30s. 6d. per pair; some tip-top cocks and hens, yellow or buff, 7s. 6d., 10s. 6d., 12s. 6d., 15s. 6d. each. Don't risk unreliable strains, but send to the fountain head, or a season's work may be wasted. Remember, all on approval, willingly.

Judge A. E. Silk, THE AVIARIES. **Whitstable.**

SANDIFORD'S FAMOUS Norwich.

READ OF SUCCESS FROM BIRDS

I have supplied, also of our noted Wins at all leading Shows, including Derby, Leek, Hinckley, Carlisle, Gateshead, Sunderland, Crewe, Edinburgh, etc., etc. Won this Season—34 Firsts, 28 Seconds, Gold and Silver Medals, 50 Specials, etc. At Hartlepool, N.P.C. Cup Show against all the cup fighters, 8 birds—4 Firsts, 2 Seconds, 2 Thirds.

Also, in the year 1900, we won **50** First Prizes, Seconds, Specials, etc. 1901, **44** Firsts, **30** Seconds, Specials, Cups, etc. 1902, **40** Firsts, **40** Seconds, **35** Thirds, Scores of Specials including Championship Medal for Best at Crystal Palace. 1903, **35** Firsts, **40** Seconds, Specials, etc., including the N.P.C. Challenge Cup, which we won at Three Shows against all others Five Shows, also Gold Medal at the N.P.C. Club Show for best Norwich. 1903-4, Won **50** Firsts, **40** Seconds, **25** Thirds, N.P.C. Challenge Cup second year in succession, also **2** Gold Medals at the International Show, England v. Scotland, **1** for Best Norwich in Show. 1905, Won **30** Firsts, **25** Seconds, Spls., etc. If my strain can't claim to be the best on earth none can.

I am offering for two weeks only 20 Grand Matched Pairs, to breed Winners, at **20/-** pair, must clear. Also other Pairs at **25/, 30/-.** Odd Yellow or Buff Cocks, **10/-, 15/-, 20/-, 25/- 30/-.** Odd Yellow and Buff Hens, **10/-, 12/-, 15/-, 20/-,** All on approval two days. If you want the blood that wins order at once.

Mr. Melver, Port Glasgow, Jan. 8, 1906.—"Sir, The Norwich Cock you sent me won 1st and Special in class of 11, against all colours." Have scores like this.

Established 1879.

CHAMPION SEIFERT ROLLERS.

Having selected my breeding stock from Mr. Tweed's bird-room, at great expense, I now offer a few young gems for sale, same strain as his Palace cup-winners, undoubtedly the finest strain in this country; cocks, 15s. to 50s.; hens, 5s.; approval.—Low, Moray Place, Elgin. t.c.

Hummel Rollers.

Finest Rollers imported. To speak well of the Hummel is to gild refined gold. Testimonials from customers who say the Hummel is still singing as sweetly as when purchased four, five, six, and seven years ago. All Hummels have delightful, deep, delicate bow roll, hollow roll, hollow bow roll, du pipe, hollow bell roll, grand round bass roll, vibrating hollow roll, and charming water bubble roll: one price only, 12s. 6d.; no fancy prices; Hummel hens, 3s. each; a beautiful pair of Hummels for 15s. St. Andreasberg Rollers, 6s. and 7s. 6d. each. Hummel Schoolmasters, 20s. each, better than can be obtained elsewhere at treble the price. Thousands of testimonials have been published by me in CAGE BIRDS from satisfied customers. I guarantee strictly honourable trading and satisfaction to all.—Varney, sole proprietor and importer of this remarkable Roller Canary. Twenty years advertiser.—Varney, Stratford, London. Export a speciality. "The Schools, Overton, Ellesmere.—Hummel arrived, it at once commenced to sing—yes, a song worth listening to. It is the most exquisite songster I ever heard—decidedly a perfect Roller. I may say I never expected such perfection; they are worth all you charge for them. I must thank you for your courtesy, and shall be able to recommend your firm to those who require birds and not rubbish."—F. Robbins, to Varney, Stratford, London, Sole Proprietor and Wholesale Roller Canary Importer and Dealer.

BUY DIRECT OF

Breeder and Trainer. Finest strain of Rollers in the country; trained to perfection, 7s. 6d., 10s., 12s. 6d., 15s. upwards; hens 2s. 6d., two for 4s. 6d.; cash or deposit.—F. Cartwright, 15, Farfield, Kidderminster; established 1888.

PURE SEIFERT ROLLERS.

Hopkins, Bird Specialist, 38 and 41, Fylde Street, Preston, Lancashire.

IMPORTANT NOTICE.

Notice, another consignment of St. Andreasberg Rollers has arrived; they are constant day and gaslight songsters, with all the sweetest, softest, and most musical changes of song; water-bubbles, runs, silvery trills, piccolo, harp, and deep bass rolls, etc.; all on six days' approval on receipt of P.O., or deposit the amount with the Editor; 7s. 6d., 8s. 6d., 10s. 6d.; perfection. Schoolmasters, 12s. 6d., 15s. 6d., 18s. 6d., 21s.; inspection invited any time.—William Shaw, 97, Essex Road, Islington, London, N.

WHITTAKER'S CONTEST REPORT.

Bury Contest.—I was second, class 1; bred and sold second, class 2; the parents of first, second, and third, class 3; sold first and second, class 4. Bolton.—See report.—I bred second, class 1; second and third, class 2; first, class 3; two firsts, one second, and two thirds myself. Before this won four silver and two bronze B.R.C.C. medals and several other prizes. This has been done with birds I have bred, not German hot pots specially imported for the purpose. Few cocks for sale, 10s. upwards; stamp for reply.—W. Whittaker, Rose Street, Moses Gate, near Bolton.

F. WAGNER,

Importer of Hartz Mountain Roller Canaries; wholesale only.—No. 9, Chamber Street, Leman Street, London, E. x266

HARTZ MOUNTAIN

Roller cock Canaries, direct from Hartz, beautiful birds, only 3s. 9d. each; 21s. a stick, try one.—Varney, Stratford.—"The Elms, 18, Whitehouse Loan, Edinburgh, January 1st, 1907.—Hummell arrived safely, and sings lovely; it is a pretty bird, and gives satisfaction.—N. Turnbull."—"January 2nd, 1907.—Birds arrived, are singing well.—R. M. Lee, 79, Mill Street, Crewe."—"Broom, Newton Mears, Glasgow.—The birds arrived in good condition; I am well pleased with such value.—J. Broom."—"January 2nd, 1907, 32, Easson Road, Darlington.—Bird to hand. I like the song wonderfully well, and thank you for your prompt delivery and attention to my instructions.—H. Hutchison."—Send all orders to Varney, Stratford, London.

DON'T KEEP THE ROLLER

if you are not thoroughly satisfied with it, as we believe in thoroughly satisfying our customers. That's why our business has grown so enormously, and, incidentally, it is the reason why we have to keep the largest stock of pure Rollers in Birmingham. Reasonable prices for reliable birds, and absolutely straightforward dealings. We send all our Rollers on seven clear days' approval entirely at our own risk, either cash to us or CAGE BIRDS deposit system, and if you are not thoroughly satisfied with it you only have to return it, and we will either replace it or refund your money in full. What could be more straightforward? We have another grand consignment of pure St. Andreasberg Rollers, all on full rolling song, with long, deep, sweet, soft, hollow, bass rolls, waterbubble runs, etc., bell, harp, and gong notes, etc., etc., 7s., 8s. each. Extra special Schoolmasters, which far excel all others in their deep, sweet, bass, hollow rolls, perfect little music boxes, 10s. each, two 18s. Pure St. Andreasberg hollow Roller hens, 3s. each, two 5s. Hartz Mountain Rollers, good loud, clear day and gaslight songsters, 6s. each, two 11s. 6d.; hens 2s. each. Ideal Roller breeding cages, 2s. 6d. each; few second-hand Roller double breeding cages, from, 30 in. long, 2s. 6d., 3s. each. Roller singing cages, 1s. 3d., 1s. 6d. each. Kindly read few of the following testimonials for proof of the quality of our Rollers. "10 George Street, Scarborough, January 16th. Dear Sir,—Received the Roller quite safe, and am highly pleased with it. I have instructed CAGE BIRDS to pay deposit over. Yours, H. Harrison." "28, Oakland Street, Miskin, January 18th. Dear Sir,—I received the Roller quite safe, and am quite satisfied. I have written for CAGE BIRDS to pay deposit over.—Yours, W. Reed." "34, Britannia Street, Leek, January 19th. Gentlemen,—The Roller arrived quite safe, and gives great satisfaction. Your way of sending them does you great credit. I shall certainly do my best for your straightforward and honest dealings. You may make what use you like of this testimonial.—Yours, J. Birch." "107, Grove Lane, Handsworth. Dear Sir,—I should be glad if you would select me another Roller similar to the one I had three weeks ago. I am pleased to say that the three Hartz Rollers, also the three Goldfinches I had from you this season, gave every satisfaction. I have dealt with you for some years, and have always found whatever purchased has been as you represented them to be.—Believe me, yours, Will. Hy. Darby."—Parker and Wilden, 257 and 258, Farm Street, Birmingham.

HARTZ CANARY KING.

William A. Gore, acknowledged by all to be the king of all Roller Canary retailers, still has a grand stock of pure St. Andreasberg hollow Rollers, all direct from Leipzig, all guaranteed in full song, day and gaslight, with long hollow and double rolls, sweet, silvery trilis, waterbubble runs, soft roulades, piccolo trills, nightingale jug-jug, bent hollow tours, deep bass tones, bell, harp, gong, and dau dau notes, etc., etc., and guaranteed perfectly free from any harsh or objectionable notes, whatever price, 7s. or 8s. each. Special Bandmasters, which exeel in the deep bass tours and hollow runs and are perfect masters of their art, 10s. each. Twenty premier contest masters, specially picked from song boxes in Germany for me, in full song and fit for immediate contest winning here, price 15s. each. Only 20 for sale, so immediate application is imperative if you would secure one of these unrivalled contest winners. Pure Roller hens, warranted same strain as above cocks, 2s. 6d. each, two 4s. 6d. each. Ordinary loud free Hartz cocks, in full, vigorous song, day and gaslight, 5s. 6d. each, two 10s., or 33s. 9d. for seven. Hartz hens, 2s. each, 3s. 6d. couple. Singing box cages, 1s. and 1s. 3d. each. Roller song cabinets, with folding doors, made specially for my Rollers, 2s. 3d. each. Thousands of unsolicited testimonials have been published by me, and still they roll in. See following:—"19, Jacktrees Road, Cleator Moor. Jan. 21st. Sir,—Received Rollers all right on Saturday, and am highly satisfied; will give you another order later on.—Yours, Eldon Barber." "4, Mill Street, Diglis, Worcester. Jan. 21st. Sir,—Received Roller safe. He is a little gem. Started singing quarter of an hour after arrival. Thanking you for prompt attention.—Yours, S. Mason." "Spring Bank, Westbourne Road, West Kirby. Jan. 25th. Sir,—Received Roller in good condition. I am well pleased with it, and am instructing Editor to forward you deposit.—Yours, T. Lee." "Holme Bank, Whitewell Bottom, Waterfoot. Jan. 26th. Sir,—Received birds all right, and am well suited with them. I have instructed Editor to forward you amount deposited.—Yours, James Whittaker." "8, Primrose Hill, Skinningrove. Jan. 26th. Sir,—Received Roller, and am highly satisfied.—Yours, F. Jackson." "Queen Street, Hightown, Staffs. Jan. 28th. Sir,—Received Rollers all right, and am well satisfied. I have had a friend to see them, and he wants one the same, so please send on a St. Andreasberg Roller at 7s., and oblige.—Yours, John Fellows." The above are but a few taken from the heap received during last few days, but I shall be pleased to show piles upon piles to anyone at any time. All are sent on full week's approval (entirely at my own risk during the whole time), either on receipt of cash or CAGE BIRDS deposit system, and money fully and freely refunded if full satisfaction is not given and your every expectation not realised. These Leipzig Rollers are actually winners of innumerable contests both in England and Germany, and I ask all intending purchasers to have one on a week's trial and test it side by side with any other higher-priced Roller on the market, and I shall be perfectly satisfied with result. My birds are being continually tested in this manner, and I am frequently being informed that my 10s. Bandmasters have beaten contest singers costing 20s., 30s., and even 40s. each. The leading breeders, dealers, and connoisseurs all patronise me, so if I can please them why cannot I please you? Wholesale prices on application. Please note new address. My business has grown so enormously that I have been compelled to take much larger premises, but only 50 yards from old address.

W. GORE, Direct Importer, 131, Gooch Street, Birmingham.

ALLOW ME, PLEASE,

to send you my illustrated Price List, which will only cost you a post-card. I offer all my Canaries carriage paid on seven days' free trial at my risk, and claim to have the best collection in the British Isles. Inspection invited. My stock consists of high-class British bred Rollers, bred from and related to the best of contest singers and winners. Cocks, in full song, 15s. 6d., 17s. 6d., 20s., 25s., 30s. A few extra special at 40s., 50s., and 60s. Hens to match same, 4s. 6d., 5s. 6d., 6s. 6d. each. Genuine trained St. Andreasberg Rollers, with full change of song by day and artificial light (no common German rubbish these), 8s. 6d., 10s. 6d., 12s. 6d., 15s. Pure Roller hens, 3s., 3s. 6d. each. Hartz Mountain Roller cocks, in full song by day and gaslight, very loud free songsters, 5s. 0d., 6s., 6s. 6d., 7s. each. Matched pairs for breeding songsters, 8s. 6d., 9s. 6d. The quality of my birds speak for themselves. I have many thousands of testimonials open for inspection, of which the following are a sample:—"60, Cairo Street, Hendon. Jan. 26th, 1907. Received Roller December 20th, and now, after a month I must give honour where it is due. I consider it a wonder. It sings splendid. I am highly pleased with it. I compliment you on the quality of your stock if this Roller is a fair sample. It has been admired by several. Again thanking you, etc.—J. W. Nicholson to Miss Storey." "Stanley Bank, St. Helens. Jan. 26th, 1907. Received the two birds in very good condition. I am well pleased with them. The Roller is a perfect treat.—J. Richardson to Miss Storey." "23, Bridge Street, Lisburn. Jan. 25th, 1907. The Hartz Roller to hand last night in pink of condition, after being 48 hours on the way, and it started to sing immediately put into the cage. Please send trained Roller. If it is much better than the one I received it will be a marvel.—J. Courtney to Miss Storey." "6, Meldrum Road, Kirkcaldy. Jan. 26th, 1907. The bird you sent gives every satisfaction. I am assured your birds are the best value for money. I have been a fancier for 30 years, but I have never had such satisfaction from anyone as I have from you.—T. Whittaker to Miss Storey." "8, Victoria Road, Platt Bridge. Jan. 26th, 1907. Received Hartz Roller. It is a splendid day and gaslight songster. It started to sing as soon as unpacked.—T. Richardson to Miss Storey." "20, Lower Grove, Wandsworth. Jan. 25th, 1907. Roller arrived quite safe. It gives great satisfaction. It is a nice songster.—S. Champion to Miss Storey." "Grassmere, Aldershot. Jan. 26th, 1907. Received bird in excellent condition. Must say it gives entire satisfaction.—H. Harrington to Miss Storey." "Tramway, Pwll, Llanelly. Jan. 26th, 1907. Roller arrived in splendid condition. Is first-class day and night songster. I enclose you further order for birds.—W. Davies to Miss Storey." "29, Clifford Road, West Stanley. Jan. 26th, 1907. Received Hartz in splendid condition. Started singing within ten minutes of arrival; indeed, it is the best and loudest songster I have ever heard. Just what I wanted. Thanking you for the prompt and honest manner of conducting business. Wishing you every success.—W. Roe to Miss Storey." If you want further proof allow me to send you the birds you require, carriage paid on seven days' approval at my risk. Illustrated list free.—Miss E. L. Storey, Crowle, Doncaster.

HOME-BRED AND IMPORTED HARTZ ROLLERS

which are

Reliable

for note. I do not profess to sell Imported Seifert Strain Cocks at 10/6, and for a very good reason—others may profess what they like.

IMPORTED—Trained Cocks, 8/6, 10/6. 12/6. 15/-, 20/- and upwards; Hens, same strain, 3/6 and 5/- each, pairs, 10/6, 15/-, 20/- All on seven days' approval, cash or deposit.

HARTZ SINGING, NOT TRAINED, COCKS, 5/6 each. Extra selected, with better notes, 6/6; Pairs, 8/6.

Home-bred (guaranteed) Trained Trute and Seifert Cocks 10 6, 12/6, 15/-; Hens, guaranteed same strains, strong, healthy, and in the best of breeding condition, 4/6, 5/- each. These have been purchased direct from the breeder and trainer, and can be recommended. Remember it is no use breeding from good Cocks if you want good results from common Hens.

Untrained—Strains unknown, Cocks 5/6, 6/6, 7/6; Hens, 3/6.

Full printed Instructions, how to keep in health and song, sent with every bird as for the past 30 years. Beware of copyists and their "catch" methods.

If you want to know about these beautiful and interesting songsters, send for my book
'Profitable Canary Breeding as Practised in Germany'
By Albert Rettich, Esq., author, breeder, and judge of the leading singing contests. Price 9d., or in larger type and gilt cover, 1/3; to be obtained from the publisher and sole owner of copyright, W. Rudd, or from the office of "Cage Birds."

W. RUDD, The Bird Specialist, **NORWICH**

SEIFERT AND TRUTE'S

Genuine Rollers are ready; these are all bred in England; fanciers who want to improve their stock should have them; week's approval; 12s. 6d. to £3; hens, cold room kept, 6s.—Corkindale, breeder-trainer, Studley, Warwickshire, England.

14 Days' Free Trial

Allowed on all our Roller Canaries, and we offer you real masterpieces, and certain contest winners at 15s. each, and understand it is impossible for anyone to sell a better or more classical songster even if you pay any kind of fancy price ranging up to 50s. for it. So do not be misled by bluff or bounce, or large displayed advertisements. Send your money to the Editor of CAGE BIRDS, and don't let go your hold on it till you are satisfied. And remember we allow you 14 days' free trial at our risk. No other dealer will do this. Deposit your 15s. at once, and let us send you one of the purest St. Andreasberg Rollers ever imported. We give full instructions with every one, and a recipe worth £5 to any Roller fancier how to keep them in full and perfect song. German Hartz cocks, in full song, like those advertised by others as St. Andreasberg Rollers, our prices 5s. 6d. and 6s. 6d. each. These are called best imported by some dealers. Bow fronted box cages, splendid for singing Rollers, 1s. 9d. each, complete. Always deposit your money, no matter who you deal with. Current price list post free. Anything alive bought, sold, or exchanged.

Northern Aviaries, Preston.

ST. ANDREASBERG AND HARTZ MOUNTAIN ROLLERS.

JUST ARRIVED. Consignment of these wonderful songsters. 3,000 sold last season.

Real St. Andreasberg Rollers, guaranteed pure notes, including Nightingale, Woodlark, Titlark and Water-bubble runs, perfect, price 6/6 7/6 each. School-masters, 3/6, 10/6 each; hens, 2/6. Hartz Mountain Rollers, perfect music boxes, sing day and night, 6/-, two 11/6, seven 38/-. Hens to match 2/- each.

Mr. J. PATTERSON, Cork, Ireland.—"Sir, I think it only right you should know that Roller you sent me won the All Ireland Roller Singing Contest, held here last November. He was a Champion."

This is only one. Send stamp for Catalogue of others and I will send you some real ones just as they have landed. They are coming every post. I guarantee or will wager my 10/6 Rollers are the best that ever comes in England, so why pay such enormous prices. Don't be gulled, send to a reliable firm. 25 years this address. Patronised by all the leading Judges, including Judges Boxson, Payne, Battyc, Barnes, Irons, Roe, Vardy, Robson, etc., etc. Grand Box Cages, 1/10. Estd. 1879

J. SANDIFORD, BIRD SPECIALIST, **PRESTON, LANCS.**

AMBLER'S classical Yorkshires, winners in keenest competition. Having selected our breeding stock, we have for sale the choicest stock of Yorkshires in the Fancy, long typical cocks, full of style, and a magnificent collection of yellow and buff hens, correct type and feathered like silk. Our strain has been noted for over 20 years for breeding the biggest champions on the show bench; three 1sts, two 2nds, Manchester, 1906. This is a chance seldom met with to secure such classical birds at such reasonable prices; approval; satisfaction guaranteed; stamp particulars; ten pairs, matched to breed winners, 15s. pair.—17, Lytton Road, Bradford.

SAMUEL DEAN, 24, Crossley Street, Gt. Horton, Bradford, Breeder and Exhibitor of high-class Yorkshire Canaries, including Greens x259

COWGILL'S YORKSHIRES.

Birds that I have sold have won over 40 1st prizes this season in the keenest of competition, which is proof of their quality. I have still some good ones for sale, for show, or stock; matched pairs from 15s. to 50s., cocks from 8s., hens from 7s.; approval; cash or deposit; stamp reply.—115, Washington Street, Girlington, Bradford.

IF YOU ARE

Requiring Yorksbires, you should try me, for satisfaction, both in price and quality; typical stock birds, all colours, finest blood procurable; cocks 6s. and 8s. 6d. upwards; hens 4s. 6d., 6s. 6d. upwards; properly matched pairs, 10s. 6d., 15s., upwards; all related to winners; week's approval.—Kemp, 270, Girlington Road, Bradford.

LAWRENCE LANE

has some champion stock birds to part with, including dark and Cinnamon ticked and clear pink-eyed, related to my winners at Burnley, Rochdale, Ormskirk, Wigan, etc.; hens from 6s. to 10s., cocks 10s. to 20s. each; approval; satisfaction guaranteed or money returned in full.—16, Fountain Street, Barnoldswick, Yorkshire. x265

YORKSHIRE AND NORWICH PLAINHEADS.

Yorkshire and Norwich Plainhead. Special Notice.—Have some splendid stock birds for disposal, all colours, colour fed or natural; cocks from 5s. 6d.; hens from 3s. 6d.; special matched pairs, 8s. 6d., 10s. 6d., 12s. 6d., 15s., 20s. per pair. No better value offered. Clean and healthy. Satisfaction guaranteed. Testimonials arrive daily. Seven-day approval. Note address. — Spence, Breeder, Mount Pleasant, Norristhorpe, Liversedge, Yorks.

IF NOT, WHY NOT

Send me your orders? If you require Yorkshire Canaries of the correct type, at reasonable prices, allow me to send you the birds you require, carriage paid, on seven days' approval. I have over one thousand birds to select from, including many winners and matched pairs for breeding winners. Light-feathered upstanding Yorkshire cocks, in full song, 6s. 6d., 7s. 6d., 8s. 6d., 10s. 6d., 12s. 6d., 15s. each. Racy Yorkshire hens, 3s. 6d., 4s. 6d., 5s. 6d., 6s. 6d., 7s. 6d., 8s. 6d., 10s. 6d. each. Properly matched pairs, 8s. 6d., 10s. 6d., 12s. 6d., 15s., 17s. 6d., 20s. per pair. A few winners at reasonable prices. Send me an order; it will convince you and your friends that I give the best value money can buy. All my customers receive satisfaction. "Frebly Street, Edinburgh, February 2nd, 1907. I received the pair of Yorkshires safely, and I must confess that they are by far the best pair of birds I have ever seen at the price; in fact, I paid double the price to another dealer, and did not get such good birds.—E. Gardener to Miss Storey. "423, Ley Street, Ilford, February 3rd, 1907. Received birds, and am very pleased with them. I was much surprised at their good condition after so long a journey.—H. Briscoe, to Miss Storey." "141, Pennant Street, Ebbw Vale, February 2nd, 1907. Birds to hand. I am very pleased with them, and thank you for your prompt attention.—W. Bethell, to Miss Storey." "Hawthorns, Brighouse, February 3rd, 1907. Received birds yesterday. They look well and healthy, in trim feather, and very neat. Many thanks for same.—J. Cheetham, to Miss Storey." "138, Babell, Swansea. Received bird in grand trim, and am thoroughly satisfied. Many friends have seen him, and have decided to send you their orders.—J. Thomas, to Miss Storey." "Canal Bank, Bony Bridge, February 2nd, 1907. Please send me the following. . . . . I have seen the two hens you sent my friend, and he owns he could not get the like anywhere else for the money he paid.—J. Logan, to Miss Storey." "114, Neath Road, Plasmerc. I am pleased to say the hen arrived safe, and gave every satisfaction.—R. Beth, to Miss Storey." I have hundreds of thousands of similar letters open for inspection. Remember I send birds, carriage paid, on seven days' approval, at my risk. New illustrated list free.—Miss E. L. Storey, Crowle, Doncaster.

J. BREWERTON
Has again a grand lot of high-class Yorkshires in Sheffield Market every Saturday.—Norton, Hammer Woodscats, Sheffield.

SATISFACTION GUARANTEED.
Yorkshires, grand long slim upstanding birds, full of quality, bred from birds that have won all over, no fancy price, pairs 12s. 6d., 15s.; cocks, 10s., 7s. 6d.; hens, 5s. 6d., 6s. 6d.; approval.—J. Sheard, Sackville Street, Ravensthorpe, Yorkshire.

CUTHBERTSON'S YORKSHIRES
still to the front, winner of over 100 prizes and cups, including the Taylor cup for third year in succession; grand stock birds and winners for sale cheap; approval; stamp, reply.—Cuthbertson, Manor House, Hughington, via Darlington.

WHY HESITATE
who to send to when I guarantee the fullest satisfaction with every bird I sell? I have some clinking colour-fed Yorkshires, matched to breed winners, 10s. 6d., 12s. 6d., 15s. pair; state wants; all on approval; cash or deposit.—F. Lockton, Castlegate, Grantham.

YORKSHIRES
to suit all, immense stock; cocks, 5s. 6d., 6s. 6d., 7s. 6d., 8s. 6d., 10s. 6d., 15s., 20s., 30s.; hens, 3s. 6d., 4s. 6d., 5s. 6d., 7s. 6d., 10s. 6d., 15s.; pairs matched for breeding, 8s. 6d., 9s. 6d., 10s. 6d., 12s. 6d., 15s., 20s.; travelling cages 3d. extra; all on approval; guaranteed the best value ever offered in Yorkshires.
W. RUDD, The Bird Specialist, Norwich.

Shackleton's Yorkshires
Still lead the way. See reports of all principal shows. Some splendid birds for either show or stock; prices reasonable.—Stamp and address for particulars, The Paragon, Girlington, Bradford, Yorks.

HIRST'S YORKSHIRES
win at all big shows. See reports. Twenty-five cocks for sale, guaranteed my own breeding, 10s. to 40s. each; clears, Cinnamon marks, few good pairs and show birds; approval; inspection invited.—23, Charter Street, Accrington.

Hudson's Champion Yorkshires.
Have a few pairs to part with, same strain as before, matched to breed winners, at 8s. 6d., 10s. 6d., 12s. 6d., 15s.; hens, 4s., 5s. 6d., 6s. 6d.; cocks at 6s. 6d., 8s. 6d., 10s. 6d.; on approval. I desire no man's money that does not get value for money; approval; stamp reply.—Hudson, Confectioner, Thackley, Bradford. x265

SUTCLIFFE & SON.
Cinnamon marked Yorkshires still lead the way. Having won the cinnamon-marked competition for the present season, we have some grand birds for sale; matched pairs from 20s. to 40s. a pair; state wants; can be seen on receipt of a post card; three days' approval; stamp for reply.—1, Back Kitson, Windhill, Shipley, Yorkshire.

CHAMPION YORKSHIRES.
SPECIAL Notice.—Write or call at any time and see my splendid lot of long, slim, straight, upstanding Yorkshires; every bird in the primest condition, with plumage like silk; every cock warranted singing; all cold room bred and kept. I have them in all colours except Greens, and all on seven days' approval; cash or deposit; Yellow Cocks, orange-yellow, 8s. 6d., 9s. 6d., 10s. 6d.; Buffs, cocks, 7s. 6d., 8s. 6d., 10s. 6d.; Orange-Yellow hens, 4s. 6d., 5s., 5s. 6d.; Buff hens, 3s. 6d., 4s., 4s. 6d.; inspection invited.—Shaw, 97, Essex Road, Islington, London, N.

YORKSHIRES

3 FIRSTS, 4 SECONDS and 6 THIRDS.
This testimonial should prove at once the quality and fair dealings you will receive if you place a trial order with me. From "11, Ashwell Street, Leighton Buzzard, Feb. 2nd 1907.—Just a few lines to inform you that the Yorkshire Cock you sent me has won 3 Firsts, 4 Seconds, and 6 Third Prizes, in good competition. Thanking you for your honest dealings, F. Collyer to J. Taylor, Frizinghall, Bradford." Fine, long, thin, racy, yellow Yorkshire Cocks, 6/6, 7/6, 8/6, 10/6, 12/6, 15/- each. Some slashing Buff Cocks, full of quality, at 5/6, 6/6, 7/6, 8/6, 10/6, 12/6 each. All on full song and standard length (some over). Grand matched pairs for breeding winners at 8/6, 10/6, 12/6, 15/-, 20/-, 25/- per pair. Clears, Ticked, Green Marked, Cinnamon Marked and Clear Pink Eyed. Champion lengthy Yellow Hens at 4/-, 5/-, 6/-, 7/-, 8/6 each. Buff Hens at 3/-, 4/-, 5/-, 6/-, 7/6 each. All in the best of health and feathered like glass. Cold-room bred and kept. Inspection invited at any time. Best and largest stock in Bradford. Seven days approval at my risk.

CRESTS & NORWICH.
If you want Crests or Crestbreds with plenty of head feather, size, and proper shape, you cannot do better than give me a trial. They are "Joyce's," "Barnett's," etc., strains. Large Crestbred Cocks, well brawed, and head feather to beak end, at 8/6, 10/6, 12/6, 15/-, 20/- each. Crested Cocks, 8/6, 10/6, 12/6, 15/-, 20/- each, with large well centred crests on. Grand accurately matched pairs for breeding, at 12/6, 15/-, 18/-, 20/-, 25/-, 30/- per pair. Large Crested Hens, 7/-, 8/6, 10/6, 12/6, 15/- each. Crestbred Hens at 6/6, 8/6, 10/6, 12/6, 15/- each. All cold-room bred and kept, and on 7 days approval at my risk. Also large Bullfinch type Buff Norwich Plainheads, Cocks at 6/-, 7/-, 8/6, 10/6, 12/6 each. Yellow Norwich Cocks at 7/6, 8/6, 10/6, 12/6, 15/- each. Properly matched pairs, to breed winners, at 8/6, 10/6, 12/6, 15/-, 20/- per pair. Some very large Buff Hens at 4/-, 5/-, 6/-, 7/6 each. Yellow Hens 5/-, 6/-, 7/- 8/- 10/- each. Clears, Ticked and Variegated. Seven days approval. Illustrated Price List post free.

EASY PAYMENT SYSTEM.
I can supply Yorkshires, Norwich and Crests, Cocks or Hens, on the Easy Payment System. Birds sent off at once on receiving first payment. Send stamp for full particulars and terms. State wants. All birds sent on 7 days approval at my risk. Only and original address.

J. TAYLOR,
9, Northdale Road, Frizinghall, BRADFORD.

THE CHAMPION WINNING STRAIN.
Winner of the Championship Diploma, Crystal Palace, 1906. Having about 60 pairs, we have decided to clear them out for a speedy clearance at 15s. to 20s. per pair, cocks standard length, hens feathered like box, also a few green cocks, 10s., 15s., 20s., no green hens, sure to give satisfaction; seven days' approval, P.O. or deposit; stamp reply.—Gill and Pickup, 1, Cragg Street, Great Horton, Bradford. x268

BENNETT'S
Champion Yorkshires, highest awards, ten guinea challenge and other cups, Palace, etc.; finest strain in the world; few properly-matched pairs cheap, same blood as those supplied by me to England's most successful exhibitors of Yorkshire Canaries; price list free.—59, Waverley Road, Great Horton, Bradford.

WILCOCK'S YORKSHIRES, NORWICH.
I can supply you with either Yorkshires or Norwich Plainheads, for either stock or the show bench, all bred from my winners at all the leading shows, no better blood in the fancy, pairs from 12s. 6d., 15s., 20s., 30s.; cocks or hens, from 7s. 6d., 10s. 6d., 15s., 20s. each; 3 days' approval.—14, Chapel Street, Eccleshill, Bradford, Yorkshire.

WINS CHAMPIONSHIPS.
I earnestly ask you for trial order to prove I give satisfaction. Sent on week's approval at my own risk; cash or deposit. Having finest stock in West England, and sold some most prominent on show bench, which wins championship and medals. This strain wins 200 prizes. Cocks, 5s. 6d., 6s. 6d., 7s. 6d., 8s. 6d., 10s. 6d., 12s. 6d., 15s., 20s.; clears or ticked hens, 3s., 3s. 6d., 4s. 6d., 5s. 6d., 6s. 6d., 7s. 6d., 10s. 6d., 12s. 6d.; pairs, matched, 8s. 6d., 10s. 6d., 12s. 6d. upwards; Sib-bred cocks and hens for light muling, same price.—C. Baker, Herbert Street, Bedminster.

CHAMPION YORKSHIRES.
Fine typical birds, ticked and clears, all clean moulted and colour fed; Buff Yorkshire cocks at 6s. and upwards; Yellow cocks 7s. 6d. upwards, all on song; hens, 4s. 6d., 5s. 6d.; pairs, 10s. 6d. upwards. —A. Smith, East Morton, nr. Bingley, Yorks. x263

Ogden Bros. Coruscating Yorkshires.
Winners of over 200 prizes, cups, medals, specials, etc., during 1906, at all the principal shows in England. Have about 100 surplus birds for disposal, splendid birds for either stock or exhibition purposes; matched pairs from 15s. 6d., approval, deposit or P.O., cold room, and every bird bred from or related to our winners, in grand condition. See CAGE BIRDS' ANNUAL or show reports for winnings. —Ashwood House, Dudley Hill, Bradford, Yorks.

Southend-on-Sea Aviaries.
Yorkshires, finest strain in the world, highest awards, see show reports, properly matched pairs to breed own winners, 15s. to 25s. per pair; odd cocks, 9s.; hens, 6s.; cash or deposit; three days' approval; stamp, reply.—A. E. Pattrick, 115, North Road, Southend-on-Sea, late Bradford House. x267

BE YE WISE

and send your orders for Canaries or British birds to Miss Storey, Bird Specialist, Crowle. You will thus be sure of receiving extraordinary good value for your money. I certainly have the finest stock of birds ever seen in an aviary at the lowest possible prices. Champion Yorkshires, all clean moulted, cold room bred and kept, feathers like wax, in the best of health and condition; typical cocks, in song, 6s., 6s. 6d., 7s. 6d., 8s. 6d., 10s. 6d. each; racy Yorkshire hens, 3s. 6d., 4s. 6d., 5s. 6d., 6s. 6d. each; properly matched breeding pairs, 8s., 9s., 10s. 6d., 12s. 6d., 15s. pair; large cobby high-class Norwich, in all colours, birds of the right type, cocks, 6s., 6s. 6d., 7s. 6d., 8s. 6d., 10s. 6d. each; Norwich hens 3s. 6d., 4s., 4s. 6d., 5s. 6d., 6s. 6d. each; matched breeding pairs, 8s. 9s., 10s. 6d., 12s. 6d., 15s. pair; send for my new illustrated price list of Canaries and British birds. Note what customers say:—
"19, Prospect Place, Neath, 3/1/07.—I am more than pleased with the pair of Norwich, and so are all my friends that have seen them. Please send me another Norwich cock."—J. Rees to Miss Storey. "1, Wottons, Pinhoe.—I am more than pleased with the bird you sent me. I consider you have treated me well."—C. Chamberlin to Miss Storey. I send all Canaries, carriage paid, on seven clear days' approval; send for my new illustrated list, post free. —Miss E. L. Storey, Crowle, Doncaster.

J. SANDIFORD, Bird Specialist, **PRESTON,** LANCS.

WHERE DO THE BIRDS COME FROM?

E. TAYLOR, BIRD SPECIALIST,
3 & 7, Thornton Road, BRADFORD,
can conscientiously assure all lovers of Birds, all dealers, and the Fancy generally, that, if this question is to be held as being confined to **GOOD** birds, the answer is, very decidedly, that they come from the above address! And, so far as the broad acres of good old Yorkshire are concerned, the Birds sold by **E. TAYLOR** do credit to that extensive county. Therefore, when you are on the market for all classes of Cage Birds, in addition to the finest selection of Cages, Aviaries, Bird-room Appliances, and all the relative and important Foods and Specialities, let **E. TAYLOR,** of Bradford, be the **first** man in whom you repose your confidence. You will promptly discover that this course of conduct will lead you straight to the high road of success, and guide you far away from the bye-paths of failure and disappointment. As a work of information, guidance, and reference my Illustrated Catalogue and Price List is simply invaluable to all parties interested. It contains level-headed **FACTS,** which will pay your perusal, and throws some splendid side-lights on Ornithological Study. **You can have** it sent you for two penny stamps to cover postage, or Bird Price List will be sent post free.

Yorkshire Cocks.
Clear Yellow, 6/-, 7/6, 8/6, 10/6, 12/6, 15/-, 20/-, 25/-. Clear Buff, 6/-, 7/6, 10/-, 12/6, 15/-, 17/6, 20/-. Ticked or Variegated, 5/6, 7/6, 10/-, 12/6, 15/-, 20/-. Cinnamon Ticked, 6/6, 7/6, 10/-, 12/6, 15/-, 20/.

E. TAYLOR,
Bird Specialist,
3 & 7, Thornton Road, BRADFORD.

BAILEY AND SWANGER'S YORKSHIRES,
Still leading. When we put down we win. See latest show reports, Scottish National, and Wimbledon, and other big shows. Having close on eighty pairs, we have decided to send them out for a speedy clearance at 15s. to 25s. per pair, cocks standard length, and hens feathered like box, sure to give satisfaction; three days' approval, cash or deposit; can be seen any day with pleasure.—24, Sandy Lane, Allerton, Bradford.

Mallinson's Cinnamon Marks
Are undoubtedly the finest stock in the world, our winnings numbering thousands of prizes, specials, and trophies, see reports of Halifax, Great Horton, Eccleshill, Huddersfield, Brighouse, Bradford West. Every bird exhibited by us is our own breeding, and not bought specimens. Circumstances prevent us from exhibiting any more this season, so we have a few first-class birds to dispose of, either for showing or stock purposes, all in good condition; stamp for reply.—D. Mallinson and Son, Victoria Street, Huddersfield.

CHAMPION YORKSHIRES.

Fine typical birds, standard length. Cocks, 6/6, 7/0, 8/6, 10/6, 12/6. Hens, 3/6, 4/6, 5/6, 7/0, upwards. Grand matched pairs at 9/6, 12/6, 15/- per pair. J. B. REES,
Glantaf Aviaries, Abercanaid, MERTHYR.

EVERYONE

desires to obtain the best possible value for their money whether the Birds are of the higher or lower priced order. This is but natural. Hence I respectfully invite all requiring CRESTS, CRESTED BREDS, YORKSHIRES, LIZARDS, CINNAMONS, BORDER FANCIES, PLAINHEADED NORWICH, SONGSTERS, HARTZ MOUNTAIN ROLLERS, MULES and MULING HENS to read my advertisements under these respective headings in this week's "Cage Birds," or send for full extended Price List, post free upon receipt of address.

All Birds on approval, cash, or deposit.

For pure LANCASHIRES, HIGH-SHOULDERED BELGIANS, SCOTCH FANCIES, DUTCH FRILLS send for before-named List.

For Easiest of Easy Payments

see particulars of my

ORIGINAL BIRD CLUB.

Distance no object, no double prices, and no "catches" in it; simply a straightforward business method.

A few more facts that should prove convincing as to value given:—

48, Newton Road, Burton-on-Trent. January 27th, 1907.—The Hartz Roller arrived safe, and he is a very nice bird. Has been singing this afternoon. Nothing could be better for these kind of birds than the cage you sent. It is so warm and cosy. I am perfectly satisfied with both. I must not forget to thank you for careful packing and prompt attention. I received bird and cage in less than 40 hours from the time I sent order.—W. Chamberlain to W. Rudd.

35, Ham Pard Road, Stratford. February 1st, 1907. Birds arrived quite safe. Am pleased with same.—H. Sedger to W. Rudd.

Coastguard Station, Baltimore, Co. Cork. January 25th, 1907.—Birds arrived safe. I am very well pleased with them. I must say I am entirely satisfied with them.—E. G. Southwood to W. Rudd.

4, Highland View, Skewen, near Neath. February 2nd, 1907.—Birds arrived safe and well, tip-top condition, after long journey through the hardest of cold weather. Well pleased with them. Thanks for such good birds.—J. Dawes to W. Rudd.

The Hague, Holland. January, 1907.—Received bird in good condition. Am very pleased with him. —C. Junod to W. Rudd.

Could Not be Beaten at the Price.

2, Victoria Square, North Place, Guildford. January 29th, 1907.—Yorkshire cock arrived quite safe. I am quite satisfied with him. He started singing soon after being unpacked. I don't think he could be beaten at the price.—T. Holden to W. Rudd.

Still Giving Satisfaction after Three Years.

16, Church Grove, Ladywell, Lewisham. January 29th, 1907.—Please send two bottles of Asthmarine. I am pleased to say the Canary is still all right, and giving complete satisfaction, since we had him three years ago.—J. C. Keiland to W. Rudd.

77, Benson Avenue, East Ham, Essex. February 1st, 1907.—Received the birds safe, and am very pleased with them. The Roller cock started singing as soon as he was put in his cage, also the Yorkshiro cocks are singing beautifully. I shall recommend you to my friends, as I am sure had I been in your aviaries I could not have picked out better birds. Thanking you for prompt attention.—C. J. Page to W. Rudd.

Good Value for Money.

London, February 1st, 1907.—Birds arrived quite safe, and give every satisfaction. They are excellent birds, and good value for money.—G. Skelton to W. Rudd.

More than Pleased.

4, George Street, Godalming. February 1st, 1907. —The birds arrived quite safe, and I am more than pleased with them. They are fine birds at the price.—W. C. Hayward to W. Rudd.

NOTE.—All Amateurs should try my Special Matched Pairs of Prize-bred Norwich Plainheads at 10/6, 12/6, 15/-, and 20/-. Crested ditto, 15/-, 20/-, 25/- and 30/-. Yorkshires, 12/6, 15/-, 20/-. These are the *Best Value* ever offered.

Travelling Cages, 3d. extra.

Is "Asthmarine"

all that has been claimed for it? Let the following answer:—

Hillside, Balcombe Road, Haywards Heath. February 2nd, 1907.—Please send one bottle of Asthmarine. I have always found it work wonders with my birds, but have just run out of it.—W. Eagle-Bott to W. Rudd.

Ettrick Grove, Sunderland. January 30th, 1907.—A friend of mine gave me some of your Asthmarine for birds, and as it did our Canary a great deal of good, will you please forward two bottles?—G. J. Milburn to W. Rudd.

St. Conans Terrace, Kirkcowan. January 2nd, 1907. Please forward me three bottles of Asthmarine. I have found it a wonderful medicine. It has completely cured two of my birds that had never sung a note for months.—J. Welsh to W. Rudd.

This remedy has the largest sale of any similar article by far. Beware of Imitations! For all lung affections it is marvellously efficacious—not a liver burner, but both soothing and healing. 9d. and 2s. 6d. per bottle, post free. Once used, always kept ready for any sudden attack.

"EGGERTINE."

It is the best, purest, and greatest bone and muscle forming food ever known, as the analytical reports of most eminent authorities prove. It will bring hens into sound and robust condition for breeding as nothing else will. This during the past twenty years has been proved by thousands. It is a genuine egg food made with fresh laid English eggs, with white, of course, included (and NOT foreign preserved yolk of egg) with other valuable properties combined. Tins, post free, **1s. 3d.**; large size, **2s. 6d.** There is a saving in the larger size.

Woodbine Cottages, New Street, Dordon. January 28th, 1907. I received pair of birds all right. I may say the Eggertine I had is a good food. I had a Canary that had sat for days muffled up in one corner of his cage, and I gave it some Eggertine, and judge of my surprise the next day to hear him singing again.—J. E. Mousley to W. Rudd.

P.S.—"CAGE BIRDS" PICTURE POST CARDS supplied by me and can be strongly recommended as Works of Art.

W. RUDD,

Practical Bird Specialist,

NORWICH,

ENGLAND.

KNIGHT'S YORKSHIRE AVIARIES.

FOREIGN BIRDS—continued

AFRICAN GREY PARROTS.

If you are intending to purchase an African Grey Parrot, I shall be pleased to hear from you. I guarantee to give you satisfaction. I only deal in Parrots of the very best quality. I have for sale this week the following birds. These are all in the pink of condition, chattering and whistling. 5 African Greys, 25/- each, £5 the lot. 2 African Greys, 30/- each. 1 Finch Amazon Parrot, saying 30 to 50 words, sings tunes, etc., 50/-. 5 Rose Cockatoos, 8/6 each, £2 the lot. Talking African Greys, saying 100 words and sentences, from £4 upwards. Postal Orders should be made payable at Park Place, Liverpool. All birds sent on approval.

ADAMS, Park Place, LIVERPOOL.

BOOKLET FREE.

FINEST Talking Parrots. I only deal in Parrots that will make first-class talkers; no rubbish. I am willing at all times to send my Parrots on four weeks' trial and three months' talking guarantee. Why? Because all my Parrots are young, strong, and reliable. My lifetime has been spent among grey Parrots, both at home and abroad. I guarantee every customer every satisfaction. Grey Parrots are my special fancy. I have trained them, know their wants, and can give every purchaser a bird that will please him in every way. I can supply grey talkers, not thinkers, that will say almost anything, at reasonable prices. Before you purchase a grey or green Parrot, send for my Booklet, entitled "Talking Parrots." All my birds are sent on four weeks' trial, at my risk. Send postcard for catalogue.—Mrs. Forster, Princes Park Aviaries, Violet Street, Liverpool.

AVIARY BUDGERIGARS BRED.

I have the finest selection of Budgerigars in London, not puny French stuff too weak to fly, much less breed. The real 10-inch sort anxious to nest. Green Cocks, 2/6; Hens, 3/-; Pairs, 5/-; Yellow Cocks, 5/-; Hens, 6/-; Pairs, 10/-. Every bird guaranteed perfect.

PEARSON, Budgerigar Specialist, **GREENWICH.**

A BOON TO FANCIERS.

Hundreds of bird-keepers—nay, many thousands—have known the troubles and disasters which follow the visitation of mice and rats to their bird-rooms and aviaries, and have experienced the worries of trying to banish the persistent little pests. The damage mice and rats can do the fancier and his stock can hardly be painted in too strong terms. They will taint his seed and foods so that they become highly injurious and obnoxious to his birds, frrghten the latter by scampering about the cages and aviaries so that serious bodily injury results, and even kill and devour them in most wanton and grievous manner. In short, the fancier who knowingly harbours rats and mice about his premises runs risks of the gravest nature. Until quite recently, however, the difficulties attending their extermination were of a heart-breaking character, traps being next to worthless and the use of poison open to many objections, so that many fanciers have been reduced to the necessity of getting rid of their pets. To-day bird-keepers have every cause for self-congratulation. Science has come to their aid, and the difficulty of totally exterminating either rats or mice, or both, no longer exists. The "Liverpool" Virus, prepared by the Incorporated Liverpool Institute of Comparative Pathology (Serum Department), compasses the entire destruction of rats, mice, field-mice, etc. The "Liverpool" Virus is a living culture grown on the surface of nutrient jelly, and is quite harmless to man or to domestic animals, such as horses, cattle, sheep, goats, dogs, cats, game, birds, etc., but when given mixed with food to mice and rats it produces in them a disease which is fatal in from 7 to 14 or more days, and which spreads from animal to animal. The virus may be used for the destruction of rats and mice in fields and cultivated areas, also about farm buildings and warehouses and in private houses and other buildings. The virus is supplied as it is grown on the surface of jelly in tubes plugged with paraffin wax and cotton wool. The tubes are of three sizes, viz., for rats 2s. 6d. and 8s. (the latter contains six times the amount of virus); for mice 1s. 6d. The jelly itself is valueless, and when the virus has been removed may be destroyed or mixed with the bait. The directions for use are very clearly stated, and are quite simple in character. Briefly put, the virus is disseminated amongst a solution of salt water, when cubes of dry bread are steeped in it, and laid down in suitable places for the rats and mice to eat, which they do very readily. Experiments have shown that, as these vermin live in colonies, it is best to apply two or three dressings, as it is possible some of the colonies may not be reached by the first dressing, though they will most probably receive the contagion. It behoves all fanciers to use "Liverpool" virus where necessary; they will be money in pocket by doing so, to say nothing of the satisfaction arising from the fact that they are well rid of a dangerous nuisance. All chemists will supply the "Liverpool" virus.

Canary Plague.

The INDIAN SHAMAH as seen By H. GOODCHILD.

WIMBLEDON AND DIS. F.A.

General meeting February 4th, at headquarters, 6, The Broadway, Wimbledon. The following officers were elected:—Mr. Piper (president), Messrs. Broome and Warley (vice-presideuts), Mr. Stoakley was again elected chairman, and Mr. Colman, hon. sec. and treasurer. The old committee again were elected with one alteration, Mr. Carsons taking the vacant place of Mr. Broome. After the general business and election of officers, Mr. Stoakley, on behalf of members, presented Mr. Colman with a very pretty plated tea service as a token of their esteem and appreciation of his work during the past year. Mr. Colman very cordially thanked the members for their kindness. A judging competition took place later amongst members.

A pair show was held at headquarters on February 4th, when twenty-eight fine pairs of Norwich and Yorkshires were staged. Mr. Peverall judged.

NOR. (9): 1, 2, 3, vhc, J. Wheeler, all good matched pairs of first-rate quality, we look forward to some good results from these; hc, Barkshin; c, Day. YORKS. (19): 1, 2, hc, J. Wheeler, all grand stock birds of perfect quality, well drawn up; 3, vhc, R. P. Broome, first-class Yorkies, good carriage, well matched; c, Warley.

BURY AND DIS. C.B.S.

The members of the Bury and District Cage Bird Society held their first social gathering at the Textile Hall, on Jan. 15th, and it proved a very successful affair. About sixty persons, including ladies, sat down to tea, and afterwards a pleasant evening was spent in music, etc. Mr. J. R. Greenwood, Chairman, expressed his pleasure at seeing so many ladies present, and said he hoped they would come forward prior to the November show and assist the society, as in addition to a drawing competition they intended to have something in which girls could take part. The programme included songs by Mr. A. Howarth, Mr. J. Pollitt, Miss Whittaker, and Miss Derby; a quartette by Misses Derby and B. Holden and Messrs. Pollitt and Howarth; humorous songs by Mr. T. Greenwood; selections on musical glasses by Mr. R. Nuttall; and selections on a gramophone lent by Mr. G. Lord. Mr. J. W. Clemishaw was the accompanist. The efforts of the various artistes were much appreciated. The society is in a flourishing condition. The President is the Rev. R. P. Hudson; Mr. J. R. Greenwood is the Chairman; Mr. T. E. Wolstenholme the Vice-chairman; Mr. W. P. Turton, Secretary and Treasurer; and Mr. F. E. Holden Assistant Secretary. It is intended to hold the first feather show on July 13th, and the annual autumn show on November 9th.—W. P. Turton, Sec.

Y.C.C. OF IRELAND.

Committee meeting held Dublin, Feb. 1st. It was agreed to hold the general annual meeting on March 11th and 18th, election of officers to take place on March 11th and other business on 18th. It was also agreed to hold fourth annual show on November 28th and 29th next. Messrs. Eno and Lambert were elected to audit the treasurer's account, and, as there was no other business of importance, the meeting adjourned to 7th inst.—W. C. Sholedice, Hon. Sec.

KILSYTH F.A.

President Hardie occupied the chair at the monthly meeting on February 2nd. The final report on the show was that, after meeting all claims, a small balance remained to the credit of the Association. On behalf of the members the chairman handed over several sovereigns to the hon. secretary, Mr. Duncan, in recognition of his services to the Association. The question of the 1907 Show was deferred for a month.—A. D. Duncan, Hon. Sec.

YORK C.B.S.

Annual meeting, All Saints' School Room, North Street, York, Jan. 14th and 17th, one of the best attended we have had. Chairman, Wm. Richardson, presented the balance sheet, which was passed, showing a satisfactory balance of £14 18s. 5d., a most successful years' work. Election of officers resulted as follows: President, Rev. P. J. Shaw; Chairman, Wm. A. Richardson; Treasurer, Wm. Cardwell; Asst. Sec., Mr. A. Waud. Committee: Messrs. Shorney, Hunter, Wright, Humphries, Camp bing, White, Chittenden, Sen., Sissons, Chittenden, Jun.; these were elected after a spirited competition. A hearty vote of thanks was passed to the retiring officers.—T. Boyle, Hon. Sec.

THE **BIRD WORLD MAGAZINE**

For FEBRUARY

Is now out and makes the Third Number of what promises to be the greatest treat that the genuine lover of birds has ever had provided for him. Handsome cover in two colours. Exquisite frontispiece. Many interesting articles lavishly illustrated.

Contents of No. III.

FRONTISPIECE IN COLOURS. "The Kingfisher," by Miss M. L. Medland. (Mr. C. P. Arthur Melk-ham) says:—"The best plate of Kingfisher I have ever seen.")

CHIRPS & CHATTER. OUR LETTER BOX.

PLATES and PICTURES. The Kentish Plover, Young Great Tit, Even-marked Yorkshire Canary, Common Singing Canary, Reed Bunting in winter plumage, Frigate Bird, White Penguin, Secretary Bird killing a Snake, Representative Vultures, Some Famous Racing Pigeons, The Dipper or Water Ouzel, Blue Sugar Birds, Juvenile Efforts at Drawing Canaries, Australian Night Heron, Hey Diddle Diddle or the Dabchick and the Pelican.

ARTICLES. The Dipper, by S. A. Sandy, Canary Management, by Wm. Fairlie, A History of Birds, by W. P. Pycraft, A.L.S., F.Z.S. The Worshipful Company of Scavengers, by Frank Finn, B.A., F.Z.S. The Racing Pigeon, By H. Kendrick, Jun., Sugar Birds, by Miss Dydegu Hamilton, The Woodcock, by John Flewelling, Little Bird Friends, by Miss H. B. Rutt.

Altogether a charming and agreeably instructive publication indispensable to bird keepers.

Subscription, 3/6 per ann. (post free.)

CITY OF BRADFORD O.S.

A well-attended and instructive evening was passed last Saturday at club headquarters, about 50 members and visitors being present to witness a washing exhibition by Mr. James Hartley. Visitors from Yeadon, Queensbury, Wibsey, and Halifax attended to see his method. He put four birds through, and then two novices tried their hands, Mr. Hartley showing them how to handle the birds; both said they would in future have more confidence. The articles used were: pure curd soap, badger lather brush, three basins of water, and drying cloths, white bleached cotton, which he informed us were washed and ironed every time they had been used. At the finish a unanimous vote of thanks was tendered to Mr. Hartley for his very practical demonstration, and to Mr. Pollitt for providing the patients.—E. Stansfield, Sec.

JUDGES OF CAGE BIRDS.

The attention of Show Secretaries is directed to the following list of gentlemen willing to act as Judges. Terms for insertion on application.

A. AMBLER, 17, Lytton Road, Bradford. Judge of Canaries and Cage Birds. Life experience. 11 years reporter to the Fancy Press.

H. W. AXE, 55, Market Place, Doncaster. Judge of Canaries and other Cage Birds. Practical experience (Norwich and British speciality).

W. O BARLOW, The Aviaries, Malpas, Cheshire. Judge of Canaries, British Birds and Mules. Terms moderate

J. C. BARNES, 149, Duncombe Street, Walkley, Sheffield. Judge of Canaries and Cage Birds. Long practical experience. Terms moderate.

W. P. BARNES, Judge of Canaries and Cage Birds. Life practical experience. Breeder and exhibitor. Reporter for Fancy Press. Commercial Road, Grantham.

GEO. BENNETT, 46, Wenlock Street, Luton, Beds. Judge of Canaries and Cage Birds. Thirty years' experience. Terms moderate.

W. A. COWGILL, 115, Washington Street, Girlington, Bradford. Judge of Canaries and Cage Birds. Over twenty years' experience. Terms moderate.

A. C. DAVIS, Judge of all Classes of Cage Birds. Long practical experience. Terms moderate. 110, Tib Street, Manchester.

T. DIXON, Pioneer Terrace, Bedlington Station, Northumberland. Judge of Canaries and Cage Birds Life experience.

J. DOBSON, 14, East Road, London, N. Judge of Canaries and Cage Birds.

J. W. DRIVER, (Adnitt & Driver), Gladstone Street, South Normanton, Alfreton. Judge of Cage Birds.

GEO. GARDNER, 11, Haverstock Road, London, N.W. Judge of all kinds of Cage Birds.

C. A. HOUSE, 82, Upper Walthamstow Road, Walthamstow Judge of Canaries, Mules, British and Foreign Birds.

W H. LINDLEY, 4, Summer Lane, Wombwell, near Barnsley. Judge of Canaries and Cage Birds only.

F. MARWOOD, 1, Barnard Street, Thornaby-on-Tees. Mules, British and Foreign, a Speciality. 17 years exhibitor. Terms moderate.

W. R. MILES, The Aviaries, Chichester. Judge of Canaries and Cage Birds. Life experience.

W. MUNDELL, 6, Carlisle Place, Bradford. Judge of Canaries and Cage Birds.

J. NORTH, 435, Oxford Road, Reading. Canaries, British and Foreign Birds. Author of "The Common Sense of Canary Rearing."

J. PATTERSON, Chirnside. Judge of Cage Birds. All varieties. Wide practical experience. Specialist Border Fancy Judge.

J. H. PAYNE, 17, Northgate Street, Gloucester. Judge of Canaries, British and Foreign Cage Birds.

PARKER ROBINSON, N.B.B. & M. Club, 1, Back Hartington Street South, Barrow-in-Furness. Cage Birds, all Varieties.

J. H. ROE, 167, Clarence Rd., Derby. Judge of Canaries and Cage Birds. Twenty years' practical experience.

WILLIAM J. ROSS, 19, Haugh Road, Inverness, N.B. Judge of Pigeons, Canaries and Cage Birds. All varieties. Life experience.

A. E. SILK, The Aviaries, Whitstable. Judge of Canaries and Cage Birds. Practical experience. Terms moderate.

C. E. SILK, The Aviaries, Emsworth, Hants. Judge of Canaries and all Cage Birds. Life experience.

HENRY TAMS, Orchard Place, Longton, Staffs. Judge of Canaries, British and Foreign Birds. Twenty-five years Breeder and Exhibitor.

R. B. TOPE, Hoe Street, Plymouth. Judge of Cage Birds, Rabbits, Cats, and Cavies. Twenty-five years' experience.

J. WILCOCK, 14, Chapel Street, Eccleshill, near Bradford, Yorkshire. Judge of Canaries and Cage Birds. 25 years Breeder and Exhibitor leading shows.

J. C. WILMOT, 17, Sandhurst Road, Bedford. Judge of Canaries & British Birds. Thirty years' experience.

J. H. WINN (of Winn & Hinde), Freehold Aviaries, Lancaster. Judge of Canaries and Cage Birds.

H. WRIGHT (WRIGHT & SON), 84, Heath Road, Norwich. Judge of Cage Birds. Life experience.

SHOW ADVERTISEMENTS.

Scale of Charges.

SHOW ADVERTISEMENTS, which must be fully

PREPAID,

are inserted in CAGE BIRDS at the following rates:—

¼-inch 2/-, ½-inch 3/-, 1 inch 5/-

If more than 1-inch in an issue is required the charge will be 6s. per inch and *pro rata* except to "Guaranteed" Shows appearing in our Dates Fixed column, which are charged at 5s. per inch and *pro rata*.

SHOW ADVERTISEMENTS across two or more columns 7/6 per inch, column width, except to "Guaranteed" Shows, for which the charge is 6/- per inch, column width.

Secretaries desirous of "guaranteeing" a Show should apply for proper guarantee form to our Manager.

A reduction will be made for a Series of not less than Nine Weeks.

"CAGE BIRDS,"

154, FLEET STREET, LONDON, E.C.

Advertisements of shows entirely confined to members or limited to a radius not exceeding 20 miles will in future be inserted at 4s. per inch, *prepaid*, but it must be clearly stated at time of ordering if the show is a confined one, and, if limited in radius, what the limitation is.

QUEEN'S PARK & DIS. C.B.A. Show of Pairs Matched for Breeding, at the Windsor Castle Hotel, Harrow Road, W. **Thursday, February 14th,** 2 to 10 p.m. Judge, J. ROBSON, Esq.

GRAND PRIZE DRAWING in aid of Mrs. Aiken, Newcraighall. WINNING NUMBERS. 12459, 1461, 19838, 9092, 4297, 20086, 4258, 14570, 18932 8747, 2709, 1072, 4719, 8593, 10179, 11626, 590, 9756, 3934, 7797, 13439, 1733, 7 78, 8884, 15236, 10785, 9789, 2579, 16265, 5317, 5556, 14643, 15308.

Prize Winners apply to Mr. John Heron, 17, Whitefield Street, Newcraighall, by Musselburgh.

THE ROLLER CANARY.

BY WALTER WHITTAKER.

(*Concluded.*)

I have given you the best explanation I possibly can do, and I hope to have shown that the yearly bad results in the singing performances of our young cocks can be reduced, in the first place by consistent treatment and mode of feeding, and that breeders will do well if they will endeavour to keep their birds, through generations on the same conditions of living, and make as few changes as possible. With these remarks, gentlemen, I will finish. There are many other things I might tell you to do, and to avoid, but I think I have kept you quite long enough, and if you manage to remember all the points I have touched upon to-night, and try and work them out, I am confident that we shall be breeding a much better class of birds before long than we are doing at present. But remember that it cannot all be done in one or two seasons, it must be done little by little. Strive onward and the reward will come to those who have the greatest patience.

I thank you all for listening so attentively to me, and if there are any particular items I have not mentioned on which you would like my opinion, or any questions you like to ask, I shall be pleased to answer, if I can do so, and I hope you will discuss my ideas, and let us know your version on them.

Questions.—(1) What method of training do you consider the best? Answer: I consider cages fitted with doors so arranged that the bird can get food and water when the doors are closed are best, and use good birds as teachers. (2) What do you think the best remedy for indigestion, and do you consider a bird so affected useless? Answer: I don't know of any real cure for indigestion, and I consider a bird so affected unfit to breed from, because most of the young will die during the moult, and others in the second moult, so if you wish to work up a sound and healthy strain, do not use them. (3) Do you consider it wise to give Rollers canary seed daily? Answer: If you find you have some vigorous young cocks that like to hear themselves make a noise, give them very little three times a week, but if you find they are not so free give a little every day. (4) How many nests do you take from each hen? Answer: If I think I have a hen extra strong I take three, if not, only two. (5) What do you consider the extreme of inbreeding, or how far do you think we can go? Answer: I should not fix any limit if I knew what I was doing it for, and I was quite sure that the birds I was using were strong and healthy; but there are many ways of doing it. I have paired three cocks to one hen in one season, so that I could mix the young together. (6) Do you think it best to use heat in a room where Rollers are kept? Answer: Yes I do, but not too much, about 40 or 50 degs. is quite enough. I know some of the leading Roller fanciers do not believe in heat; but I am quite content to go on as I have done. After many other questions of minor interest, and a very strong vote of thanks, moved by Mr. Fallows and seconded by Mr. Greenwood, a very pleasant evening was brought to a close.

Mr. A. M. Whitby is taking over a bird shop in a good position, doing a decent trade, in Luton.

A correspondent wishes to know where to obtain "Duriseo" disinfectant wash. Can any reader oblige?

I beg to correct Luton report; 3, Lees (Goldie-Canary) and vhe (Twite-Canary) were both my exhibits. First and second correct. —E. J. Lamb (Kingston-on-Thames).

Please thank all those that answered my advert. in CAGE BIRDS of Scarlet Tanager, as I cannot answer them all.—Mr. COOPER (West Ham).

The approach of the breeding season is heralded by the receipt of a sample of Canary Marking Rings, as made and advertised in our columns by Mr. W. Mortimer, 77, Arlington Road, Camden Town, London, N.W. They are very simple, and at the same time thoroughly practical, well designed to meet the needs of fanciers, while the price is extremely moderate, viz., 6d. per dozen, 2s. 6d. half-gross.

A New Judge of Yorkshires.

J. Dewhurst, Hon. Sec., West London F.A., writes:—Our annual pair show will be held on Saturday afternoon, Feb. 9th, at Bush Hotel, Shepherd's Bush. R. L. Crisp will judge Yorkshires, J. Robson all other varieties. We anticipate a large number of entries and hope to have a successful show.

WHEN ANSWERING ADVERTISEMENTS PLEASE MENTION "CAGE BIRDS."

Continued from page 114.

and shelter for husks, etc. In a cage 16 inches deep, the back 8 inches would be board and the other 8 inches open wirework. Treatment fully given in other replies in this issue; please refer.

What Bird?—(1) Colours identical with Purple Finch, but is a little larger, with beak more like a Weaver or Goldfinch; it has a crimson top-knot, which is mostly kept flat. (2) Please describe the best talking Mynah.—J. WOOD.

(1) It is a Pileated Finch, a beautiful South American bird. When in full plumage you will find it very beautiful, and when tame, by its confiding nature, it will soon endear itself to you. (2) The Hill Mynah, a bird having fine glossy black plumage, with a bluish sheen, with fine eye wattles of orange yellow, and beak of same colour. There is a fine specimen in the Insect House at the Zoo at the present time, which calls out "What are you talking about," "I'm surprised at you," "Who are you," "Come a bit closer," and other phrases, as distinctly and clearly as if uttered by a human being. Its talent is the result of careful and persevering tuition, and there is no reason why the majority of this species should not become talented birds, if like time and patience be expended upon their training.

American Grey Bird.—I am feeding on insectivorous food, crushed hemp, and canary seed. Is this correct? Is it worth keeping as a songster?—"GREY BIRD."

You might add such ripe fruit as it will eat to your diet, also a few live insects, mealworms, cockroaches, spiders, beetles, smooth caterpillars, etc., as obtainable. Do not over-do the hemp. For green food, chopped (or rather minced) lettuce, sprinkled among its soft food is about the best for the next two months. Let it bathe daily if it will do so, but keep out of draught till dry. Mid-day is a good time to give the bath; on many days we get gleams of sunshine at that time. I cannot speak of this species from actual experience; but it is said to be quite a passable songster, and this is what one would expect.

Birds with Pigeons.—My flight and cote is 26 ft. by 25 ft. by 8 ft. high—due S.—covered with ½ in. netting. What birds and how many could I keep with Dragon Pigeons (only four at present), and what extra arrangements must I make for them? —J. CHEETHAM.

You can put a few British in at once, but you will have to wait a bit for the Foreigners, unless you can procure such as I name later from some outdoor aviary where they have been outdoors all the summer. Do not put too many in at once, introduce them gradually, so that pigeons will not notice them much; but I expect the latter will levy heavy toll on the small seed. British: Goldfinch, Bullfinch, Linnet, Greenfinch, Siskin. Foreign: Either Californian or Chinese Quails as ground birds; Grey and Green Cardinals, Cowbirds, Grey Java Sparrows, Cutthroats, Zebra Finches, Silverbills, and Spice Finches. You could add others as these settle down, of which I should be pleased to advise you further. You must hang up a number of small nest boxes and cocoa-nut husks, and travelling cases as retreats, etc., for the small birds. Diet: Mixture No. 1, canary and white millet in equal parts. No. 2, oats, rice in the husk, summer rape, teazle, hemp, dari, and white sunflower seed. Greenfood, grit, cuttlefish, a saucer of soft food (see advertisements), and a few insects, beetles, spiders, greenfly, etc., and mealworms when these fail; see that the birds which will eat them get two or three daily.

Feather Plucking.—My Grey, otherwise healthy, has for the last six months plucked itself. Have tried spraying with tobacco juice and quassia chips.—W. W. BALL.

I can only give you a sort of provisional reply, as you give me no particulars as to how you are dieting and treating, and in the majority of cases feather plucking is the outcome of improper treatment. Do not give Parrot foods, slops, fats, or any kind of animal food. Diet: Canary, millet, oats, wheat, dari, hemp, and sunflower in equal parts; well mix, and always keep a supply in the cage. Grit, cuttlefish, green food, and water—continuous supplies. Also ripe fruit, plain biscuit, nuts, boiled potato and raw carrot as extras; not all at once, but so as to vary the diet. Give 3 drops of tasteless castor oil on a piece of sponge cake or biscuit, and repeat same after an interval of three days. Colour the bird's drinking water with Parrish's chemical food every other day. Also try a metal collar, from which a piece of steel chain hangs, over the bird's breast; it has been fully described in this column several times recently. Note: If you have been giving boiled maize, you must continue a little of this till you find it eating freely of the seed mixture.

Outdoor Aviary.—To list of birds I have, what others can I add, and how many? Please give details as to diet and treatment, also aviary fittings.—L.W.Q.

Your proposed arrangements will answer well enough, providing the loft is not less than 4 ft. square, and is furnished all round with plenty of twiggy branches and nest boxes and husks. But I advise you to put it up independent of the summer house, and make it 12 ft. long, 6 ft. wide, and height as proposed; four feet of this length would form the shed, this must be made weather proof with boards and felt, the remaining eight feet would form the flight, three feet of the roof of this should also be boarded and felted. Construct of 2 in. quartering and ½ in. mesh wire netting. If you can possibly spare the space make it 6 ft. wide, 4 ft. being really too narrow for comfort. The ground under open wire netting might have a couple of common fruit trees put in it, and be also sown with canary seed, grass, oats, etc. You will require a shallow dish for bathing, one or two of Jones' hygienic drinking fountains, and about half-a-dozen seed hoppers. Natural branches are best as perches. The birds you name will all agree together with the exception of Budgerigars, and I cannot advise you to keep these with Finches, etc.; sooner or later they would maim them. To prevent trouble have the seed hoppers well distributed about the enclosure. Diet: Mixture 1, canary and white millet in equal parts; 2, summer rape, hemp, teazel, sunflower, rice in the husk, dari, and oats in equal parts. Also give millet sprays, ripe fruit, a saucer of soft food, green food, grit, and cuttlefish. Give me full particulars of size, etc., of aviary when completed, and I will advise you as to extra birds.

Birds for Garden Cage.—(1) Cage 6 ft. long, with partitions dividing it into divisions, 2 and 4 ft. respectively. Pekin Robins in one division and Pectorals in the other. Can I put Zebras with the Pectorals, or could I take out partition and leave them altogether? (2) What Foreign birds would breed in a similar garden cage?—AVIS.

(1) Yes, you could put in a pair of Zebras with the Pectorals, and if you hang up a couple of husks and the same number of nest boxes they will most probably breed; the Zebra Finches certainly will. You can take out the partition and keep them altogether with perfect safety as to their bodies, but the Pekins are nest robbers, and have a liking for the eggs of other birds. The Pekins seldom make any attempt to breed in captivity. You could put a pair of Long-tailed Grassfinches in with the Zebras and Pectorals; I do not think they would interfere with the Zebras breeding in any way. The Long-tails need a little care when they first arrive, but otherwise are hardy enough. (2) A pair of Ruficaudas or Kulus-tailed Grassfinches would do well in your cage, and most probably breed; put up two or three nest boxes and screen same with twiggy branches. A pair of Yellow-rumped Finches would also do equally well; or you might keep the two pairs together, with fair prospects of success. Note: You must not put your birds out of doors till early May at earliest; a little later if the season is backward.

Parrot Not Talking.—Bird was a very fluent talker, but for six months has said very little. Seems healthy, and feeds well; is in splendid feather, and about twelve months old.—S. WINTER.

It is impossible for me to help you from the meagre details you give. Is your diet correct? Compare it with that advised to other queriers in this issue, and treat yours similarly. For one day only make its drinking water just saline with Epsom salts; follow this by putting 6 drops of glycerine in the bird's water daily for a week or ten days. Talk to the bird as much as possible, and fondle and play with it, as much as its disposition permits. Some old birds do go on their speech and become somewhat mopy in their old age; however, your bird should be good for many years of activity and loquacity yet. If there are any symptoms you can describe, or other details, shall be pleased to help you further on receipt of same.

What Bird? (S. Greenwood).—We get very few Japanese birds imported to this country, and your particulars are so meagre that I could not do more than make a possible guess at its species. As you kept them for some little time in confinement before the rats made a meal of them, you can surely give me the colours say of head, sides of face, wings, tail, and under parts of throat, breast, abdomen, also as to whether the beak was stout, that is, more like that of a Grosbeak or Finch. If you can give me a few hints in this direction, possibly I shall be able to name them for you. Possibly they are Javan Mannikins, but these birds are not usually so lively as you say yours were.

Treating Young Grey Parrot.—What quantity of water can I give daily to a young Grey? What can I give him for wheezing?—NO NAME.

Do not at present leave the water continuously in the cage, but let it satisfy its thirst three times a day; when you are satisfied it will only take a normal supply it can then be left in the cage all day. Get from your chemist the following mixture:—Ipecacuanha wine, oxymel of squills and glycerine in equal parts. Put half-a-teaspoonful of the mixture in two tablespoonsful of water, and let the bird have only this to drink till the wheezing ceases. I have used the above with all species of birds for more than twelve years, and found it very effective. You make no mention of your diet, but this is fully given in this issue. If yours have been having boiled maize, you must continue this till you are satisfied it is eating sufficient of the dry seed mixture. Boiled maize only keeps fresh one day.

Budgerigars.—Pair of birds in my possession fully sixteen months have always appeared in good health, but they are no sooner in full feather than they begin moulting again. Is this excessive, and if so, what is the remedy?—PERSEVERE.

Your dietary is all that could be desired, the one item lacking being cuttlefish; keep a piece of this hanging in their cage; also crush the egg shells left from your table, and mingle this with the grit on cage bottom. Just colour their drinking water with Parrish's chemical food for about a month, and let them have a leaf of fresh tender lettuce daily. You give me no particulars as to where you are keeping them; possibly in too warm a situation. They are a very hardy and robust species, and only need to be kept out of draught; but in making any change with them do not let it be a sudden one. They are active and lively birds, and their cage cannot be too large for them to disport in.

GENERAL.

Answered by the EDITOR.

Picture Postcard (R.D.).—Regret that we cannot find space for this.

Green Canary Association (S.H.).—Thanks for Notes; the show was reported in our last issue.

Plate Wanted (Dickinson).—Everything comes to him who waits.

Article (H. W. Sheldon).—This will appear in due course.

Sine Agna System (James Wood).—Pleased to know your mealworm breeding experiments are proving successful.

Canary Book (A. Wallace).—Try "The British Canary," by C. A. House, 1s. 2d. post free, from this office, paper, or 2s. cloth.

Excellent Report (F. Howes).—Glad to hear your members liked the report, and that your society is progressing well. May it continue to do so.

His Daughter's Photo (S. G. Waldram).—It will give us great pleasure to reproduce this picture in some future special issue.

Opening and Closing of the Palace Show (Thelma, and others).—This information is given in another column this week.

Does Royalty Take in "C.B."? (G.F.B.).—We have the honour of sending CAGE BIRDS each week by command to two members of the Royal Family.

Would He? (Edgar Cross).—The Editor is always ready to welcome suggestions for the benefit of readers and the paper. Address a letter to him, care of CAGE BIRDS, 154, Fleet Street, London.

Leeds C.B.S. (G. Iredale).—The secretary's address is Mr. C. R. Stephenson, 19, Hartley Grove, Woodhouse, Leeds. A full list of cage-bird societies is printed in our ANNUAL.

Doing the Fancy no Good (Taken Up).—It behoves readers of "C.B." to study advertisements carefully before replying to them. They should then avoid any that do not seem straightforward, and deposit money with us before deciding.

Photo Block (W. Ruddiman).—This is at present lying in the editorial drawer waiting an opportunity to be used. Such a block is useless for the purpose of an ordinary weekly issue, which requires a special patent rotary-block process.

Annual for 1906 (N.S.).—We have an odd copy or two of the cloth-bound edition about the office, and will send you one to replace the "lost friend" on receipt of 1s. postal order. Your other query will be found answered in our Mr. Weston's columns.

The Charnwood Forest (Pennyworth).—We would have printed your communication, but as you desire to have left out the name of the spot where the Nightingale may be heard, we see no object in doing so. Our Mr. Weston says he has frequently listened to the Nightingale within easy distance of the spot he describes, but never within its bounds. Only last summer he heard one quite close by.

Don't miss Next Week's "C.B."

The First and Foremost Journal of its kind.

Cage Birds AND BIRD WORLD.

A guaranteed Circulation amongst over 40,000 readers weekly.

The Best and Cheapest Advertising Medium.

THE MANAGER, "Cage Birds."

The Crested Canary Club.

The annual general meeting will be held in a private dining room adjoining the Restaurant, at the Crystal Palace, on Saturday, February 16th, at three o'clock, writes Mr. John Tyson, the hon. sec. Any member unable to attend the annual meeting must send any observations on the agenda in writing not later than Friday, February 15th, when they will be read to the meeting. Agenda.—(a) To receive the balance sheet and annual report, (b) The affiliation to the Cage Bird Union, (c) The registration of purchased stock and the publication of breeder's name in show catalogues, (d) The universal definition of a novice.

MICE

IN THE BIRD ROOM.

Rats, Mice, Field Mice, &c.,

EXTERMINATED BY DANYSZ VIRUS

Discovered and Prepared by
Dr. DANYSZ of the Pasteur Institute, Paris.

When affected with the Virus the Vermin leave their usual haunts and die in the open. The remedy is harmless to other animals and human beings and may be used everywhere with absolute safety.

For MICE only, 1/- per tube.
RATS & MICE, 2/6 ,,
Post free with full Particulars and Testimonials from

DANYSZ VIRUS Ltd. (Box 74)
52, Leadenhall St., London, E.C.

Mr. James Ovenstone (Grangemouth) writes that he was the winner of first and special in the Dark Mule class at Auchterarder, and not Mr. Ross, as reported.

Mr. F. B. Wilkinson has resigned the Secretaryship of the Huddersfield O.S. All communications should now be addressed to Mr. Sam Lodge, 34, Jacob's Row, Lockwood.

At the last meeting of the Dysart P.F. and C.B.S. it was decided, through want of support from Pigeon fanciers, to have Cage Birds only at the next show. Cage Bird fanciers, please note.—J. LOGAN, Hon. Sec.

Thank all those who replied to my advertisement, as they were so numerous, far exceeding all my expectations, extending from Aberdeen, in Scotland, to Helston, in Cornwall.—G. M. EARLE, Christchurch.

In report of Attercliffe and District C.B.S. Members' Show you credit Perry with 2, 3, 4 prizes. It should read, Greenfield, first second, third and fourth Unfli. Yorks. The Birthday Number was a marvel.—GEO. H. GREENFIELD.

Mr. H. W. Sheldon is offering two silver medals, and Mr. J. L. Ford a cup, as extra special prizes to be competed for by members of the North Wales Cage Bird Society. These are in addition to the specials already advertised.—W. H. HAYHURST, Hon. Sec.

Mr. W. Sampson, Secretary of the Cardiff and District C.B.S., writes:—After the 8th inst. my address will be "Langland House," Llanishen Street, The Heath, Cardiff. The date of our Matched Pair Show has been fixed for Feb. 27th, and our Annual Open Show for Nov. 27th and 28th. Messrs. Payne and Robson will judge.

In our correspondence columns this week Mr. J. W. Norris, the Hon. Sec. of the British Roller Canary Club, raises an interesting point. He says:—"I know several cases where a man has taken first prize, where instead of taking the cash, he buys a gold medal from the society which runs the show, and then advertises himself as winning a gold medal. How can he win it if he has bought it?"

Your last number, writes Mr. H. Payne, of Putney, is splendid, also the almanac. Your readers might like to know of an effective way in which to preserve these plates. I paste them on to a thick card; bind the edges with a thin green paper, and then give a coat of white varnish. They can then be washed when dirty. I have about twelve done in this way in my bird-room, and everyone admires them.

The British Roller C.C. had a very successful season during 1906, the membership increasing, and a cash balance remaining in hand of £1 5s. 10d. In addition to the latter the Club possess a silver cup and medals totalling £7 14s. 6d. in value. During the year the B.R.C.C. encouraged its members by offering medals for competition to the value of over £9, and all Roller Canary fanciers should communicate with the hon. sec., Mr. J. W. Norris, 31, Scylla Road, Peckham Rye, London, S.E., who will supply them with particulars of this progressive society, and explain the advantages accruing from membership.

Widespread Sympathy for Mr. Maxwell.

Last week we gave a most extensive and illustrated account of the entire destruction by fire of Mr. C. T. Maxwell's magnificent collection of prize birds and aviaries at Brixton. Mr. Maxwell now writes:—Will you allow me to most heartily thank, through your columns, all those friends and fellow-fanciers who have so kindly written me letters of sympathy for my great loss, which you were good enough to make known in your last issue of CAGE BIRDS? As they are so numerous, it is impossible for me to answer them individually.

District Stewards.

The Sunderland C.B.A. annual general meeting was a great success. The hon. sec. reports a balance in hand of £6 3s. 6d. on the year's working. A new member, Mr. W. Sheppard, was elected. The system of having district stewards to look up the fanciers in their locality, and give them advice about their birds, if required, has proved an excellent feature, and even better results are expected from it in the future. We commend the idea to other societies. Fanciers in the vicinity of Sunderland should communicate with the hon. sec., Mr. F. Gordon, 23, Lisburn Terrace, Sunderland, for particulars of membership.

Mr. Wheatley has removed to 20, Milton Street, Leicester.

I think the "Bird World" grand, writes Mr. Geo. Hooper, Yonkers, New York.

Merthyr Tydfil Annual Show has been fixed to be held on Thursday, November 14th next.

A little society was started at Llwyn Own, Groeslon R.S.O., about three months ago, and a show is being held there to-day (Saturday).

Miss G. Brown (Harrogate) writes:—Please thank the many gentlemen who replied to my advertisement about Irish Terrier; he is now disposed of.

The North London Cage Bird Association have fixed show dates as under: Pair Show (free), February 13th, 8 p.m.; Young Stock Show, June 29th; Annual Show, November 29th and 30th. Mr. J. Robson will judge.

Kindly find space to thank the numerous correspondents who answered my advertisement. I find it impossible to answer all by post myself. I had letters from England, Ireland, Scotland and Wales.—W. BINNS (Alne).

G. H. Ellison (Ramsey, I. of M.) writes:—We have just had a very nice Cage Bird Show, and Mr. Tams, Longton, Staffs., was the judge. He said we had some very good exhibits, well worthy of some of the English shows.

Complimentary letters anent our recent Birthday number continue to come into this office with gratifying frequency. We cannot spare space to print more than just a few odd ones, selected at hazard, but we are deeply grateful to all friends who have shown appreciation of our efforts.

The balance-sheet of the Bournemouth C.B.S., just to hand, is a document likely to give satisfaction to every member of the society. No less than £27 1s. 9d. was paid out in prizes and specials last year, and apart from other substantial assets, a cash balance of £7 7s. 9d. remains in hand.

I thank you for putting in CAGE BIRDS such a splendidly life-like sketch of my Crestbred cock winner of first and special, Walthamstow. This bird is a winner of many firsts, but he was not shown at Nottingham. The bird I sent there is a grand Green C.B., which won first.—H. HORTON (Blackheath).

At the recent show held under the auspices of the King's Heath, Moseley, and District F. and F.S., a dainty little girl came forward bearing a handsome cage containing a Norwich Canary, and offered it to Mrs. Austen Chamberlain as a memento of the opening of the exhibition. The gift was gracefully accepted.

I have sold the whole of my birds (Yorkshires), both show and stock, to Mr. J. Sandiford, Preston, having decided to relinquish the Fancy after 25 years. I may say that they include 50 of the best hens in the Fancy. Of course, I shall continue to take my CAGE BIRDS as usual.—F. BATE (Stoke-on-Trent).

Mr. W. Bamsey, sec. Derby C.B.C., writes:—"It was decided at a special committee meeting on 2nd inst. to hold Derby 'Jubilee' C.B.C. Show on November 26th and 27th next. Members' Show will be held at the same time, so as to make it the best show held under the auspices of the club. Four judges will be engaged."

Mr. Harry E. Wilkinson writes:—After holding the office of Hon. Sec. and Treasurer to the Bramley and District O.S. for the past three years, I have been compelled, reluctantly (owing to business), to resign. The secretarial duties will in future be conducted by our late Chairman, Mr. Jas. Metcalfe, 9, Elder View, Elder Road, Bramley, Leeds, to whom all future communications must be addressed.

A neat book of rules reaches us from the Hon. Sec. of the City and Suburban A.C.B., Mr. V. Wynn, 22, Park Lane, London, W. The membership role is a very fine one, and bears evidence of the high standing of the Association in the esteem of Metropolitan fanciers. A splendid list of lectures, shows, cage-making and washing demonstrations, judging, and essay competitions, etc., has been arranged for the ensuing season.

We regret to learn that Mr. J. Patterson, our Border Fancy Canary expert, is confined to his room with a severe chill, caught after a recent attack of influenza. His many friends will join us in wishing him a speedy restoration to health. In the meantime, will correspondents kindly overlook any delay for the time being in answering their communications. Just as we go to press we hear that Mr. Patterson is making satisfactory progress towards recovery.

Your new book, "The Bird World," is a grand thing for the fancier. It's a marvel of cheapness.—F. KING (Cambridge).

J. Walton, bird dealer, Salford, says:—"I find CAGE BIRDS as good a paper to trade through as can be found on the market."

Mr. James Thomas, St. Austell, writes:—Penzance Show report: I won first prize in £1 Selling class with a clear yellow Yorks. Report credits Bailey.

Mr. T. Davies, Narberth, writes:—"There is a printer's error in the report of Narberth Show in A.O.V. small B. bird. You credit D. Davies 1st and c; it should have been T. Davies.

Llanelly Show.—3rd, F. Rees; vhc, R. Griffiths—as stated in your report, is not correct. I won both honours with my birds, and the cards returned with the birds for the same, Class 13, Bird No. 4, 3rd; Bird No. 5, vhc. Enclosed leaf of catalogue sent to me by the Secretary. Please correct.—W. JONES (Penarth).

The Eccles and Dis. C.B.S., though only formed about four months, have a most successful balance sheet and report. They have made 40 members, and can show a balance of £3 13 1d. Their first Members' Show, held last November, surpassed all expectations, and they have every prospect of becoming a very strong society.

Luton and Dis. C.B.S.

Annual dinner of the Luton C.B.S. was held Jan. 30th, when a goodly number sat down to an excellent spread provided by Mr. Clark at Walker's Restaurant, Manchester Street. A capital entertainment was provided by the Secretary, Mr. E. Cherry. Mr. F. Chart accompanied.—E. CHERRY.

New Society for Jarrow.

A number of Jarrow cage bird fanciers will hold a meeting on Feb. 13th, at Lockhart's Cafe, Ormonde Street, with a view to forming a cage bird society for Jarrow and District. All fanciers are cordially invited to attend, or give their names to—MAURICE HAYES, 79, Grange Road, Jarrow.

(For other new Societies see Correspondence columns.)

Death of a Champion Swallow.

I regret to say that my frequently shown champion Swallow died on New Year's Day from old age, after living in perfect health and condition for seven years and seven months; so tame was he that he would sit on my hand in the open room and sing at command.—P. F. M. GALLOWAY (Reading).

Why it was absent.

I entered one of the best Goldfinches I ever had for West London Show, but it was absent for this reason: My two-year-old boy took half its tail out. I had put it in a show cage, after a wash, and left for a few minutes to see how a Fox Terrier pup was getting on in the yard (which I had given a dose for worms). When I returned I found the bird flying about the room, with only half a tail. I was a bit annoyed over it, but said, "It can't be helped." So that's how the bird was absent.—J. KERSHAW (Llanrwst).

Disastrous Entry at Wandsworth.

The first annual show of the Wandsworth and District F.A. was fixed to take place January 23rd. The association has only been in existence about twelve months, and has made good progress as regards membership. Of cage birds—alas! there were only two solitary specimens staged—a very nice Yorkshire and an African grey Parrot. These were the property of Mr. P. Reynolds, and each was awarded first prize in its class. The association, notwithstanding its apparent failure at the first attempt, so far as cage birds are concerned, should yet do well in this direction.

The Bird Had Flown.

A young man named Norman M'Niven (24) appeared at Glasgow Northern Court on a charge of having, on January 3rd, stolen a Canary bird, the value of which was less than £10 sterling, from a house in William Street, Cowcaddens. Accused pleaded guilty. It appeared that he had inserted his hand into the Canary's cage, and, having caught the little warbler, he placed it in his pocket. When he was taken into custody he stated that the Canary had made its escape from his pocket. There was a previous conviction registered against accused, who was sentenced to 21 days' imprisonment.—*Glasgow Record.*

A Mephistophelian Squidger.

There is said to be a mysterious bird which strikes terror into the hearts of those frequenting the Crookston district after nightfall. It was first observed by a pedestrian who had been visiting a Good Templar meeting at Paisley, and other individuals now make bold to assert that they possess feathers from this winged freak, which illumines its flight by a light, while the atmosphere through which it passes is said to contain a sulphuric smell. Attempts have been made to capture the bird, but so far unsuccessfully. Whether there is any truth in the story or not, one thing is certain—that this part of the highway is now practically deserted by pedestrians since the story of this wonder of the winged world has gained currency.—*Glasgow Evening Times*, Jan. 19th.

C.B.U. ANNUAL MEETING.

The annual meeting of delegates of the Union will be held at the Palace Show on Saturday, February 16th, at four o'clock, when the election of president and secretary will take place. Particulars will be published next week.—GEO. W. F. LYTHGOE.

[The above promises to be one of the most momentous meetings in the history of the cage bird fancy. It is to be earnestly hoped that every delegate will make a special effort to attend. The voice of each society should be heard on this occasion.—EDITOR, "C. B."]

A Live Magazine.

"Health and Strength," for February, is once again an issue of exceptional attractiveness. For topical interest the contents of this very "live" magazine are unequalled by any publication of a similar scope. Readers who have not yet had the pleasure of perusing a copy of this "national organ of physical fitness" should order the Februafy number at once from their newsagent. It is great value for 2d. Or send a postcard to the Manager, "Health and Strength," 27, Fetter Lane, London, E.C., for a specimen copy.

Defying Dirt and Death.

Our friend, Mr. Spillman, of Plymouth, is now able to appreciate the fact that the lot of a London editor (or sub-editor for that matter) is, like the lot of Mr. Gilbert's policeman, a most unhappy one. For a fellow-townsman of his has been spending a few days in the great metropolis, and records his own and other people's impressions of London in most unflattering terms. Listen to this:—"In London, if you don't wash yourself all over once every half-hour, you can't keep clean. As you can't earn your living by spending your life in a bathroom, you have to go dirty. What must our lungs be like?" Or to this:—"The Londoner deteriorates rapidly. He is a horrible example of physical deterioration. An illness snaps him up—and—puff!—he's gone. I hesitate. I am appalled, to imagine what the death-rate of London would be if it were not for the constant influx of new blood from the country." Reading this our gaze unconsciously wandered to the rosy cheeks of our sub-editor. Still alive! and still clean.

Astonishing Migration of Finches

In Melville Woods, near Ladybank, writes "Finch," to the "Dundee Courier," on January 25th, I came yesterday upon an enormous flock of Finches migrating towards the south. There could not have been fewer than 3,000 of them. I see that White, of Selbourne, in his day marvelled where all these birds came from, whether from Norway, or assembled from a wide area within our own shores. They were female birds [apparently Chaffinches are being referred to] as the males don't flock, and therefore I came to the conclusion that they had left Norway in the middle of November, and had been on the march ever since. They were seen about Cupar the day before (the 23rd), so that gave a progress of six miles per day, or 200 miles per month. Our own Finches must be about London now. The noise they made arrested my attention quite as much as their numbers, and with earthquakes about I confess I felt somewhat queer."

[A later correspondent denies the accuracy of the statement that only hen Chaffinches flock and migrate.—ED.]

Our Xmas Competition.

We never remember any competition of ours which apparently excited so much interest as has our recent "front page colouring" idea, promoted in connection with the Xmas Number. Many of the competitors, it is true, took very little pains over their entries, some of them seeming to think that to daub a bit of coloured crayon on the backs of two or three of the birds was quite sufficient, but others, on the contrary, took the utmost trouble, and must have expended a great deal of time upon their work. The keenness of the contest may be gathered from the fact that there were in all 1,756 front pages competing, many of them reaching a high degree of excellence. Every conceivable vehicle of colour appears to have been utilised. Some of the artists actually endeavoured to blend on the same page oil colour with water colour or crayon, and the effect was more often than not far from satisfactory. Oil-painted fronts had been sent in in some cases without any protecting sheet, and in consequence were so spoilt as to be immediately disqualified. Most of the entries were unmounted. A few had the foresight to stretch the cover upon thick card, and gained considerably in effect by so doing.

Amongst many others deserving of special mention we may single out the front pages sent in by the following:—Mrs. E. Meeson (Grimsby), J. A. Stewart (Glasgow), Miss Mabel Palmer (Herne Bay), Percy Davies (Millom), C. Frank Hayman (Parkstone), Ernest G Cox (Southampton), Colin McD. Pattison (Rutherglen), Robert Stewart (Glasgow), W. Collins (Southampton), W. J. Burgess (Wandsworth Road), Geo. Barton (Farnworth).

The competition has evidently provided quite a number of readers with a harmless and agreeable evening's recreation, and even the unsuccessful ones have the compensating thought that their labours have given pleasure to themselves, and probably improved their facility with brush and colour.

IMPORTANT NOTICE TO SHOW MANAGERS.

As the time for fixing show dates for the next season has now arrived, I am venturing to draw the attention of show managers and committees to our "Show Dates Fixed" column as practically the only safeguard against clashing, that frequent cause of so many disastrous shows.

A reference to the file of CAGE BIRDS for the past show season proves that practically every show of any consequence thought it worth while to be represented in this list, and the advantages we offer to a show which guarantees to spend not less than 25s. with us in advertisements are so many that the popularity of the feature is not to be wondered at. A guaranteed show is entitled to be included on our Fanciers' Map, issued at the start of the show season; it is entitled to the free insertion of the date, name of show, and initials of judges from the time of guarantee up to the date of the show; we indicate in the column whether the show is held under Union Rule or License; we give either a handsome bound volume of CAGE BIRDS or two framed coloured plates, at the committee's option, as special prizes; and we do our best to see that every guaranteed show is given a proper report in our columns.

We are, however, pleased to review show schedules free of cost, whether the show is guaranteed or not, and we especially draw attention to the very great convenience afforded to show committees by our features "Entries Extended," "Entries Close," and "Prize Money Paid."

To the executives of Scotch shows we make a special appeal in view of our Scotch edition, which enables us to report with great thoroughness the many interesting Scotch exhibitions.

In conclusion, we would remind committees that by guaranteeing their shows with us they effect a considerable saving, as our tariff for guaranteed shows is one shilling per inch less than it is for non-guaranteed events. Moreover, the wins of shows guaranteed for our "Dates Fixed" column are inserted in our annual register of wins free of cost, thus completing a series of advantages of which we feel sure committees will see the full force.—The Manager, CAGE BIRDS, 154, Fleet Street, London.

AN INTERESTING FACT.

Mr. LAMBERT BROWN, Joint Manager of the CRYSTAL PALACE SHOW, informed his Committee at their last meeting that about

95 out of every 100

applications for Schedules came through "Cage Birds."

Show Secretaries, make a note of this!

Feathered Songsters Should Have

SPRATT'S MIXED BIRD SEEDS.

SOLD IN PACKETS AND TINS.

Send postcard for Samples, also **Free** Booklet on "Canary and Cage Bird Rearing."

PARROT FOOD

Mr. F. H. JUDGE writes:

4, Fryent Cottages, Kingsbury, London, N.W., July, 1906.

I thought you would feel interested to hear of the success I have achieved by using your excellent Parrot Food. I exhibited for the first time at Great Missenden, on July 12th, my green Amazon parrot, in an amalgamated class of English and Foreign birds, and was successful in carrying off first prize. Her excellent plumage was much commented upon, and I attribute this to having always fed her on your food, which sustains her through her moults and keeps her in good health.

SOLD IN PACKETS AND TINS.

Booklet on "Parrot Keeping and Feeding," post free for three penny stamps.

SPRATT'S PATENT, LTD

24 & 25, Fenchurch Street, LONDON, E.C.

SINGING CONTESTS.

LINNET CONTEST AT YORK.

The usual week-end contest was held at the Acorn Hotel, Micklegate, York, on the 2nd inst. Mr. Hopwood gave the usual prizes. Mr. J. Jirth acted as judge in conjunction with Mr. C. Benson as timekeeper. Result: 1st, J. Evans; 2nd, J. Smith; 3rd, M. Smith; 4th, Jefferson; 5th, A. Chaplin.—G. HOPWOOD, Sec.

COMPETITION AT HULL.

A Linnet singing contest was held at the Prince of Wales Inn, St. James' Street, on February 2nd, when 20 birds competed for four prizes. 1st, R. Dearlove; 2nd, R. Dearlove; 3rd, S. Saul; 4th, J. Booker. Judges, Messrs. E. Mawer, R. Booker, S. Saul. Thirtieth annual Linnet singing contest will take place on Whit Monday. Anyone wishing to join our Society can do so by applying to the secretary, E. Mawer, 14, Easteheap.

NEW RULES AT BRADFORD.

A Linnet singing contest of unusual interest to Bradford Linnet fanciers took place at the Exchange Tavern, Wakefield Road, on February 2nd, when 25 birds competed for three prizes, under a style of judging hitherto unknown here, viz., the "all in" London or Leicester style, whereas the late Bradford Linnet Singing Association sang under the Leeds quality singing rules. 1st prize, Frank Burton; 2nd, Fred Morrell; 3rd, Albert Smith. This being an innovation for Bradford, old and new friends of the Linnet clique are cordially invited to join us. All sings held reported in CAGE BIRDS only.—FRANK STOTHARD, Sec.

NEWTOWN, LEEDS.

The members and friends of the Prince Albert Inn Linnet Association, Newtown, Leeds, assembled in large numbers to hear a singing contest between eleven picked birds owned in Leeds, "all previous contest winners," for three good prizes offered by the landlord, Mr. J. R. Saynor. The judges were B. Jackson and T. Crane. Timekeeper, S. Green.

1st prize, H. Allen; 2nd prize, H. Allen; 3rd prize, F. Allen. It is many years since the performance of the winning bird was equalled in Leeds. Special meeting on February 3rd, at 8 p.m.—E. WOOD, Hon. Sec.

Week-end contest, February 3rd, when 18 previous contest Linnets sang for three good prizes, given by J. R. Saynor. There were a good number of visitors present, although it was a very unfavourable day. Judges, E. Wood and S. Green. 1, 2, H. Allen, 3, F. Allen.—E. WOOD, Hon. Sec.

WHOLESALE POISONING OF BIRDS.

Blyth Farmer Prosecuted.

The somewhat unusual charge of sowing poisoned wheat in a field so as to destroy life was preferred against Benjamin Bentley Birkett, a Blyth farmer, at the Retford County Police-court, on Dec. 29th. Mr. A. P. Williamson prosecuted.

P.C. Harpham stated that on the 10th inst. he saw defendant, and asked him to account for the many dead birds lying about in his field. Defendant replied that he had purchased two shillings'worth of crow poison at Doncaster, and in this he steeped a quantity of wheat, which he afterwards deposited on the field on the 8th inst. He added that he had done it to kill the Larks which had proved a serious nuisance, and in consequence he had to resow. Witness told him it was a very serious matter, and he would have to report it. He then went into the field, and received from the keeper 74 Larks, 6 Sparrows, 2 Chaffinches, 2 Starlings, 1 Pigeon, and other dead birds, numbering altogether 159. When he served the summons on defendant for a previous alleged offence, he said there were other ways of killing game without shooting them.—Cross-examined by Mr. S. H. Clay, who defended, witness said he gave evidence in a case against defendant a fortnight ago when the case was dismissed.

Mr. S. R. Trotman, city analyst of Nottingham, deposed to receiving a sample of grain and several dead birds from the police, and upon analysis found them to contain a large quantity of strychnine. The crops found in the dead birds contained grain which had also been treated with strychnine, which was sufficient to render the grain poisonous and calculated to destroy life.

For the defence Mr. Clay said the case was admitted. Defendant had been perfectly open. The damage he had suffered by the birds picking up the seed had been so serious that he felt justified in doing something to stop it. He bought the poison for the express purpose of keeping the Larks off his land. Major Willey and others had been warned for what had been done. Instructions were also given to keep the game off.

The Bench regarded it as a very serious offence. There was no guarantee that the game could be kept off, and if any had got into the hands of the public it would have been awkward. Defendant would be fined £2 and costs amounting to £3.

Work Wanted.

Mr. Verrall writes:—Do you know anyone amongst your subscribers who could give me some sort of employment? I think I could live on 18s. a week. Outdoor gardening I prefer. I have had many years' experience amongst land and fancy water fowl, poultry, also seed-eating birds, British and foreign. I do not understand the care of anything that has more than two legs. Letters for Mr. Verrall may be sent care of this office.

CLUB NOTICES.

No charge is made for notices of forthcoming meetings, but they can only be inserted once. Should secretaries desire to secure immediate insertion of their announcements **exactly as written** they can do so by pre-payment at the rate of three words a penny.

Attercliffe and Dis. C.B.S.—Feb 14th, at Board Room, Vestry Hall, 8 p.m. Balance sheet and election of officers. All please attend.—J. Perry, sec.

Barrow and Dis. C.B.A.—Feb. 13th, at St. George's Hall, Greengate, 7.30 prompt. Important business; table show of matched pairs for Yorkshire breeding. Members make a special effort to attend.—E. E. Miller, sec.

Bolton Woods C.B.S.—Feb. 9th., at Victoria Hotel, 8 p.m.—E. Shepherd, hon. sec.

Bradford (West) C.B.A.—Feb. 9th, at Red Lion Hotel, 8 p.m. Arrangements for members' show.—T. Clegg, sec.

Bury and Dis. C.B.S.—Feb. 12th, at Textile Hall, Bury, 7.30. Lecture on "The Goldfinch," by Mr. Bancroft (Bolton).—W. P. Turton, sec.

Carlisle and Dis. C.B.S.—Feb. 12th, 8 p.m. Election of committee and other important business; all attend.—G. Davidson, sec.

City and Suburban A.C.B.—Feb. 11th, 8.15 p.m. Lecture by C. A. House, "The Breeding Season"; distribution of prize money and presentation of special prizes; all bird lovers welcomed.—Victor Wynn, sec.

City of Bradford.—Feb. 16th, at Travellers' Rest, at 8 p.m. To present to Mr. Hellewell prize for members' competition, previously to his departure for Canada.—P. Stansfield, sec.

Crewe O.S.—Special meeting, Feb. 12th, at Masonic Arms, at 7.30 prompt. All members requested to attend; business very important.—A. Wilkinson, sec.

Crook C.B.S.—Feb. 9th, at Crown Hotel Rooms, 7.30 p.m. Election of officers; members all attend.—Wm. Rutherford, sec.

Eccles and Dis. C.B.S.—Feb. 13th, at the Grapes Hotel, Peel Green, 8 o'clock prompt. Meeting and supper.—A. Wheatley, hon. sec.

Darlington C. and B.B.F.A.—Feb. 13th, at George Hotel, 8 p.m. Table show of matched pairs Yorks., Norwich, and pairs for Mule or Hybrid breeding; judge, T. Wright (York).—R. S. Black, sec.

Edinburgh Southern O.S.—Buchanan's Hotel, Feb. 13th, at 8 p.m. Enrolment of new members.—James Drysdale, sec.

Gateshead and Dis. C.B.S.—Feb. 13th, at Newton and Skeen's Cafe, 6.30 p.m. Balance sheet, etc. Annual general meeting at 8.30 p.m.; reading of balance sheet; paying members prize-money, and election of officers, etc.—T. Taylor, sec.

Gt. Harwood and Dis. C.B.S.—Feb. 21st, at late Queen's Hotel, 7.30. Discussion on Young Birds Cup, and other business; all fanciers welcome.—F. Sharples, sec.

Great Horton O.S.—Saturday, Feb. 9th, at Butchers' Arms, 8 p.m. Members' monthly show or meeting.—Samuel Dean, sec.

Grimsby and Dis. C.B.S.—Meetings second Wednesday in each month, at 8 o'clock. Next meeting Slatter's Rooms, 120, Freeman Street. Judging competition; two classes, Norwich cock and hen.—Hy. Emerson, hon sec.

Hazel Grove C.B.S.—Feb. 10th, at White Hart Inn, at 6.30. Table show of matched pairs of Yorkshires for breeding; on table 7 o'clock.—James Hall, sec.

Hyde and Dis. C.B.S.—Feb. 11th, at St. George's School, at 8 p.m. Business: Arrangement of date for Open Show, etc. Members and intending members please attend.—T. Allsop, sec.

Leicester C.B.S.—Feb. 13th, at Headquarters, 8 p.m. Table Show, any variety Norwich, pairs matched for breeding (open); ditto novice; judge, Mr. G. Lander.—J Heighton, sec.

Leith O.S.—Feb. 9th, in Labour Hall, Smith's Place, at 7.30 p.m. Business: Enrolment of members; revision of rules; election of committee.—Geo. Brown, sec.

Liverpool B.B.A.—Feb. 14th, at Oldham Hall, Oldham Street, 8 p.m. prompt. Pair show and judging competition.—H. Barratt, sec.

Llanelly C.B.S.—Meeting Feb. 9th, Bird in Hand, 7.30 p.m.—W. Lewis, sec.

L.C.B.A.—Feb. 13th, at Parish House, St. Clement's, Danes, Clare Market, W.C., at 8.30. Paper on "The Yorkshire Canary," by R. L. Crisp. All fanciers welcome.—T. A. Wade, sec.

Metropolitan Association of C.M.H.B.—Feb. 14th, at "Crown Hotel," Lavender Hill, S.W., 8 p.m. Competition in matched pairs; J. Robson, judge.—A. J. Head, sec.

N.B.B. and M.C.—Feb. 16th, at Crystal Palace, 6 o'clock. Annual general meeting; place of meeting will be posted on Sale Office.—Plumbridge and Carr, secs.

North London C.B.A.—Feb. 15th, at Public Library, Church Street, Stoke Newington, N., 8 p.m. Members' Pair Show; judge, J. Robson; all fanciers welcome.—R. P. Harper, sec.

Partick and Dis. C.B.C.—Feb. 14th, at Joiner's Hall, at 8 p.m. Show of breeding pairs. All fanciers and intending members invited.—A. Miller, sec.

Pendleton and Salford O.S.—Feb 14th, at Derby Arms, at 8 p.m. Washing competition. Members are requested to bring their own birds. All fanciers invited.—S. Skelton, sec.

Shields and Dis. C.B.S.—Feb. 13th, at Greggs' Cafe, Laygate Lane, 8 p.m. Payment of prize money, and enrolment of new members.—William Duke, sec.

South-West London Cage Bird Society's next meeting is Thursday, February 14th, 8.30, Plough Hotel, Clapham Junction. Business: To arrange Young Bird and Annual Autumn Show; also to receive proposal for anyone wishing to become a member.—Lilley, hon. sec.

Stoke Newington F.A.—Next meeting, Feb. 12th, 8 p.m. at Headquarters. Agenda: Elect judges for Y.S. Show and Annual Show.—G. Dowden, hon. sec.

Stratford and East London F.S.—Feb. 14th, at Workman's Hall, Stratford, E., 8 p.m. Election of officers; alteration of rules; all members attend. Intending members please send in name at once to A. E. Blakebrough, 65, Adelaide Road, Leyton, N.E.

Swansea and Dis. C.B.A.—Feb. 14th, at Oxford Coffee Tavern, 7.45. Programme for coming season; all members should attend.—J. Evans, sec.

Tamworth and Dis. C.B.S will hold their next general meeting at College Lane Schoolroom, on Saturday, Feb. 16th, 1907, at 7.30 p.m. Important business; all members are requested to attend.—J. E. Brown, sec.

Wibsey and Dis. C.B.S.—Feb. 9th. Members' Show; birds staged 6 o'clock prompt; judge, J. Wilman.—E. W. Johnson, sec.

Wolverhampton and Dis. C.B.S.—Feb. 12th, at Vine Hotel, Princes Square, 8 p.m. Paper by F. J. Weaver, "Preparation and Management of Breeding Stock"; all fanciers invited.—F. Howes, hon. sec.

QUESTIONS & ANSWERS

DOUBTS AND DIFFICULTIES SOLVED BY SPECIALISTS.

Queries will be answered under the following conditions:—

(1)—*All questions must be clearly written in ink (or typewritten) on one side only of paper, and must conclude with either the correct name of querist, or a pseudonym, or initials.*

(2)—*The proper name and address in full of querist must always be written on a separate sheet of paper and enclosed with the query. In no case must the address appear on the query.*

(3)—*Queries intended for different specialists must not be written on the same sheet of paper.*

(4)—**Queries must not include** *or be included in orders for books, instructions re advertisements, or any other matter for publication.*

(5)—*The department to which the queries refer must be stated in bold letters on the left-hand corner of the query.*

(6)—*If an answer in the same week's issue is desired, queries must be posted to reach us by* **Monday's first post** *at latest. Queries will be dealt with in the order in which they are received, and only as space permits. The earlier queries are received the better attention they are likely to have.*

(7)—*Queries relating to illnesses of birds, except enquiries as to cause of death (for which see Post Mortems) will be answered by return of post on receipt of a postal order for sixpence and an addressed stamped envelope. Queries of an ordinary nature will be answered by post, if desired, on receipt of a postal order for one shilling and a stamped addressed envelope.*

(8)—*All who require letters of complaint written to advertisers must state grounds for doing so clearly and fully, and enclose a fee of sixpence to pay postage expenses, &c., otherwise their letters will not receive attention.*

(9)—*All queries must be addressed* **the Editor, "Cage Birds,"** *154, Fleet Street, London, E.C. Only queries so sent will be answered. Postcards are not admissible.*

NOTE.—Readers are requested to carefully study past numbers and current issue before submitting questions. By doing so they may save trouble and unnecessary repetition.

THE following gentlemen represent CAGE BIRDS staff of **ADVISORY EXPERTS.** Queries must in no case be addressed to any of them individually, but to the Editor.

Norwich Plainheads.—**J. H. Payne.** Yorkshires.—**H. W. Battye.** Crests & Crestbreds—**W. E. Greeves.** Cinnamons & Miscellaneous Canary Queries—**J. North.** Border Fancies—**J. Patterson.** Scotch Fancies—**R. Wright.** Lizards **Barker Clegg.** Lancashires—**S. R. Compston.** Greens—**S. Hadwin.** Belgians—**W. B. Cobb.** Rollers—**F. A. Lester.** British Birds, Mules & Hybrids—**G. E. Weston.** Foreign Birds—**Wesley T. Page,** F.Z.S., M.B.N.H.S., &c. Park and Lake Aviculture—**Frank Finn,** B.A., F.Z.S., M.B.O.U. &c. Wild Bird Life—**H. Norman.**

CANARIES.

NORWICH PLAINHEADS.

Answered by J. H. PAYNE.

Skin Trouble (G.H.G.).—Give your bird, on alternate days, in two tablespoonfuls of water, fifteen drops of the juice of a good fresh lemon. Continue this for three weeks, and on the days he is not having this give ten drops of tincture of quinine in the same quantity of water. Twice a week give a little egg food, to which add a small pinch of flowers of sulphur. To the parts which you say are of a scaly nature and are bare of feathers, you may apply, with your finger tip, a little hazeline cream, which you can procure from any good chemist.

Hens at Fault (T. L., Leeds).—I should recommend you to give your two hens another trial, and the probability is that they will do well next time. The hen that laid the ten clear eggs may not be the one to blame; maybe the cock was at fault. The other hen that made her nest but did not lay eggs should be all the better for breeding with next season; that is, of course, should she lay, and I have no doubt she will.

Not Moulted; Seed Mixture (W.W.).—Your Norwich, which you say has not yet moulted, will in all probability not do so now. Of course, it is quite unnatural and unusual for a bird not to moult when the season comes round. Still, I have known of several that have bred all right the following season, and, as you say your bird is in full song (which proves he is in good health), he will no doubt breed this coming spring. (2) I should recommend you not to use mixed seed for your Canaries as a staple diet, but let this be plain Spanish canary. You can give, as a treat and a change, two or three times a week, a half teaspoonful of the following mixture:—Hemp, German rape, and niga, in equal quantities. A pinch of maw seed occasionally will be beneficial.

A Mixed Bag (Charlie).—(1) I am not aware of an insurance company that would insure your birds and cages, but perhaps some of our readers may know of one, and will let you know through the columns of this paper. (2) Linseed is a good thing to put polish on birds; but at the same time you must have high condition and well-bred stock before you can get this in any pronounced degree. Use the best English linseed; or you may use a little of the meal with the egg and biscuit. I prefer the former. (3) Give your birds, that you say make a wheezing noise at night-time, fifteen drops of glycerine and ten drops of paregoric in their drinking water, every day for a fortnight. (4) Unlighted birds are those that are bred in the current years, and left as Nature made them; that is, not had their flight feathers drawn. (5) I should not recommend sunflower seed for Canaries. It would lay on too much fat. Mr. Westen will answer you re the other birds you mention.

Rough on Legs (Constant Reader).—I do not think there is anything radically wrong with your bird. Some birds are very prone to get scaly on the legs. Put, with the tip of your finger, a little vaseline on the legs for two or three days, and then I think the scales will come off quite easily. Put a few drops of the juice of a lemon in his drinking water every day for a week.

Mesh of Wire Partition (Slide).—Yes; the width of mesh you mention, half inch, will be quite suitable for your partition slide, and the old birds will feed the young quite well through it.

Hens Which Sing (J. Hawkes).—It is, as I have previously stated, a very difficult matter to put on paper the way for a novice to tell the sex of Canaries; particularly so at this time of the year with young birds, that is, late-hatched, last year's birds. Briefly, the vents of the cocks protrude more than the hens, the latter being much flatter, and the more so the fresher they get in condition. The cocks are deeper in colour; and in the buffs there is much more colour round the eyes and on the front of the head. Buff hens invariably carry more meal (or fresting) than the cocks, and are not so active in their movements. Yellow hens mostly show a little mealing at the extreme edges of the feathers on the back and neck. I expect the birds you say you bought for hens are really such, as you say they "seem" to sing. If they were cocks and healthy birds, I fancy they would actually be doing so, and in such a way that you could have no doubt on the matter. Many hens will try to emulate the sterner sex in the way of song, but only in very exceptional cases is there much real resemblance.

Concerning Perches, etc. (Advice).—There is no "correct distance" between the perches, everything, of course, depending upon the size of the cages. As you wish to get your birds into good condition, I should advise you to put the perches as far apart as you can, so that they may get all the exercise it is possible for them to have. The "long jump," as you call it, will not spoil your birds for exhibition purposes. When the perches are put a good distance apart, they have to fly, which, of course, is good exercise for birds, and helps to keep them in good condition. I should not advise you to give crushed oats with the egg, but give either biscuit or home-made bread, the latter for choice. You may use the chaff you get for the bottoms of show cages on the bottoms of the cages you have now in use. You are doing quite right to provide them with some sand in a dish. I rather suspect your bird has red-mite. Go on with the quassia spraying, and in addition give him a dusting of Keating's insect powder, putting it well under his wings.

Lacking Life (J.A.P.).—Give your birds nothing but plain Spanish canary seed; only give a little of the mixed seed, a half teaspoonful to each bird, twice a week. Put as much Epsom salts in the drinking water twice a week as will make it taste slightly. Then give, in two tablespoonfuls of water, on alternate days for a fortnight, ten drops of tincture of quinine. Let them have a spray of watercress two or three times a week, and put a piece of sweet apple between the bars of the cage for them to peck at.

Pairing Questions (Standerton).—From your description I do not think you will do any good with either the variegated hen or the colour-fed Norwich cock, and should advise you to get rid of them in some way. Kill them, and save yourself a lot of bother and trouble. Pair the pink-eyed yellow hen to the colour-fed cock you mention first, and the green to the cock which you say is singing. I do not think you can make any mistake if you pair up the other two pairs as you think best. I cannot advise you, as you do not tell me whether they are buffs or yellows. I did not get your sample of seed which you say you enclosed, consequently cannot say if suitable. The single cages you are thinking of using for breeding purposes should be quite suitable, and are of a nice size, 24 in. by 15 in.

Sitting Humped Up (H. Dives).—Do not give your bird any more of the Epsom salts, but give instead, in two tablespoonfuls of water, ten drops of tincture of quinine. Continue this on alternate days for a fortnight, when I think you will see an improvement. Let him have a piece of sweet apple placed between the bars of the cage to peck at. Cut away the feathers which are clogged with the bird's excreta with a pair of scissors. Keep him in a cosy corner, with plenty of light, and cover over at night with a warm cloth.

Persistent Cold (G.O.W.).—Give your Norwich hen, in its drinking water, ten drops of paregoric and fifteen drops of syrup of tolu every day for a week; then on alternate days for a fortnight. You are doing the right thing with your other bird; I cannot advise anything better than your present mode of treatment.

YORKSHIRES.

Answered by H. W. BATTYE.

Not Sung (J.T.T.).—Evidently your bird is in the "loose moult" and thoroughly out of condition. I presume from what you write that you keep it in the living room; if so, remove it into a room where there is no fire. Get a packet of egg-bread, or canary-cake, from a bird shop, and use as directed on the cover; and, in addition, give half a teaspoonful of maw seed daily until the bird has got rid of most of its feathers. Then give eight or ten drops of Parrish's chemical food in the bird's drinking water, when your bird will probably get all right and commence singing. During the coming spring let his staple food be clean, sound, white canary seed, in addition to above.

Sneezing and Wheezing (J.H.B.).—The house is a very unsuitable place to keep birds in, especially birds you intend to breed with. See replies to "J.T.T." and "Willing to Learn." Your birds seem to have got cold, either from draughts or changes of temperature. You might try the following:—Take the birds' drinking water away at night, and give fresh each morning, well mixing with it five drops of the following mixture—½ oz. oil of eucalyptus, ½ oz. oil of cajeput. For the hare place, dip your finger end in paraffin, and rub gently on the hare spot, on alternate days, for a fortnight or three weeks.

Only Sung Slightly (One of Your New Readers).—I do not know under what conditions you keep your birds. I have had birds that would not sing a note when I was in the room, but would sing as hard as any of the others immediately I left the bird room. Of course, I have a "peep-hole" where I can see them without them seeing me. Perhaps your birds may be the same. Again, some birds will not sing for a long time after a removal to fresh quarters; but you have had the birds long enough for them to have got over this. I am inclined to think your birds will sing when you are not in the room, seeing that you say they were in full song when you bought them, and that they are sound, healthy birds. At present give them a little egg food, with a pinch of maw seed every other day, when I think they will be again in full song when the milder weather comes.

Casting Feathers (Willing to Learn).—I should imagine your bird had moulted last year before December, and then went into the loose moult, and has been in it ever since. You do not say anything as to the bird's age, or I might have been better able to advise you. But I have no doubt in my own mind that keeping him in the kitchen was the first and principal cause of him going amiss. The great and frequent changes of temperature in the average kitchen or living room are calculated to cause most Canaries to go into soft moult. Perhaps the baking or washing may be on foot during the day, and the place gets very hot; then during the night the fire goes out, and during such weather as we have been having of late the change is both sudden and severe. Follow advice given to "J.T.T." this week, when I think you may very probably have your bird ready for breeding by April or May.

CRESTS AND CREST-BREDS.

Answered by W. E. GREEVES.

Breeding Crests (H.S.M.).—(1) Crested cock and Crestbred hen will breed both Crests and Plainheads, and is the proper method of breeding to produce Crests of good formation. Two Crests may be mated together, but this is the exception, and not the rule. When so mating, two of the largest crests obtainable should be put together, it is only waste of time to mate two small Crests together. (2) The cock and the hen should be kept in separate cages until they are in breeding condition, which will not be before the end of March or beginning of April. (3) The sample of egg-bread sent is not good enough to rear young birds on; it will do very well to use when weaning the young ones from egg food. Hard boiled egg, with either bread crumbs or crushed biscuits, should be given now to the old birds twice a week and used for rearing the young ones.

Swelling Near Beak (T.G.).—As the witch hazel extract has not reduced the lump over your bird's beak, I should advise you to take a sharp knife and just cut through the skin of the lump on the top. You will find matter underneath which can be easily removed. Afterwards well wash the place with warm water, using a small piece of sponge for the purpose. Be careful to dry well, and keep the bird in a warm place. There is no need for any alteration in your feeding.

CINNAMONS.

Answered by J. NORTH.

Pink-eyed Chicks from Dark-eyed Parents (Cinnamon).—It is quite possible to get a pink-eyed chick from parents that have dark eyes. As a rule such youngsters are hens, but I have known a few exceptions, where pink-eyed or cinnamon variegated cocks have been bred unexpectedly, although such cases are very rare. Such occurrences are also remarkable because, when dealing with cross-bred stock, it is very difficult to get the cinnamon coloured plumage on the males, clears and greens being much the commoner colours. With young hens it is quite different, for the cinnamon colour is reproduced on them in the fifth and sixth generations after the known admission of the brown feather. By the expression, "pink-eye is the hall mark of the variety," it is meant that any bird that is hatched with transparent pink eyes is a true Cinnamon, whether its garb is brown or clear of colour, or the two mixed together, forming what is called "cinnamon-ticked," "pied," or "variegated." Every cinnamon feathered bird has pink eyes, and every green or green marked bird has dark eyes. Some Cinnamon bred birds have quite clear yellow or buff plumage, and some of these may have dark eyes and others pink eyes. Any and all of these pink-eyed birds are Cinnamons, no matter how they have been produced. It is extremely rare for two pink-eyed birds to breed any but pink-eyed youngsters.

GREENS.

Answered by S. HADWIN.

Brother and Sister (G.N.).—I do not advocate the pairing of brother and sister, but if the birds are very large and very well pencilled you might take a nest of them for the purpose of striking or fixing the markings. But you will have better general results by keeping away from such close in-breeding.

ROLLERS.

Answered by F. A. LESTER.

German Roller Fanting (J. Smith).—Your bird has evidently come through his moult very weak, and needs a tonic. Try Parrish's chemical food, 10 drops to each drinker. You do not say anything about your feeding; is it correct? Feed very plainly on 2 parts rape, 1 part canary, with egg food once a week. Is your bird cage infested with red mite? Cover with a white cloth at night, and take it off after daylight next morning. Should you find some, scald the cage in boiling soda and water, and be sure it is thoroughly dry before returning the bird.

Feathers Missing (Puzzled).—Roller cock nearly bare of feathers, and been like it two years! Well, your bird must look a very curious object, and appears to have a very strong constitution. The best thing I can recommend you to do is to lightly anoint him with vaseline. I found this treatment very successful with a bald-headed bird. If, as you say, the egg food caused his feathers to grew again, I should give him it occasionally.

Advice Regarding Breeding (Amateur).—No doubt your hen is a buff; there are not many yellows among Germans. Your cock is also buff, although a little brighter than the hen, which is quite natural owing to the sex. Your procedure up to the present is correct. But is your hen ready? Take her in your hand and blow up her feathers underneath. If she appears fat and bare of feathers up to the breast bone, you may take it she is ready. Give her a little egg food twice a week, and the cock once. As soon as she commences to carry bits of nesting material in her mouth she is ready for the cock to be run in with her. Of course, it is rather early yet, and the present weather is not very helpful. Your birds will breed mostly buffs if you get any young. With the cock an ordinary Hartz Roller, and the hen doubtless of better quality, in any case the youngsters should be as good, if not better, than their father.

General Advice (Canariensis).—Pleased to hear that our advice has been of use. An oval perch about ¾ in. wide is most suitable for Rollers. A good staple diet is 1 part Canary and 2 parts German rape, with egg food once or twice a week. Do not give any other seeds if the bird continues healthy. The enclosed seed is red millet, useless for any Canaries. There is a hook on Rollers, by Albert Rettich, which could be procured through CAGE BIRDS' office for 10d., or 1s. 4d. post free, paper and cloth bound, respectively. Always pleased to help you.

MISCELLANEOUS CANARY QUERIES.

Answered by J. NORTH.

Canary Off Song.—Canary moulted rather earlier than usual last year, and is still losing his feathers. He has gone off song altogether, and is rather loose in his bowels. I gave him sulphate of iron in his drinking water, but he would not drink it. Usual seed and salad diet. I have recently given him a few drops of Parrish's chemical food in his water.—HOLME LEA.

A great many singing birds go off song and occasionally drop feathers. I have generally found this to arise through liver trouble, indicated in the case of your bird by the condition of the bowels. Remedies must be administered with a firm hand, and it will never do to take too much notice of what a bird likes and dislikes. Discontinue the Parrish's chemical food, and get a chemist to mix the following (which should be given in a glass vessel) and give in place of ordinary drinking water:—Sulphate of iron, one scruple; dilute sulphuric acid, 20 drops; sulphate of soda, 2 drachms; distilled water, 1 pint. Diet same as before.

One Cock with Two Hens.—(1) I want to run cock with two hens. If I take him out as soon as the first hen has laid, will she hatch and feed the young by herself? (2) Will dandelion do as green food, and should I supply it while the hen is feeding the young? At what age do I take the young away? The cock that I have is six years old, shall I have to get another one?—T.J.

(1) It would be prudent to give up the idea of running a cock six years old with two hens. This plan has its disadvantages at all times, for it very often happens that the father bird is wanted in two places at once, and such misfortunes happen as the hen forsaking her eggs or chicks, or she plucks their young feathers for the purpose of making another nest. Only such birds should be coupled for breeding as are in prime condition of health; one cock should be run with one hen, in one cage, for one season. Sometimes a hen will do well without the attendance of the cock, will incubate and hatch her eggs and rear her young single-handed, but no one can foretell what a female bird will do under varying circumstances. (2) Dandelion is a splendid salad when the young leaves can be got in the spring, but avoid the large old leaves. Watercress, groundsell, chickweed, and lettuce may also be given while the hen is feeding, but the chicks should not have any salad after they have been taken away, which may be when they are four weeks old. If the six year old cock bird is not in full song he is not suitable for the breeding cage.

Rearing-food.—Is the enclosed sample of patent food suitable for rearing young Canaries from the nest? I have used it since the moult and find the birds do well on it, instead of egg food. Will you tell me its constituents?—J.T.D.

This is a proprietary preparation, and on reference to the makers' advertisement it is noted that it is particularly recommended for rearing young Canaries while they are in the nest, and for their continual sustenance when they get into the flight cages "on their own." It appears to me to be exceedingly well adapted for its purpose, and in conjunction with your endorsement of its value as a food for young birds on the wing, I think you might with confidence extend your use of it to the earlier stages of the nestling Canaries' careers. I cannot, unless you commission me to analyse the sample, tell you exactly what it is made of, but a cursory examination suggests the admixture of some well-made and well-baked biscuit containing farina, sugar, and fat, subsequently crushed, sifted, and blended with a due proportion of dried egg.

BRITISH BIRDS, MULES AND HYBRIDS.

Answered by G. E. WESTON.

"Mule-Canary" (G. W. Andrews).—There is no such thing as a "Mule-Canary." A bird may be a Mule, or it may be a Canary; but it cannot be a Mule-Canary (which signifies half of each), because Mules themselves will not breed—at any rate, have not been bred from up to the present. I think your bird, "with almost black marks on the head, near the eyes, and also on the wings," is unquestionably a Canary pure and simple. To be a genuine Canary, a bird has not necessarily to possess an unstained yellow coat. There are all-green Canaries, just as there are Canaries splashed with dark markings on various parts of their bodies. As a matter of fact, breeders of high-class Canaries seldom pair two perfectly clear birds together, because the use of a marked bird generally improves, or keeps up, the colour in the youngsters they breed. Still, it is a common error to term marked Canaries "Mule-Canaries"; and I suppose, like many other errors, it will live many a long year yet. If your bird is a yellow, mate it with a clear buff hen; if a buff, with a clear yellow hen. Your other question has been answered by the Editor.

Byno-Phosphates (Avis Ornis).—Allen and Hanbury's Byno-Phosphates is not intended to be used so much as a tonic for getting birds into show condition, as a tonic for pulling them together when "off their feed," or run down through a bad moult, or illness, etc. In a sense, like chemical food and similar preparations, it is a food and tonic-medicine combined. You could give it to your birds during the moult, say three times a week, and continue it until they come into hard show condition. Five or six drops may be mixed amongst a teaspoonful of egg-food, or biscuit and milk sop; or a small teaspoonful may be well stirred into two tablespoonfuls of drinking water, using a glass vessel only. The former is the more economical method, though, of course, if the water is placed inside the cages, a very small vessel may be used, and two tablespoonfuls then suffices for several birds.

"Clara."—Your question was answered last week, under initials "C.P." There is nothing for it but to keep the Canaries out of earshot of the Bullfinch.

A "Good Mixture" (D.J.H.).—I have frequently pointed out that there can be no "good mixture" suitable for birds all the year round, without a change or variety. To keep birds in health, one must keep them provided with variety in their diet, and much of this variety is not unconnected with the seasons of the year. Thus one can gather seeding thistles, hard-heads, teazle, chickweed, dandelion, shepherd's purse, groundsel, plantain, etc., only at certain times of the year, and when these times come round, our birds should get a supply of Nature's good things, to keep them up to "concert pitch," and to afford them some change from (and solatium for!) the deadly dull routine of dry, hard seed which they have necessarily to go content with during great part of the year. The feeding of Linnets is fully dealt with in another answer this week, which see. A good stock mixture for Goldfinches now is:—Hemp and teazle, two pints each; canary, one pint; linseed, half-pint; and maw, quarter-pint. If freshly caught, give plenty of niger in addition. Cracked sunflower seed, too, is usually relished, and forms a valuable change. Other "tit-bits"—such as thistle, dandelion, etc.—you can give now and again, as procurable. Canaries only require plain canary seed as their staple diet, with a third part of summer rape added every second day, and a feed of hemp, maw, cracked sunflower, niga, etc. (mixed), once a week—say by way of a Sunday dinner. This treatment will keep them in excellent condition.

Bad and Harsh Feathered Linnet (Gilly).—If you have any red-mite about the bird, it may account for the trouble, and until you shift the pest you cannot well hope for relief. Study CAGE BIRDS' ANNUAL on the point; extended directions are therein given. Assuming red-mite are not present, then see the bird is not hung too near the ceiling, in the hot fumes of gas, etc., or kept too hot near a fire. Lightly spray him every morning with water which has just had the chill taken off, and has been turned just cloudy by the addition of a few spots of Scrubb's Cloudy Ammonia. Don't drown him, or let him hang in a draught afterwards. Feed him well, as advised another querist this week. The best medicine you can offer is a fortnight's course on Parrish's chemical food, adding sufficient to the drinking water (weak

daily) to turn it a medium red in colour, and using a glass vessel for preference. This treatment should pull him together in condition, and stimulate new feathers to put in an appearance and cover up his nakedness. But make certain on the score of red-mite. Many fanciers harbour them on their birds quite unsuspectingly.

Treatment of the Bramblefinch (S. McK.).—In reply to "Pink" and "Regular Reader" last week appeared very full instructions on feeding the Bramblefinch, to which advice I must ask you to kindly refer. I have so many queries to answer I cannot possibly cover the same ground week after week. Readers might save both themselves and me a deal of trouble by thoughtfully referring to recent issues before firing off their problems. Be a good boy in future, Mac; it isna canny on your part to blue two whole bawbies in postage.

Chaffinches Breeding (B.G.).—A pair of Chaffinches has been induced to breed in a large cage. I can assure you that it is a most uncertain business, however, and far more likely to be unsuccessful than it is to be successful. Still, as you say you are "anxious to get a pair to breed," by all means try. It will be most interesting, without a doubt. But don't get disgusted if you breed nothing, and then sell out and go in for mice. Look upon it purely as an experiment, and you ought to get a deal of pleasure out of the attempt, to say nothing of the eclat attaching to a seldom accomplished feat should you succeed. If you count your chickens before they are hatched, however, the result may be a blank, and typify your state of mind. Feed on the lines recommended "Regular Reader" in our last issue.

Breeding in an Aviary (D. Morgan).—You make a great mistake in having your aviary papered inside. If you will take my advice you will strip off all the paper before you turn in any birds, and put a coat or two of very pale blue or green sanitary water paint (or distemper) on the walls. Should you turn in a Norwich cock, he will not rest content with one wife, but will assume the ownership of several of the hens, and mate with them. Keep the pair of Norwich in a breeding cage to themselves. But not hanging on the wall of the outdoor bird room, or the birds flying loose therein will be continually interfering with and disturbing them. Keep them right apart. I don't care to have cock Canaries within earshot even of my muling hens, except under special circumstances, for they only distract their attention from their rightful partners. Your place, 6 ft. 4 in. by 4 ft. 8 in. would hold a dozen hen Canaries, and seven or eight cock Finches comfortably. I do not advise you to turn any hen British birds in. You could put in cock Goldfinches and Linnets with a Greenfinch, Redpoll, Siskin, or Twite, or any of the cock Finches usually employed for muling purposes, just as your own fancy dictates. You will have to be careful when entering the room to see that none of the birds fly out over your head. A double door is the best to have; you could build a sort of lobby, of wood uprights and wire netting, very easily outside your place, and this would effectually prevent any escapes. No artificial heat will be necessary. Turn out the birds at the beginning of March, if the weather is mild and springlike.

Bullfinch-Greenfinch Hybrids (North Country).—The writer of the article you mention was quite correct in saying that the usual mating to produce the Hybrid between the Bullfinch and the Greenfinch was hen Bullie to cock Greenie. The cock Bullfinch is a very uncertain breeder for some reason or other in a cage, so that the last-mentioned way of pairing has come to be generally recognised as the most likely to bring results in its train. It is very interesting to know that you have succeeded by the reverse process of mating; it is quite a rare feat, and deserves putting on record. Having accomplished this, you will indeed be foolish not to try again in the same way, when you may, I hope, be more fortunate with the young, and not get them drowned in a thunderstorm. I quite agree with you that the hen Greenfinch is far more likely to rear her young by her own unaided efforts than is the hen Bullfinch. Some of the latter are all right; but hen Greenies which go to nest invariably turn out good mothers. Your plan of keeping only one pair of would-be Hybrid-breeders in each enclosure is absolutely the best you could pursue, and is far, far more likely to lead to success than having a lot of birds of differing species flying together, as so many fanciers persist in doing. I would point out that you yourself had other birds flying with this particular couple, including a cock Greenfinch. Can you be sure it was the cock Bullfinch who actually fertilised the eggs on this occasion?

Wife for a cock Greenfinch (O. Cogman).—Any good-sized, stout-bodied yellow Norwich hen would make an ideal mate for a large, good-coloured cock Greenfinch. She could be either clear or marked; a self green would not matter a jot. You should breed some good sized, shapely, rich-coloured Mules from this mating, which will make you excellent songsters. Buff hens, of course, can be used, but the resulting progeny never come so deep and bright in colour. A stout Cinnamon hen, or a big-framed but scanty-feathered Crestbred hen, will also make very acceptable mates, getting yellows if possible.

Brass Wire Fronts (N.S.).—I have never seen any brass wire fronts—by which I mean the removable wire-fronts. In any case, it is quite impossible to beat the tinned wire, as ordinarily used; it is in every way suitable. Brass cages, and especially the merely lacquered kind, are likely to be dangerous to birds, owing to verdigris forming on them should they get wet—a thing practically impossible to avoid. If the birds peck off the verdigris (a dangerous irritant poison), the results are likely to be fatal. Many birds, of course, are kept in brass cages without this ever happening; still, the danger is always there, and some birds are more prone than others to go pecking about the wires—Roller Canaries, in particular, are fond of doing so.

Shrub to Nest In (T.L.H.).—Strictly speaking, it is not at all necessary to put a shrub (a living plant) into an aviary for hen British birds to nest in. As likely as not they would ignore it, though quite possibly they might use it. They do some strange things. I myself have fixed up the most secret and snug corners for them to build their homes in, but they only turned up their noses at my contriving, and planted their nests right out in the open, within a very few inches of the wire-netting front. The feminine mind is always a puzzle, all the world over. Therefore you should fix up as many likely spots as possible (one cannot do more), and then leave the birds to go their own sweet way, keeping an eye open, however, for fear two couples should fancy the same site, for a pitched battle is almost certain to result should this happen, and unless one or the other gives way it may become necessary to interfere. I have seen some comical sights in my time, though, the best of all, I think, being two hen Canaries using the same nest at the same time, one sitting on eggs, and the other feeding quite a big baby—an only child. It sounds extraordinary, and I can assure you it looked even more so. There were three (I think) hens and one cock in an indoor aviary. If you want to include a shrub, you cannot do better than follow the advice given—"L.G.S." last week. In addition, hang up nest-boxes in likely corners (or place them on shelves, etc.), and arrange bundles of pea-sticks, or suitable dead branches, here and there about the place. It is a very good plan to get a few old, yet not dilapidated, Blackbird and Thrush nests out of the hedgerows, and stick these about. Many Bullfinch and other hens will gladly re-line and use them. It is possible to get disused "first-round" nests of the above species in the season in plenty of time for use in one's aviaries and cages.

Concerning the Hawfinch.—(1) What is the food for Hawfinch? (2) Are they difficult to keep? (3) What is proper stock cage, also show cage? (4) Are they sometimes colour fed? (5) How can I sex them?—"ATHOS."

(1) The principal food for a caged Hawfinch is sound, plump, white sunflower seed. Sunflower seed which is black, or striped, however, is not bad by any means; still, I prefer white, myself, whenever obtainable. Given this, and a mealworm or two every day or so, the bird asks for little more. The mealworms, however, should be given direct from the fingers; a little patience, and, so great is the bird's love for these squirming creatures, he will take them fearlessly. They are an invaluable agent in steadying a Hawfinch. The bird also appreciates hemp, linseed, canary, oats, and sometimes a little buckwheat, summer rape, small Indian corn, etc. His powerful beak makes short work of beechmast, walnuts, plum and cherry stones, hawthorn, privet, etc., berries and the like. One never need be fast for dainties acceptable to the Hawfinch. Green food they are not particularly keen on, but appreciate a little young lettuce, watercress, chickweed, shepherd's purse, also ripe apple, pear, etc., occasionally. They make an exception in favour of tender green garden peas, of which they are passionately fond, and these are especially good for young birds, given in the pod. They are fond of a bath, so let him have one whenever the weather is suitable. (2) They are not difficult to keep; but they are most difficult to moult, which no doubt accounts for the limited number seen annually on the show bench. (3) Any extra-large box-pattern cage, of the usual type for Finches, is suitable for a stock cage. The show cage should be an enlarged edition of the usual Finch show cage, with inside seed vessel (and water, too, if you like), enamelled inside and wires very dark green. (4) They are sometimes colour fed; and generally spoilt in the process, too. (5) It is quite easy to sex Hawfinches, as a rule. The hen is quite a dingy, ashy-brown compared with her mate, whose plumage is a mixture of rich chestnut and chocolate and cinnamon brown. Young males, however, will deceive the inexperienced. You ask too many questions; three is the editorial limit. You should remember "there are others," as the poet says. Remainder of questions must stand over.

Singing Linnet and its Food.—I want to get a Linnet likely to sing soon. Could you give me any hints? Also explain how best to feed?—"CONTRARY."

For singing purposes you want to go and look out a medium-sized bird, bold in demeanour (not dashing madly about the cage), with big, wide-open, fearless eyes, and tight in plumage—a bird that has "got the jump quickly," as old Linnet men say; that is, hops steadily backwards and forwards without getting on the wires. Such a bird is certain to turn out a singer (if a cock, of course). If he "does a turn" while you are weighing up his merits, then he is doubly certain to. The best kind of cage to keep a Linnet in is that known as the Finch stock cage—box pattern (wired in front only) about 16 by 9 by 10. You will find it pictured and fully described in the ANNUAL for 1906. The treatment to make it sing (assuming it, of course, to be a cock bird) lies in the correct feeding. Go to a good seed shop and get the following mixture, by measure: Canary and teazle, four parts each; summer rape, charlock and linseed, one part each. Give this as a stock food, and vary it with a good pinch of maw or hemp now and again given in a finger-drawer or separate dish; also a little packet Finch mixture, and wild seed mixture, and a few cracked or shelled sunflower seeds. Give plenty of seeding shepherd's purse, chickweed, and groundsel tops, but strip off old, stringy leaves (these do internal damage, there can be no question) giving the young and juicy ones only. While moulting, it is not a bad plan to increase the richness of the stock mixture by including a portion of hemp and maw therein—say one part of the former, and a half-part of the latter. Of the wild seeds, shepherd's purse, our old friend, is the most generally liked by Linnets and many other birds. Then we have plantain, wild mustard, chickweed, groundsel tops, hard-heads, the various thistles, dock, various grass seeds, and gold of pleasure. Here you have a fairly complete list of easily obtainable and easily recognisable wild seeds, and not for Linnets alone, but for all British seed-eaters. "Wild seed mixture," for a feed now and again, you can get sent to your door—and very cheaply, too—by many advertisers who use the columns of CAGE BIRDS.

Siberian Goldfinch and its Treatment.—Am anxious to keep my bird healthy and get him fit for breeding, but have had bad luck with Siberian Goldies. How do you treat them yourself?—"YOUNG FANCIER."

One of your remarks I might well take unkindly, though I don't suppose you mean it that way. Am always glad to help any fancier, young or old, as far as I possibly can. "Keeping things back" is not in my line, however it may be (as you allege) with other "old fanciers." By-the-bye, please don't call me "old"; it can't be justified, even though I *have* acquired a few wrinkles since I started answering these queries. Siberian Goldfinches appreciate the same seeds and delicacies as our British Finch, but need indulging much less freely with fattening, stimulating foods—especially so during hot weather. Most fanciers have experienced those sudden and mysterious departures from this earth which Siberian Finches are so prone to take—well and apparently in fine form one day; stiff and cold on the cage-bottom the next. I believe this is largely due to neglect of the above rule. These Goldies acquire a taste for summer rape during transportation to this country. A good stock mixture now would be hemp, canary and teazle three parts each, summer rape and linseed one part each. Give a little maw and niger frequently, also a good feed of white sunflower seeds (cracked if necessary)—not all at one time, of course, but one or other daily. Thistles, hard-heads, dandelion, flowering groundsel and chickweed, wild seeds, etc., are all good for them, and appreciated. Many Siberians are lost through wrong treatment when first bought, owing to the unfortunate inexperience of the buyer. They are immediately put in a cage with food and water hung outside, consequently they starve or die of thirst, never before having seen a water-hole, much more put their head through one. Food and water should always be put inside to them, and it should be seen they get at the same. Inga (niger) seed is their staple food during importation, and they must have an unlimited supply of this at first. When they have got the taste for sunflower seed (it comes quickly, for they are very fond of it, and it is a grand food for them) gradually wean them off the niger. Should a bird seem to droop at any time, give at once a dose (two, if necessary) of sulphate of soda for one day; as much as will lie on a sixpence dissolved in two tablespoonfuls of water. Follow this with a course of citrate of iron as a tonic, a tiny pinch (just a few granules) dissolved in the same quantity of water. Watch its effects on the bowels; it is constipating when given too strongly. Also, don't give grit freely at first. They will simply "gorge" it; and then comes trouble.

Nests for Hybrid Pairs.—Have not noticed you say anything about nests and nesting materials for Hybrid pairs in cages, etc. Should welcome a hint or two.—G. TRAVERS.

I have from time to time had quite a deal to say on this subject; not recently, though. A small flight, with the nest-box up in a well-shaded corner is the best of all places for breeding Hybrids. A big cage, however (say not less than 3 feet by 18 by 12 inches), is also very good; likewise a double Canary-breeding cage with the centre slide withdrawn. The nest (or nest-box) should be screened in any ease, either with dead broom, gorse, fir, etc., or brown paper fixed over one corner of the cage front. The easiest and best way to provide acceptable nesting material is to go out and collect and store old (but good) Greenfinch, Linnet, etc., nests—in fact, practically any Finch nests—and pull them to pieces when wanted. Thrushes and Blackbirds' nests are all right at a pinch; with the help of a nest-bag, in addition, at all times. Many hen Bullies (and other British hens too) will build in (sort or re-line) an old Blackbird or Thrush nest when nothing else will tempt them, and lay their eggs therein too, seldom dropping them on the floor. A suitably sized sod of clover grass (or turf), something like that given to Larks, with a shallow, cup-shaped depression beaten into it, will also invariably induce them to build thereon. To avoid mould (through damp) a piece of half-inch mesh wire netting should be tacked on to two strips of wood and he fastened in the breeding cage, on a level with the first cross-bar (and consequently the perches) from back to front. The piece of netting will, of course, be cut to size according to the depth of the cage. The sod should be placed on this wire netting platform. Some twigs, etc., can be twisted into the meshes so as to form at the front an effective and natural-looking screen. The old Thrush's or Blackbird's nest could be slung up in the same way; in fact, there are many little dodges one can think out. In a flight (small aviary) hen Bullies will sometimes favour a wood nest-box, and sometimes an old nest; while I have known many decline both, and build on shelves, etc.—several actually on the floor. Wicker (Roller Canary) travelling cages, with the front and inside fitments knocked out, are also often favoured.

Thrush Out of Condition.—I have a Thrush which has not got any feathers on head or neck. It started to moult in August. It is lively, but sings only very quietly. Fed on hemp seed and bread. Third season bird. What can I do?—C.A.L.

If your Thrush has stood a diet of hemp seed and bread for three seasons, he must have possessed a healthy constitution in the first place. I expect, however, he has not had sufficient vitality left to shake off the effects of the last moult. If you feed him properly, as outlined below, he should come into condition and full song. Mix some hemp seed and bread with the food at first, gradually leaving it off, as many birds detest a sudden and complete change of diet, even when for the better. He must have some "greenmeat" mixed amongst his food; also be given live insects frequently. Get the game meal without grit; if you have any difficulty in doing so, substitute crushed puppy cakes. Let the bird bathe on suitable dry days. Here is the correct method of feeding: Go to a good bird-food vendor, and get mixed, by measure, game or pheasant meal, six parts; ants' eggs, dried flies, and meat meal, two parts each. Damp the quantity required for use with grated raw carrot, or finely chopped tender dandelion, chickweed, lettuce, watercress, etc., according to season, or cold boiled potato, or even a little ripe fruit, varying it as much as possible. Give a few mealworms daily, and any live foods you can get in season—for instance, smooth caterpillars, flies, spiders, wasp-grub, gentles, earwigs, beetles, cockroaches, and the like. A little ripe fruit and various berries, sweet apple, pear, split grapes, orange, red and white currants, banana, etc., straw, rasp, black, privet, elder, haw, etc., berries are also relished. You need never want for variety. Into the above stock food a proportion of preserved yolk of egg (flake) should be well mixed now and again, or a hard-boiled egg; or a little finely-scraped raw lean meat makes a nice change at times, but should not be overdone. A few snails boiled and chopped up are also greatly relished, and are fine things to induce the birds to sing. Immerse them in boiling hot water for a time. A small half-teaspoonful of tasteless cod-liver oil mixed into the daily food supply will no doubt greatly assist the bird to pull round.

Sunflower Seed (Charlie).—In my opinion sunflower seed is a very excellent and wholesome food for all seed-eating birds, either whole, for those who can shell it, or lightly-cracked, for those which find it too large to be negotiated otherwise. All seed-eaters are fond of it, once they have tasted it. Larks, Pipits, and similar semi-graineating birds, relish it very much when shelled and just "kibbled" (broken up), either given alone or placed on top of their soft food. I get through a large quantity of sunflower seed practically weekly, and never have any but good results accrue from its use. Of course, it must not be given so freely to some birds as to others. Greenfinches, Crossbills, and Hawfinches, for instance, will hardly do really well unless they have it in plenty; Chaffinches and Bramblefinches should have it fairly freely; Goldfinches, Bullfinches, and other small Finches should be given a frequent feed. For growing young birds (especially Hybrids) it is excellent, not only being a nutritious food, but providing them with something to exercise their beaks on, and pass away spare moments which otherwise would very likely be devoted to pecking at their companions' plumage—everyone knows how mischievous young Mules can be in this latter respect. For adult Hybrids, of whatever variety, a feed of sunflower seed daily is very good; the larger varieties (Bullfinch or Greenfinch cross, for instance) may have a more liberal supply.

Sex of the Nightingale (J. Bathgate).—There is not sufficient difference between the plumage of the male and female Nightingale to enable any inexperienced fancier to tell t'other from which. Even a very old Nightingale fancier, I believe, would hesitate to wager that he would accurately sex any dozen Nightingales put down in front of him. Still, he would no doubt hit the bull's-eye in the great majority of instances. He is not guided so much by colour of plumage, however, as by the size, shape, and actions of the bird; and a knowledge of these distinctions, of course, cannot be learned from paper—they are only picked up through a long course of keeping many specimens of the species. Briefly, the cock is generally somewhat the larger bird (though I have seen many small males and many large females), has a bolder look and action (on the same lines as the difference seen between cock and hen Canaries), and is larger and flatter in head and bill when viewed in profile. Thus a good-coloured, sprightly, bold bird, with a long flat head, is likely to be a cock.

Feeding a Bullfinch (C. Williams).—Yes; the seed diet recommended "Regular Reader" last week for a Chaffinch will suit a Bullfinch admirably. Don't overdo the sunflower, however. A pinch of the other usual seeds (hemp, etc.) should be given for a treat now and again. The green foods mentioned will do admirably; the fairly free supply of insect food is not needed, however, though a mealworm, etc., occasionally is usually relished. Bullies are also fond of berries, such as privet, haw, and blackberries.

Wild Seeds (J. Wyke).—There is not much variety in the sample of screenings from the thresher which you enclose; still, it is quite good and fit for use with British seed-eaters, to pick over as a special treat. It is mainly "bird-rape," a term which covers many practically undifferentiable members of the Brassica family (turnip, or "winter rape," charlock, etc.), with dock and one or two grass seeds.

Thrush in Show Condition (Briggins).—Your question is a peculiar one. How on earth I am to describe a Song Thrush "when in show condition" I can't imagine; my most fluent pen turned pale at the bare idea of trying. Why not visit a good show and look over the Thrushes staged thereat? At almost all really large exhibitions a good specimen may be seen. Briefly, its feathers must sit very closely—making the bird look as though modelled out of wax—and the surface of the plumage should shine like your own hair does (or ought to) when you visit your best girl, after it has had a good dressing of the most corruscating brilliantine money can buy. You should feed as advised another querist this week. The only sure way to sex song Thrushes is to hear them sing. By the way, many exhibition Thrushes have a little colour-feed given them when going through the moult.

Wild Seeds (L.H.C.).—It looks a very nice "wild-seed" mixture indeed, and Linnets and Chaffinches will both pick it over with relish. But you certainly should not mix it among their other seeds; give always in a separate dish. I agree with you that most wild-seed mixtures bear a strong family likeness one to the other; that is inevitable, however.

"Thistle" Seed (H.B.).—The "thistle" seed you enclose is not thistle seed at all—that is to say, it is not the seed of the field thistle, which is what you want to feed birds on. The latter is a small, ashy-white seed; about one-third the size of that you send. Take my advice, and throw the "thistle" seed you now have into the dust-bin.

Concerning Skylarks (Skylarks).—All the information you now ask of me was given last week in reply to "J. Saunders," and to that answer I must ask you to kindly refer. Skylarks are both long-lived and free singers. The small room you mention would do admirably for keeping Larks in. The sample of food you enclose is very good, and should answer splendidly if prepared in the manner advised by me. To tame the birds, hang them breast high in a room (not at the window), where people are constantly moving about. But avoid hasty movements close to the cage, and talk to the birds gently and kindly whenever near, also offering them mealworms out of your fingers. It takes much time and patience to steady some birds down.

What Sort of Young? (Redpoll).—This is a curious kind of question. I don't pretend to be able to forecast the result of pairing two given birds together—it would puzzle Old Moore and Zadkiel combined to do so. I can go thus far, however: tell you that if you mate a cock Redpoll to a clear Yorkshire hen you will, if you have luck, breed some sprightly little Mules, free and sweet songsters. If the hen is a yellow, some of the young are sure to be rich (deep) in colour, though with no particular colour contrasts.

Mate for cock Chaffinch (J.A.H.).—Taking a line through the Hybrids known to have been produced, it would seem as though a hen Bramblefinch would be the most likely mate for your cock Chaffinch. The cock Chaffinch has but very seldom been successfully bred with so far as Hybrids are concerned. Possibly it may be that he has not had a wide enough trial; any way, young have been bred and reared between a pair of Chaffinches kept in a large cage. You will gather from this that any attempt to breed Hybrids from your Chaffinch will be merely in the nature of an experiment—that is to say, any result will be far from a certainty. Try any hen Finch you please; say a Bullfinch. The Chaffinch's method of courtship is peculiar, and if indulged in it may not commend itself to hens outside his own species.

Bullfinch Ailing (W.M.).—This bird needs a complete change of diet. See reply to another querist this week as regards general feeding. Let the bird have as much hemp, sunflower, maw, and teazle seeds as it will eat; also try it with a little Osborne biscuit steeped in new milk, squeezed as dry as possible, and well sprinkled with maw seed, offering it fresh frequently. Put in every two tablespoonfuls of drinking water, fresh daily, half a teaspoonful of Parrish's chemical food, obtainable from any chemist. Offer Bullie a mealworm, and try and induce him to eat it (pin it down to a perch, if necessary, just inside the wires). Let him have as many daily as he cares to eat. It is to the change of diet you must pin your hopes of recovery.

What Bird? (Y.O.).—Your description is but a meagre one; still, I have little hesitation in saying that the bird you have is a Yellowhammer, in all probability a hen. If there is any trace of yellow on the bird's head, you can take it for certain this is the correct species. The fact that it is partial only to canary seed goes to confirm me in my opinion, for canary forms the staple diet of practically the whole of the Bunting family when kept in captivity. The bird must have a few mealworms occasionally; also flies, and other suitable insect life, and spiders, as obtainable.

How Birds Feed (Absolutely).—I am certainly not prepared to say what British birds feed from the crop and what direct from the bill. I have a wife and family to keep, and this unfortunately precludes me from indulging in the compilation of such a list. I should need no other work for a month. Broadly speaking, the exclusively insectivorous birds feed direct from the bill, while the Finch-like birds known to fanciers regurgitate food from the crop; some of the latter—the Chaffinch, for instance—also feed direct from the bill when giving their young live (insect) food, of which they use no inconsiderable quantity. Your reference to "feeding like a pigeon" I hardly understand. Are you referring to the well-known habit of the young of having the food "pumped" into them, as it were? I believe this taking of the beak within

the beak, so to speak, is a peculiarity found solely in the Pigeon-like birds. If I can add anything to the above information, I will do so next week. Most male birds feed the hen—it is a sort of love pledge, I presume—just about the time serious courtship commences.

Linnet Constipated (R.A.J.E.).—Get a penny-worth of sulphate of soda from a chemist, dissolve as much as will lie on a shilling in two tablespoons-of water, and give the bird the mixture to drink. Leave it in the cage for about six hours only; then replace it with plain water. Give another dose, but only half the above strength, next morning if it seems needed. Let the bird have some green food; see other replies this week. If the feathers round the vent are clogged with excreta, gently wash them clean with warm water, taking care not to unduly wet the bird.

Getting Goldfinch in Breeding Condition (B.L.).—If you feed your Goldfinch as advised "Young Fancier" this week, he will come into breeding condition all right. You must look out for early tender dandelion leaves and the flowering and seeding heads, and give the bird a free supply, seeing they are never in a frosted condition when offered; also give a flowering groundsel top or two daily. The dandelion is invaluable as a "conditioner" for breeding birds. For early supplies, look on sheltered banks (railway embankments for instance) which face south. Pair your birds when they give evidence of being in breeding condition; it is useless doing so before. The Goldie should be in full vigorous song; if his beak is clear (free from dark streak at the tip of the upper mandible) so much the better.

Goldfinch with Two Hens (Dock).—Goldfinches are frequently run with two hens, and there is no reason, so far as I know, why yours should not attend to a couple of wives. When he has sent one of them to nest, part him off from her, and put him in with the other (providing she is ready). Take him away when the latter gocs to nest, and keep him in readiness to be popped along with No. 1 again in due course. If both hens want to nest at the same time, let him spend half the day with one and half with the other.

Hybrids from Foreign Finches in British Classes (Hybrid).—On the face of it it does seem, of course, that Hybrids bred from a Siberian cock Goldfinch and a Siberian hen Bullfinch, ought to compete in the class for Foreign-bird Hybrids at the forthcoming Crystal Palace Show. It is pretty certain, however, we shall not see any therein. They will go in the class headed "A.V. Hybrid between two British Birds." It certainly is a curious, not to say knotty, point. But controversial matters of this kind do not concern me in this column, so I pass no opinion. What about the dark Mules bred from Siberian Goldfinch and hen Canary? Of course, the judge is certain to award such specimens prizes, and I don't see how he could do otherwise. How is he to discriminate?

Bullfinch Wheezing (E.M.L.B.)—If your bird has a touch of cold, you cannot do better than try our Mr. North's bronchial syrup, 1 ounce each of glycerine, ipecacuanha wine, and oxymel of squills, mixed. Put half-a-teaspoonful in every two tablespoonfuls of drinking water. Keep the bird out of draughts, and see if you can get him to eat a little biscuit and milk-sop daily, as advised another querist this week.

Thrush Wheezing (Constant Reader).—Your Thrush has evidently a severe cold. Keep it out of draughts, and try a lengthy course of the bronchial syrup advised "E.M.L.B." this week. Well mix a a small half-teaspoonful of tasteless cod-liver oil with its daily soft food.

Sexing House Moulted Redpolls (S.P.).—It is next to impossible to accurately sex house moulted Redpolls, except, of course, by hearing a bird in full song, this, naturally, being a male. You can simply go for the boldest, best-coloured bird, with the deepest-coloured black pencilling and markings.

Siskin's Show Cage (East Ham).—A show cage five inches from front to back should be of ample depth for any Siskin. If you do not like dark green enamel for the wires and inside woodwork, you cannot beat a very pale blue. Some exhibitors use very small show cages (about 10 by 9 by 4) for Siskins and Redpolls.

Breeding Hybrids (G.W.D.).—(1) I should say it is most certainly possible to breed an exhibition Hybrid from a Siberian Goldfinch mated to a British hen Bullie. Why not? (2) It is a generally accepted fact that Siberian Goldies are not such ready breeders, taken on the whole, as their British brethren. This failing, however, is well compensated for by the superiority of whatever Hybrids one does succeed in getting from them. Besides, many Siberians are just as free at egg-filling as any British Goldies. I myself once bought from a friend a bird which had bred for four seasons (his owner, I fancy, thought him about played out) used him very successfully for two more, then turned him over to a lady friend, who also got Mules from him. This bird, at any rate, showed that some Siberians will live a long enough time in captivity. All Hybrids are not at their best, from an exhibition point of view, until their second season; most make a still further improvement at their third moult. There is no "age limit," however; you can show a Hybrid at any age you like, however young. It is a great mistake, though, to tax baby birds by sending them to shows; give them a chance to mature.

Blackbird Out of Condition (J.B.).—A room in which clothes are dried cannot be a good one in which to keep birds. Put your Blackie in a more suitable spot when the warmer weather comes. Your feeding, too, strikes me as somewhat poor. Get the bird on to the diet advised "C.A.L." this week. Mix as much flowers of sulphur as will lie on a sixpence into its soft food daily for a week or ten days. If the bird will let you catch it gently anoint the bare place for a few days with a spot or two of paraffin or a little hazeline cream. But, above all, improve its diet.

A Mixture (J.D.).—It is best to leave the cock Goldie and hen Bullfinch together right through the season. But probably the latter would not mind you removing her lord and master for a few hours a day, as necessary, while he fertilised the eggs of the hen Canary. You certainly should not keep all three birds together in one cage. Some hen Bullies will feed their young when in a cage; but not many, I am afraid. Even when they start to do so, the fancier has generally to finish off their progeny by hand-feeding them—else lose them from starvation. The breeder has to scheme matters so that he has a hen Canary going to nest somewhere close on the time the Bullie hen is likely to lay her eggs. This is a problem every fancier has to work out for himself.

Thrush Mopy (No Name).—Read replies to "Constant Reader" and "C.A.L." this week, and act on the advice given those querists.

Mate for Hen Redpoll (Querist.).—I should not mate a cock Canary with hen Redpoll. The resulting progeny, if any, would be of little value, I feel sure. Far better get a medium-sized, rich-coloured cock Goldfinch for her husband; or a rich-coloured Siskin. Any Hybrids from these couples would be of fair value (the cocks, that is), and very pretty and engaging to boot.

Pairing Up Stock (Chatsworth).—Of course, the ideal Greenfinch for both muling and showing is a very large jonque (yellow). But such are scarce. If I had a very big mealy Greenfinch and a medium-sized jonque, and both were stout, well-proportioned birds, I should send them —the two— out, for one or the other (and possibly both) would be almost certain to score. You must decide for yourself whether you will use the big buffs or smaller jonques for Muling, as, without seeing them, I have no chance of determining their relative size. I should be inclined to give the yellows preference, unless they are very small. You could put a big buff with a rich-coloured (chocolate-brown) hen Bullfinch, and any progeny would carry plenty of colour. There is an "element of chance," as you put it, about all Hybrid-breeding; it will be there just the same if you put the Siberian cock Goldie with a hen Bullie. Thanks for your invitation. The next time I am holidaying in your district I will certainly look you up.

A Heap of Questions (P.J.W.).—You will find the food for Goldfinches given in replies to other querists this week; also hints on getting them into "breeding condition." The necessary features in a good Muling Goldfinch are size and richness of colour. "White-legged birds" indicates specimens which have been house-moulted, and, in consequence, are (or should be) steady and well-domesticated, valuable points in muling Britishers. Neither breeding Goldfinches nor Linnets care one jot, as a rule, whether their Canary mates are clear, or marked, or all green. You cannot beat a stoutly-built yellow Norwich hen for producing nice singing Mules. Inga, niger, and niga, are one and the same seed. The term niger is the correct one; or, rather, the most widely used, for probably nigra will be the only strictly correct way of spelling it—meaning black.

FOREIGN BIRDS.

Answered by WESLEY T. PAGE, F.Z.S., M.B.N.H.S.

Diet for Grey Parrot.—My bird eats freely of seed and boiled maize, but will not touch fruit, grit, or cuttlefish. Will it take to these in time? It had cut wings when it reached me; some have moulted out; should the balance be pulled out? How often must I give Dinneford's magnesia and Parrish's chemical food?—BIRMINGHAM.

Your bird will do well on the diet it is taking, though I do not believe in too much boiled maize for these birds. I should gradually wean it from this as soon as possible; do not give it separately, put it on the top of its seed mixture. An adult bird is far better without it, though with young birds it must be given regularly till you have ascertained that they are eating sufficient of the dry seed mixture. Keep a piece of cuttlefish hanging in its cage; it will take to it ultimately. Crush a little of same to about the size of peas, and mix this with its seed mixture. As regards fruit, if you offer it a little of same when you are eating it yourself it will soon take to it; I have found Parrots especially like and call for what you are yourself taking. Magnesia should only be given as necessary to keep the bowels moving freely, not loose, and Parrish's chemical food is a tonic, especially useful during the moult, but do not give drugs to a bird unless it is out of condition.

Budgerigar and Canary Hybrid.—Would it be possible to pair a male Budgerigar with a green hen Canary?—DAN O'CONNOR.

There is no prospect of such an union coming off. The Budgerigar and the Canary are ready to chum up with any odd companion in their enclosure, if they be without a mate of their own kind; but when such chumminess exists it usually ends in disaster for the unlucky Finch. The Budgerigar is a romper, and has a beak, etc., of quite different proportions and strength to that of a Finch, so that without any maliciousness on the Budgerigar's part, such friendships mostly spell broken legs or wings, if nothing worse, for the poor Canary, etc.

Outdoor Aviary.—The aviary is 16 ft. long, 7½ ft. high, and 5 ft. wide, covered in with ½ in. mesh netting. Enclosed is a list of the birds I have in it, and also a list of the birds I have indoors. I should like to add to these pairs of Pekin Robins, Cut-throats, and White Javas. Can you recommend any others, and also advise me how to proceed so as to get best breeding results?—L.A.F.

Your aviary should give you much pleasure and interest, and you should have good breeding results in same. Put up as many husks and nest boxes as you can, so that the birds in using them will not intrude too much on one another. To this end separate the husks and boxes by twiggy branches. Sow your open flight with grass, oats, rape, canary, etc., and give regular supplies of grass in flower, chickweed, and groundsel heads when obtainable; green food forms an important part of the diet of young British and foreign Finches, etc. Gouldian Finches are not tolerant of their species in captivity, and I cannot advise you to put more than one pair each of Black and Red-headed Gouldians. If you want breeding results do not put in more pairs than there are feet frontage to the aviary, say the following pairs: Red and Black-headed Gouldians, Zebra, Rufus-tailed, Long-tailed Grassfinches, Cut-throats, Silverbills, White Java Sparrows, Common and Green Avadavats, Diamond Doves, British Gold and Bullfinches. Do not put in Redpolls or Siskins; they are mischievous and interfere with their fellow captives' nesting arrangements. You can put in Pekin Robins, but they are rather fond of robbing the nests of other birds and feasting on their eggs. You would find a pair of small Quails—say the Chinese—a pleasing and interesting contrast to the other birds. Note.—The Quails' wings should be cut for the first year.

Making Use of Means.—Young African Parrot lay on bottom of cage the morning after it reached me, so I looked through CAGE BIRDS' "Queries," and doctored it as advised to others. It is now like a new bird, and healthy and fine. It growls when I go near it; how can I tame it and teach it to talk?—H.E.S.

Your promptitude in looking up past queries possibly saved your bird's life. I have a very tame Hawk-headed Parrot I can simply do anything with; yet this bird gives a low growl whenever there is a knock at the door, or it is disturbed by any sudden movement or noise, even when it is being nursed. I can only suggest that one individual should attend to its wants for a time, and that when in the vicinity of its cage, sudden or startling movements should be avoided, and that the replenishing of seed and water hoppers and cleaning of cages should be done in as quiet a manner as possible. If your bird is near a window, and the road a busy one, it would be well to stretch a piece of muslin across, or put a screen of some sort round half its cage, so as to somewhat obscure the outlook till the bird becomes thoroughly used to its quarters. The only way to teach a Parrot to talk is to repeat to it a word or two, and keep at these until they are thoroughly learned; then start on something fresh. Correct diet is given in this issue, see reply to "W. W. Ball."

Java Sparrows.—(1) What is their food and treatment? What other small birds can I put with them for breeding purposes? (2) I have a large wire cage, will that do for breeding?—E.E.G.N.

(1) Canary, white and spray millet seeds, a little rice in the husk, grit, green food, cuttlefish, and water for drinking and bathing. These are hardy and robust birds, but their cage must not stand in a draughty place, nor yet where any wind can blow directly into it, thus a window is a bad position in which to stand cages. Foreign birds that will breed in cages are best kept one pair in each cage; tho most likely to breed in a really large cage with the Javas would be Zebra or Ribbon Finches. (2) A breeding cage should be of the box type, and for Foreigners the minimum size should be 20 by 12 by 18 in. high. The large wire cage would make a good flight cage for any young birds you rear, when they could fend for themselves. You could use it as a breeding cage by putting a screen of some kind round one long side and the two ends.

Oryx Weaver.—Is my bird a true Oryx? I have enclosed two rough sketches. Fig 1 showing colour areas of Oryx as I believe them to be. Fig 2 showing colour areas of my bird. It is not an Orango Bishop, being too large. Is it a Crimson Crowned Weaver? Will it be safe to put it with Javas, Spice Birds, etc., in an outdoor aviary 16 ft. by 12 ft.?—PLOCEUS.

You are quite in error as to the orange red extending to the base of the upper mandible in the Grenadier Weaver; in fact Fig. 2, which you say shows the colour areas of your bird is that of a typical Grenadier Weaver. In the Grenadier Weaver the black extends from the base of the upper mandible to well past the middle of the crown, while with the Crimson-crowned Weaver, as its name indicates, the crown is fiery orange-red, there being only a narrow band of black at the base of its upper mandible. The brown flights and tail also point to your bird being a true P. Oryx, the flights and tail of the Crimson-crowned being black; again the latter is about the same size as the Orange Bishop. There can be no doubt at all, taking into consideration size, etc., but that you have a young specimen of the Grenadier Weaver. With this species the intensity of the colouring increases with age, likewise the areas of fiery orange-red in its plumage. To sum up, a young bird donning nuptial plumage for the first time would show larger areas of black than a bird several years old; and this quite apart from the variation common to all species.

What Birds?—They are a little larger than Passerine Parrakeets and somewhat similar in shape. I have roughly coloured a print of a Lovebird, and enclose it herewith.—SHEFFIELD.

Your birds certainly are not Blue-crowned Conures, nor yet either of the others described in my previous reply; neither does your sketch fit any of the species described and figured in books I have by me, and indisposition prevented me going over to the British Museum and comparing your figure with the skins there. It appears to me to be some rare species of Lovebird (of which there are a number in South America), of which only one species I believe has been imported alive to this country. I hope to give you the information you require in our next issue.

Birds for Aviary.—British birds named I shall put in as soon as flight is ready. Should I get the Foreigners now, and keep them in cage till May? Is there any other name for the Grey Cardinal? Which is the best species of Cowbird to get? How many hens to one cock Canary could I put in.—J. C.

Keep your British birds in a cold room till you are ready to turn them out; if you keep them in a room in which a fire is burning, you will have to keep them there till May. See that your cage is stood or hung out of reach of draught. I should get the Foreigners as you see them advertised—that is, according to your cage accomodation; but do not over-crowd; the temperature of your living room will suffice for them. The Grey Cardinal is sometimes called the Red Crested, and also the White-breasted Cardinal; the latter name is very misleading, as it would apply to several species. Cowbirds are rather wild at first, but will not be unduly so in your aviary; the Silky Cowbird is the more commonly imported, and consequently cheapest, species; it is a handsome bird. But the Ruddy-shouldered and the Yellow-shouldered, also the Bay-winged Cowbirds, are extra-fine birds, worth about 30s. a pair; but mostly only males come to hand. You could put in two hen Canaries to each male. Hope you will have good luck with your aviary. Do not put in the birds till paint is quite dry.

Breeding Budgerigars in Cage.—I have an all-wire cage, 24 by 16 by 21 inches high, and a box-cage, 3ft. by 10in. by 18in. high. Which would be the best to use? Am I likely to find them more trouble than Canaries?—H. GREEN.

Budgerigars are a robust and hardy species, and will do well in your cold-room, providing they are out of the reach of draught. The box-cage will be far better than the wire cage; put up a couple of husks. Diet as advised regularly in this column, and again in this issue. You will find these birds far less trouble than Canaries; they require no soft food, and they rear their young without fuss or bother, and then clean out their husk and set about hatching out another brood. Keep a piece of cuttlefish in the cage, and during the frosty weather let them have a leaf of tender lettuce every other day; but as soon as you can get it free from frost, let them have a good supply of grass in flower. Crushed egg shells from your table will help to keep egg-binding in check.

Budgerigars.—Can I do anything to bring them into breeding condition? Will change of cage at this time prejudice their breeding?—E. G. W.

Unless you notice your birds are a little out of sorts (when you might give a little Parrish's Chemical Food), I should not attempt any forcing, but treat them as advised to other correspondents in this issue. It will be far better for the birds and for their young also, if they do not begin nesting before April at the earliest. The change of cage will be better for them in every way, as these active and interesting birds cannot very well have too much room in which to disport themselves; it will not in any way defer their breeding season; there is ample time for them to settle down before the light and warm weather comes round.

Cutthroats.—This is my first attempt with Foreigners. Please give food and treatment for Cutthroats?—A. G. BEESTON.

You are sure to be pleased and interested in your new venture, and I trust you will have good luck with them. You did quite right to give them the aperient. Once these birds are acclimatised, they are as hardy as our native Sparrows and can be kept out of doors all the year round. They were the first Foreign birds I succeeded in breeding in the "long ago," and they are favourites with me still. They should breed with you, but, being late breeders in this country, will probably not do so till July, or even a little later. I have had young hatch out in November, and develop into fine birds. These birds are the better for a little insect food (though they will do without), and for a couple of mealworms each, every other day; as soon as the weather permits, green fly any any kind of plant bugs may be given instead. Diet: Canary, white and spray millet; a few ants' eggs, scattered in sand tray; green food, cuttlefish, crushed egg shells, grit and water for drinking and bathing. When they are rearing young, a little soft food mixture should be given. Your warm room will be the better place to keep them in till the end of March; then they should do well in your bird-room.

Tui Parrakeet.—Please give size, also treatment for these birds; and are they noisy?—F. C. D.

The total length of the Tui is 6¾ in., that of the Tovi bein 7¾ in. They must be kept in a warmish (not hot) situation for their first six months in this country, and always must be kept strictly out of draught. Canary seed must be their staple diet, with such ripe fruit and green food as they will take. I strongly favour a fresh and tender leaf of lettuce at all seasons, as green feed for all Parrots and Parrakeets. You will find the Tui has a more pleasant voice than the Orange-flanked, and it is more moderate in its use of it. Do not give hemp seed to these birds, or there is a possibility of their becoming over-fat in a cage, and consequently liable to fits. Be very quiet when attending to it at first; it will then soon become tame and permit you to handle it as you please. However, they have a very rapid flight, and are apt to dart away; so see that your windows are closed (at first at any rate) when you have it out of cage.

Australian Grey Parrot.—My bird supposed to be twelve months old. (1) How soon should it talk? (2) What is its proper food? (3) Is it right for it to grind its bill a good deal?—H. C. F.

Your Australian Parrot is the Australian rose-breasted Cockatoo (Cacatua roseicapilla). It is a hardy and robust species, and the temperature of any living-room will be ample for it; but it must not be placed in a draught. They bear a good reputation for power of speech in their native country, but in this country tho majority do not accomplish much in this respect; however, several good talkers have been noted in our pages recently, so that, if you persevere and carefully train your bird, there is no reason why it should not become a good talker also. The only method is constant repetition of what you want it to learn; one thing at a time. (2) A seed mixture of canary, small Indian corn, oats, hemp, sunflower, dari and wheat in equal parts. This is the staple diet, with daily supplies of green food, ripe fruit, grit, cuttlefish and water. Vary this by giving a little at odd times of boiled potato, nuts, plain biscuit and raw carrot. (3) I incline to the opinion that this habit is characteristic of many species. My Hawk-head, in perfect condition and health, often indulges therein. Unless it is accompanied by some other unpromising symptom, you need not trouble about it.

Foreign Finches.—Please describe (1) Silverbills, (2) Comhassous, (3) Paradise Whydahs, (4) Bengalese, (5) Madagascar Weavers?—"FANCIER."

(1) A slender and elegantly-formed bird, of soft pale brown, with wings and tail of dark brown. The Indian variety is distinguished by its white rump and upper tail coverts; the sides of its face are also whitish. It has a pleasing little song; 3s. 6d. to 4s. 6d. a pair. (2) The male, in breeding plumage, is black, with a steel blue or greenish sheen; at other times it resembles the female, which is a plain brown bird all the year round; 4s. 6d. to 5s. 6d. per pair. (3) Male in breeding plumage Head, throat, back, shoulders, wing coverts, tail and thighs, glossy black; back and sides of neck and breast, ruddy-chestnut; rump, white; tail 6 to 13 inches long, according to age. Female: Reddish brown above, with blackish shaft streaks; head, sandy buff, with black eye streaks; under parts, brownish buff. In winter plumage, the male resembles the female, but the markings of his plumage are more decided, and a little richer in tone. 7s. 6d. to 10s. a pair. (4) Bengalese. These are in shape somewhat like a small Sparrow. There are three varieties, viz.: pure white, white and fawn, and white and chocolate. The colour areas vary a good bit with these birds, scarcely any two being alike in this respect. The pure white is worth 8s. 6d. to 10s., the others 3s. 6d. to 5s. a pair. (5) The male in breeding plumage is principally intense crimson in colour, with dark, olive-brown wings and tail. The female is an olive-brown bird, with darker shaft streaks, lighter on the under parts. In winter plumage the male much resembles her. Price 7s. 6d. to 10s. a pair.

Rosella or Pennant.—I am told my bird is a Pennant; I enclose description. Can you tell me its sex? What is it worth, and what is the correct diet?—"PENNANT."

Your description is that of the Pennant Parrakeet. Its value is from 20s. to 30s., according to condition. The sexes are only to be distinguished by comparison. The colouring of the plumage is the same, but when comparing adult birds, it will be seen that the plumage of the female is less vivid on the upper parts, and also on the head; her head is also slightly smaller and rounder in form than that of the male. She is mostly a noticeably smaller bird than her mate. In its native wilds it feeds upon berries, the seeds of grasses, and undoubtedly insects, caterpillars, etc. In captivity it should have a mixture of two parts canary and one part each oats, hemp, dari and sunflower seeds; green food, ripe fruit, grit, cuttlefish, etc. Once acclimatised, it is a hardy, robust, and long-lived bird, and only needs protection from draught.

Grey Parrot and Chemical Food.—I want to give my bird Chemical Food, but I am told this will purge it. It is quite loose enough already.—"IGNORANT."

Chemical Food will not purge the bird, but will act somewhat as check thereto. You do not say how you are dieting the bird, but the correct diet is given in reply to other correspondents in this issue: feed yours accordingly. For one day only, put six drops of tasteless castor oil on a piece of sponge-cake, plain biscuit, or other absorbent food that the bird will eat. Make its drinking water every other day the colour of pale port with the Chemical Food, using only a crock or glass drinking-vessel while giving this. Let the bird have as much cuttlefish as it will eat. Keep it warm, quiet, and out of draught.

Cage for Budgerigars (T.J.).—The minimum size of such a cage should be 24 by 16 by 8 inches high; but a cage 3 feet long, with other dimensions as above, would be far better, and more likely to lead to successful breeding of healthy stock. To produce such, a moderate amount of exercise must be provided for. I prefer the pure box type to any other, though a cage having half the top wire netting and half covered in enables you to see the birds better, and also secures sufficient retirement

Continued on page 109.

THE CRYSTAL PALACE.

FORTY-EIGHTH GREAT ANNUAL NATIONAL CAGE BIRD SHOW.

As the majority of our readers will be aware, the great annual function at the Sydenham "Glass house" is due to be held on Friday, Saturday, Monday, and Tuesday, February 15th, 16th, 18th, and 19th, 1907, inclusive. The Show will open at 3 o'clock on the Friday, and will close on Tuesday, at 4 p.m. On the Friday, Saturday, and Monday the time of closing is from 9.30 to 10 p.m. On the Saturday, Monday, and Tuesday the exhibition is opened at 10 a.m.

The Show at the Palace will be under the solo management of Mr. J. W. Ramsden, 10, Heron Road, Herne Hill, S.E., who will accept orders for stalls and dispatch all birds at close of Show. Letters for Mr. Ramsden should be addressed direct to the Crystal Palace on the days of the Show. Mr. H. Lambert Brown, 64, Manor Park, Lee, S.E., will dispatch tickets, labels, etc., also pay prize and sale monies.

The usual Judges' Luncheon will be held in the Grill Room on February 15th. Covers at 2 o'clock. Tickets 3s. each. Tickets for exhibitors and friends will be supplied by the Show manager on application.

Result of Judging.

Telegrams or letters asking for result of judging cannot be answered by the authorities. Under these circumstances CAGE BIRDS will be pleased to supply exhibitors with the result in any class upon compliance with the following rules:—

1. Fully stamped (prepaid) post-cards, letters, or telegraph forms must reach us, at 154, Fleet Street, not later than February 12th.

We will do our best to despatch as soon as judging permits. Any sent to the Palace direct will be treated last.

2. The number of each exhibit and number of class must be stated, and spaces left blank for awards. For instance:—Jones, 15, Aberystwyth Terrace, Swansea.—Class 30, No. 259 ——; Class 31, No. 263 ——.

3 All applicants for results at the Palace must write "Result" on top left-hand corner of the envelope.

CAGE BIRDS will have its usual stall at the Palace, and we shall be pleased to welcome visitors and friends.

Excursions to the Crystal Palace Show.

Mr. J. W. Ramsden writes: I have received details of the following excursions since my notice on page 91 of last week's issue:—

Great Eastern Railway.—On Thursday, February 14th, and Saturday, 16th, from Norwich, Lowestoft, Beccles, Halesworth, Saxmundham, Wickham Market, Woodbridge, Yarmouth, and Gorleston. On Saturday, February 16th, from Lynn and Wisbech, York, Hull, Doncaster, Gainsborough, Lincoln, Sleaford, Spalding, etc., Stow, Downham, etc., Cromer, Grnton, Walsham, etc., Wymondham, Thetford, Ely, etc., Wells, Fakenham, Dereham, etc., March, St. Ives, etc. On Friday, 15th, from Felixstowe, Westerfield, etc.

Midland Railway will run their usual excursions for this Show.

Great Western Railway are running some excursions, but their promised details are not yet to hand, and intending visitors should enquire at their local stations.

Great Northern Railway.—On Thursday, February 14th, and Saturday, February 16th, from Yarmouth, Cromer, Norwich, Melton Constable, Grimsby, Louth, Boston, Spalding, Gainsboro', Lincoln, Sleaford, York, Selby, Hull, Pontefract, Doncaster, Retford, Tuxford, Newark. On Saturday, 16th, from most of the Lancashire and Yorkshire stations, including Liverpool and Manchester districts, also from Lynn and Wisbech districts.

Great Central Railway.—On Thursday, 14th, and Saturday, 16th, from Barton, Cleethorpes, Grimsby, Gainsboro', Retford, Worksop, Nottingham, Leicester, Chesterfield, Hucknall, etc. On Saturday, February 16th, from Bradford, Halifax, Huddersfield, Manchester district, Oldham, Ashton, Sheffield, etc.

Most lines are also running week-end trips. For fares, times, etc., see bills at stations.

Routes for Visitors.

PADDINGTON (G.W.R.)—Take the Underground from Praed Street to Victoria or Aldersgate Street; then the Chatham Railway to the Crystal Palace High Level Station.

MARYLEBONE (G.C.R.)—"Bakerloo" tube to Elephant and Castle; then transfer to Chatham Railway to High Level Station.

EUSTON (L.N.W.R.), ST. PANCRAS (M.R.), and KING'S CROSS (G.N.R.)—Underground to Aldersgate Street; or 'bus to Ludgate Hill or Holborn Viaduct, and then Chatham Railway to Palace.

LIVERPOOL STREET (G.E.R.)—Rail direct, via New Cross; or 'bus to London Bridge, Holborn Viaduct, or Ludgate Hill, and then by L.B. and S.C. or Chatham Railway.

Victoria, Ludgate Hill, St. Paul's, Snow Hill, Holborn Viaduct, Moorgate Street, and London Bridge.—Rail direct to the Palace from these stations.

WATERLOO (L. and S.W.R.)—Take halfpenny car to Elephant and Castle; then transfer to Chatham Railway.

Direct trains to the Palace also run from Willesden and Clapham Junctions.

Preparing for the Show.

It was an industrious little company that we found assembled at 64, Manor Park, Lee, on the night of February 6th. All were hard at work collating the entries for the great show. Mr. Ramsden and Mr. Lambert Brown, the joint show managers, were there leading the way. Mr. Tringham gave valuable aid, while Mrs. Lambert Brown and a bevy of fair ladies brought up the rear. The show managers were obviously gratified at the entry. Asked what they expected it to total, they replied, "Considerably over 2,000." Certain sections were deplorably weak but others had turned up in splendid style, and the popular varieties of Canary and British birds seemed more popular than ever.

Here is a rough approximate statement of entries in the different sections:—

CANARIES.

Norwich Plainheads	350	Greens	100
" Crests ..	70	Scotch Fancy ..	17
Yorkshires	350	Lancashires ..	100
Cinnamons	23	Rollers	70
Lizards .. 35			

MULES AND HYBRIDS

(including 7 Canary-Bullies) 150

BRITISH BIRDS.

About 500 altogether.

Resident Class, over 20.

Migratory Class, about 16.

Goldfinches..	40	Linnets .. 30	Siskins .. 35
Bullfinches..	40	Chaffinches 25	Greenfinches 35

Buntings, about 30 (a grand variety).

Albino and Rare Feathered, about 12 (notably a white Bullfinch and a white Linnet).

Not a single Belgian had been entered—with such an authority on the breed as Mr. James F. Dewar, too! Where are the former Kings of the Fancy?

The Foreign Hybrid class is likely to prove most interesting. It contains, amongst other exhibits (7 entries in all), the following crosses:

Long-tailed—Masked Grassfinch
Red-mantled Parrakeet
Bicheno—Zebrafinch
Red Rump—Rosella
Barnard—Yellow naped
Zebrafinch—Indian Silver Bill
American Song Sparrows.

The catalogue wil throughout set out various instructive details about the exhibits.

The weakest sections of the show proved to be Crests, Cinnamons and Scotch Fancy. The Scotch Fancy and Champion Crests were so weak that the managers had decided to cancel them throughout, but the Editor of "Cage Birds," thinking it would be a great pity not to see the national bird of Scotland represented at a national English Show, came to the rescue and guaranteed on behalf of "Cage Birds," the entire Scotch Fancy Section. He also stood guarantee for the Champion Crests, so that lovers of this variety might be privileged to see, on their visit to the Palace, the birds of champion Crest exhibitors.

The Yorkshires have come up well. All the well-known Yorkshiremen are to the front, and our old friends, Messrs. Bailey and Swanger and Shackleton, will be well represented. The Southern fanciers of Yorkshires are in full force, but numerically they will probably be in the minority.

It is curious to note that not a single reference to the Cage Bird Union was made by any exhibitor when making his entries.

Two entries have been received from far-off Australia, Mr. H. E. Pier, of Sydney, N. S. Wales, sending a pair of Bourke's Parrakeets, also a pair of Blue-banded Grass Parrakeets.

Two Irish exhibitors have entered birds, while Scotchmen have rolled up in great numbers. The well-known names of Messrs. Brown and Arrighi, E. G. Wright, Goodfellow, Dr. Galloway, McQuiston, Duncan and Logan, Livingstone and Sinclair, Wm. Ramsey, Wm. Cullen, Wm. Mason, W. Cairns, J. C. Watt, W. J. Ross, McInroy, Chas. Campbell, Arnot and Jamieson, J. W. Bruce, McDougall and Simpson (Fort William), C. S. Crockatt, and others, will figure in the catalogue.

By special request of the Victorian Canary Club of Melbourne, their special representative, Mr. White, will be allowed by Mr. Ramsden the privilege of studying the entire method of show management as conducted at the Palace from start to finish. The Victorians wish to learn a wrinkle or two, and they could hardly have come to a better school.

The Foreign section will be greatly in evidence. The Tanager class promises to be attractive, and the A.O.S. class comprises some most curious birds. The Coly recently referred to in these pages has been entered. There is also a "Leadbitter's Pilcated Jay," a white-throated Ground Thrush, and a pair of Japanese Tits. Mrs. Jane Snoddon has entered her famous Red-sided Eclectus Parrot, which she values at £600. There will be the novelty of a pair (cock and hen) of Banksian Cockatoos. A talking Siamese Hill Mynah and a Cinghalese Mocking Bird are also entered. The largest exhibitor is probably Mr. R. J. Howe, of Wellingboro'.

The recent sad loss of all his birds by fire sustained by that champion exhibitor, Mr. G. T. Maxwell, has caused all the smaller men to rally up with their entries in the British section. "It's an ill wind that blows nobody good." Mr. Maxwell is showing six birds, two of them the survivors from the late catastrophe—the Magpie and the Chough. The extra stock class numbers well over 100.

Special attention should be drawn to a letter of Mr. Ramsden's in our correspondence columns referring to the arrangements for heating the show and covering up the birds at night. The L. & P.O.S., we understand, have been put to serious inconvenience and expense in order to secure adequate facilities on these accounts, voting a sum of £30 to be spent if necessary under this head.

There is every indication that a great crowd of fanciers intends to be present, and we shall be most pleased to welcome at our stall all old friends and any new ones that have as yet not given us the pleasure of a word with them.

Despatching Birds to the Show.

All exhibitors are requested to send off their birds by trains timed to reach London not later than three o'clock. They will then reach the Palace in good time.

Meetings at the Palace.

The Crystal Palace Company have this year decided to let the Board rooms for specialist club meetings at a fee of 10s 6d. for each club. So application for rooms must be made to the Manager of the Palace and not to Mr. Ramsden.

OUR GREAT BIRTHDAY NUMBER.

Everyone votes it a Triumph.

Here are a few more out of the Hundreds of Complimentary Letters.

I wish you and your interesting paper, CAGE BIRDS, every success for the ensuing year, with greater prosperity than ever. Your motto should be "We defy competition."—A. E. BAILEY (Bristol).

A great advance.—E. F. BENJAMIN (Bradford-on-Avon).

Delighted.—A. SINDEN (Stroud Green).

Your Birthday Number is marvellous and every credit to your many efforts to please all true fanciers.—A. GLEESON (Smethwick).

Congratulations on your grand Birthday Number. The plates by Messrs. Goodchild and Norman again surpass all previous efforts. Mr. J. F. Bishop's Norwich is, in my humble opinion, the best and truest delineation of this variety we have ever had. One plate alone is worth the money charged for the whole interesting number. Wishing you continued success, which is well deserved.—THOS. ROBSON (Hon. Sec. Northern Crest Club, Newcastle-on-Tyne).

You will fairly "knock 'em" with your latest effort which is a magnificent treat for all of us in the Fancy.—JOHN RUKIN (Rawtenstall).

Having received your sixth Birthday Number of CAGE BIRDS, I am well pleased by its contents and illustrations, and beg to congratulate you on the success you have gained by this beautiful edition. I am so very much pleased by the coloured illustration "Desirable Aliens" that I beg to inquire if you can supply me with 500 copies of this plate? I want to send them to my New York firm, and have them divided among my numerous customers. Hoping this may help to increase the Fancy for these beautiful pets in the United States.—L. RUHE (Naturalist, Alfeld, Germany).

I am very pleased with the coloured plates and supplement of the Birthday Number. They are grand.—J. CARTER (Gillingham).

Birthday Number simply magnificent.—A. E. CROSS (Guildford).

Let me hasten to convey to you my highest appreciation of your superb Birthday Number. Such a work as this, so mammoth in its size, and so original in so many features, must have caused you and your staff many days of toil and, perhaps, of anxiety too, but for all that your efforts have been crowned with conspicuous success. The two coloured plates alone are worth the money, for I do think the Budgerigars are perfectly life-like, and the expression of the Pekin Robin is most true. I think it must now be obvious to all, after seeing the plate of the "Stars of the Season," that the colour of our show cages is wrong, such an enhancing effect has the background for showing up in bold relief the two Canaries. I need scarcely say that, like all Mr. Norman's drawings, they are characteristically true in the beautiful and delicate outlines that have made his name a household word. May the crowning reward of your greatest effort result in new recruits and a record sale is the wish of V. WYNN (Park Lane, W.).

Many happy returns. Never seen anything like it for the money. In fact, it gets better every week, and I've taken it now for over three years, and have kept birds all the time, and I can say truthfully that all I have wanted to know I've either found in the current or back numbers. I consider I was lucky to come across it. It has been worth its weight in gold to me, and I know others of the same mind. Coloured plates, beautiful calendar a speciality. I have them in a prominent place in the house.—J. BRADLEY (Leeds).

Accept my thanks for the manner in which you have published my article on a new form of bird cage in your excellent Birthday Number. It is a great pleasure, amidst the cares and worries of life, to be able to sit down and find a friend in the shape of a paper devoted to a peaceful and recreative hobby.—E. T. MARTIN, M.D. (Southport).

A magnificent treat.—C. W. FOX (London, N.)

I am delighted with your Birthday Number. It is a rare treat for fanciers. The coloured plates are splendid.—S. M'COLLUM (Hon. Sec., Lurgan O.S.).

The fanciers in the West of Scotland are much pleased with your Birthday Number. It is a wonderful production, and reflects great credit upon you, and all who took part in getting it up. Art, utility, and instruction are combined with a master mind and hand.—T. SMITH (Glasgow).

Your splendid Birthday Number is a grand production, without doubt the finest ever put before the cage bird Fancy.—J. W. RAMSDEN (Herne Hill).

Congratulate you on magnificent Birthday Number; well worth double the money.—R. ROLL, Sec. Norwich Alliance A.E.C.B.A.

Your Birthday Number was a huge success, it being something grand. My order was seven copies. I hope you had enough to supply all readers with your grand treat.—F. GORDON (Hon. Sec. Sunderland C.B.A.)

Grandest Birthday Number yet out.—W. G. FRENCH (Plymouth).

I think your paper the best of bird papers. It has more in it in a week than the others in a month.—W. J. BANKS (Buckhurst Hill).

You still continue to do your utmost to keep Fanciers' in touch with your journal, and needless for me to say it continues pre-eminent, and doubtful if ever you will lose the patronage you now beget. Personally, I thank you most cordially for your extreme appreciation and kindness.—J. KERSHAW (Llanwrst).

I am requested to state on behalf of our members, that they are all delighted with your Birthday Number. Several have had the plate "Norwich and Yorkshire" framed. We have also one at our headquarters, beautifully framed, and admired by everyone.—FRED TYLER, Hon. Sec. Baildon C.B.F.A.

Your Birthday Number excels any ever produced by any Fancy paper.—F. W. HEATON (Salford).

Splendid and unequalled.—W. GOODFELLOW (Burslem).

Your Birthday Number of CAGE BIRDS is a remarkable development. I have been a reader of CAGE BIRDS from the first. A copy was given me by a lady fancier, and I have never missed a week since that time. I think this number breaks all records of loveliness. It is perfection.—A. SYMONS (Bideford).

Hearty congratulations to you on the production of the finest number of a "birdy paper" it has been my good fortune to possess. With all its magnitude there is no lack of bright and interesting literature. I am confident your efforts to excel are appreciated by all readers of CAGE BIRDS. May it have many prosperous birthdays.—C. BRUNT Edmonton).

CAGE BIRDS has issued a magnificent Birthday Number. It is certainly a marvellous threepennyworth. It is doubtful if anything better has been done by a specialist journal. The cult of the cage bird has grown enormously during the past few years, and this number indicates that the riders of this hobby are well catered for by the press.—"Dundee Advertiser."

Birthday Number of CAGE BIRDS far surpasses any previous one, and as one of the readers from the start, I highly appreciate the difference from No. 1 and now.—A. S. TREASURE (Cheltenham).

Allow me as a reader of "C.B" to thank you for the splendid Birthday issue, and those grand coloured plates. You have given us some lovely plates in other years, but the last beat the lot. The owners of the Canaries on the plate are to be congratulated and also envied. I wish the staff a prosperous year, and that CAGE BIRDS may never grow less.—J. TAYLOR (Haworth).

After reading the Birthday Number of CAGE BIRDS and seeing such beautiful plates, fanciers will be prepared for anything in the way of progress. CAGE BIRDS is a journal capable of overcoming any obstacle and may be summed up as a marvel.—T. L. CASTREE (Mountain Ash).

I was very pleased with the splendid coloured plates and the calendar published with the beautiful Birthday Number of CAGE BIRDS.—E. LANGFORD (Hunstanton).

Allow me to add my quota to the list of congratulations to Birthday Number of CAGE BIRDS. I have been a purchaser of it from its first issue and I have been heartily pleased to see its steady progress.—W. OLDHAM (Hazel Grove, near Stockport).

I have to congratulate you on the great success of our favourite paper CAGE BIRDS, but I am not surprised at the excellence of your Birthday Number. I have got beyond that stage, and take each one as a matter of course.—GEO. SCAIFE (Fauldhouse).

It is not my custom to be fulsome, but your Birthday Number is, in my opinion, the very finest production that has ever been attempted in the annals of the Fancy, and if that is what you intend to treat us with, I hope I shall live to see you come of age.—W. ROSLYN (President Mansfield C.B.C.).

A capitally illustrated supplement. Altogether a very interesting number.—"Sheffield Telegraph."

The sixth anniversary of the foundation of CAGE BIRDS was celebrated last week by the issue of a special number. The plates are really high-class specimens of the art of colour printing, and, what is more, they are drawn by those who are thoroughly acquainted with the subjects depicted, so that the result is the pictorial representation of "real" birds, and not the idealised creations of the artist's imagination. The number contains interesting articles. All written by experts in their several departments amateurs should find their hobby rendered additionally attractive by the help thus afforded.—"Bristol Evening News."

I consider the coloured plates worth far more than the charge for the whole paper. I wish you every success.—H. C. FARMERY (Accrington).

Excellent in every department.—THOMAS McCREDIE (Maxwelltown).

Only thirty copies returned unsold out of 42,000!! thus constituting A RECORD SALE.

READING.

Annual show in the Corn Exchange, Jan. 30th. The keenest competition was found in the Goldfinch class, in which the exhibits were of very high quality. The Corn Exchange is a splendid building for a show, being lofty, excellently lighted and warmed. All the arrangements were well carried out by the committee, at the head of which was that keen fancier, Mr. W. G. Flanagan. Mr. Anthony Houghton and his two assistants looked well after the duties belonging to the secretariat and among others who deserve mention are Messrs. Primes, Collier, Bunce, Burch, Galloway, Holmes, King, Poulton and Rowles. Beautiful weather favoured the show, and, as a consequence, the attendance was large. Mr. G. H. Billett judged, and apparently gave satisfaction to everyone.

NOR. YELL. (6): 1, 3, 4, Yates, very smart three-pointed, grand quanty, rich even colour, nice shape, third clear, not so large, but beautifully feathered and coloured, fourth clear, large, bold bird, of good shape, sound colour, hardly so tight in feather; 2, Silk, grand shaped, clear rose colour and quanty; hc, Street, Rogers. A.O.V. (7): 1, 3, 4, vhc, Yates, first clinking good clear buff, rare shape and substance, capital colour and feather, romps home, third beautiful bodied buff, of rich even colour, fourth very tight-feathered, rich coloured buff, loses in body substance; 2, Silk, four-pointed yell, splendid colour, nice silky feather, and good shape; hc, Street. YORKS., CLEAR, ETC., YELL. (6): 1, Yates, neat, stylish, clear, slim and tapering, and well up on leg; 2, Spring, very long, shapely, stylish clear of good colour; 3, Silk, rare shapely bird, stands well up, nice wings and tail; 4, vhc, Mrs. Green, very nice shape and carriage, capital feather, but a little pale in colour. CINN. (7): 1, 2, 3, 4, vhc 2, Yates, capital team, first large, good, sound-coloured buff, nice shape and feather, second yell., of rare quality, grand colour and very nice shape, third anotner yell., not quite so stout and shapely, but all there in colour and feather; fourth yell., nice colour, loses a bit in feather; hc, Rogers. GOLDFINCH, BRIT.(12): 1, Carrier, a gem, large, deep, well cut blaze of splendid rich bright colour, capital bars and buttons, good back and chest; 2, Vince, not so large, but most brilliant in colour and beautifully marked; 3, Jupe, we liked well, rich bright colour, good blaze and bars, in rare form; 4, Norkett, large, shapely, bright blaze, not so rich in body colour; ex. 4, vhc, hc. (3), Callos, nice team, but not so bright in colour; vhc, Acton; hc, Iles. BULLFINCH (5): 1, 3, Jupe, brace of very rich-breasted birds, large, glossy, well cut caps, good backs and bars, and shown in the pink of condition; vhc, Galloway; hc, Smith, Robinson. LINNET, REDPOLL, ETC. (6): 1, Spring, large, shapely pied Linnet, beautifully shown, very steady; 2, Galloway, another pied Linnet, not so large, nice shape and carriage; 3, Callos, well marked, good-coloured shapely Siskin, nicely-laced cap; 4, Hoare, rich coloured, stylish Linnet, rare feather and very steady; hc, Acton. A.O.V. SMALL (3): 1, 2, 3, 4, vhc, hc (2), Galloway, very fine team, and all shown in the pink of condition, first well-marked, nice coloured Golden Crested Wren, second Bearded Tit, beautifully marked, rose colour, grand feather, third very nice little Jenny Wren, fourth Swallow, vhc Long-tailed Tit. LARGE (6): 1, 2, Galloway, Nightjar and Great Grey Shrike, both more rare than handsome, shown in splendid form, very nicely marked; 3, 4, Scales, nicely marked, well-feathered Horned Owl and a very steady pied Jackdaw; 4, Edwards, common Barndoor Owl, beautifully marked, and in nice feather; vhc, King. PARROT (5): 1, Mrs. Dormain, grandly marked grey African, splendid colour, nice eye, in good feather; 3, Clark, blue-fronted Amazon, grand colour and markings, large and well shaped; 4, Earley, another good blue-fronted Amazon, not so rich in colour; extra 4, Gilbert, beautifully-coloured Rosy-breast, in grand feather. SELLING, 15s. (9): 1, 4, Galloway; 2, 4, Green; 3, Yates.

ROLLER CANARIES AT BOLTON.

The second annual Roller Canary singing contest took place at the Joiners' Arms Hotel on Feb. 1st and 2nd. Entries totalled 106, in six classes, which speaks well of the efforts of Mr. J. Stringer and his committee. The room is a splendid one for a Roller contest. Long before the judge's task was over the showroom was kept busy with visitors. The quality of the contestants was A1, and the judge had great difficulty in awarding the honours, each bird gaining the same number of points, being only divided by depth of tone. Mr. J. Netherwood judged. CLASS 1, for birds bred in 1906, and wearing the closed ring; total, 18. 1st and silver cup, presented by Mr. F. A. Lester (London) was won by F. Oldroyd with a very good bird; his range included: Hollow roll 5, bass roll 3, hollow bell 2, schockel 3, bell roll 1, flute notes 2, delivery 2, anfzug 1, off, total 17. 2nd, J. Bramhall, hollow roll 6, schockel 3, bell roll 2, flute notes 2, delivery and purity 3, total 16. 3rd, J. B. Hesling, hollow roll 5, hollow bell 3, schockel 3, bell roll 2, delivery 2, sharp whistles 1, 1 off, total 16. Depth of tone divided the 2nd and 3rd prize winners. VHC, W. Whittaker, hollow roll 5, hollow bell 2, schockel 3, bell roll 2, flute notes 2, delivery 2, sharp whistle, 1 off, total 15. HC, C. J. Dalton, hollow roll 4, hollow bell 4, schockel 2, bell roll 2, water gluck 2, delivery 2, sharp whistles, 1 off, total 15. C, T. W. Walton, hollow roll 3, hollow bell 3, schockel 2, bell tour 2, bell roll 2, flute notes 2, delivery 2, 2 off sharp whistles, total 14. CLASS 2, entries 35. 1st and special, J. W. Norris, a very nice and free singer with hollow roll 5, bass roll 5, hollow bell 2, schockel 2, bell roll 2, flute notes 2, gluck 3, delivery and purity 3, total 24. 2nd, S. G. Parr, a bird with a beautiful pure song, hollow roll 8 (rising and falling), hollow bell, 3, schockel 4, flute notes 2, delivery and purity 5, total 22. 3rd, S. G. Parr, hollow roll 5, bass roll 2, hollow bell 3, schockel 3, bell roll 2, flute notes 1, delivery and purity 3, total 19 (this bird also won cup presented by Mr. W. Whittaker for best bird wearing 1905 closed wing). VHC, F. Wilsden, hollow roll 6, hollow bell 2, schockel 3, bell roll 2, bubbling water tour 2, delivery 2, sharp bell tour 2 off, total 17. HC, F. Wilsden, hollow roll 4, schockel 3, bell roll 2, flute notes 2, bubbling water tour 2, delivery 2, high bell 1 off, total 14. C, T. W. Walton, hollow roll 5, schockel 3, bell roll 2, flute notes 2, water gluck 2, delivery 2, sharp bell tour 1 off, sharp whistles 1 off, total 14. Nos. 7, 21, 23, 28 did not open. CLASS 3, judge, A. Foulds. 1st, C. Whittaker, hollow roll 4, hollow bell 3, schockel 3, bell roll 2, flute notes 3, delivery and purity 4, total 19. 2nd, F. A. Lester, hollow roll 4, bass roll 5, schockel 3, bell roll 3, flute notes 2, delivery 1, total 18. 3rd, E. Lord, hollow roll 3, hollow bell 4, schockel 5, bell roll 2, delivery and purity 2, total 16. VHC, H. Roebuck. HC, W. Evans. C, R. Kremner. CLASS 4, 1st, F. Oldroyd, hollow roll 5, hollow bell 4, schockel 4, flute notes 3, delivery 2, total 18. 2nd, W. Whittaker, hollow roll 4, hollow bell 2, schockel 3, bell roll 2, flute notes 3, delivery and purity 2, total 16. 3rd, J. Gootling, hollow roll 3, hollow bell 4, schockel 3, bell tour 2, delivery 3, total 15. VHC, Walters Bros. HC, F. A. Lester. C, F. A. Lester. CLASS 5, 1st, W. Whittaker, hollow roll 6, bass roll 3, hollow bell 3, schockel 4, flute notes 3, delivery 4, total 23. 2nd, S. G. Parr, hollow roll 5, bass roll 2, hollow bell 4, schockel 4, bell roll 2, flute notes 3, delivery 1, total 21. 3rd, W. Whittaker, hollow roll bent 7, bass roll 3, hollow bell 4, schockel 4, flute notes 2, delivery 2, 2 off sharp bell tour, total 20. VHC, Massey and Ridings. HC, R. Kremner. C, Massey and Ridings. CLASS 6, 1st, W. Whittaker, hollow roll 4, hollow bell 5, schockel 4, bell roll 2, flute notes 2, delivery and purity 4, total 21. 2nd, Massey and Ridings, hollow roll 4, bass roll 3, hollow bell 4, schockel 4, bell roll 2, fluto notes 3, total 20. 3rd, J. Bramhall, hollow roll bent 7, bass roll 3, hollow bell 4, schockel 4, delivery 2, 2 off sharp bell, total 19. VHC, Massey and Ridings. HC, W. Whittaker. C, J. Bramhall. Mr. F. Oldroyd won cup presented by Mr. Kremner for the best bird fed on Siegfried's Patent Egg Bread.

GREENWICH & DEPTFORD C.B.S.

The pair show, held January 31st, at the Two Brewers, Church Street, Greenwich, proved a great success in every respect. The entries were in excess of last year, and the quality of the exhibits was far ahead of anything previously shown by this society. The entries totalled 71 pairs, Canaries only. In the members' judging competition Mr. Stead placed the first three birds, in a class of 26, in the same order as the judge, Mr. J. Robson. Five new members elected. CHAMPION SECTION, N.P'H. (26): 1, 2, hc, Meades; 3, vhc, Rennie; c, Jordan. NOVICE, N.P'H. (7): 1, 2, Hack; 3, vhc, Evenden; hc Daniell; c, Janes. CHAMPION YORKS. (11): 1, 3, vhc, Rennie; 2, hc, c, Fishwick. NOVICE YORKS. (15): 1, 2, 3, Putner; vhc, Cobley; hc, c, Done. CRESTS (6): 1, 2, 3, vhc, hc, c, Johnson. SELL. A.V. PAIRS (6): 1, 2, Sidgwick; 3, Fishwick; vhc, Meades; hc, c, Horsfield.—GEO. HILL, Hon. Sec.

MANNINGHAM C.B.A.

Members' show, February 2nd, at headquarters. This was the last of the series of members' shows for 1906-7. There were 76 entries, some really good birds being staged. Mr. T. Murgatroyd judged. The siver cup and gold medal for most points throughout the shows were won by A. Grange; silver medal for second most points, G. Wellock; silver medal for third most points, W. Normington. The prizes will be awarded at the annual social, to be held at headquarters on February 16th. CL. YELL. YORKS: 1, Normington; 2, 4, Wellock; 3, Warley; vhc, hc, c, Grange. BUFF: 1, 2, 3, Wellock; 4, Smith; vhc, hc, c, Grange. TICK. YELL.: 1, hc, Wellock; 2, Suggitt; 3, Normington; 4, Varley; vhc, c, Ross. BUFF: 1, Smith; 2, Normington; 3, hc, Ross; 4, Wellock; vhc, Brown. CIN. MKD. YELL.: 1, 2, 4, hc, c, Grange; 3, Normington; vhc, Guy Bros. BUFF: 1, 2, 3, vhc, c, Grange; 4, Wellock; hc, Varley. YELL. YORKS. HEN: 1, 2, 3, Grange; 4, Brown; vhc, c, Ross; hc, Varley. HEN: 1, Varley; 2, Wellock; 3, Ross; 4, vhc, hc, Grange; c, Guy Bros. UNEVEN MKD.: 1, 3, vhc, Grange; 2, Ross; 4, Varley; hc, Normington. NOR.: 1, hc, Ross; 2, 3, 4, vhc, Normington. SELL., 12s. 6d.: 1, Suggitt; 2, 4, Wellock; 3, hc, A. Grange; vhc, Smith.

BRIGHOUSE AND DIS. C.B.S.

Annual members' show, February 2nd, at headquarters. The entries totalled 71 for only 11 exhibitors. Mr. James Overend (Ravensthorpe) placed the cards, and gave every satisfaction. CL. YELL. YORKS. (7): 1, Wright; 2, Sykes; 3, Dearden; vhc, Morton; hc, Shaw; c, Kent. BUFF (3): 1, spl for best bird in show exhibited by a pro., Morton; 2, Hodgson; 3, Dearden. TICK. OR UNEVEN YELL. (5): 1, 2, Hodgson; 3, Elam; vhc, Wright; hc, H. Stake. BUFF (1): 1, spl for best bird exhibited by a novice, Naylor. YELL. HEN (5): 1, Naylor; 2, vhc, Hodgson; 3, Kent; hc, Elam. BUFF (5): 1, vhc, Hodgson; 2, Bates; 3, Elam; hc, Naylor. CINN. TICK. YELL. (3): 1, Hodgson; 2, Dearden; 3, Elam. BUFF (6): 1, Wright; 2, 3, Elam; vhc, Kent; hc, Morton; c, Hodgson. YELL. HEN (7): 1, Dearden; 2, Morton; 3, Shaw; vhc, Naylor; hc, c, Hodgson. BUFF (9): 1, Kent; 2, 3, Dearden; vhc, Elam; hc, Hodgson; c, Sykes. FOUL MKD. (5): 1, State; 2, Hodgson; 3, Sykes; vhc, Elam; hc, Dearden. A.V. NOR. COCK (5): 1, 2, Hodgson; 3, Morton; vhc, Elam; hc, Naylor. HEN (2): 1, Morton; 2, Hodgson. A.O.V. (1): 1, Hodgson. SELL., 12s. 6d. (3): 1, 3, Bates; 2, Hodgson. BRIT. (9): 1, 3, Morton; 2, Stake; vhc, Sykes.

THIRSK.

In connection with the Show of Poultry, Pigeons, etc., at the above fixture a few classes for cage birds were included. Those for Canaries, which, by the way, were all Yorkshires, filled moderately. The bitterly cold weather prevailing when entries were closing no doubt affected the total considerably. Britishers made a splendid show, and many real good ones failed to secure a prize. There were 60 entries, however, in six classes. The arrangements were excellent, and exhibitors may with confidence send their birds to this fixture. The secretaries, Messrs. J. Bell and C. Long, are most courteous and hard-working gentlemen, and well deserve support. Mr. Ambrose judged.

YORKS CL. (3): 1, Watts, a grand hot yell., best position and feather; 2, 3, Cuthbertson, fine buff leading, rich colour and grand position. TKD., ETC. (7): 1, Marsden, thigh tkd. yell., lengthy, nice shape, length, and feather; 2, Barfe, slim buff, nice type, style, and feather, rich colour, good wings and tail; 3, 4, Barnwell, stylish buffs, rare length and feather, fine type; vhc and hc, Cuthbertson. HENS (4): 1, Cuthbertson, yell., long, racy, and close feathered, good back and wings, A1 position; 2, Watts, yell., good length, nice shape, rich colour, fails a trifle in feather; 3, vhc, Barnwell, stylish buff, grand quality. NOVICE (15): 1, Ramsden, yell., fine colour, good length, shape and feather, good legs, wings well braced, and tail nicely packed; 2, Marsden, buff, rich colour, nice head, good body, not as long as leader; 3, Head, longest of the trio, not quite as good in feather, but very rich in colour, splendid legs; 4, hc, Wilcock, a nice pair; vhc, Towers; hc, Bennison, best Yorkshires in the Show in this class. SELL. 12s. 6d. (8): 1, Watts; 2, Axe; 3, Towers; 4, Bennison. BRIT. A.V. (23): 1, 3, Axe, leader gem of a Song Thrush, in perfect bloom, third nice Yellow Buuting; 2, Wildsmith and Hawkins, Waxwing in fine colour; 4, Wilkinson and Danby, Great Spotted Woodpecker, somewhat soiled in plumage, but very steady; ex 4, Isherwood, very nice housemoulted Bullie; vhc, Foster, Milburn, Flintoff; hc, Gregg, Woods.

CITY & SUBURBAN A.C.B.

Show of pairs matched for breeding took place at the Church Institute, Paddington Street, W., on Feb. 2nd. There was a record entry of 162, making a capital display in the spacious, well-lighted and warm hall. The quality of the exhibits was well above the average, some clinking pairs of Crests, Plainheads and Yorkshires being staged. The Hybrid section, containing 44 pairs, was most interesting, and, if their owners have luck, some rare specimens may be heard of this coming season. There was an excellent attendance, including many well-known London fanciers. A good sum was taken at the "gate," and an excellent number of tickets disposed of in addition. Catalogues, with awards, were on sale shortly after 3 o'clock (an unusual feature at these shows), and the enterprise was much appreciated. Altogether, the show was a great success. Mr. F. Easterling won the cup for most points. Mr. J. Robson judged.

NOR. PLAIN. CHAMPION (19): 1, spl., 3, c, Wynn; 2, hc, Martin; vhc, spl., Curtis; vhc, Kearney. AMATEUR (6): 1, vhc, hc, c, Burn; 2, 3, Hart. NOVICE (4): 1, Wyse; 2, Barnett; 3, vhc, Thirwell. CRESTS, AMATEUR (7): 1, 3, vhc, spl, hc, c, Poolcy; 2, Lazarus. NOVICE (14): 1, 2, vhc, Shepherd; 3, Sanders; vhc, hc, Offord; c, Dickinson. YORKS. CHAMPION (11): 1, vhc, spl, c, Hawes; 2, Easterling; 3, hc, Burton. AMATEUR (3): 1, 2, 3, Cox. NOVICE (19): 1, spl, Pullinger; 2, vhc, Page; 3, hc, c, Hodges. CINN. CHAMPION (2): 1, 2, Wynn. LIZ. (5): 1, spl, Martin; 2, 3, vhc, hc, Wynn. A.O.V., AMATEUR: 1, Pooley. NOVICE: 1, Lissenden. GOLDFINCH-CAN. (13): 1, 2, 3, B. Martin; vhc, Bassett, Easterling; hc, Offord; c, Thorpe. LINNET-CAN. (9): 1, spl, Curtis; 2, Harris; 3, Bassett; vhc, Elgar; hc, c, Easterling. GREENFINCH-CAN. (3): 1, Harris; 2, Easterling; 3, Bassett. A.O.V. FINCH AND CAN. (4): 1, Morrison; 2, Elgar; 3, Thorpe; vhc, Easterling. A.V. BRIT. (15): 1, c, Morrison; 2, 3, vhc, Turnber; vhc, Elgar; hc, Miss Brain. SELL., 50s. (5): 1, Lazarus; 2, hc, Ashby; 3, vhc, Offord. 30s. (8): 1, Hawes; 2, Burton; 3, vhc, Cooper Bros; hc, Pullinger; c, Rennie. 20s. (9): 1, Hawes; 2, Thirwell; 3, Rennie; vhc, hc, Hart; c, Pooley.

WIBSEY AND DIS. C.B.S.

Wibsey and District C.B.S. Members' Show, held at Horse and Groom, Wibsey, Jan. 26th. Seventy-seven birds were staged, and were judged to general satisfaction by Mr. J. Hodgson. CLASS 1: 1, C. Bastow; 2, D. Thornton; 3, E. W. Johnson. CLASS 2: 1, Taylor Bros.; 2, S. Shaw. CLASS 3: 1, 2, S. Shaw; 3, C. Bastow; 4, D. Thornton. CLASS 5: 1, D. Thornton; 2, Taylor Bros.; 3, F. Pickles; 4, Chapman and Bairstow; vhc, Ellerton. CLASS 6: 1, S. Shaw; 2, 4, Taylor Bros; 3, vhc, D. Thornton; hc, E. W. Johnson; c, C. Bastow. CLASS 7: 1, hc, C. Bastow; 2, c, F. Pickles; 3, vhc, D. Thornton; 4, H. Norton. CLASS 8: 1, E. Johnson; 2, vhc, Ellerton; 3, Taylor Bros.; hc, S. Wilkinson; c, H. Norton. CLASS 9: 1, Ellerton; 2, hc, D. Thornton; 3, vhc, C. Bastow; 4, Taylor Bros.; c, Chapman and Bairstow. CLASS 10: 1, 2, S. Shaw; 3, 4, S. Wilkinson; vhc, hc, c, C. Bastow. CLASS 11: 1, c, F. Pickles; 2, 3, S. Shaw; 4, Taylor Bros.; vhc, hc, C. Bastow. CLASS 12: 1, Taylor Bros.; 2, 4, S. Wilkinson; 3, F. Pickles; vhc, C. Bastow; hc, H. Norton; c, E. W. Johnson.

Stoke Newington F.A.

Geo. Dowden, hon. sec. Stoke Newington F.A., writes:—"You will be pleased to know we have had a most successful year, 38 new members having been added to our roll; and, after meeting all liabilities, we have a balance in hand of £3 11s. 6d. and over £20 worth of assets."

NORTH AND SOUTH SHIELDS.

The Second Annual Combined Club Show of the North Shields British Bird and Mule Club and the South Shields C.B.S was held in the Mechanics Arms, East Street, South Shields, January 26th. Mr. James Maddison (Newcastle), who placed the cards, was faced with a grand turn out of 150 entries, and his judging met with general satisfaction. This is the second occasion on which the two clubs have held a joint Show for members, and proved very helpful to the membership roll, several new ones being added as a result. NOR. COCK (10): Richardson, 1, 3; Turner, 2; Murrell, vhc; Alty, hc, c. HEN (12): Richardson, 1; Murrell, 2; Thurston, 3; Winter, vhc, hc. CREST (5): 1, 2, Woodhouse; Duke, 3, hc; Turner, vhc. CRESTBRED (7): Winter, 1, 2; Duke, 3, vhc; Barrass, hc; Woodhouse, c. YORKS. COCK (10): Thompson, 1, 3, c; Steel, 2, hc; Thurston, vhc. HENS (8): Steel, 1, vhc; Thompson, 2; Taylor, 3, c; Alty, hc. CINN. YELL. (6): Taylor, 1, 2, vhc; Duke, c; Winter, 3, hc. BUFF (5): Taylor, 1, vhc, hc; Duke, 2; Winter, 3. BORDER (6): Smith, 1, 2; Thompson, 3, vhc; Duke, hc. PAIRS A.V. (7): Woodhouse, 1, Crests; Taylor, 2, Cinnamons; Alty, 3, Norwich; Duke, vhc, Crests; Winter, hc, Cinnamons; Barrass, c, Borders. BLACKBIRD, THRUSH, OR STARLING (4): Smith, 1; King, 2; Telford, 3; Bage, vhc. SKYLARK (6): Potts, 1; King, 2; Smith, 3; Bage, vhc, hc. LINNET (15): Wilkinson, 1; Smith, 2, 3, hc; Winter, vhc; McVay, c. GOLDFINCH OR BULLFINCH (15): Johnston, 1, c; Baker, 2; Bage, 3; Lawson, vhc; Williamson, hc. REDPOLL, SISKIN, OR TWITE (4): McVay, 1, 2; Steel, 3; Duke, vhc. FINCH, A.O.V. (7): McVay, 1; Dixon, 2, 3; Lawson, vhc; Turner, hc; Telford, c. BUNTING OR PIPIT (5): McVay, 1, 2, 3, vhc; Dixon, hc. SMALL INSECTIVOROUS: Smith, 1. MULE OR HYBRID (6): Smith, 1; Dixon, 2; Steel, 3; Wilkinson, vhc; McVay, hc; Duke, c. GREENFINCH (11): Duke, 1; McVay, 2, 3; Johnston, vhc; Steel, hc; Smith, c.—WILLIAM DUKE and J. W. KING, Secretaries.

WALLSEND AND MID-TYNE C.B.A.

A pleasant and instructive meeting was held in the Station Hotel on January 31st, Mr. Macdonald in the chair. Eight new members were enrolled. Mr. A. Brown (Gateshead) gave a very instructive lecture on the Norwich Canary, which was closely followed by a large number of members.—JOHN R. EVANS, Sec.

WELSH NATIONAL C.B.S.

Chairman, R. F. Browne; vice-chairman, H. Creber; treasurer, W. A. Truscott; show manager, D. A. S. Longden; committee, Messrs. W. H. Love, F. Scrines, W. J. Bancroft, B. Prosser, and W. Slade. Headquarters, Mancel's ArmsHotel; meetings held third Tuesday in each month. Membership fee, 2s. 6d. annually. S. J. Nicholas, Hon. Sec., 9, Nicholl Street, Swansea.

WOLVERHAMPTON & DIS. C.B.S.

Meeting on January 29th, when a vote of thanks was accorded to the Editor of CAGE BIRDS for the splendid report of our Show. The Secretary presented balance-sheet showing a profit of £1 4s. 6d. on Show. Three new members were enrolled, which brings the membership up to 25. We feel sure there are many more fanciers in the district who would benefit by joining the Society (Roller Breeders note). We shall be pleased to cater for that variety.—F. HOWES, Hon. Sec.

BOLTON WOODS C.B.S.

Annual smoking concert and presentation of cup and medals, February 2nd, at Victoria Hotel. The President, Councillor H. W. Rodgerson, made the awards as follows:—L. Dykes, cup and first medal, 87 points; C. Whittaker, second medal, 73 points; H. J. Chittenden, third prize, 5s., 67 points. Medal presented by President for most points gained by a Novice in the two first feather shows was won by J. Martin, 37, points. Songs were rendered by Messrs. W. Earnshaw and Sam Buck, and several others.—E. SHEPHERD, Hon. Sec.

STRATFORD & EAST LONDON F.S.

The distribution of prizes, cups, and specials won at the late Annual Show was undertaken by Mr. Day at headquarters, Workman's Hall, Stratford, on January 10th. There were about 70 members present. The Hon. Sec. reported that a balance of £1 17s. 6d. remained after meeting all the heavy expenses. Special mention was made of the good work put in by Mr. Love, Mr. Barrett, Miss Cooper and Mrs. A. E. Blakebrough at the last exhibition, at which there were over 700 visitors. Twenty new members are joining. The Society has a good balance and assets, and no debts are owing, so that the prospect of the next season is most hopeful. New members are cordially invited. Entry 1s.; annual subscription 2s. 6d.—A. E. BLAKEBROUGH, Hon. Sec., 65, Adelaide Road.

CARDIFF CAGE BIRD SOCIETY.

Annual Dinner, at Maskell's Restaurant, Queen Street, on January 31st, when a large number of members and friends were present. In the unavoidable absence of the Chairman, Mr. E. J. Banks, the Vice-Chairman, Mr. A. Harrington, presided, and was ably supported by Messrs. J. Shearn, F. P. Dymond, W. C. Flyn, F. D. Jones, W. Harrington, R. Waters, T. H. Melhuish, and W. Sampson. An interesting event of the evening was the presentation to Mr. W. Sampson, the esteemed Secretary of the Society, of a gold English lever watch, subscribed for by the members in recognition of his untiring efforts in the interests of the Society, and a gold necklet to Mrs. Sampson. The presentations were made by Mr. J. Shearn, who spoke of Mr. Sampson and his wife in most eulogistic terms. Mr. W. Harrington also very kindly handed to Mr. Shearn a very handsome box of confectionery for Mrs. Sampson. Mr. Sampson very feelingly responded on behalf of himself and his wife. An excellent musical programme had been arranged by Mr. D. G. Lewis, to whom the best thanks of the Society are due.

When answering Advertisements please mention "CAGE BIRDS."

The Housing and Treatment of Foreign Birds in Captivity.

By WESLEY T. PAGE, F.Z.S., etc.

(Continued from page 797.)

GREEN-HEADED OR TRICOLOUR TANAGER.
(Calliste tricolor.)

This and the following species may be numbered among the best known and most freely imported of the Tanagers, and gorgeous and exquisite cage birds they are—their glowing beauty must be seen to be appreciated, and, if a healthy specimen be procured, are not difficult to keep in health on the fruit, sponge cake, etc., diet recommended at head of chapter. When once acclimatised they are not at all delicate, and are long-lived. Plumage: Adult male: Head, neck and narrow band across throat, refulgent green; upper back, golden green; lower back, rich cadmium-yellow; upper tail coverts, golden green; wings, black; lesser coverts, rich purplish-blue. The larger wing feathers have their outer edges green, bluish and golden greeus; tail, black with green outer edges; beak, black; legs and feet, brown; iris, rich brown. Total length, 4.8 inches. Female: Slightly smaller than the male, her beak is also a trifle broader; the greens aud blacks of her plumage more diffused, and neither so rich nor intense in colour; the rich cadmium yellow of the lower back and rump of the male is more restricted, diffused and mottled with dusky; her under parts are yellower and blurred and mottled with greyish-blue. Song: Pleasing, but lacks power aud variety. Habitat: Rio de Janeiro and S.E. Brazil. Here they are met with in small flights, passing from one fruit tree to another, oranges appearing to be their favourite fruit. In the aviary or cage two males will not agree together for any lengthy period, but they may be kept with other birds of similar strength, or even larger than themselves. There is a good bit of variation in colouring, the intensity of which, and the areas of the green and golden portions, increases with each successive moult. I have found them long-lived and easy to keep on the diet and treatment given at head of this chapter, though I have not yet subjected them to frost.

THE SUPERB TANAGER.
(Calliste fastuosa.)

This is one of the most freely imported species of this genus, and may be also counted among the most beautiful. A three-year-old male in good feather is a fine spectacle indeed. They are easily kept in good condition on the regulation diet, providing they are not kept in too small a cage. I have found them long-lived, the critical time with them being their first few weeks in this country. Plumage: Head, neck and band across throat, rich shining green; upper back, lustrous black; lower back, brilliant cadmium yellow; wings and tail, black edged with purple; outer secondaries, brilliant golden, by which it may always be distinguished from *C. tricolor*, and almost every other species of this genus; lesser wing coverts, shining green; middle of throat and chin, black; underparts purplish, washed with silvery-blue on the breast; beak, black; legs and feet, blackish-brown; iris, rich brown. Total length, 4.8 inches. Sexes: Similar, but the plumage of the female is less refulgent than that of the male, and she has more black on the upper parts, and her lower back and rump is not nearly so rich in colour. Habitat: Pernambuco.

RED-NECKED TANAGER.
(Calliste festiva.)

This species may be distinguished by its broad red band, commencing at base of beak and running all round the back of the neck, chin and centre of throat, and a streak, extending to eye, rich velvety black; front of crown, breast and remainder of underparts, rich shining green; crown, lower throat and chest, light purple; mantle, upper back and sides of breast, black, with purplish sheen; wings and tail, purplish black, the feathers having their outer webs broadly edged with green and golden green; the lower portion of the flights, edged purplish—on each shoulder is a band of golden yellow; middle, lower back and upper wing coverts, shining grass-green. There is a narrow circlet of light green round each eye; beak, blackish brown; iris, golden brown. Total length, 5 ins.; tail, 1.9 ins. Habitat: South-East Brazil, frequenting the thickly-wooded regions, and not at all common.

BLUE-BELLIED TANAGER.
(Calliste cyaneiventris.)

Adult male: Head, sides of face and neck, band across throat, mantle and back, golden yellow, flecked with black; upper tail coverts, golden green; tail feathers, black with bright green outer edges; wing coverts, bright green, streaked with black; other wing feathers, black with their outer webs bright green; flights tipped with dark brown; there is a circlet of black round the eyes; forehead and chin, black; underparts dark blue, merging into green at lower abdomen; vent, yellowish; beak, legs and feet, dark brown. Total length, 5 ins.; tail, barely 2 ins. Habitat: Southern Brazil.

YELLOW-BREASTED TANAGER.
(Calliste thoracia.)

Habitat: S.E. Brazil, and neighbouring provinces. Adult male: Above, grass-green, regularly flecked, with black triangular markings; a narrow band above the front and eye region, turquoise blue; wings and tail, black, edged with grass-green; lesser wing coverts edged bright yellow; underparts, bright green with circular breast patch of orange-yellow; middle of belly and vent, pale yellow; beak, blackish; legs and feet, light brown. Total length, 5⅜ ins.; tail, 2⅜ ins. Female: Similar, but colours neither so intense nor pure. This species may always be recognised by the circular patch of orange-yellow on its breast.

SCHRANKS OR YELLOW-CAPPED TANAGER.
(Calliste schranki.)

Adult male: Crown, golden yellow; forehead, chin and ear coverts, velvety black; chest, sides of face and neck, bright green; upper back, golden green flecked with black; lower back, rich golden yellow; upper tail coverts, green; tail, black with blue outer edges; wings, black with the outer edges of each feather brilliant blue; inner edges aud tips of secondaries and flights, brown; sides, flanks and vent, green; remainder of underparts, yellow; beak, blackish-brown; legs and feet, greyish-brown. Total length, 4½ ins.; tail, 1¾ ins. Habitat: Eastern Peru, Ecuador, Bolivia, and the extreme borders of Western Brazil. Frequenting the hot and damp wooded regions.

THE SPOTTED TANAGER.
(Calliste punctata.)

This does uot call for a detailed description. It is of a beautiful rich green, spotted or spangled with black, washed with golden-yellow on the under parts, sides of face, and washed with brownish-bronze on the upper parts. It is a striking and beautiful bird, and not difficult to keep. Total length, 4½ ins.; tail, 1¾ ins. Habitat: Cayenne.

SPOTTED EMERALD TANAGER.
(Calliste guttata.)

This is a near ally and very similar to *C. punctata*, but is a more brilliant bird; the ear coverts are washed golden-yellow; there is a golden-yellow streak from the base of the upper mandible to the back of the eye, and the under parts are washed whitish-yellow. Total length, 5½ ins.; tail, 2 ins. Has been exhibited at the London Zoo. Habitat: This beautiful Tanager is widely distributed; examples have been taken in Trinidad, Roraima Mountains, British Guiana, Venezuela, Caraccas, Bogota and Ecuador.

Several living specimens have been exhibited in the gardens of the Zoological Society of London.

(To be continued.)

On Boxing Day there was a football match at Stamford Bridge, Chelsea, attendance about 30,000. The ground had been swept clear of snow, to allow the teams to play. While the game was in progress, down dropped a Water Wagtail, running here and there in search of food, quite heedless of the crowd yelling, and the play in the arena. I thought the bird must have been very hard pressed for food to face a crowd of this description.—A DULWICH READER.

Hints on Muling.

By FRANCIS SMITH.

[There seem to us many statements in this article which other experienced mule breeders may take exception to, and with the idea of provoking correspondence on these points, we print the article exactly as sent us by the author.—Ed. "C.B."]

My readers will find this a very interesting, and often a very profitable, pastime. They may rely upon the statement that the writer is one who has had great opportunities, experience and practice in the matter, and has spared neither time or trouble.

Many kinds of valuable Mules can be bred besides Goldfinch and Canary, Linnet and Canary. Mules can be bred from Goldfinch and Bullfinch, and Goldfinch and Greenfinch, the males being always the Goldfinch. They must be bred in cages; no success attends muling if tried in aviaries. The cage should not be too large—about 18 inches square, with wire on the front only. The nest should be in nesting baskets, procurable at any bird shop. Hang them upon a nail placed conveniently in the cage. Don't use those complicated breeding cages with boxes and partitions; they are a frequent cause of failure.

THE PAIRING SEASON.

The time of year for putting pairs together is the beginning of May. Get one Bullfinch hen, in good health and feather; it should be an imported hen—German. They are very cheap. Go to a good shop for one, and be sure you don't accept an English-caught hen, as they are useless. There are plenty of imported German and Russian hens to be got now. The Goldfinch cock should be an English bird, one that has been cage-moulted, two or three years old preferable; and if he has bred with Canary hens so much the better. Hang them so that they can see each other, but they must not be put together until early in May, and it will not be of any use to put them together unless the Goldfinch is in song. That can be managed by feeding in early April with hard-boiled chopped egg, a little crushed hemp and maw seed—the same for Bully. When they have been together a few days put in the basket so that you can conveniently take it out when you want. Put some coarse sand, with a little pounded old mortar, on the bottom of cage. When they have been together a few days hang up a nesting net full of moss and hair (cow-hair), which you can buy at any bird shop. You will soon see whether they mean breeding; the hen will soon be busy, and when the nest is finished you will, early in the morning, find Bully in the nest—that means the first egg.

REMOVING THE COCK.

You must at once take the Goldfinch out of the cage, he is a troublesome, mischievous little monkey, and is constantly trying to get the hen off the nest, pulling it to pieces, breaking the eggs, and so on. Even if he happens to be a quiet bird he will not take his turns sitting, nor will he feed the young ones. I have always found Goldfinches the same in this respect when bred with Canary hens. When you see the Bullfinch on the nest, blow her gently to get her off; take the basket out and with a spoon lift out the egg, place it in a saucer or cup with a bit of something soft in the bottom, and put in a place of safety. Repeat this the next morning; on the third morning you will find a third egg. At once put back the two first eggs, and leave the hen to do the rest: she will lay a fourth, and perhaps a fifth. By closely adhering to these instructions you will find all the eggs hatch in one day, and the young will all grow up together one size, and be ready to leave the nest together. If a small one, or one that was hatched last is left in the nest the hen will sometimes neglect it to feed the older ones that have left the nest and perhaps you may thus lose the best-marked one.

DIET FOR THE HEN.

The young will not take to seed on leaving the nest; the hen will continue to feed them. When the eggs are hatched give every day some dandelion, lettuce or water cress; no groundsel at any time. Soft food should consist of hard boiled eggs, chopped fine, boiled bread and milk, rape and maw seed. Let the bread and milk be solid, not sloppy; mix all together and give a small quantity three times a day, not forgetting to feed them late in the evening, so that the hen may have food to go to first thing in the morning.

My readers must not forget that birds in cages are very different from birds in a wild state. Birds do not sit in a wild state until they have laid the last eggs; it is not so in cages; in a wild state the cocks sit and feed the young, but never when muling. This is my experience after many years of practice and close observation. My first trial of Goldfinch and Bullfinch produced three young ones, very beautiful after moulting, and they made good and long singers. I sold two for £5 each; the other I kept two years and then sold it for £7. I found out afterwards that I could have sold it for much more. I bred many afterwards but not with the same pair. I tried to breed with English hens and Prussian hens, but they had no young ones; I always had some success with German hens.

I had a Greenfinch hen that had been reared from the nest. I reared four by putting the eggs under a Canary hen that had lain eggs in a small breeding cage; she was by herself and built her nest and laid without a cock being with her. I took her eggs away and gave her the Greenfinch eggs, and she hatched and reared all. They were very tame. The hen I put up with the Goldfinch that had bred with a Bullfinch; there was soon a love match between them which resulted in a nest of five eggs; two of the young died but three were reared, all cocks. They were very large and strongly built, with rather short and strong beaks; they all had pale Goldfinch faces with breasts of a greyish yellow, and all had the Goldfinch tail. After moulting into good colour they were very smart, handsome birds, loud but rather short in song. They puzzled many before I told them what they were bred from. I bred again next year from the same birds with similar success, and sold all but two; some were purchased by the late Mr. Jamrach, of Ratcliffe Highway, the great bird and animal dealer.

MULES AND A JACKASS.

The late Frank Buckland, the great naturalist and Editor of "Land and Water," had one which fell a victim to his pet Australian Kingfisher (the Laughing Jackass). The Jackass used to swallow all the small birds he could get hold of.

I treated and fed this pair in precisely the same way as the Goldfinch and Bullfinch and with great success. I tried the cock Greenfinches with Canary hens, and they bred freely so long as the Canary hens were young birds of the previous year; old Canary hens are useless for mule breeding.

CHAFFINCH NOT A FINCH.

I had a tame Chaffinch cock, hand reared; I put him up with a Canary hen; they soon had eggs but they did not hatch. I tried them again and again but with no success. I tried next year, with three different hens, but got no young ones. I had many eggs, but all were unfertile, showing beyond doubt that the Chaffinch is not a true Finch. Chaffinches are to a certain extent insectivorous; true Finches are not. I next tried a cock Chaffinch with a Bramblefinch hen, and had one nest of four young ones. They moulted out very handsome birds, but were poor singers. They did not breed again that year and I never tried the cross again. I next year bred from a Yellow Bunting cock and a Canary hen; they had four young ones of a splendid shape, long in feather and leg, very much resembling a good Norwich Canary, but they were bad in colour, looking like dirty Yellow Canaries and they were miserable singers, so I did not repeat the trial. I have bred Siskin and Canary together, also the large Mealy Redpoll and Canary with much success.

HAVE YOU SEEN OUR
Picture Post Cards of Canaries?

CORRESPONDENCE

YORKSHIRE GREENS.

Round or Square, Which?

SIR,—As Secretary of the Liverpool B.B.A., allow me a few lines in answer to Lancashire Lad in your issue of February 2nd, under the above title. I was present when Mr. Mundell disqualified the birds, and I quite agree with Lancashire Lad that "Mr. Mundell was absolutely certain in his own mind that these birds were clipped." So was I at the time, but I am now as absolutely certain that they were not clipped. I also think if Mr. Mundell's opinion was known, it has changed a little since them. Until Mr. Wellings inserted a bit of white paper under the feathers, showing them up, I had never seen a square feather (though I have bred Greens); but I have found amongst my own birds some "square-feathered 'uns," and not young birds either, birds that have never been entered at a show, nor offered for sale; so there was no motive for me to clip them—nor could I have done so had I wished; and I doubt if Lancashire Lad could clip them if he tried, or any other "handy man" of the Fancy. The members were unanimous that the birds were not clipped, but honestly shown; but they were not at all unanimous as to the cause of square feather. Some thought it was caused by a "stick in the moult"; others that crossing with Cinnamons caused it, even asserting they had seen square feathers on Cinnamons; while others asked, "Is it caused by in-breeding?" No matter how caused, many members of the L.B.B.A. have birds with square feathers, and *they know they are a natural growth.* And because Lancashire Lad "has bred Greens, but never bred a square-feathered one yet," proves nothing, only that he has never seen a square feather on any he bred. And his statement that "never once have I seen a natural square feather" only proves that when he has seen a square feather he would not believe it to be natural. So it would be no use myself or any other member of the L.B.B.A. who have birds with natural-grown square feathers asking him to see them. As to the show and the disqualifications, the birds were judged in an exceptionally good light; it was a very fine morning, and the windows of the hall are nearly due south, so the judge had sunshine from 9 a.m. till 3 p.m. He had judged six classes of Greens before coming to the class in which were the birds he disqualified, and had put square-feathered birds in the money or tickets in every class—69 birds in the six classes. If Lancashire Lad was at the show, and I rather fancy he was, he knows Mr. Mundell never looked for square feathers till he judged that particular class. And, if he was at the show, he also knows Mr. Houlton was not far off the mark when he suggested that Mr. Mundell had to be persuaded. Of course, that is putting it rather strong; but it—the square feather idea—was brought very prominently under his notice. *If* Lancashire Lad was at the show, he knows the whole story as well as I do, and perhaps he can answer a question as well as ask one. Why were no square feathers seen till after lunch?—H. BARRATT, Sec., L.B.B.A.

SIR,—I should like to say a few words of thanks to Mr. Houlton for the trouble he has taken in connection with the very regrettable incident which occurred at the late Liverpool B.B.A. Show. I refer to the disqualification of several birds for alleged trimming of feathers across the shoulders, which gives the feathers a square appearance. Now these feathers are not trimmed in any way; they are simply feathers not reaching full growth, either through slow moult or other causes, but as they appear in a very prominent place between the shoulders in the centre of the back, they are particularly noticeable, and give this square appearance, that is, to the superficial observer. The man who really wants to now, and who will take the trouble to put the feathers under a glass will readily see that the fibre comes to a natural termination, as Mr. Houlton says. These square feathers, as they are generally known, are not confined to Greens, and they can be found in Clears, and no doubt in other varieties if carefully looked for, but as they show very prominently in Greens I suppose this is the reason they have been taken so much notice of. Now, as to Lancashire Lad's letter in last week's issue I do not propose to say anything to the clerk who actually penned the letter; he is but a scribe, and it is not necessary to see the card so kindly sent to you, Mr. Editor, or to be a Zaccig to see who is the man "behind the throne," or, shall I say, "door." Neither is it very difficult to get at the motive of this epistle of L.L.'s; the motive is jealousy of Mr. Houlton, and the name is ——. However, I will let him show his own face, if it is clean enough to appear in our paper. As regards the jealousy, a few years ago Mr. Houlton was elected by the G.C.A. to judge at one of their patronage shows, and took such a great deal of interest in the Green Canary that he has frequently judged since. Not only has he judged the birds very satisfactorily, but he has taken every possible opportunity of making himself thoroughly conversant with the variety, and the G.C.A. and its members are under a deep debt of gratitude to Mr. Houlton for his trouble. When Mr. Deacon wrote that Mr. Houlton was a specialist I rather fancy he meant to say that Mr. Houlten had frequently been asked to test birds, etc., and in that way he is a specialist. I do not propose to deal seriatim with Lancashire Lad's letter. In spite of his protest to the contrary, he evidently does not understand the subject. If L. L. will show his face I will have no objection to discuss this matter or any other connected with the Green Canary, and leave the public to judge between us. As regards the old Liverpool society, I was chairman during Mr. Galloway's secretaryship, and do not remember a show being held at any place called the Wellington Hotel. In reply to L. L.'s particular questions—(1) It is not true that square feathers are the peculiar property of young birds. (2) Greens are not alone in having these square feathers. (3) The square feathers are not in a place noted for colour. (4) I have never seen any bronze in place named. (5) It was a show confined practically to Liverpool and district, and in the olden days only Liverpool men showed Greens. Just one question from me, Mr. Lancashire Lad. Is it not strange the disqualification took place after lunch? I have no doubt you will be able to answer this question satisfactorily.—S. HADWIN.

HEATING OF CRYSTAL PALACE BIRD SHOW.

SIR,—In reply to many correspondents, The Crystal Palace Company (who are solely responsible for the heating of the show) have given a special assurance that the show will be kept at a suitable temperature. I have, apart from this, hired twelve gas heating-stoves, which will be put on if weather is very severe, and have also purchased 1,000 yards of covering, so that all birds may be covered up at night.—J. W. RAMSDEN.

EARLY MULES.

SIR,—Having read a letter by a "Disgusted Mule Breeder," in a back number of CAGE BIRDS, I should like him to know that, though I have been disappointed myself for two seasons I have taken to heart the motto, "If at first you don't succeed, try again," and my efforts at last seem likely to be crowned with success. Many in this neighbourhood thought it was too early, and that it would be no good trying to pair Goldfinch and Canary before May, but as I had a young Norwich hen ready, I thought there would be no harm in trying for an early nest. She laid the first egg on January 20th, and, in all, laid four. I am pleased to state there are two hatched out at the time I am writing this. I am only a working man, often away all day, the birds being left in the care of my wife, who looks after them to perfection.—FRANK GOULDING (Malmesbury).

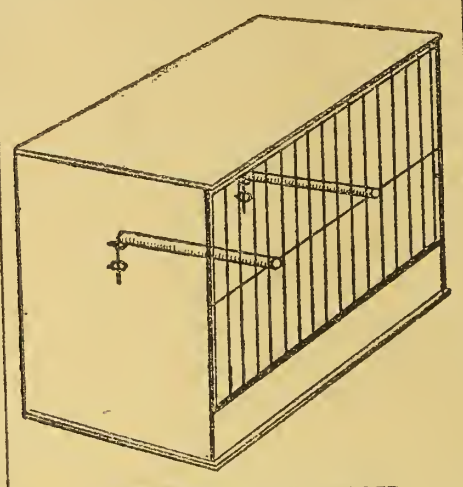
REPORTED BREEDING OF BULLFINCH-GREENFINCH HYBRIDS.

SIR,—Most writers on Hybrid breeding advise the hen Bullie—cock Greenfinch cross, and do not apparently recommend the opposite, i.e., hen Groenfinch and cock Bullfinch. In an outdoor aviary last year I had (with several other birds) two pairs of Greenfinches and a cock Bullfinch. The latter paired with one of the hen Greenfinches, and one young one was hatched out, but, unfortunately, was drowned, when about a fortnight old, in a very heavy thunderstorm. This year I propose trying to mate up more than one Bullfinch with hen Greenfinches. My idea is to put a Bullfinch with a hen Greenfinch in a large cage, or smaller aviary, the two birds being the sole occupants of enclosure. I thought that probably the hen Greenfinches would hatch and look after their young better than hen Bullfinches, besides the chance of better coloured progeny. —NORTH COUNTRY.

[Our Mr. Weston refers to the above letter in the Hybrid Query Column this week.—EDITOR.]

MOVABLE PERCHES.

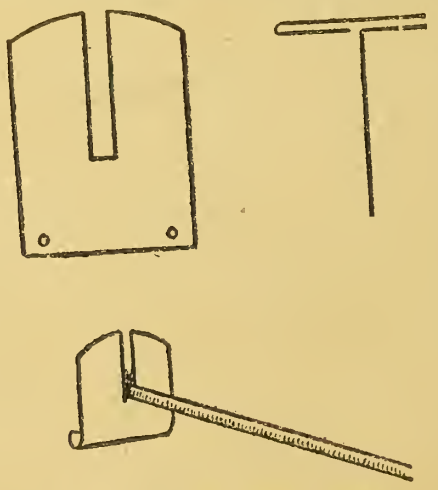
SIR,—A correspondent in the Christmas Number of CAGE BIRDS, who signs himself J.E.D., asks for a simple method of fixing perches in a box cage so that they can easily be removed. I have tried two methods, and at the present time have both in use, but I prefer the second. In both methods the perch, instead of being fixed against a wire at the front of the cage, passes between two wires, fitting tightly between them, so that there is no movement, and it projects about half an inch, so that it can be readily grasped by the fingers for the purpose of removal. The other end of the perch, which goes to the back of the cage, has inserted into it a dowel screw. Dowel screws, I may explain, have no head, but are double screws, that is to say, have a thread each end. The one end is screwed tightly into the end of the perch, and the free end is screwed just a turn or two into the back of the cage. When



DR. MARTIN'S PERCH-HOLDER.
End of cage is assumed to be cut to permit view of back of cage.

you wish to remove the perch all you have to do is to grasp the end projecting from the front of the cage, unscrew it from the back, and pull the perch and its screw out through the front. The second method is, perhaps, better still. You insert two tiny brass screw eyelets into the back of the cage, putting the top one where you wish the end of the perch to be, and the other about ⅜in. below it; take a piece of cage wire about 2in. long, and drive it about an inch into the end of the perch; there will now be an inch projecting which must be bent down at right angles to the perch, forming a hook, which is slipped into the two eyelets. When you wish to withdraw, all you have to do is to grasp the front projecting end of the perch, slip the wire hook out of the eyelets at the back and withdraw. In both methods the end of the perch has to be first tightly wrapped close to the end with a few turns of fine binding wire to prevent splitting.—(Dr.) E. T. MARTIN.

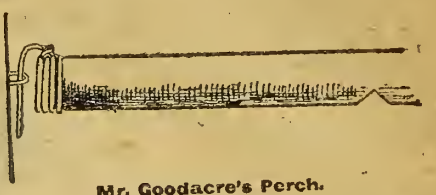
SIR,—In reply to "J. E. D.," I send you sketch of a simple yet perfect perch-holder. Figure 1 is a piece of tin bent to shape, which is fixed to the back of the cage at the bottom, thus leaving a certain amount of "spring" at the top, allowing the wire (Fig. 2) fixed in



Mr. J. Haggard's Perch-holde

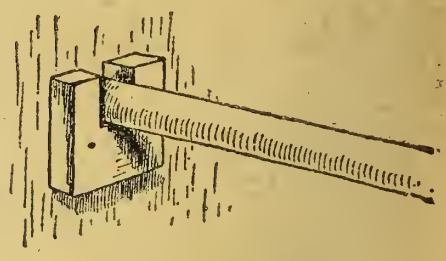
end of the perch to slip behind it, then grip it tight; or the piece of tin may be nailed in slit downwards, then bent up, leaving a space for the wire to fit between. This perch holds very firmly, yet may be easily removed.—JOSEPH HAGGARD.

SIR,—I am sending you an idea for fixing perches in wood cages, which "J.E.D." might find useful, both for keeping red mite off of wire, to suit large or small birds. The spring to be screwed to the back of cage or aviary; the perch to be of green willow, the size required. It can be drawn out and a fresh one put on at any time.—T. GOODACRE.



Mr. Goodacre's Perch.

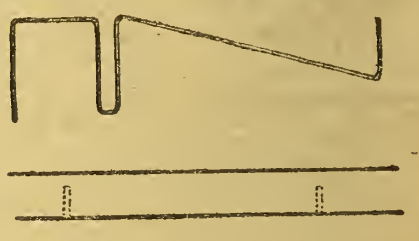
SIR,—Enclosed please find a rough model of what I think is a very easily cleaned perch, which I find can be taken out of the cage without disturbing the birds in any way. I have fixed all my perches in this way and find them most easy to take out when cleaning. I also send pattern of perch to place inside under seed and water vessels, where the cage bottoms are too deep for the birds to reach up

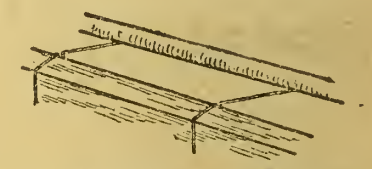


Mr. Ogg's Notion No. 1.

when standing on them. I may say that I have only known of your paper for about two months, but I find the most valuable information in it, and think it grand, and look forward for it every Friday. I may also say that I have been able to get two of my fellow-workmates that keep birds to take it every week, they also not having seen it until I showed them mine.—ERNEST HOGG.

[We are much obliged to our correspondent for his kind remarks and efforts on our behalf.—ED.]





Mr. Ogg's Notion No. 2.

AN EXTRAORDINARY EPIDEMIC.

SIR,—I am pleased to tell you that our birds appear to be getting new beaks. The first one that went bad has already got half a new beak, and my bird, which is a Border Fancy hen, is also showing signs of a new one. I took her in my hand the other day, and scraped her beak, when, to my surprise, a kind of shell came off, showing part of a new mandible. The reason I wrote you was to find out the cause, so as to prevent it another time. What we think is the cause is a certain soap with which our birds have been washed. We puposely refrained from mentioning this before, as we thought we might be wrong, but we cannot now blame anything else as every bird that caught the disease had been washed with it, not only ours, but two birds belonging to other fanciers here. Some of them we bred, others we bought from different parties. We have never heard of a similar case, so we conclude it is nothing but the soap (which is of a highly scented nature) getting in their nostrils and thus destroying the upper mandible, and leaving the lower one perfect.—W.F.H. and R.E.G.

THE CLOUDS ROLL BY.

SIR,—Many readers will remember me. I had the misfortune to break a blood-vessel last June, and afterwards had an attack of rheumatic fever. I should like to thank through your valuable paper, my brother fanciers in England and Scotland for their kind sympathy and good wishes for my speedy recovery. I am pleased to say that I am progressing very favourably. In reply to several fanciers, I have not retired from the Fancy; I am still as keen as fancier as ever. Fanciers will note that the reason why my birds were absent from the show bench this season is owing to my serious illness.—W. BROWN (Chelsea), ex-secretary, L.C.B.A.

FROM—**W. T. MOULTON & CO., 5, Church Street, BRIGHTON.**

AVIARIES & CAGES FOR BIRDS;

and How to Make Them.

By I. W. HINTON.

JUST COMMENCED a most interesting series of articles which will be eagerly read by all bird lovers. Not only are the various kinds of Aviaries—outdoor and indoor—fully described, but a lot of useful information respecting their inmates is also included.

In Nos. 2,171, 2,174, and 2,186 of the ENGLISH MECHANIC.

Price 2d. each of all Newsagents, or post free from the Office for 7½d.

A specimen copy on receipt of Post Card.

ENGLISH MECHANIC, CLEMENT'S HOUSE, KINGSWAY, W.C.

THE HYGIENE OF BIRD KEEPING.

By W. GEO. CRESWELL, M.D., L.R.C.P., F.Z.S.

Price 1/1, post free from CAGE BIRDS Offices, 154, FLEET STREET, LONDON, E.C.

OPINIONS OF THE PRESS.

LANCET: "This little book will be welcomed by all lovers of birds, whether ornithologists, aviculturists, or the owners of a single pet songster. The author deals with his subject in a thoroughly practical and scientific manner, and the results of his experiments prove the fallacy of some rule-of-thumb theories. . . . The book is well illustrated."

COUNTRY LIFE: " . . . a surprising amount of really valuable advice for all who keep small birds, whether in cages or aviaries. . . . Those who approach the subject with an open mind must admit the cogency of the author's arguments; and these, backed by a very wide experience at first hand, will prove hard nuts to crack for many of the champions of the 'good old methods.' . . . We venture to think that his experience will pave the way for a revolution in the methods of bird keeping in the near future."

MEDICINES.

DIARRHŒA, inflammation cure, my own practical recipe after 25 years' practical experience, will cure when all others fail, used by most successful exhibitors, 7d. per oz.; free advice given.—Mather, 65, Albert Road, Widnes.

PANNASSINA.

A medicinal preparation for Canaries and all kinds of cage birds, prevents and cures asthma, wheezing, loss of song and all diseases caused through damp and cold; is an excellent stimulant, and takes the birds easily through their moult. This speciality has built up a 30 years' reputation entirely on its own merits, invariably effecting a cure after every other remedy has failed. In 6d. and 1s. tins, postage 1d. extra. If you cannot obtain it from your tradesman, apply direct to W. J. Hammond, 19, Anstey Road, Coldharbour Lane, Camberwell, London, S.E. Agents wanted.

FOUND AT LAST.

BRONCHORINE.

Cure for Asthma, Bronchitis, Loss of Tone, and Wheezing; Ideal Tonic for all Cage Birds; taken readily.

"66, Moston Street, Birches Head, Stoke-on-Trent. Jan. 2nd, 1907. Send 1s. 6d. bottle Bronchorino. I am one that does not believe in trying to cure half dead birds, but find Bronchorine fine to have by you to give birds when they come back from shows this weather.—B. Peake." "King Street, Melton Mowbray. Jan. 3rd, 1907. Send early 1s. 6d. bottle Bronchorine, have run out; don't want to be without it; find it very good remedy for colds.—W. Jackson." "73, Tudor Street, Liverpool. Aug. 22nd, 1906. Forward as soon as possible another bottle Bronchorine. The last one has given me every satisfaction, and has nearly cured two birds which were suffering from chronic asthma.—J. Jones." Price, 9d., 1s. 6d., and 3s. bottle.—Crawley, 112, Radford Boulevard, Nottingham.

BRITISH BIRDS.

Hardbills.

CHAMPION Siberian Goldfinches.—The cream of the last and best shipment into England. Giants in size, and full of colour and health. The real sort to breed champion exhibition Mules and Hybrids. Selected and got into condition by a Specialist. All at one price, 10s. 6d. each. Read these extracts from six letters from four noted Scotch and two English exhibitors received by one post:—"Glasgow, February 3rd. Goldies to hand. A pair of real gems." "Scotstown, February 3rd. Am very pleased with both. Thanks for your most excellent choice." "Edinburgh, February 3rd. Delighted. Goldfinch is a champion, even among the wonderful birds we have here." "Ayrshire, February 3rd. Many thanks. More than pleased. You, at least, know a champion when you see one." "Plymouth, February 3rd. Goldie is a very fine bird, far superior to my other ventures bought elsewhere. Thank you for sending it." "Chatham, February 3rd. Goldfinch arrived safe. I am highly delighted. He is a gem, something more than first-class." The original letters can be seen, if desired, with many others. Have a few magnificent show specimens, real gems, at for the keenest competition, at moderate prices for cash. Also one or two grand British Goldfinches, to moult for show, price 10s. 6d. and 12s. 6d. Hawfinch, another real gem, price 20s. —G. E. Weston, 307, High Holborn, London, W.C.

IRWIN & CO., LURGAN,

Hopkins, Bird Specialist and Cage Maker, 38 and 41, Fylde Street, Preston, Lancashire.

HARRY ALLEN.

Still again! This week, 1st, 2nd, and 3rd prizes. It's marvellous, but nothing surprising with the kind of birds I keep and send out. Everybody satisfied; no delay. Big, fine, well-pencilled Linnets, stand well and very tame, 2s. and 2s. 6d. each; extra picked birds, sure winners and will soon make a name for their owners, 3s. and 3s. 6d. each. Showmen, please give me a trial order, and you will never regret it. Fine healthy cock Linnets, singing beautifully, in a polished singing contest cage, with a packet of my special mixture and instructions how to feed, 4s. the lot; real bargains. Young house moulted Linnets, singing hard and taught by my champions, 6s. 6d., 7s. 6d., and 10s. 6d. each, including singing cage. These birds are improving wonderfully; will make first-class contest birds. I can highly recommend these to anyone. A grand Thrush, singing hard, suit a publican or shopkeeper, 15s.; four packets of my special mixture, 1s. I sell hundreds of these packets in Leeds alone; all Linnet singers buy it. Anyone wanting to know how to make Linnets sing at one another with their wings down, how to moult, and how to train for contests, should write with stamped envelope; it is worth 10 guineas to all Linnet men, but I am very near giving it away to encourage Linnet singing.—Everybody welcome to hear my birds. All trippers drop a post-card when coming. See singing results.—Harry Allen, 42, Brown Hill Crescent, Harehills Lane, Leeds

VARNEY, Stratford. English Cock Goldfinches, 2/-; Cock Linnets, 1/-; beautiful extra special Siberian Cock Goldfinches, 5/6 and 7/6 each. All above guaranteed breeders, and singing stontly.

Big selection of Yorkshire and Norwich Canaries for exhibition and breeding purposes; cocks 7s. 6d. to £2; hens 3s. to 20s. Also all kinds of Parrots, Cockatoos, British and small Foreign Finches of every description always in stock. Small animals, Monkeys, Mongoose, etc., Tortoise, and Goldfish. Toy Dog, Persian Kittens. Everything on approval. Testimonials from all parts of the country. Patronised by Royalty.—Proprietors, Hollins and Son. Write for anything you may require.

LOW PRICES DO

not always mean cheapness. It is far better to pay a reasonable price and have exactly what you want than to pay a less price and get that which is absolutely useless to you, and is only an eyesore. I don't pretend to sell birds at less than they cost me (although some try to do so), but I do guarantee to sell genuine well caged steady birds exactly as described, and well on hard seed, and to give utmost value to every customer. Grand large genuine Worcestershire cock Goldfinches, in perfect health and feather, and warranted cocks, 2s. 6d. each, three 6s., six 11s., or 20s. dozen; specially selected large cocks, with large expansive blaze, for showing or muling, and warranted now in free song, 3s. and 4s. each; Worcestershire hen Goldfinches, 1s. each, three 2s. 6d.; splendid large German cock Goldfinches, very rich coloured, in full song, 4s. and 5s. each. Arriving this week, the second and last consignment of the real Siberian cock Goldfinches, grand birds, in splendid trim, and full song, 5s. each, two 9s. 6d., three 12s. 6d., or seven 28s.; extra special exhibition specimens, 7s. 6d. each, two 13s.; grand Worcestershire cock Bullfinches, steady and well caged, 1s. 6d. each; specially selected for show, 2s. and 2s. 6d. each; hen Bullfinches, 1s. each; few selected hen Bullfinches, very large and almost as rich in colour as cocks, price 1s. 6d. each; German cock Bullfinches, 3s. and 4s. each; cock Greenfinches, grand yellow birds, 6d. each, three 1s.; few extra large, for show or Hybrid breeding, 1s. each; cock Chaffinches, 9d. each, three 1s. 6d., six 2s. 6d., or 4s. 6d. dozen; splendid lot cock Brown Linnets, in tip-top condition and well on seed, 1s. each, three 2s. 6d., six 3s. 6d., or 6s. dozen. Specially selected large cocks, for show or muling, and warranted in song, 1s. 6d. each, three 3s. 6d., these Linnets are not seacoast rubbish, but genuine country caught birds; cock Goldfinch Mules, warranted in song, 5s. and 6s. each; cock Greenfinch Mules, grand free songsters, 4s., 5s., and 6s. each; Muling hen Canaries, 2s. 6d. and 3s. each; splendid large cock Twites, well on seed, 1s. each, three 2s. 6d., six 3s. 6d.; single trap cages, 6d. each; double ditto, 10d. and 1s. each; treble ditto, 1s. 3d. each; patent self-setting and self-acting trap cages, warranted to catch birds and immediately re-set without any attention whatever, 1s. 6d. each; self-acting spring net traps, 24 inches long, 1s. each, 18 inches long, 9d. each, these net traps are entirely different to the old-fashioned ones on the market, are extremely simple to set, and will catch and hold any bird, from a Wren to a Rook, without least injury; clap nets, 3 yards long, 4s.; pair, 4 yards, 5s.; 5 yards, 6s.; 6 yards, 7s.; 7 yards, 8s.; 8 yards, 9s.; 9 yards, 10s.; 10 yards, 11s. per pair, all made from thread netting, ¾ in. mesh, 4 feet deep, and sent complete with all pegs, poles, lines, etc., ready for immediate use; loose netting, ¾ in. mesh, 6 feet deep, 3d. yard; 8 feet deep, 4d. yard; 12 feet deep, 5d. yard, all post free, this netting is guaranteed genuine thread, and made specially for bird netting, and must not be confused with the thick American cotton netting now being sold for bird netting; real Japanese bird lime, absolutely strongest made, guaranteed to hold a Hawk or Rook, does not freeze, 6d. ¼ lb., 10d. ½ lb., 1s. 6d. lb., full weight guaranteed, and sent post free; penny tin drinkers, 3 dozen, 1s. 3d., 6 dozen, 2s.; zinc ones, same size, 9d. dozen, 3 dozen 2s., 6 dozen 3s. 6d.; half-penny tin drinkers, same size as usually sold as penny ones, 3 dozen, 10d., 6 dozen, 1s. 6d. Everything is guaranteed exactly as advertised, and sent on approval at my risk, either cash or CAGE BIRDS' deposit system, and money fully refunded if every satisfaction not given. Please note new address, by far the largest, cleanest, and best stocked stores in Midlands; personal inspection invited.

W. GORE, 131, Gooch Street, Birmingham.

W. RUDD, The Bird Specialist, **NORWICH.**

CHAMPION CRESTS & NORWICH PLAINHEADS.

These are the two varieties I keep, and no one in England has better. Last Season I had three Fanciers breeding for me with birds of the highest quality. Neither money or sound judgment has been wanting in getting one of the finest stocks in the world together; and remember I don't exhibit now I breed for my customers to win. Hundreds of Winners sold by me, and reasonable. 30 years breeder. Have had the honour to judge at over one hundred shows. If fanciers cannot get the right birds from me, where can they get them? All on approval.

T. BILLINGTON,
220, COLWICK ROAD, NOTTINGHAM.

C. ROBERTS, E.R.V.C.C.

FEW grand Norwich cocks, bred 1906, splendid songsters, 5s. 6d., 6s. 6d., 7s. 6d.; no hens left; seven days' approval, deposit.—J. Evans, 19, Gloucester Road Croydon

COLOURED PLATE of Yellow and Buff Norwich Plainheads, artistic and lifelike, sent post free, carefully packed, on receipt of four penny stamps.—CAGE BIRDS, 154, Fleet Street, London, E.C.

"A STUDY IN GREEN AND GOLD."—Mr. H. Norman's latest coloured plate of Cinnamon-marked and Self-green Norwich, post paid, 3d.—F. Carl, CAGE BIRDS Office, 154, Fleet Street, E.C.

LARGE Norwich Canaries, clear, ticked, and green; correct shape and fine condition. Seen evenings and all Saturday.—Richards, 10, Dewhurst Road, Shepherd's Bush Road. x269

WM. HINDMAN, 26, Sarah Ellen Street, Blackburn, breeder and exhibitor; champion Norwich, properly matched pairs, 15s. 6d. to £2 10s.; grand cocks from 10s. 6d. to 25s., cold room; on approval.

W. BERKSHIRE has some grand unflighted Norwich, also good stock pairs that will breed winners, for sale from £1; can be seen by appointment; approval.—3, Larch Road, Balham, London.

GRAND lot of Plainheads for sale, stock birds, cocks or hens, yellow or buff, single 10s. to 12s., pairs 17s. 6d. to 25s.—Carstairs, Stationer, 277, High Street, Perth. x269

GRAND Norwich for sale, related to our winners; pairs from 10s. 6d., 12s. 6d., 15s. to 21s.; no odd hens (see show reports).—Athersuch and Son, 65, Spon Street, Coventry. x265

NORWICH Plainheads, well-matched pairs, from winning strain, from 12s. 6d. pair; satisfaction guaranteed; list free.—Gostling, Chapel Road, Saxmundham (late of Norwich).

NORWICH Plainheads, few good yellow buffs, and variegated cocks and hens, for sale, owing to removal.—Wm. McAulay, 25, Harriet Street, Rutherglen.

T. GILBERT, Arcade, Coventry.—Few grand Norwich for sale, the correct type and quality, cocks, 7s. 6d., 10s., 15s., 20s.; pairs from 10s. 6d.; 20 cocks, £6; approval. x266

T. IRONS, Ivy Road, Northampton. Champion Norwich pairs, 15s., 20s., 25s., 30s., single cocks and hens, 7s. 6d., 10s., 15s., 20s. upwards; approval; stamp. x267

BREEDER and exhibitor of Norwich cocks, from 7s. each; hens from 5s.; bred in cold room; all colours; approval.—34, Wenlock Road, Limonside, Tyne Dock, Durham.

HANDSOME Norwich cocks, grand songsters, 5s., 5s. 6d.; hens 2s. 6d., 3s.; pairs 7s. 6d., 8s. 6d.; typical prize bred stock; approval.—Hatton, Windmill, Belper.

LARGE yellow cock Canaries, 7s. 6d., 8s. 6d. each; hens, buffs or yellows, 3s. 6d., 4s. each; healthy birds.—W. Copeman, Gamekeeper, Toftwood Common, Dereham.

T. BALE, 14, Chester Terrace, Barnstaple.—Norwich Canaries for sale; large yellow and cinnamon cocks, 10s. 6d. each; yellow and buff hens, from 3s. 6d. Canary-reared Goldfinches, 5s.; approval.

COLOUR-FED Norwich Canaries for sale; cocks from 6s. to 10s.; hens from 2s. 3d. to 3s. 6d.; naturals from 5s. 6d. to 8s.; hens from 2s. to 3s.—F. Jelley, 32, Mill Lane, Leicester.

SYMONDS AND SON have for disposal ten pairs of Norwich, 12s. 6d. pair; cocks, 8s. 6d.; cold room; on approval.—Oakdene, Brunswick Road, Coventry.

GEORGE HIGHAM, 7, Glebe Street, Stockport, cup winner Stockport Bird Fanciers' Association, has some grand Norwich cocks from 6s. 6d.; hens 3s. 6d.; approval, deposit.

MATCHED pairs good Norwich, 9s. 6d.; approval willingly; large English cock Goldfinches, 3s.; cock Bullfinches, 1s. 6d.; ditto hen, house-moulted, 1s. 6d. —Girling, 7, Vaxham Road, Dereham.

WALLBANK, Hairdresser, breeder of champion Norwich, has about 50 to part with; pairs from 9s. 6d. to 30s.; cocks from 6s. 6d., hens from 3s. to 20s.; approval.—Withers Street, Blackburn.

PRIZE-BRED Norwich, few pairs from 12s. 6d. pair; buff hens, 5s., 7s. 6d., 10s. 6d., 12s. 6d. each, unflighted; approval.—Dawson, Cobden Street, Peterborough.

G. CHAPMAN, Haymarket, Leicester, has for disposal a splendid lot of high-class Norwich cocks, prize strain, 5s. 6d., 6s. 6d., 7s. 6d., and 8s. 6d. each; hens 3s., 3s. 6d., and 4s. each; properly matched pairs, 8s., 9s., 10s. pair; stamp reply.

SPECIAL! Special!!—Still supplying with the highest satisfaction, grand, healthy, typical Plainheads; judiciously matched prize-bred pairs, 8s. 6d., 12s. 6d., 15s., 20s. upwards; odd cocks and hens cheap, all cold room bred, and willingly on approval. —H. Amies, 69, Ashby Street, Norwich.

A SMALL and select stud of Black Magpie Pigeons, nine in all, including winners Tavistock, Bridgwater, Brislington, Glastonbury, etc., exchange for exhibition Norwich or Yorkshire Canaries, or sell, with eight compartment basket, £4 10s.—E. Smith, Street, Somerset.

SPLENDID Norwich, right blood, same as my winners, own breeding, large yellow and buff cocks, ditto hens, only a few to spare; exchange one pair for one pair unflighted Cinnamons, yellow hen, buff cock, must be short and gobby.—Willoughby, Decorator, Wolverhampton.

STILL THEY COME!

PROPOSED LEYTON AND DIS. CAGE BIRD ASSOCIATION.

SIR,—A meeting has been arranged to take place at Y.M.C.A. rooms, 8, Grange Park Road, Leyton, at 7.30 p.m. on Friday, February 15th. Will all fanciers interested kindly do their best to attend and give us all the support possible, as we wish to put the Association on a successful footing. Since last writing, another Challenge Cup has been promised, making four in all. Therefore, the Society will not be put to any expense for Cups. If any further information is required, same will only be too gladly given by F. WILLIAMSON, 63, Murchison Road, High Road, Leyton.

CREST AND PLAINHEAD CLUB FOR IRELAND.

SIR,—A large and very successful meeting of fanciers was held in Belfast on January 29th, for the purpose of considering the advisability of promoting the above club. Mr. W. J. Cummings occupied the chair. It was unanimously decided to form a Specialist Club for Ireland for the breeding, exhibiting, and protection of the Crest and Norwich Plainhead Canary. The chairman read some correspondence from fanciers in other parts of Ireland in favour of the club, and offering support. A chairman, secretary, and committee were elected, provisionally, to carry out the arrangements. Any fanciers in Ireland desirous of becoming members can do so by communicating with the undersigned, who will be glad to receive contributions and duly acknowledge same (annual subscription, 2s. 6d.). The next meeting will be held in the Avenue Hall, Garfield Street, Belfast, on Tuesday, February 19th, at eight o'clock.—JAMES STEWART, Hon. Sec. (pro tem.), 359, Donegal Road, Belfast.

NEW SOCIETY FOR PLYMOUTH.

SIR,—A well-attended meeting was held in the Borough Arms, Plymouth, on Jan. 30th, when it was decided to form the "Western Fanciers' Society." Mr. W. G. Hawken presided, and Messrs. Staples, Clark, Watson, Hellard, and Knott were elected to form a sub-committee to draw up rules to be submitted to a general meeting, to be held at the same place on Wednesday, February 13th, at 8 o'clock. All fanciers are cordially invited.—W. J. SLOMAN, sec (pro tem.), 32, Mainstone-avenue, Plymouth.

C.B. SOCIETY FOR EXETER & DIS.

SIR,—The letter which appeared under the above heading in your last issue is very misleading. Mr. Folley says, "Having been amalgamated with the Exeter and Devon P.P. and C.B.S., etc." This is the point we wish to put right, as the latter society is still going strong, the Cage Bird section being stronger at the present time than it has ever been since the formation of the society 18 years ago. By the time this appears in print we hope that the members, at their monthly meeting, will approve of what the committee have done, that is, to hold the show on Wednesday, September 25th, and to throw the Cage Bird section open to the United Kingdom. Our Cage Bird Committee are all old fanciers who may be relied on to look after the interests of the little songsters. One of them took an active part in the formation of the society, and has been on the committee for the best part of the 18 years. We hope the next time Mr. Folley writes to the Press he will not give false impressions. There is plenty of room for both societies in Exeter, and we hope the new one will be able to induce more to join the ranks, and by these means they will no doubt do the old one a lot of good instead of harm.—W. A. CORNISH and M. S. ADAMS, Hon. Secs. of the Exeter and Devon Poultry, etc., Society.

OLD C.B.S. AT ACCRINGTON REVIVED.

SIR,—A meeting was held at the Central Conservative Club, on January 1st, for the purpose of reviving the old society. A good number of fanciers were present, and it was decided to start it at once. The following gentlemen were elected as officials:—President and chairman, J. Smith, J.P.; vice-chairmen, A. Hirst and W. Dormer. The committee will be elected at the next meeting, to be held at the same place on February 14th, at 8 o'clock prompt. A hearty invitation is offered to old members and intending new ones.—D. HARWOOD, Sec.

THE CLASSIFICATION OF YORKSHIRES.

SIR,—In reply to Mr. Ferguson, the T.C.C. grant patronage to societies making six Yorkshire classes. The £20 Challenge Cup Competition and the Money and Novice Cup Competitions are granted to these shows. The Taylor's Cup Competition is allotted to members of the T.C.C. who reside outside Yorkshire. The number of classes required is three. Any society can make more classes if they choose, the wording of some being left with them. If Mr. F. will send me his address I will forward him a T.C.C. Book of Rules.—W. MUNDELL.

BORDERS VERSUS COLOUR.

SIR,—Now that the show season is drawing to a close I think it behoves lovers of the Border Fancy Canary to seriously consider the colour question as it affects the sprightly Border. Whoever has followed the various shows where classes have been provided for this variety must admit that with a few exceptions the entries have not been what one would have desired, nor what one could reasonably expect, seeing how popular the bird is becoming, especially in the North, with two specialist clubs to look after its interests and the large number of breeders. How often during the present season, when reading the reports of the Border classes in the various fancy papers have we come across comments such as "Looked as if it had been near the pepper-box!" "Is this colour question open?" etc., etc. Then, with regard to the entries, where are the large classes that we used to see, containing anything between fifteen and thirty, at some of the Northern fixtures, compared with the meagre entries of seven or eight per class at some of the shows this season? And in some cases they have been practically cancelled. Are the breeders of this variety quite sure that this colour question is not working detrimentally to the best interests of the Border Fancy? Those of us who can remember the ordeal that the Norwich variety passed through a good number of years ago, when the natural colour versus K.N. fed and yellow fed versus red fed question was the chief topic, know the heart-burnings and ill-feeling which was then caused. Undoubtedly, in the majority of cases, the winners were fed, and one can hear pretty much the same comments at the shows now in regard to the Borders. That this scarcity of entries in the Border classes is not due to a scarcity of good birds is evident as one goes into the various fanciers' rooms. What, then, is the cause? I think myself that one of the principal reasons is the unsatisfactory solution of the colour question, and until this is settled the entries in Border classes will grow less. I am acquainted with a few fanciers in my own district (possessing two or three hundred Borders amongst them) who will not exhibit for this very reason. There is this to be said in favour of throwing the colour open. Everybody will start off the same mark, whereas as it now stands the most experienced and scientific feeders have the advantage. What have other fanciers to say? Now that the show season is about ended I hope that all interested in the matter will express their views and opinions, treating each other with courtesy and civility, sticking to the question at issue, and signing their names to their epistles. No nom-de-plumes, please!—JAMES FORSYTH (Workington).

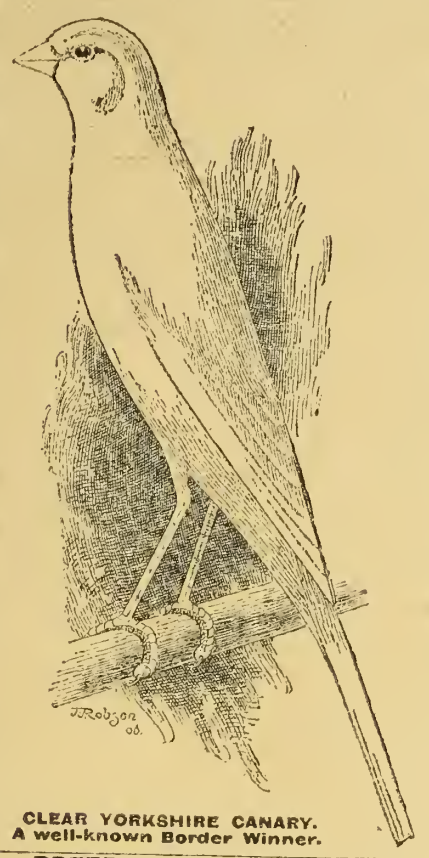
INHUMAN BIRD CATCHING.

Brutality in Cornwall.

SIR,—Where does the law of protection to wild birds come in? During the last week there have been thousands of Thrushes and Blackbirds murderously captured in this neighbourhood here (St. Ives, Cornwall), and if the snow had lasted another week there would have been scarcely one of our favourite songsters left to tell us, with their harmony, of the approach of spring. The mode of capturing is what is called a tackle, or snare—a long line, with perhaps, 50 short strings; each has a small hook with a worm attached, which is stretched along a bare, prepared patch of ground, and fastened thereto. The starving bird soon discovers it, and the tempting bait is soon swallowed. The hook catches in the throat, and the poor bird is left struggling for a considerable time, to attract the attention of others, while the catcher is away to his meals—struggling often until death ends his misery. If the law does not protect them, surely humanity and conscience should. You may see them hawked from door to door, selling at 3d. per dozen in the town, each catcher supplying as many as 100 a day. I hope something will be soon be done to put a stop to the disgraceful cruelty.—WILLIAM PEASE.

A COCKATOO CURED OF FEATHER PLUCKING.

SIR,—Having seen a few notes on the Rose-breasted Cockatoo, and lots of feather-plucking queries in CAGE BIRDS, may I say I have a Rose-breasted Cockatoo that can say more than a hundred words, and many long sentences, such as "Hello, what do you want?" Polly wants a small Scotch." "Bring Polly a quart." It is a clever mimic of all sounds. I had this Parrot given to me as incurable; a confirmed feather-plucker. It was a freak, to be sure. I set to work as advised by your valuable paper, CAGE BIRDS, and paid strict attention to it. At night, before retiring, I smeared it over with a strong solution of quassia chips, using a paint brush; and on warm days I bathed him with water and Condy's Fluid. Now it is in perfect plumage, and is a real beauty. It took a whole year to cure it, but I am more than satisfied. I beg to say I have been very successful with Parrots and Canaries, but I owe it all to your valuable paper, CAGE BIRDS. Wishing you every success.—F. H. TODD.



CLEAR YORKSHIRE CANARY.
A well-known Border Winner.

BREEDER OR EXHIBITOR?

SIR,—I was very pleased to see that a discussion on the above subject had taken place at a meeting of the L.C.B.A. I note that the subject of closed rings played a prominent part. The statement was made that the rings are a failure. This is not so; they have been a big success. With all due respect to Mr. J. S. Clarke, I am not doubting his word when he says that a fancier friend of his used the rings and had failure with them; but I think that if Mr. Clarke were to ask his friend again, the reply would be that he was now successful. When the B.R.C.C. first started ringing their birds we were at a disadvantage, not knowing what would be the proper time to ring the birds—some rung at two others at five days, with the result that the rings slipped off. We now find that the best time to ring the birds is on the seventh day, and to show that the rings are a success we issued in 1905, 1,400, and in 1906, 2,400, and so far we have already issued 400 for this year, which plainly speaks for itself. The advantages of the closed rings are many; we can tell the age of the birds (which stops old birds being put in young bird classes), and also who bred the bird. Also there is no chance of Mr. So-and-so advertising his winning strain, and then, when asked to supply birds, going to buy them, thereby doing the purchaser a great injustice. With regard to the question should the breeder's name as well as the exhibitor's appear in the catalogue, this opens up a big question. For instance, I breed a bird and sell it; the purchaser exhibits it, and wins with it. Am I justified in advertising the fact that I bred the bird? For my part, I say no. I sell the bird, and there's an end to it, as far as I am concerned (though of course I am pleased to know that the bird has won), and if this question of breeder or exhibitor should be brought up by the Cage Bird Union, it should be discussed by members of every club, who should give instructions to their delegate how to vote. I do not think it right that it should be left in the hands of the delegates themselves. At the same time, when having a discussion on the subject, I should like them to discuss the following question: Should an exhibitor, after winning a money prize, buy a medal and advertise that he won it at a certain show? This buying of medals is on the increase, and I contend that the advertising of such is misleading to those who are not in the know. —J. W. NORRIS.

WITHHOLDING OF PRIZES, STOURBRIDGE SHOW.

SIR,—I should like to draw your readers' attention to the judging of the cage bird section at Stourbridge Show. The entries in the Canary A.V. class numbered only four all told, and in consequence the first and third prizes were withheld. The bird which took second prize was the same as was placed second in a class of fifteen the previous week at Netherton. As long as this kind of thing is carried on our shows must inevitably suffer —and rightly, too. In fairness to exhibitors the class should either have been cancelled or a proper judgment given. W. R. WHITE.

[The committees of shows (and not the judge) are generally supposed to be responsible for the withholding of prizes where a shortage of entries occurs.—ED. "C. B."]

THE CAGE BIRD UNION.

SIR,—Who is this tub-thumping Wm. Reid that he should constitute himself the Archangel of the Fancy? Because the Cage Bird Union does not happen to meet with his august approval he seems to think that everyone else must fall into line with him, and disregard the old adage of "Unity is strength" entirely. The William Reids of the Fancy are the people who spell its downfall. He seems to think that because thirty-six members of the London Cage Bird Association are said to have given its affiliation with the Cage Bird Union as their reason for leaving that association, that the end is near for the C.B.U. I do not wish to throw doubt upon Mr. Tyson's words, but I would like to know what he really did say, and whether there was no other reason given by any single one of these members for their resignations. I see that the Manchester Society, our largest and most popular cage bird society only records a loss of two members on account of the Cage Bird Union. There are cranks in every club, and there are always, and will be always, people who, like William Reid, place their own petty interests before those of the Fancy at large. This union is not perfect, but if William Reid and others of his tribe will only give it a chance, or even if they don't (it doesn't matter much one way or the other), it will soon get into working order in spite of the plentiful frost and snow scattered round by disheartened and disappointed clerks and scriveners.—JAMES REID.

SIR,—I heartily approve of Mr. William Reid's sensible suggestion. Let there be a plebiscite taken of all the members of societies affiliated to the Cage Bird Union, with the object of ascertaining (1) Are all members in favour of a union? (2) If so, do they approve of the C.B. Union as at present constituted? (3) If not, what steps do they propose to take to abolish the present officers and constitution? I entirely disapprove of the union being exploited for trade purposes. —M. GREGORY.

THE BENEFIT OF A NARROW AVIARY.

SIR,—"Your aviary is very narrow," is an expression I have seen with frequency lately in your columns, in answer to querists, by your esteemed advisory experts. Mine is 6 ft. by 5 ft. by 2 ft., and I find that a narrow cage is more suitable for keeping the birds practically finger-tame; that is, as far as my experience goes. My small collection is very tame through having a narrow aviary, and I think if you have a wide one, they (the birds) are very apt to be "wild," and seek retreat when you go near. Mr. Weston gave me the suggestion to keep my seeds separate, and I find it very successful indeed; the waste is reduced practically to nil. Many thanks, Mr. Weston. I am only writing this as a very friendly critic, and I wonder what the experience of other fanciers are of narrow aviaries?—PENNYWORTH.

A CANNIBAL BLACKBIRD.

SIR,—A friend of mine, living at Trinity, a northern suburb of Edinburgh, on his way to business recently, noticed, hanging by the leg from the branch of a tree, a Blackbird which was fluttering, and trying to free itself. The bird appeared to have a string round one of its legs, which had got twisted about a branch. The following morning my friend, passing the place, noticed the bird still hanging, but, apparently, dead, and to his surprise, saw another Blackbird sitting on the branch pecking at, and devouring the dead bird. Did any of the readers of your paper ever hear of such a case? I can believe my friend's story as he knows and takes an interest in birds.—W. E.

FORRES SHOW.

SIR,—Kindly allow me a small space in your valuable paper regarding the Forres Show incident. I think it is time those two correspondents came to an agreement for the benefit of the society. As for the disqualification of Macalpine's birds, I am sorry to see the matter gone so far. Had it been two professionals it would have been settled at once and for all.—CABERFEIDH.

[A sentence drawing a comparison between the respective experience of the two disputants has been blue-pencilled.—ED.]

"PRAISE FROM SIR HUBERT."

SIR,—As you like opinions of your paper and magazine, I will give you mine, after thirty years' experience in ornithology, and that is, that in the present age bird fanciers are developing into a scientific body, who study the characteristics of the various birds, both wild and domesticated, and therefore CAGE BIRDS and the "Bird World" are leading in the right direction to supply the wants and desires of the bird fancying public. The steady and continued increase in size and importance of the paper, CAGE BIRDS, is a clear proof of its value and prospect of always superseding other papers of a similar nature. —A. H. R. COCQ (Twickenham).

Several letters crowded out.

Breeding, Rearing and Exhibiting.

By J. C. Barnes.

A Paper read before the Chesterfield and District F.A. Oct. 10th, 1906.

(Continued from page 738.)

Egg and bread, or whatever soft food one is used to, must be given at the time the offspring put in an appearance. Twice or three times a day, if possible, this should be administered, as the oftener you provide fresh food the more frequently will the young have attention paid to them by the parent birds. A little hemp seed can be given with good results, when the young birds are a couple of days old. I use a great quantity of hemp during the breeding season, with very beneficial results, so can highly recommend same.

Many fanciers have a great objection to the use of hemp seed, on account of its heating qualities, but I think that in most cases they are fanciers who have never given this seed a trial; the idea is more superstition than anything else with those fanciers who hold this view. Should any be present this evening let me prevail on them to depart from such ways, and try it ere another breeding season comes round. Hemp seed is a most excellent food for young birds, and very often old birds feed better on hemp than they do on any other food. German summer rape is also a seed that is used rather extensively for feeding purposes.

HOW TO PREPARE RAPE.

The best and safest way to give this seed is to boil it first for a short time, and then strain. By this procedure you take away the pungent taste. Old turnip seed and charlock are good seeds, but it is hard to know when you get a bit of good rape. The best test, as far as I know, is to taste it. It should be of a sweet nature, and free from bitterness, and not of too hot an order. It should be free from dust and bright. Colour of seed varies. I, for my own use, always try to procure that of a fairly light red tint. This, as far as my experience goes, gives the best results.

GREEN FOOD.

Never give any kind of green meat to birds until their youngsters are three days old. Various are the opinions as to what kind of green stuff is best. Dandelion, lettuce, and watercress are the three kinds mostly used. The former is a favourite of mine, a great quantity of which is consumed by my birds during the summer months. I have often heard it said that dandelion gets your birds into too raky a condition, but this I have still to find out, and can with every confidence recommend its use. When selecting dandelion, choose the younger leaves of the herb and discard the large rough leaves, and always collect it in places that are outside any area of possible contamination. From under walls or on the road sides I should never think of taking a single leaf. Select it, if you can, from open fields. Two small leaves, morning and afternoon, is ample to give to each pair of birds per day. Watercress I do not dislike, and in towns or cities this is without doubt mostly used, and is most convenient. The watercress to use is that which is of a nice green colour, and not the black or very dark green variety. The small-leafed cress is far better than the large-leafed variety, it being much more tender. Lettuce I hardly ever use, but several fanciers use it with every satisfaction, and no doubt the young leaves of this plant are much appreciated by the birds. Let your motto be, in administering green food: little and often.

Don't push as much between the wires as would be sufficient for 100 birds, but just sufficient for the birds to eat up and relish.

WEANING YOUNG BIRDS.

When your young birds are 28 days old, you take them away from the parents, and place them in flight cages, or whatever you intend keeping them in. Having done so, great care must be given them. Egg food must be supplied until they are at least eight weeks old, along with a little crushed hemp, rape, and canary seed. Get the youngsters on to hard seed by degrees. Many young birds are killed at this stage of life by fanciers rushing them from soft food on to hard too hurriedly. I generally make a practice (which I think beneficial) of providing all young birds with a small quantity of soft food until they begin to moult. A bath on nice, bright days is thoroughly enjoyed by one and all, and is a good conditioner to birds whether young or old. Always provide the bath in the early part of the day, so as to give the birds ample time to dry themselves previous to their going to the land of nod.

KEEPING DOWN RED MITE.

A little quassia can be added to the bathing water with advantage. This assists in keeping down red mite, which, to my mind would have been far better named, "red monster," for the trouble these parasites cause—one way or another—throughout the entire year. All present will no doubt have read the correspondence that has appeared in the columns of CAGE BIRDS re red mite. I cannot help but smile to myself that men in these enlightened days should state that "the more red mite they breed the better their success with their birds." That is rubbish. Red mite are the bugbear of Canarydom without doubt, and those fanciers who desire to gain success will do well in keeping top side of these insects. Red mite suck the very life out of a bird, and stop its growth. No breeding-room is entirely free from them, but by careful methods one can keep them down.

THE ART OF EXHIBITING.

Here we arrive at a very important part of the business—exhibiting. Exhibiting creates surprises, wonder, pleasures, argument, and a host of other excitements. The exhibition world of to-day is hot whichever way you look at things. Fanciers need to be cute, to the point, and up to all the moves, if success on the show bench is to be gained.

Whatever variety you possess, training of same is an absolute requirement. No matter how good a bird is, if not properly trained, so as to show off all its good points when facing its adjudicator, it stands a very remote chance of bringing home a first and special. To attain the object of steadiness run your birds into show-cages as often as possible; this is best practised when the birds are quite young. When nicely settled in the show-cage, lift them, speak kindly, gain their confidence, scratch the cage-bottom so as to draw their attention, and so on. You cannot fondle birds too much. Your trouble will be ample repaid by your birds having learnt the lesson of showing to the best of their ability.

A wild or unsteady bird hardly ever gets noticed by a judge, the fact being that he has not the time to waste over a specimen not properly benched. Train your birds so as to assist the judge all round, thereby you will assist yourself to land the prize you are bent on.

WASHING.

A good bird well washed stands a good chance. A good bird badly washed stands a poor chance. Always make a practice of bathing your birds fully five days previous to show day. Birds vary greatly in length and quality of feather. Those specimens that possess short feather pull themselves much more quickly together than do the birds that carry an abundance, so let each particular bird be your guide as to the washing-up of same. After washing it is most desirable to spray them, or, better still, give them a bath each morning previous to show day. Bathing is a conditioner, putting vigour into the birds, encouraging them to plume themselves, and is also a good tightener of feather, and assists very materially in producing finish.

CONDITIONING FOODS.

Egg food, with a little maw seed added and also a small quantity of isinglass, answers the purpose of putting birds into condition admirably in most instances. You might add to the drinking water a few drops of chemical food (Parrish's), just sufficient to turn the water port-wine colour. The isinglass you can purchase from any chemist. Put one teaspoonful in half a cupful of water, and place the same in an oven to melt. When cold it sets like a jelly. To each egg and bread add about one teaspoonful, mix well together.

Another excellent conditioner is Allen and Hanbury's "Byno-Phosphates," added to the drinking water in the proportion of one tenspoonful to each ounce of water or thereabouts. This preparation I have great faith in, and can highly recommend it. It assists in the digestion of the bird, is a strengthener, mild in action, and most useful in cases of bowel trouble. The following mixture I have also used with every satisfaction:—One pint best port wine, 1 lb. best honey, 1 oz. of citrate of iron and ammonia. Heat the port wine before adding the honey and citrate, stir well, and, when cold, bottle up. Put just enough to your egg food to make it fairly moist. About twice a week is sufficient. The port wine gives strength, the honey acts on the bowels, and the citrate is a tonic.

HINTS FOR THE SHOW BENCH.

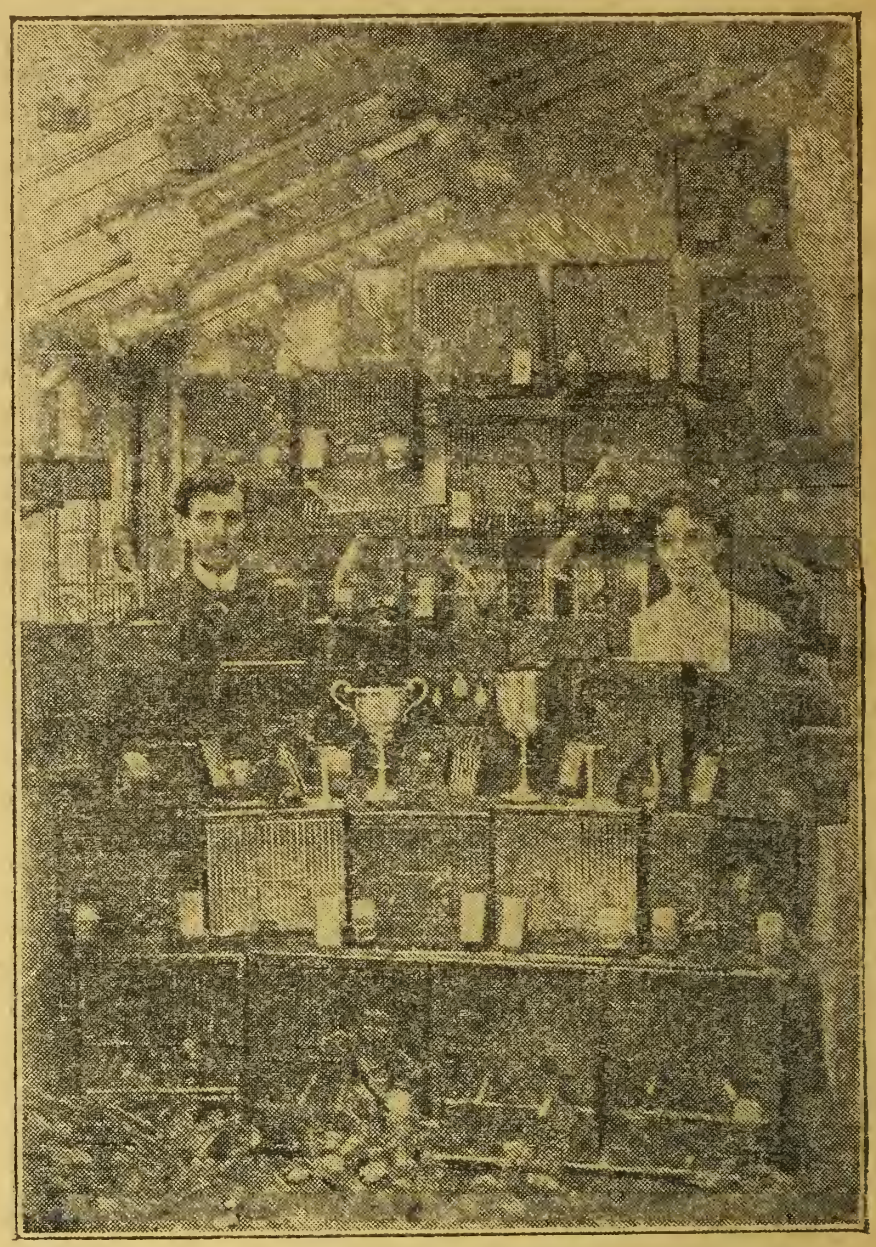
Should you contemplate exhibiting at any show, enter your birds early, as late entries are apt to throw unnecessary labour on the hard-worked secretary, and cause mistakes to be made.

Get your birds off the night previously to show day if possible, so that they may be staged in good time; by so doing, you avoid the "too late for competition" label being placed on your cages. Also, it gives your birds more time to get accustomed to their fresh surroundings, and put their toilet in apple-pie order previous to being adjudicated upon.

Place only plain canary seed in the cage bottoms, so that suspicions will not be aroused as to the fairness of your staging. Avoid coloured perch ends, these are looked upon as a "landmark"; tie your cage-labels on in the ordinary manner and bar "patent ways"; also have your cages scrupulously clean, as dirty cages often turn the verdict against you. Let the best birds win; if these happen to be one's own well and good, but should it be otherwise, give credit where credit is due, and don't be blind to the good points other exhibitors' birds possess over your own.

Visit the shows where you are exhibiting and make comparisons amongst the birds; should you fail to follow the judge in his selections, get a word or two with him if possible; he will usually only be too pleased to explain matters. Don't bully the judge, he is only human. No man is infallible, and when a judge has acted up to his convictions, straightly and honestly, he surely deserves a better fate than often falls to his lot.

Don't rush off with your exhibits two or three hours before the show is advertised to close; it is far from fair both to show officials and the visiting public.



"WHEN A MAN'S MARRIED."

Mr. W. G. Bull and his helpmate in their conservatory at Bristol. The many prizes here displayed will give some indication of the value of a Fancier having a "better half."

Grateful—Comforting.

EPPS'S

A welcome delicacy for

COCOA

Breakfast and Supper.

Anyone who requires a free sample of "Colorine" can have same on sending a postcard to H. Cooper, House Decorator, Hitchin Road, Luton. I have, writes Mr. Cooper, sold just on 1,700 tins, and never received a complaint. My results from advertising in CAGE BIRDS are splendid.

SOULS OF THE LOST.

[Flocks of birds, in appearance like Cormorants, fly up and down the Bosphorus, skimming the surface of the water at a prodigious speed. These birds the French call "les Ames Damnees," the tradition being that they are lost souls constrained to take up the form of birds. They are never seen to alight anywhere, and apparently spend all their time flying up and down the Bosphorus between Constantinople and the Black Sea.]

Souls of the Lost, on tireless wing
From sea to sea they ever fly.
Seeking for rest that naught may bring,
Souls of the dead who may not die.

No mortal eye hath seen them fold
Their vagrant wings in hallowed rest.
'Neath summer's sun, in winter's cold,
From sea to sea they fly, unblest.

Far overhead the eagle floats,
A sable blot against the sky.
At sea the white-winged sailing-boats
Speed homeward as the shadows die.

And when the night gives way to morn
You see them still on tireless wing.
From Azof's Sea to Golden Horn
They seek the rest that naught may bring.

—E. LE BRETON-MARTIN, in the "Evening Standard."

The Best Shilling Handbook on Canaries Published

THE

BRITISH CANARY.

By that well-known Judge, Expert and Journalist,

C. A. HOUSE.

This thoroughly practical book treats of the Varieties, Characteristics, Breeding and Management of the Canary, and has reached its fourth edition. We have had it illustrated by "Cage Birds'" artist-in-chief, Mr. H. Norman, and it is now absolutely the best Shilling book on the subject procurable. Post free, 1/2, stoutly bound in cloth, 2/-, post free.

"CAGE BIRDS," 154, Fleet Street, London.

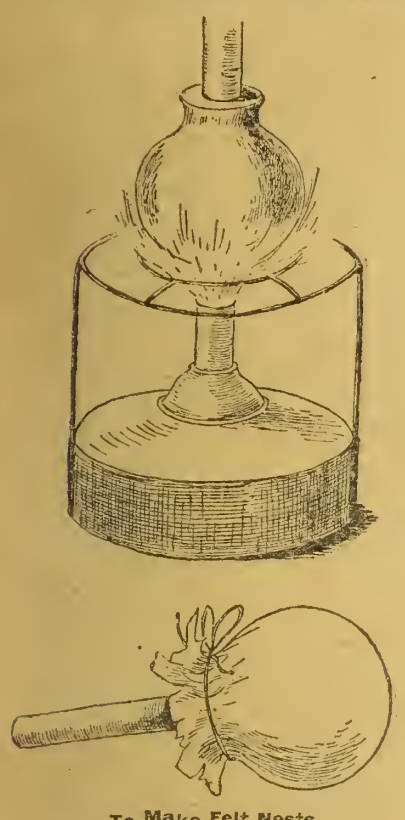
ILLUSTRATED IDEAS

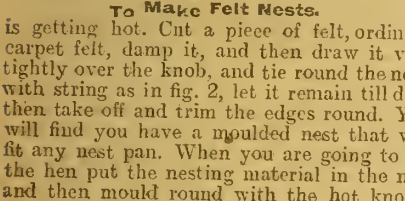
Under this heading we shall illustrate weekly some idea useful to the bird-keeper. Readers are invited to send us particulars of any novel and practical appliance of use in our hobby, either in cage, bird-room or aviary, with a rough sketch of same where possible. Every "Illustrated Idea" used in this column will entitle the sender thereof to a postal order for two shillings and sixpence.

No. 73.
FELT NESTS.

Sent by W. MORTIMER, 77, Arlington Road, Camden Town.

Mr. Mortimer writes:—"For making felt nests all that is required is a brass knob of a bedstead, and spirit lamp. Drive a stick of wood into the hole of the knob, place it on the rests of the spirit lamp in fig. I., while it





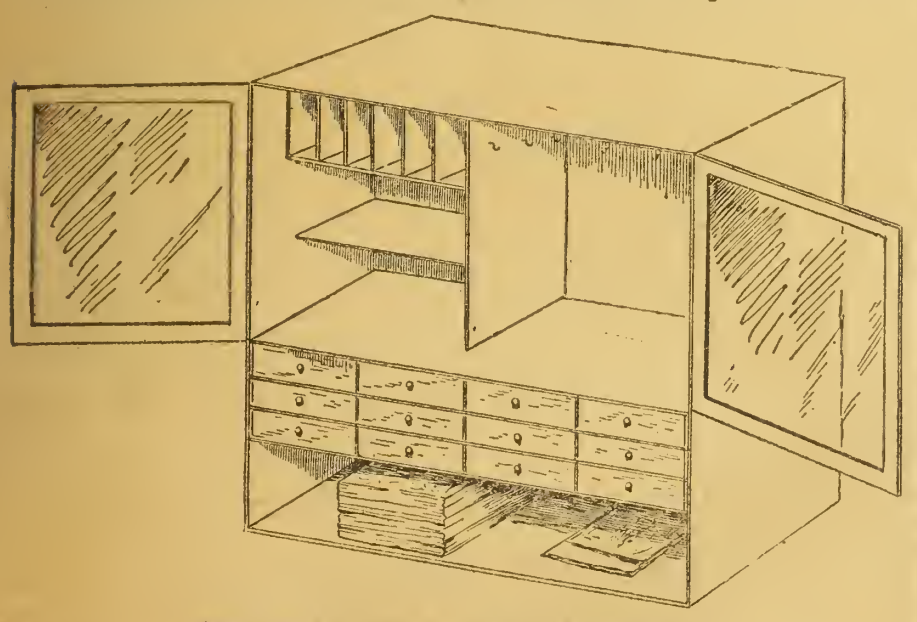
To Make Felt Nests.

is getting hot. Cut a piece of felt, ordinary carpet felt, damp it, and then draw it very tightly over the knob, and tie round the neck with string as in fig. 2, let it remain till dry, then take off and trim the edges round. You will find you have a moulded nest that will fit any nest pan. When you are going to set the hen put the nesting material in the nest and then mould round with the hot knob."

No. 74.
A BIRD-ROOM CABINET.

Sent by Mrs. Annie Barker, Mostyn House, Cardigan Road, Headington, Leeds.

I am sending you a sketch of my bird-room cabinet, which I find most useful, and which cost me just 8s. only in the making. It was put together for me by my son, and any fancier clever with his hands and possessing a few tools can make and fix one in a convenient corner of his bird-room quite



Mrs. BARKER'S BIRD-ROOM CABINET.

Height, 2 ft. 6 in.; depth, 12 in.; length, to suit recess wherein fixed; height of tier of drawers, 8 in.

easily. It makes a nice-looking piece of furniture, besides being so very useful. At the top are narrow divisions for keeping medicine bottles (such as a little brandy, olive oil, Parrish's chemical food, etc.). Underneath is a shelf for storing clean seed and water vessels, finger drawers, etc., also clean perches. Underneath that I keep my cocoanut husks, and other nest-boxes (for Foreign birds). In the large space at right-hand side are pegs to hang spray millet, dusters, etc., on. It will also hold sliding divisions, etc. The drawers, of course, are useful for many purposes, such as the storing of sponge cake, cuttlefish, dried egg shells, grit, titbits in the seed line, etc. On the lower shelf I keep my CAGE BIRDS and "Bird World Magazines." The Answers to Queries I find particularly useful to have at hand for ready reference. The folding doors over the upper part keep out all dust and dirt.

Disappearing British Birds.

G. H. Paddock, F.Z.S., The Hollies, Wellington, Salop, writes to the Editor of the "Daily Mail" as follows:—"Mr. Stephen Reynolds, in his remarks anent the disappearance of rare birds, is too one-sided in laying the cause solely at the door of the wealthy collector. What about the game preserver? To the lover of birds it is a source of regret, lessening as it does the interest which he would otherwise have in many districts, that, owing to the persistent persecution of game preserves, some of the larger Raptores, which formerly bred in them, do so no longer, and that the smaller species are from the same cause rapidly diminishing in number. Nor is this systematic destruction confined solely to the Raptorial birds, for similar fate has befallen some members of the Corvidæ, though to a lesser degree, as witness the disappearance of the Raven, Crow, and Magpie. The writer can remember one district where forty years back every little spinney, to say nothing of the larger woods, held a crow's or Magpie's nest. Now, alas! you may hunt for them in that locality in vain."

Robin Feeds Rook.

During the recent severe weather a Robin was noticed to be carrying away large pieces of bread from a window-sill of a house near Hadleigh.

A watch was kept upon its movements, and it was discovered that it carried the food to a Rook which sat on the snow in a meadow adjoining the house, and about 100 yards distant from the window-sill.

The Robin continued to do this work as long as the snow was on the ground.—"Evening News."

Musical Birds.

Although the majority of the birds are faring badly, a few in the village are evidently doing well. We had a proof of this recently. The snow was falling heavily just before dusk, and as I came through the village a cheery Robin was piping his evening song. A little further on the shrill notes of the Hedge Sparrow were heard, and, still later, the beautiful, clear melody of the Song Thrush came from the Convent grounds. The weather was cold and dreary; there was nothing in the wintry aspect of the surroundings to cause our tuneful birdies to break into song.

The Cow-Bird.

In some parts of England the Yellow Wagtail is called the Cow Bird, on account of its constant attendance upon cattle when they are feeding in the meadows. Grass land is always infested with insects, especially during the summer months, and at each movement the animal dislodges swarms of small flies, besides those that settle upon it. It is a pretty sight to see the active Wagtails running nimbly round the feet of the grazing cow, and no doubt they find plenty of food in this manner.

Cage Making and Painting.

Remarks delivered before the Oldham F.A., by Messrs. Hampshire and Harrison.

Mr. Hampshire was first called upon by the chairman to deal with "Cage Making." He said: You all are aware of the subject that I am down for this evening, and I hope none of you are going in for cage-making with a view to making a fortune, as this sort of work is termed "a farthing an hour job." However, different fanciers have different opinions, and I will proceed to explain my method of cage-making. Any reliable firm will supply you with the wood you require. I generally purchase a yellow pine (deal) plank, which I term an 11 in. x 3 in. seconds pine. I then have it cut up into boards 5-16ths of an inch thick, or you may have it cut to the thickness of your own choice. At the time of purchase, get the wood planed by machinery, which will save you a lot of labour, and will only add slightly to the cost. Supposing you have got some well-seasoned boards and a few tools which are suitable, you are ready for the undertaking. If you intend to make a number of cages, for a rack, I should suggest to have them as accurate as possible, and all one size.

THE SHOOTING BOARD.

Your first step is to make what I call a "shooting board"; you need not be very particular about the size, so long as it is large enough to receive the longest part of the cages you intend using it for. My board is made of very hard oak, so you see it is something which a novice would not plane away so soon. The size is about 24 inches by 12 inches wide, and 1 inch thick, and consists of 1 inch scantling, or strip, which is the full length of the board; also a strip the width of board. These pieces are prepared with screws, so that I can move them to any position I require. My own cages are 15½ in. x 14½ in, about 8 in. deep from front to back, and I think they are very suitable for moulting any kind of a bird in. They are plenty large enough for breeding Lizards, Norwich, etc., in. Lizards, in particular, are birds which should be kept in separate cages when moulting, and during the time you are exhibiting them. You also have to take into consideration the number of cages your space will allow. To make cages about 15½ in. long, 14½ in. high, and about 8 in. deep, your wood should be 11 in. wide. This is the width I find to have the least waste in, and it is generally sold by the superficial measurement. A good cutter-out can easily save his wood, where a bad one may easily spoil a lot. With boards and rips 7 inches full from best edge, it generally leaves 3½ inches full, as they are mostly 11¼ inches wide, so you see the 3½ in. pieces come in for the bottom rails, and for joining the back boards up to the 14½ inches.

CROSS CUTTING AND PLANING.

Next cross-cut them into various lengths, and skim them over with the smoothing plane; also just shoot the best edge off your stuff and lay it in lots of four, to work four pieces at once. Then set your long rib on near the edge of the shooting board, on a parallel line 7½ inches from face edge of board; also set the top end strip or plug. Then take four of the pieces which you need, 7½ inches wide, lay your plane on its side on the bench, on the off-side of your shooting board, and shoot the four pieces at one time. When you have stretched up all your tops, bottoms, and sides, unfasten the screws of the long strip and re-set same on a parallel line 3½ inches from the face edge of your board, then "shoot" all the bottom rails, etc., which should be 3½ inches wide. By removing the long strip again to the 11 inch line, you can "shoot" the edges of all boards you intend to glue together for the backs.

We now come to unfasten the short strip (or plug) and by resetting it a little over 15½ inches down, we can "shoot" one end off all the tops, bottoms, and back pieces, four at once; then by resetting strip exact at 15½ inches, you can "shoot" all this lot the nett length. Again move your strip to a little over 14 inches down, and trim one end of your sides. Reset again to 14 inches, exact, and you get your right length of sides. The ½ inch bars for top rail of cage can be got out of remnant pieces. Glue backs together, and then fix your top, bottom and sides together with fine long sprigs, also the backs and front rails. Give a rub over with fine sand-paper. The next step is the making of the fronts. My own are loose wire fronts with punched flat bars, and my method of making them is to lay them on a tinplate, or block, made of similar wood as the "shooting board." The block has small grooves to hold the flat bars in their position, and by placing the four longest wires in you can solder them to the bars; the rest of the wires being put in place you can just lay on with a small brush a small quantity of spirits of salts, and then run your solder and iron over same. By placing the door bars in two short grooves you can fill in the wires and solder; be careful to leave the two end wires longer than the rest, so as to bend round the two long centre wires.

FINISHING THE CAGES.

Mr. Harrison took up the subject of "finished" cages, and in his opening remarks, stated that he preferred to stick to the old-fashioned way of lime-washing inside. However, a change had been made by our younger fanciers, and they were using paint and enamel. He believed in every man following his own ideas, and went on at length with advice as to painting and enamelling. Firstly, he recommended getting cages free from all crevices, and being well sand-papered. For the fronts he suggested making some burnt sienna in water and rubbing boards with same, and when dry getting a flat camel hair brush and polishing or varnishing the way of the grain. For enamelling, he advised oil paint (white), giving one coat; let this stand a day or two, then rub over with fine sand-paper. The next coat must be "dead" paint (white), which means that turps is used instead of oil for mixing. When dry the cages are ready for enamelling. On the outside the most general colour used is black. After sand-papering, give a thin coat of black paint; then get some common lamp black and "stout," and rub on with hands until dry. Enamel may then be put on, and the effect will well repay for the trouble.—A good discussion followed, and the gathering terminated by votes of thanks to the lecturer.

SELLING SPLENDIDLY.
OUR DELIGHTFUL

Picture Postcards OF Canaries, Etc.

EXECUTED IN COLOURS BY

Mr. H. NORMAN.

The most delightful and appropriate Postcards for Bird Lovers on the market.

SERIES.

STRAY NOTES.

By Claude St. John.

A question reached me not long ago which provided matter for some speculation. Here it is: What is the cause of a caged bird's feet being always clogged with dirt? Replying in an off-hand way that it was often due to the habits of the individual, or neglected cages, brought the retort that it was not that kind of bird that was meant, but the bird whose feet were always getting clogged through ill-health. We all know that bird at one time or another whose feet are continually a mass of filth. The feet may be washed clean and dried, and the cages cleaned and sanded, yet barely an hour will pass before droppings are again seen adhering to the claws. One should not be too ready to attribute it to dirty habits on the part of the bird. The fact that this viscid condition of the droppings is unnatural shows that something is wrong, although the bird may appear in good health and spirits, and in nearly every case that something is an error in diet. It may be but a single item, or even an occasional tit-bit, that causes this effect. In Canaries, I know, animal fat, such as a tit-bit of fat pork or bacon, will very frequently be followed by the unpleasantness referred to.

Whether it is wise to continue the use of such foods as cause this viscuosity is another question. Certainly the bird appears to suffer no harm for a time. Still, personally, I would not care to pursue the experiment until the bird's health was affected. I believe that many of the half-feathered surfeited creatures which never seem to moult properly are ruined by the long-continued use of some such unsuitable item of food.

On the other hand, respecting Canaries, we have to consider a common custom of the German breeders of treating their birds with tit-bits of fat pork. Possibly a bird which is bred under this treatment would not be affected by it to the same extent as our fancy varieties which are not so treated. Then, we have all heard that "one man's meat is another man's poison." May it not be the same with cage birds?

Another question that reached me recently made me marvel how little attention readers must pay to their Cage Birds. The same query is asked so frequently. What is the best food for Parrots? Of course, that seems simple enough. But if one reflected for a moment, they must surely see the absurdity of it. The Parrot family comprises genera which feed on hard grain, nuts, etc., very similar to our domestic fowls; others that feed on seeds, fruits or berries; others that feed almost entirely upon soft fruits, honey, flowers, and, perhaps, the minute insects that inhabit the flowers; and at least one species is believed to subsist largely upon animal matter. Thus, one must recognise the utter impossibility of giving the best diet for Parrots without some more definite information as to the species enquired about.

The proper way to teach a Parrot to talk is another of these evergreen queries. As one method will suit every species, whether it be a Parrot or any other species, this is more to the point. The royal road is by unlimited attention, patience and perseverance. The chief stumbling block is that fond Parrot owners too often fail to appreciate the fact that individual specimens, even of the same species, vary greatly in their capacity for being taught. The more they are noticed and petted and talked to, the quicker they will pick up words and repeat them. A catchy expression of two or three words only should be chosen and repeated distinctly, with unwearying patience, day after day until the bird repeats it freely and perfectly. Select a time when it is quiet, or cover its cage over to draw its attention to the lesson. A good time is just after it has settled down to roost at night. The soldiers in India, who make pets of the native parrakeets, are said to have a practice of lowering the bird in its cage to the bottom of a dry well, and shouting its lesson down to it—not a very dignified proceeding, perhaps, but one that is likely to be effectual in securing the bird's attention.

The late stress of severe weather must have rendered our wild birds an easy prey to the amateur bird-catcher. One hint as to seeding off Finches may not, therefore, be out of place. Do not put them wholly on to hard seeds all at once. Soak canary and rape for an hour or two in water, drain, and wipe dry in a towel, and let this form the major part of the diet for a day or two; then gradually add an increased proportion of dry seeds until the soaked seed is superseded. The sudden change from the sodden seed outdoors to the dry seeds of cage diet is the cause of tremendous loss of bird life.

THE YOUNG NATURALIST.

Prizes of 1s. and two of 6d. each will be given for respectively the best and two second best cuttings or original bits about birds. Competitors must be children under sixteen years of age. All efforts must be briefly and clearly written, and ON ONE SIDE OF THE PAPER ONLY.

Two stars indicate the Winning Contribution; one Star the runners up.

Perhaps some of Uncle Peter's nephews and nieces may have seen the wonderful white mare Trixie, who counts and spells and matches colours "just like a Christian," at the Palace Theatre. But it may surprise you to know that more than one hundred years ago, in 1775, a man named Bisset exhibited a horse, and even a pig, who could do the same thing. And besides his four-footed animals, he "taught Canary birds, Linnets and Sparrows to spell the name of any person in company, to distinguish the hour and minute of time, and play many other surprising tricks. He trained six Turkey cocks to go through a regular country dance; but in doing this he confessed he adopted the Eastern method by which camels are made to dance, by heating the floor. In the course of six months' teaching, he made a Turtle Dove fetch and carry like a dog; and having chalked the floor and blackened its claws, could direct it to trace out any given name of the company."

A Foolish Chaffinch.

One day I noticed a bird in the trap-cage, and going to it I found a very rare visitor to the trap, a cock Chaffinch. I took it out, and put it in a cage with a supply of clean water and hemp seed. In the evening I found that these were eaten. When I lifted up the cloth, the bird began to flutter, and beat itself very wildly against the cage. My father advised me to let it go, but I was not willing to do this. It is now getting on very well, and I hope to tame it in time.—Sent by Tom White, age 12, Shepherds, Newlyn East, Grampound Road.

* Thrushes.

A cock may be distinguished from a hen by a darker back, and the more glossy appearance of the feathers. The belly also is white. Their natural food is insects, worms and snails. In a domesticated state they will eat raw meat, but snails and worms should be procured for them. Young birds are hatched about the middle of April, and should be kept very warm. They should be fed on raw meat, cut small, or bread mixed in milk with hemp seed well bruised; when they are able to feed themselves they should be given lean meat, cut very small, and mixed with bread, or German paste, plenty of clean water, and kept in a very warm, dry and sunny situation.—Sent in by Rosa Poor (age 15), 81, Chalk Farm Road, St. Pancras, London, N.W.

* The Birds in our Aviary.

In our aviary there are 23 birds altogether. There are seven pairs of Madagascar Lovebirds, two pairs of Bullfinches, and three Budgerigars. My father caught a young Bullfinch in his workshop not long ago. At first we thought it was a young hen Bullfinch, but soon afterwards red feathers came on its breast. The Bullfinches are very tame, they will eat quite small seeds out of our hands. My father often has the Bullfinches sitting on the side of his hand pecking at seeds in the centre of his hand. One of the Bullfinches got in a small ordinary cage standing on the ground near the aviary, and my father went to the cage and shut the bird in. Two of the Budgerigars whistle very prettily.—From May Curtis (age 10), North Hill, North Street, Oundle.

** The American Mocking Bird.

A gentleman had an American Mocking-bird in such health and vigour that it was constantly either singing or imitating the various sounds it heard. In order to try the powers of this bird, its owner purchased a fine Skylark. When placed in the same room with the Mocking-bird, its song was heard to echo through the house as if it were chaunting on fluttering wing its well-known welcome to the rising sun. The Mocking-bird was silent for some time, but at last burst forth in the strains of the aerial songster, but louder and clearer, as if mounting and stretching its wings towards heaven. The Lark was silent from that moment, nor was a joyous note ever heard from it afterwards.—Ronald McCallum (aged 10 years), 379, Caledonia Road, S.S. Glasgow.

The Reed Bunting.

Passing sometimes through a moorland country dotted with ponds and rushes, one's attention may suddenly be called to a small bird with a black head, white collar, and black gorget down the breast, which darts suddenly from amongst some thick grass or a little tuft of reeds, and drops down as though its wing was broken. But really this is to lure the intruder from the nest, like the trick played by Plovers. The nest is well hidden, and is lined inside with hair, vegetable down, and thin grass, and contains from four to six eggs, which are dark brown and thickly streaked with dark purple and black. In winter (in the North of England) they seem to migrate, and appear about the 12th of April. This bird is called here by the name of the Blackcap.—F. Crossley, age 15, Madison Av., Cheadle Hulme, Cheshire.

Nests of Birds, Poultry, etc., should be regularly sprinkled with KEATING'S POWDER, especially when hens are sitting. Don't forget to do this just previous to the eggs hatching, to destroy the Red Mite. It kills all insects, harmless to everything else. Sold in tins, 6d., 9d., and 1s each.

WILD BIRD LIFE

All communications for this column should be written on one side of the paper only, duly authenticated with the name and address of the writer, not necessarily for publication, and sent to H. Norman, Editor, "Wild Bird Life," "Eastcote," Alma Road, Carshalton, Surrey, by Monday in each week. Original observations and records invited.

During this severe wintry weather, most birds go short of food, and some get so weak that death soon puts an end to their sufferings. There are some species, however, that neither frost nor snow affects; these are the carnivorous birds. Food with them must be plentiful, more so in severe weather than at other times. The half-starved Linnet or the hungry Bunting fall easy victims to the swift, strong Hawk; the Magpie and Jay, too, must find plenty of food along the hedgerows and in the woods.

The big, strong Raven, when he beats his way over the wild snow-clad hills of the West, must find carrion plentiful. The farm stock, the wild deer, and smaller animal life of all kinds, must suffer from the severity of the weather. His vision is keen; very little escapes him. At all times carrion must be fairly plentiful upon the hillside and along the seashore, and he spends his days busily hunting for it, from the first peep of day, until some time after other birds have retired for the night. So restless and active is he, in spite of his great size, that his day is considerably longer; he is the first to stir in the morning, and the last to retire.

The Raven.

This big sable bird has been gradually driven from his old haunts, and now his chief strongholds are the seashore and the mountain sides of Scotland. Like other large birds, he has been constantly persecuted, until few pairs remain, and it is only the bird's natural wariness of disposition that has prevented his total extermination. He has constantly to measure his strength against the wits of the gamekeeper and shepherd; game and eggs enter into his menu, and during the lambing season he haunts the large sheep farms, and is the first to attack a weakly lamb or sickly sheep. But however exposed the find may be, his natural wariness prevents him "setting to" at once. He flies over and over, and back again, to and fro, several times before finally alighting. He beats the seashore like a gull, flying just above the waves, and will dispute with the sea birds for the possession of a carcase.

Ravens pair for life. Nesting commences early, before the winter is past, and snow may be thick upon the hills when the first egg is laid. The nest is placed high up on some inaccessible cliff; it is a huge affair, and has been used for years by the same pair, or their predecessors. Each year it is added to, and patched-up, and made good after the winter storms. Sticks of all lengths are used in its construction; roots, tufts of grass, and wool forming the finer material for lining. The eggs are small for the size of the bird, and closely resemble those of the Rook. It appears that both parents assist in incubation, although the hen bird does the greater amount of the work.

During the whole of the nesting period, the Raven relaxes none of his wariness, and will approach the nest as carefully then as he will at any time of the year. While rearing the young birds the old ones do a considerable amount of damage in the district; the sheep farm, the game preserves, and the poultry runs all come in for attention. He is a strong, powerful bird, and will attack anything living that he can master, and as a considerable amount of food is required for his hungry brood, the neighbourhood is heavily taxed. When the young birds are reared, and can forage for themselves, they are driven from the district, the old birds allowing no others of their own species upon their particular beat. These birds live to a great age, and a pair will inhabit the same cliff for years. Their natural wariness protects them; their chief enemy now, and the one that will eventually exterminate the species, is the greedy egg collector.

Notes and Queries.

The Waxwing.

In a recent number it was remarked that the Waxwing had not been recorded this season. A reader (F. W. C. Flint) kindly sends a note to say that one was observed in her garden in Kent during November. Such a record is interesting because these birds generally travel in parties of various sizes, whereas this one was alone.

The London Pigeon.

Perhaps one of the greatest wonders to the countryman naturalist visiting London is the tameness of the Wood Pigeons, for few birds are so wary and careful as this particular bird in a state of Nature, and yet here they may be seen strutting about among the cabs and traffic like the ordinary domesticated Pigeon. The London Wood Pigeon must not be confused with the ordinary domesticated bird so plentiful in the neighbourhood of St. Paul's. The former can only be seen in certain districts, mostly in the West End, near the parks.

Rough on the Heron.

It is reported that the Exe Conservators have decided to persecute the lordly Heron, and are about to offer rewards for birds killed in the estuary. One was shot recently, and about forty young trout were found in its crop. Although I am fond of fish, I must say I am sorry to hear this decision, for, while passing west in the early autumn, one of the most pleasing sights of the whole journey from London was some dozen Herons perched upon the sea-wall at various intervals. Such a sight made one wish the train would slow up to allow of further inspection.

Maternal Instinct in a Magpie.

Here is a peculiar case of maternal instinct as displayed by a Magpie, told by a man who knew the bird from birth. He said they called him Jacko, but from the time when he first started to cut his tail feathers until his untimely death the problem of sex had never been solved. Jacko had always taken kindly to the children, but the baby was the object of his special affection. Jacko guarded the infant as though it had been his own little Magpie, pecked the cat whenever it came near, and made the dog so unhappy that it ran away from home. If the baby cried Jacko would come flapping in, regard it tenderly with an affectionate side-glance, and then hop off down the garden, to return in a few minutes with a worm, or a grub, or some other tempting morsel. One day the child's mother was startled by an unusual commotion. Caw! Caw! Caw! squeaked the bird, and the baby screamd as though it had lost the teat of its bottle. Jacko was perched on the teethling's shoulder, trying to insert a live wriggling centipede into its mouth. The mother seized the fire-shovel, and Jacko got it on his "worm-basket" with a thud. Thus he died, a martyr to the maternal instinct.—Cutting sent by J. B. Waterman, East Dulwich.

HOW TO MAKE LIGHT BUNS.

FOREIGN BIRDS—continued.

PARROT LOVERS

Should send post-card immediately for our new enlarged book entitled "Parrot Prattle" (registered copyright, infringers and imitators will be proceeded against). This book contains 120 pages of very interesting facts, and gives valuable advice and hints to all parrot buyers. Full details of our original system of selling Parrots on four week's trial, at our risk, which we were the first to introduce. We sell Parrots of all descriptions on four weeks' trial, at our risk, before settlement. Cheapest and best in the Kingdom, and any Parrot sold by us, and not giving full satisfaction, will be exchanged any time within twelve months. Remember we lead and others try to follow. Write to other dealers as well as us, and judge for yourselves. Lists of Parrots for sale and above book post free on receipt of postcard.

ALWAYS USE OUR

DEPOSIT SYSTEM.

We are not responsible for the statements made in advertisements, nor for the *bona-fides* of either buyers or sellers. In all transactions the adoption of our Deposit System should be insisted upon.

IMPORTANT.

SEND THE FULL COMMISSION.—If the full commission does not accompany the deposit, the vendor will not be notified of its receipt until the amount deficient, plus the extra postage incurred, has been paid to us.

HOW TO REMIT.—Under no circumstances will Chequcs or Post-dated Money Orders be accepted as deposits. Uncrossed Postal Orders must be sent and the numbers taken for safety.

RULES.

1.—PROCEDURE.—Tbe intending purchaser should send to this office tbe amount of the purchase (our deposit fee included), and at the same time he should communicate witb tbe seller, stating what it is he requires sent on approval. We acknowledge reccipt of the deposit to both parties. In all cases the depositor should give bis name and address, and also that of tbe vendor, and must write same clearly and distinctly.

2.—END OF TRANSACTION.—Tbe deposit is retainced by us until we bear from *both* parties that the transaction has been completed. If a sale has been effected, we hand tbe amount deposited to tbe seller. If a sale has *not* been effected, we return the amount to the depositor. The transaction must be conducted by the parties themselves. We merely hold the deposit.

3.—AMOUNT OF COMMISSION.—Tbe fee is 6d. for each £1, or fraction of £1, and it must be sent at same time as the deposit.

4.—IMPORTANT POINTS.—The depositor must decide within forty-eight hours of tbe receipt of the goods whetber he will keep or return the same, unless, tbat is, some otber period of approval (of which we must be advised) is agreed upon by both parties. The depositor must at tbe same time notify us of tbe fact that he bas returned tbe goods. If the goods are not returned within tbe said forty-eight hours, we reserve the right to send the deposit to the seller after the expiration of that period. And should tbe seller fail within three days to notify us of the receipt of his goods back again, tbe transaction will be treated as ended, and the deposit be returned to the depositor.

5.—A SATISFACTORY PURCHASE.—When a transaction has been completed to tbe satisfaction of both depositor and seller, both parties must at once return the deposit receipts as a guarantee of its completion. The depositor must at the same time instruct us to pay over the deposit to the seller.

6.—GOODS ALREADY SOLD.—If the goods are sold before our deposit note reaches the seller, or, if for any other reason he declines to do business, he must at once return tbe deposit note to us. Failing its receipt, we reserve the rigbt to return tbe deposit to the sender after the expiration of three days.

7.—FRESH TRANSACTION.—In case no sale be effected, a deposit is available for purposes of a fresh transaction, provided another deposit fee be paid.

8.—GOODS IN TRANSIT.—Goods in transit are at the seller's risk, and any damage or loss sustained on the journey must be borne by the seller. But goods not approved of must be properly packed and returned by tbe same means as were used in sending the same.

9.—PAYMENT OF CARRIAGE.—The payment of carriage must be a matter for arrangement between the vendor and depositor. We do not undertake to settle disputes affecting questions of carriage. But in the absence of otber arrangements the purchaser is liable for the carriage of the goods, and if the goods are sent on approval and returned, each party pays the carriage one way.

10.—DISPUTES.—In case of a dispute, the decision of the Editor is final.

PREPAID ADVERTISEMENTS

UNDISPLAYED.—Three Words a Penny up to eighteen words, MINIMUM Fourpence. One Halfpenny per Word for each word over eighteen.

IMPORTANT NOTE.—Two or more Advertisements coming from the same advertiser, even if sent in different names, are reckoned together and counted as one Advertisement.

Headlines or Footlines 6d., 9d., 1/-, 1/6, according to size.

Postal Orders must be sent as far as possible. All moneys should be made payable to F. CARL. Advertisements close Tuesdays first post in each week, and should be sent to tbe Advertisemcnt Manager, CAGE BIRDS, 154, Fleet Street, London. Terms for Display Advertisements on application.

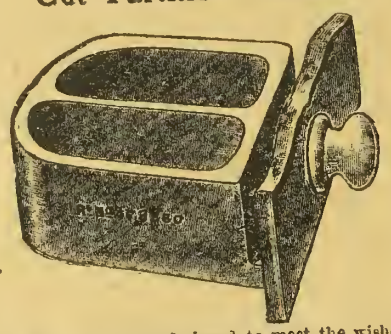
WORTH notice.—Grand drawing-room Crystal Palace-shaped, three-compartment aviary, 3 ft. long, 3 ft. high, fitted with sand bottoms, perches, two movable wire partitions, highly finished and ornamental, 10/6, carriage paid; approval anywhere.—McKeand, Cage Manufactnrer, Castle Douglas.

MY SELF-ACTING SPRING NET TRAPS catch birds of every description without any attention, price 1s. 6d.; larger size 2s.; carriage paid. I have received hundreds of testimonials stating tbey are worth double the money of any trap advertised. Read two, and beware of cheaper imitations that are not worth the cost of carriage. "Sir.—I received tbe net trap; it is honestly worth a dozen of some of the nets advertised. I tried it tbis afternoon, and caugbt more birds in two hours than I bave caugbt in other net traps in two months.—G. Matthews, 87, Myrtle Street, Stockport." "Sir,—Trap arrived safe. It is far superior to all others. I have to-day caught fifteen Linnets, six Redpolls, four Chaffinches, three Greenfinches. J. Scragg, The Brewery, Armitage Road, Rugeley." Patent self-setting trap, Patent 23,927, warranted to catch birds and re-set without attention, 1s. 6d.; call cages, 4d. each; trap cages, single 5d., double 8d., treble 1s. 3d.; birdlime, best and strongest in England, 1s. 6d. lb., 10d. ½lb.; send for sample tin, 3d. post free. Loose netting made from the best thread obtainable, ¾-in. mesh, 6-ft. wide, 3d. yard, 9-ft. wide, 4d.; Lark netting, 1½-in. mesh, 5 yards wide, 6d. yard, post free.—Henry Morris, The Aviaries, Cape Hill, Birmingham.

PARR'S POTTERY

NEST PANS, DRINKERS, FOUNTAINS, BATHS (Oval, Round and Square).

"Duplex" Cut Partition Drawer.



This drawer has been designed to meet the wishes of Breeders so the foods can be separated instead of mixing together. Thus having one drawer instead of two. Made in two sizes.

Mr. C. A. House, Claude St. John and J. North all say it is a good idea.

Wire door falls into the groove and is not in contact with food.

BOOKS.

AVIARIES & CAGES FOR BIRDS;
and How to Make Them.
By I. W. HINTON.

JUST COMMENCED a most interesting series of articles which will be eagerly read by all bird lovers. Not only are the various kinds of Aviaries—outdoor and indoor—fully described, but a lot of useful information respecting their inmates is also included.

In Nos. 2,171, 2,174, and 2,183 of the ENGLISH MECHANIC.

Price 2d. each of all Newsagents, or post free from the Office for 7½d.

A specimen copy on receipt of Post Card.

ENGLISH MECHANIC, CLEMENT'S HOUSE, KINGSWAY, W.C.

THE HYGIENE OF BIRD KEEPING.

By W. GEO. CRESWELL, M.D., L.R.C.P., F.Z.S.

Price 1/1, post free from CAGE BIRDS Offices,

154, FLEET STREET, LONDON, E.C.

OPINIONS OF THE PRESS.

LANCET: "This little book will be welcomed by all lovers of birds, whether ornithologists, aviculturists, or the owners of a single pet songster. The author deals with his subject in a thoroughly practical and scientific manner, and the results of his experiments prove the fallacy of some rule-of-thumb theories. . . . The book is well illustrated."

COUNTRY LIFE: " . . . a surprising amount of really valuable advice for all who keep small birds, whether in cages or aviaries. . . . Those who approach the subject with an open mind must admit the cogency of the author's arguments; and these, backed by a very wide experience at first hand, will prove hard nuts to crack for many of the champions of the 'good old methods.' . . . We venture to think that his experience will pave the way for a revolution in the methods of bird keeping in the near future."

MEDICINES.

DIARRHŒA Inflammation Cure; will cure when all others fail; 25 years' practical breeder of Canaries; advice given free; used by all the leading exhibitors; 7d. ounce, free.—Mather, 5, Albert-rd., Widnes.

PANNASSINA.

A medicinal preparation for Canaries and all kinds of cage birds, prevents and cures asthma, wheezing, loss of song and all diseases caused through damp and cold; is an excellent stimulant, and takes the birds easily through their moult. This speciality has built up a 30 years' reputation entirely on its own merits, invariably effecting a cure after every other remedy has failed. In 6d. and 1s. tins, postage 1d. extra. If you cannot obtain it from your tradesman, apply direct to W. J. Hammond, 19, Anstey Road, Coldharbour Lane, Camberwell, London, S.E. Agents wanted.

FOUND AT LAST.
BRONCHORINE.
Cure for Asthma, Bronchitis, Loss of Tone, and Wheezing; Ideal Tonic for all Cage Birds; taken readily.

"66, Moston Street, Birches Head, Stoke-on-Trent. Jan. 2nd, 1907. Send 1s. 6d. bottle Bronchorine. I am one that does not believe in trying to cure half dead birds, but find Bronchorine fine to have by you to give birds when they come back from shows this weather.—B. Peake." "King Street, Melton Mowbray. Jan. 3rd, 1907. Send early 1s. 6d. bottle Bronchorine, have run out; don't want to be without it; find it very good remedy for colds.—W. Jackson." "73, Tudor Street, Liverpool. Aug. 22nd, 1906. Forward as soon as possible another bottle Bronchorine. The last one has given me every satisfaction, and has nearly cured two birds which were suffering from chronic asthma.—J. Jones." Price, 9d., 1s. 6d., and 3s. bottle.—Crawley, 112, Radford Boulevard, Nottingham.

Hopkins, Bird Specialist and Cage Maker, 38 and 41, Fylde-st., Preston, Lancashire.

HARRY ALLEN.

Still again, first, second, third prizes; but it is nothing surprising, with the kind of birds I keep and send out. They are winning all over, including Cleveland, Sheffield, etc. Big, fine, well-pencilled Linnets, stand well, very tame, 2/- and 2/6; extra picked birds, sure mulers, 3/- and 3/6 each; no small rubbish, but real pictures remember. Sixty Mules, bred by three of the above kind, sold by me to Sergeant Smith; £25 to anyone if not true. Grand cock Linnets, singing beautifully, in a polished singing contest cage, with a packet of my Special Mixture, 4/- the lot. Young house-moulted Linnets, taught by my champions, finger tame, 7/6 and 8/6, including singing cage. I can recommend these to anyone; honestly worth the money. "37, Victoria-av., Flixton. Dear Sir,—Received the Linnet and cage quite safe. He is a fine and well-pencilled bird, well worth the money. You may expect another order from me shortly.—F. Street, to H. Allen." I have hundreds of testimonials; see previous advertisements. No delay. Everybody satisfied. Beware, as I see there are a few trying to imitate. I sell the best Linnets that can be got. Don't be led astray by so-called Linnet Kings. This is the original Linnet firm. I am also selling the secret of how to make Linnets sing at one another with their wings down, how to moult, and how to train for contests. Send stamped envelope for particulars. Four packets of my Special Mixture, 1/-.—Harry Allen, 42, Brown Hill-cres., Harehill-la., Leeds.

VARNEY, Stratford. English Cock Goldfinches, 2/-; Cock Linnets, 1/-; beautiful extra special Siberian Cock Goldfinches, 5/6 and 7/6 each. All above guaranteed breeders, and singing stoutly.

Splendid Bullfinches, quite tame, 3/6, Hens, 1/-

British Bird Exhibitors

MOULT YOUR OWN WINNERS.
Hybrid and Mule Breeders, breed your own Winners.
Read of Success received this last two weeks. No fancy prices.

"Mr. Thomson, Markinch. Jan. 17th, 1907. Sir,—Bullfinch I purchased from you won 1st at Scottish National, Edinburgh, this month, beating all the English and Scotch cracks in a class of 38."

"Mr. Turnbull, Jedburgh. Dec. 8th, '06. Glad to let you know of my success with Goldfinches you sent me, winning 1st and 2nd Jedburgh, 3rd Selkirk, 2nd Hawick, 2nd and 4th Carlisle. Send me two more beauties and a show cage." "Mr. J. J. Brain, Glastonbury. Dec. 4th, '06. I must thank you for Goldfinch for prompt dispatch. I received him in the evening and I showed him next morning, and won 1st in a large class. Thanks for same." "Mr. Turnhull, Jedburgh. Jan., '07. Goldfinch has added another 1st to his successes." "Mr. Asburg, Hucknall Torkard. Sir,—Goldfinch you sent me stands 1st at our show in a good class." "Mr. Higgins, West Mallony, Kent. Jan., '07. Glad to inform you Bullfiuch you sent me won 1st and special at Canterbury in a large class. Thanking you for such a good cheap bird." "Mr. Lee, Bandon, Cork. Glad to tell you I bred the light Mule, 1st and special Cork Show, from birds purchased from you." "Mr. W. Dyke, Longridge. Send a cock Goldfinch and hen Bullfinch. Pleased to see the Hybrid Goldfinch-Bullfinch I bred from the birds I bought from you has won 1st and special Leeds, Class 19, 3rd Halifax, 1st Leek, 2nd Hamilton, 2nd Hinckley, 1st Portsmouth, etc., etc."

Mr. Veitch, Jedburgh, Scotland, writes:—"Send cock Goldfinch, 3s., two hen Bullfinches, 3s. Glad to say young Goldfiuch purchased from you won me two 1sts Hawick, 1st and special Kelso, 5th Edinburgh, Class 33, 3rd Galashiels, twice 2nd at our show." W. Jones, Altrincham, December 6th, 1905: —"Send two cock Linnets and two cock Siskins. Am pleased to say I won 2nd and 4th at Altrincham, Open Class with birds purchased from you." Mr. Ewan, Kirn, writes:—"Goldfinch arrived safe, and won 1st and special at our show." Mr. Weedall, Winsford, January 30th, 1906:—"Send another good Bullfinch. Glad to say last two have won 1st and 2nd every time shown. Unfortunately, best one just died; other won 4th large class at big Crystal Palace Show."

W. RUDD, The Bird Specialist, **NORWICH.**

C. ROBERTS, E.R.V.C.C.

Champion Crests and Crestbreds, winning thousands prizes, cups, and honours at all leading shows. Breeder and exporter of some of the best cracks seen on the show bench. Well matched pairs from 30s. 6d.; single birds from 15s. 6d. Few show birds.—67, Whitegate Drive, Blackpool, Lancashire.

CHAMPION CRESTS & NORWICH PLAINHEADS.

These are the two varieties I keep, and no one in England has better. Last Season I had three Fanciers breeding for me with birds of the highest quality. Neither money or sound judgment has been wanting in getting one of the finest stocks in the world together; and remember I don't exhibit now I breed for my customers to win. Hundreds of Winners sold by me, and reasonable. 30 years breeder. Have had the honour to judge at over one hundred shows. If fanciers cannot get the right birds from me, where can they get them? All on approval.

T. BILLINGTON,
220, COLWICK ROAD, NOTTINGHAM.

A sample of letters received by us as to our dealings and value offered to the Fancy:—

"31, High-street, Stone, Staffs, Jan. 29th, 1907.—Dear Sirs,—The bird arrived quite safe at 10.30. It seems in good condition, and I am quite satisfied it is a nice bird. Thanking you for your fair dealings,—I am, Yours respectfully, H. EGERTON."

"81, Roodspark-street, Govan, Jan. 29th, 1907.—Dear Sirs,—The birds arrived here all safe. There is no doubt about them, they are a splendid pair.—Yours, W. HUTCHINSON."

"13, Paradise-row, Eden Bridge, Kent, Feb. 6th, 1907.—Dear Sirs,—The birds arrived safe Tuesday morning by the 10.54 train, S. E. Railway, which I am very pleased with, hoping to give you another order some day, trusting they will keep going on all right.—Yours faithfully, H. JEFFERY."

All birds on approval or deposit. Satisfaction guaranteed.

73, Knowsley Road, NORWICH.

WILL YOU, PLEASE?

Will you please send me your name and address on a post card, upon receipt of which I will forward you, post free, my New Illustrated List of Canaries and British Birds? I have some of the best Norwich in England, including many winners and matched pairs for breeding winners, all at reasonable prices; state requirements. I offer exceptional good value in typical cocks at 6s. 6d., 7s. 6d., 8s. 6d., 10s. 6d., 12s. 6d., 15s., 20s. each; hens, 2s. 6d., 4s. 6d., 5s. 6d., 6s. 6d. to 15s. each; matched pairs from 8s. 6d., 9s. 6d., 10s. 6d., 12s. 6d., 15s. upwards. See what customers say:—"Percy Street, Cork, January 18th, 1907. Received the bird on 15th, and am highly satisfied; it is extraordinary good value for the money.—B. Bramhald to Miss Storey."—"Mcmock, Dumfriesshire, January 19th, 1907. I am exceedingly well pleased with the birds you sent me. They give every satisfaction.—T. Cross to Miss Storey."—"Victoria Road, Hatherleigh, January 18th, 1907. Bird received quite safe, in best of health. I am more than pleased with the quality of the bird.—C. Short to Miss Storey."—"36, Long Causeway, Perth, January 19th, 1907. Bird received safely, and gives every satisfaction, for which accept my thanks. R. Taylor to Miss Storey."—I have thousands similar to the above open for inspection. New Illustrated Price List post free. Travelling cages, 2d. each; all Canaries sent carriage paid on 7 days' approval at my risk.—Miss E. L. Storey, Crowle, Doncaster.

LATEST OPINION OF MACKLEY BROS.' BIRDS.

"High Street, Uppingham, Rutland. Jan. 12th, 1907. Dear Sirs,—The two Birds arrived safe, in the PICTURE OF HEALTH; they are the BEST TYPE of Norwich Plainhead I ever saw. I am HIGHLY DELIGHTED with them. I shall certainly recommend you to all I have the opportunity of so doing. I never had the favour done me from any one FIRM but yours by sending birds on approval without the Deposit System. Trusting the Firm of MACKLEY BROS. may live and reign for the sake of their customers.—Yours faithfully, J. Waddingham to Mackley Bros."

Postal and Telegraphic Address: MACKLEY BROS., (Jacob Mackley), NORWICH.

NORWICH—continued

WRIGHT & SON,
84, Heath Road, Norwich, for Show and prize-bred Norwich Plainheads winners of hundreds of money prizes, also medals, etc., in open competition at Crystal Palace and leading shows. W. RUDD, The Bird Specialist, **NORWICH**

SILK'S CHAMPION NORWICH.

My name and fame as breeder of Norwich Plainheads is so well known to every fancier that my birds need no paper recommendation. I breed to sell. Most of the leading champions have been bred and sold by me, my vast business having been built purely upon recommendation, not on paper bounce. If you were disappointed last year with Norwich purchased elsewhere, try a pair from a strain of many years' standing. Success certain. Every pair on approval, money returned if unsatisfactory, or deposit with Editor. Satisfaction guaranteed. Champion pairs, 15s. 6d., 20s. 6d., 25s. 6d., 30s. 6d. per pair; some tip-top cocks and hens, yellow or buff, 7s. 6d., 10s. 6d., 12s. 6d., 15s. 6d. each. Don't risk unreliable strains, but send to the fountain head, or a season's work may be wasted. Remember, all on approval, willingly.

Judge A. E. Silk, *THE AVIARIES,* **Whitstable.**

E. W. SAINTER,
CHAMPION NORWICH.

WINNER AT LEADING SHOWS LAST FIVE YEARS

Few choice (Hot Colour-Fed) Birds for Show and Stock. Single Birds from **10/-** Matched pairs from **20/-** Approval. Inspection invited.

New Address: **37, ROYDS STREET, STOCKPORT ROAD, MANCHESTER.**

SANDIFORD'S FAMOUS Norwich.

READ OF SUCCESS FROM BIRDS I have supplied, also of our noted Wins at all leading Shows, including Derby, Leek, Hinckley, Carlisle, Gateshead, Sunderland, Crewe, Edinburgh, etc., etc. Won this Season—34 Firsts, 26 Seconds, Cold and Silver Medals, 50 Specials, etc. At Hartlepool, N.P.C. Cup Show against all the cup fighters, 8 birds—4 Firsts, 2 Seconds, 2 Thirds. This week at Nantwich—4 Firsts, 2 Seconds, Third and Fourth—with 8.

Also, in the year 1900, we won **50** First Prizes, Seconds, Specials, etc. 1901, **44** Firsts, **30** Seconds, Specials, Cups, etc. 1902, **40** Firsts, **40** Seconds, **35** Thirds, Scores of Specials including Championship Medal for Best at Crystal Palace. 1903, **35** Firsts, **40** Seconds, Specials, etc., including the N.P.C. Challenge Cup, which we won at Three Shows against all others Five Shows, also Gold Medal at the N.P.C. Club Show for best Norwich. 1903-4, Won **50** Firsts, **40** Seconds, **25** Thirds, N.P.C. Challenge Cup second year in succession, also 2 Gold Medals at the International Show, England v. Scotland, 1 for Best Norwich in Show. 1905, Won **30** Firsts, **25** Seconds, Spls., etc. If my strain can't claim to be the best on earth none can.

I am offering for two weeks only 20 Grand Matched Pairs, to breed Winners, at **20/-** pair, must clear. Also other Pairs at **25/, 30/-.** Odd Yellow or Buff Cocks, **10/-, 15/-, 20/-, 25/- 30/-.** Odd Yellow and Buff Hens, **10/-, 12/-, 15/-, 20/-.** All on approval two days. If you want the blood that wins order at once.

Mr. McIver, Port Glasgow, Jan. 8, 1906.—"Sir, The Norwich Cock you sent me won 1st and Special in class of 11, against all colours." Have scores like this.

Established 1879.

J. SANDIFORD, Canary Breeder, **PRESTON, LANCS.**

Rollers & Singing Canaries.

SEIFERT Rollers, in full song, from 7/6 to 12/6; hens, 3/-; approval.—Fred Parker, 43, Raleigh-st., Walsall.

YOUNG St. Andreasberg Roller, grand songster, very handsome, new brass cage, 12/6, cost 16/6; approval.—Roper, 134, Derby Seven Kings, Essex.

PURE Siefert Roller cocks, full song, cold-room, 5/6, 6/6 each; approval, cash or deposit.—46, Alexandra-rd., Morecambe.

ROLLERS.—Splendid singing cocks, 6s. 6d. and 8s. 6d.; hens 3s. 6d. and 4s. 6d.—Palmer, 51, Bridge Street, Worksop. x266

HARTZ Mountain Rollers, day and gaslight singers, 7s. 6d., 8s. 6d.; deposit or approval.—Newman, Hingerton Street, Brookfield, Birmingham.

A FEW of my trained St. Andreasberg Rollers for disposal, 8s. and 10s. 6d.—J. Boothman, 100, Bank Top, Blackburn.

I HAVE twelve good green Roller hens, guaranteed Trute strain, 3s. each, also a few good Roller cocks, 10s. 6d.; approval.—Pimm, 229, Icknield Port Road, Birmingham.

SEIFERT and Twite Rollers, John Smith's strain, all ring with British Roller closed club ring, cocks from 8/6, hens from 4/-.—Hughes, Surrey Villa, Long-la., Church End, Finchley.

HARTZ Roller cock, 1905, 10/-; three 1906 cocks, in full song, own breeding, 7/- each; cages with folding doors, 3/- extra.—Kerr, 63, Brackenbury-rd., Hammersmith, London.

HARTZ cock Canaries, 4/6 and 5/- each, 28/6 and 31/- per stick; Rollers, 6/-, 7/-, and 8/- each; wholesale list to trade only.—De Von, 114, Bethnal Green-rd., London.

PURE Hummel Rollers, cold room, own breed, 1906 birds; trained cocks, 7/6 each; 14 days' approval, cash or deposit.—Johnson, Seeley-cottage, Fisher-st., Hyson-green, Nottingham.

HIGH-CLASS Roller Canaries, Trute strain, 12/6 and 15/- each; hens, same strain, 3/6; these birds are closely related to my prize winners at Wakefield B.R.C.C.; seven days' approval.—Taylor, Ridings-rd., Dewsbury.

PURE-BRED 1906 St. Andreasberg Roller cock, trained to perfection, only wants hearing; guaranteed to have no chopping or other harsh notes, singing its pure rolling song by day and gaslight; Seifert's strain direct; accept 9/-; approval.—Lawson, Langley, near Birmingham.

SEIFERT Rollers of the highest excellence, brothers to my recent silver cup winner, 30s. to 60s.; new joiner-made 8ft. flight cage, four compartments, cost £5, accept 40s.; new travelling basket, with six club cages, complete, cheap.—Foulds, 213, Brunswick Street, near Owens College, Manchester.

IMPORTANT NOTICE.

Notice, another consignment of St. Andreasberg Rollers has arrived; they are constant day and gaslight songsters, with all the sweetest, softest, and most musical changes of song; water-bubbles, runs, silvery trills, piccolo, harp, and deep bass rolls, etc.; all on six days' approval on receipt of P.O., or deposit the amount with the Editor; 7s. 6d., 8s. 6d., 10s. 6d.; perfection. Schoolmasters, 12s. 6d., 15s. 6d., 18s. 6d., 21s.; inspection invited any time.—William Shaw, 97, Essex Road, Islington, London, N.

PURE SEIFERT ROLLERS.

Good English cold room bred birds, trained cocks, 8s. 6d., 10s. 6d., 12s. 6d.; splendid hens, same strain, 3s., 4s., 5s.; on seven days' approval, cash or deposit.—G. Percival, 24, Wellington Road, Wrexham. x265

CORKINDALE'S

Seifert strain Rollers. These are not imported stuff. Cocks from 10/6 up to 40/-; hens 3/6 and 5/-; properly matched pairs from 14/- up to 60/-; seven days' approval, deposit system; breeder and trainer.—Studley, Warwickshire.

St. Andreasburg Rollers,

trained to perfection, under Nightingale, Titlark, Woodlark, etc., daylight and gaslight songsters, 7/6, 8/6 each; Hartz hens 2/- each, two 3/9; Norwich Canaries, pairs, 10/6, 12/6, 15/6; odd cocks 7/6, 8/6, 10/6; Yorkshire cocks 7/6 each.—Matt. Hopkins, Bird Specialist, 38 and 41, Fylde-st., Preston, Lancashire.

Don't Keep the Roller

if you are not thoroughly satisfied with it, as we believe in thoroughly satisfying our customers; that's why our business has grown so enormously, and, incidentally, it is the reason why we have to keep the largest stock of Pure Rollers in Birmingham. Reasonable prices for reliable birds and absolutely straightforward dealings. We send all our Rollers on seven days' approval entirely at our own risk, either cash to us or CAGE BIRDS Deposit System, and if you are not thoroughly satisfied you only have to return them, and we will either replace them or refund your money in full, whichever you prefer. What could be more straightforward? We have grand consignments of pure St. Andreasberg Rollers, with long deep, sweet soft hollow bass rolls, water-bubbling runs, deep bass tours, bell, harp, and gong notes, etc., etc., and are guaranteed free from any harsh or objectionable notes, 7/-, 8/- each. Extra special Schoolmasters, which far excel all others in their deep bass and hollow rolls, 10/- each, two 18/-; hens 2/6 each, two 4/6. Hartz Mountain Rollers, good, loud, clear, day and gaslight songsters, 6/- each, two 11/6; hens, 2/- each. (Notice to the Public.) Our Hartz Rollers are not Belgians palmed on the Public for Hartz Rollers and sold at 1/3 stick less than they can be bought. Ideal Roller breeding cages 2/6 each; few second-hand, slightly used, from 30in. long, 2/6, 3/- each. Roller singing cages 1/3, 1/6 each. Kindly read few of the following testimonials for proof of the quality we send out:—"10, George-st., Scarborough, Jan. 16.—Dear Sir,—Received the Roller quite safe, and I am highly pleased with it. I have instructed CAGE BIRDS to pay deposit to you.—Yours, H. Harrison."—"23, Oakland-st., Miskin, Jan. 18.—I received the Roller quite safe, and am quite satisfied. I have written to CAGE BIRDS to pay deposit to you.—Yours, W. Reed."—"34, Britannia-st., Leek, Jan. 19.—Gentlemen,—The Roller arrived quite safe and gives great satisfaction. Your way of sending them does you great credit. I shall certainly do my best for your straightforward and honest dealings. You may make what use you like of this testimonial.—Yours, J. Birch."—"197, Grove-la., Handworth.—Dear Sir,—I should be glad if you would select me another Roller similar to the one I had from you three weeks ago. I am pleased to say that the three Hartz Rolers, also the three Goldfinches I had from you this season, gave every satisfaction. I have dealt with you for years, and have always found whatever purchased has been as you have represented them to be.—Believe me, yours, Will. Hy. Darby."—Parker and Wilden, Bird Merchants, 257 and 258, Farm-st., Birmingham.

5/9 Carriage Paid 5/9

I offer all my Canaries carriage paid on seven days' free trial at my risk, and claim to have the best collection in the British Isles. Inspection invited. My stock consists of high-class British bred Rollers, bred from and related to the best of contest singers and winners. Cocks, in full song, 15/6, 17/6, 20/-, 23/-, 30/-. A few extra special at 40/-, 50/-, and 60/-. Hens to match same, 4/6, 5/6, 6/6 each. Genuine trained St. Andreasberg Rollers, with full change of song by day and artificial light (no common German rubbish these), 8/6, 10/6, 12/6, 15/-. Pure Roller hens, 3/-, 3/6 each. Hartz Mountain Roller cocks, in full song by day and gaslight, very loud free songsters, 5/9, 6/-, 6/6, 7/- each. Matched pairs for breeding songsters, 8/6, 9/6. The quality of my birds speaks for itself. I have many thousands of testimonials open for inspection, of which the following are a sample:—"60, Cairo-st., Hendon, Jan. 26th, 1907. Received Roller December 20th, and now, after a month, I must give honour where it is due. I consider it a wonder. It sings splendid. I am highly pleased with it. I compliment you on the quality of your stock if this Roller is a fair sample. It has been admired by several. Again thanking you, etc.—J. W. Nicholson, to Miss Storey." If you want further proof, allow me to send you the birds you require, carriage paid, on seven days' approval at my risk. Illustrated list free.—Miss E. L. Storey, Crowle, Doncaster.

Don't miss Next Week's "C.B."

BUY DIRECT OF

Breeder and Trainer. Finest strain of Rollers in the country; trained to perfection, 7s. 6d., 10s., 12s. 6d., 15s. upwards; hens 2s. 6d., two for 4s. 6d.; cash or deposit.—F. Cartwright, 15, Farfield, Kidderminster; established 1888.

HARTZ MOUNTAIN

Roller cock Canaries, direct from Hartz, beautiful birds, only 3s. 9d. each; 21s. a stick, try one.—Varney, Stratford.—"The Elms, 18, Whitehouse Loan, Edinburgh, January 1st, 1907.—Hummell arrived safely, and sings lovely; it is a pretty bird, and gives satisfaction.—N. Turnbull."—"January 2nd, 1907.—Birds arrived, are singing well.—R. M. Lee, 79, Mill Street, Crewe."—"Broom, Newton Mears, Glasgow.—The birds arrived in good condition; I am well pleased with such value.—J. Broom."—"January 2nd, 1907, 32, Easson Road, Darlington.—Bird to hand. I like the song wonderfully well, and thank you for your prompt delivery and attention to my instructions.—H. Hutchison."—Send all orders to Varney, Stratford, London.

HERE'S A RECORD.

On Tuesday, Feb. 12th, 1907, I sent away 132 Roller Canaries, all at retail price. This does not include the many I sent away at wholesale prices to dealers in all parts of the kingdom. I think I can safely claim to hold the record as the largest retailer of Roller Canaries in England. This enormous trade has been built up solely by the sheer merit of my birds, as the public know full well that they cannot get the quality of birds only from me. I have at the present moment over 400 pure St. Andreasberg hollow Rollers in stock, which can be inspected at any time. All are in full rolling song day and gaslight, with long hollow and double rolls, sweet silvery trills, soft ronlades, waterbubble runs, piccolo trills, Nightingale jug-jug, hollow bell rolls, deep bass tours, bell, harp, and gong notes, etc., etc., and guaranteed entirely free from any harsh notes whatever, price 7/- and 8/- each. Special Bandmasters, which excel in the deep bass and hollow bell tours, 10/- each. Pure Roller hens, guaranteed same strain as above cocks, 2/6 each. Also a few special contest masters, specially selected from song boxes for me, and now fit to win contests immediately, 15/- each. Loud, free singing Hartz cocks, in full, vigorous song, 6/- each, two 11/-, or seven 35/-. Hartz hens, 2/- each, 3/6 couple. These Hartz cocks are often sold as Hartz Mountain Rollers at fancy prices by unscrupulous dealers. Singing box cages, 1/- and 1/3 each. Roller song cabinets, with folding doors, made specially for my Rollers, 2/3 each. Week after week I have published scores of testimonials, all speaking in higbest terms of praise of the quality of my Rollers, and during that time have received thousands that have never been published at all. Few more given below. Kindly note.—Full name and address published with every letter, also correct date. "Academy-buildings, Inverness, Feb. 1st. Sir,—Roller arrived safe, and am very well pleased with it, and will likely get an order or two for you.—Yours, F. Kelly." "Reepham, Norfolk, Feb. 3rd. Sir,—Received Roller safe, and just the one that suits me in colour and in song; started singiug ten minutes after arrival (after nearly 24 hours' railway travelling).—Yours, Jno. Wasey." "6, Willow-grove, Southport, Feb. 4th. Sir,—Fourteen days ago I had one of your 8/- Rollers, which bas turned out a splendid bird, and just what I wanted for breeding. Please send me another at 7/-, and also one at 10/-.—Yours, A. Williams." "39, Summerbank-rd., Tunstall, Feb. 4th. Sir,—I am keeping the Roller, as he has turned out to give every satisfaction, and singing nicely.—Yours, J. Lovatt." "Feb. 4th. Sir,—Received Roller, in grand condition, and started to sing very soon, and I am well pleased with him, and think I shall have another order for this week.—Yours, D. Jones." "6, Lady Pit-st., Beeston-hill, Leeds, Feb. 4th. Sir,—Please send me a premier contest singer at 15/-. I got one of your Bandmasters last year, and was well satisfied. I cannot get any good enough in Leeds.—Yours, G. Ibson." "5, Barnes-rd., Workington, Feb. 6th. Sir,—I had a Roller from you about two months ago, and it sings day and night. Kindly forward me a hen to match.—Yours, John Hughes." "Callander, Scotland, Feb. 11th. Sir,—I got a Bandmaster, 'a perfect bird,' from you about three weeks ago, and would not sell him for double the money I paid for it.—Yours, R. Hill." (This bird was ordered from me solely to test it against an English-bred Seifert Roller, costing 20/-.—W. Gore.) Hundreds more letters similar to above open for inspection at any time. Every bird sent safely and warmly packed (no matter how cold the weather) in special travelling cages, with seed and water to last 48 hours, on a full week's trial, solely at my own risk, during the whole time, either on receipt of cash or deposit with CAGE BIRDS, and money refunded in full if every satisfaction is not given. Compare my prices with others, and, above all, I ask you to compare the song of my birds with that of any other costing more money. I don't care if the other costs double the money. I shall be satisfied with result. My Rollers have been repeatedly tested against birds costing up to 40/- each in this manner, but never yet have I been informed that my bird came out of the trial second. I have and am at present supplying all the principal breeders, connoisseurs, etc., with birds, and never fail to give entire satisfaction. May I send one on trial to you also? Please note new address, by far the largest stores in Midland Counties, and 400 Rollers to select from.

Hummel Rollers.

Finest Rollers imported. To speak well of the Hummel is to gild refined gold. Testimonials from customers who say the Hummel is still singing as sweetly as when purchased four, five, six, and seven years ago. All Hummels have delightful, deep, delicate bow roll, hollow roll, bollow bow roll, du pipe, hollow bell roll, grand round bass roll, vibrating hollow roll, and charming water bubble roll; one price only, 12s. 6d.; no fancy prices; Hummel hens, 3s. each; a beautiful pair of Hummels for 15s. St. Andreasberg Rollers, 5s. and 7s. 6d. each. Hummel Schoolmasters, 20s. each, better than can be obtained elsewhere at treble the price. Thousands of testimonials have been published by me in CAGE BIRDS from satisfied customers. I guarantee strictly honourable trading and satisfaction to all.—Varney, sole proprietor and importer of this remarkable Roller Canary. Twenty years advertiser.—Varney, Stratford, London. Export a speciality. "The Schools, Overton, Ellesmere.—Hummel arrived, it at once commenced to sing—yes, a song worth listening to. It is the most exquisite songster I ever heard—decidedly a perfect Roller. I may say I never expected such perfection; they are worth all you charge for them. I must thank you for your courtesy, and shall be able to recommend your firm to those who require birds and not rubbish."—F. Robbins, to Varney, Stratford, London, Sole Proprietor and Wholesale Roller Canary Importer and Dealer.

J. SANDIFORD, BIRD SPECIALIST, **PRESTON, LANCS.**

HARTZ Mountain Roller Cocks,

All in full song, and Hens, both imported and Home bred, in the finest breeding condition. I have the Largest Collection of CHOICE PEDIGREE ROLLER HENS ever got together in one lot. They comprise Seifert and Trute pure Hens, and I can honestly recommend these to all breeders wanting Reliable Breeding Stock to produce the best money can buy. You can give 10/6 or more, and cannot get better blood or stock. Can be seen.

IMPORTED—Trained Cocks, 8/6, 10/6, 12/6, 15/-, 20/- and upwards; Hens, same strain, 3/6 and 5/- each, pairs, 10/6, 15/-, 20/- All on seven days' approval, cash or deposit.

HARTZ SINGING, NOT TRAINED, COCKS, 5/6 each. Extra selected, with better notes, 6/6; Pairs, 8/6. Strong Hens, 2/3 each.

Home-bred (guaranteed) Trained Trute and Seifert Cocks 10 6, 12/6, 15/-; Hens, guaranteed same strains, strong, healthy, and in the best of breeding condition, 4/6, 5/- each. These have been purchased direct from the breeder and trainer, and can be recommended. Remember it is no use breeding from good Cocks and common Hens if you want good results.

Untrained—Strains unknown, Cocks 5/6, 6/6, 7/6; Hens, 3/6.

Full printed Instructions, how to keep in health and song, sent with every bird as for the past 30 years. Beware of copyists and their "catch" methods.

If you want to know about these beautiful and interesting songsters, send for my book **'Profitable Canary Breeding as Practised in Germany'** By Albert Rettich, Esq., author, breeder, and judge of the leading singing contests. Price 9d., or in larger type and gilt cover, 1/3; to be obtained from the publisher and sole owner of copyright, W. Rudd, or from the office of "Cage Birds."

YORKSHIRES.—Grand leggy stock cock, many 7 in. long, full of quality, 7/6 to 20/-; ticked buff cock, first Kirbymoorside, 20/- (see Thirsk Show report, last week's CAGE BIRDS). A few splendid hens cheap; approval willingly.—Watts, Relieving Officer, Driffield.

IF you want Yorkshires to breed winners, buy from the breeder; best blood in the Fancy; cold room bred, smart, stylish cocks (full song), 5/6, 6/6, 7/6, 10/6; hens, 3/6, 4/6, 5/6; seven days' approval.—W. H. Berry, Ingrow, Keighley.

EXCEPTIONAL offer in high-class, colour-fed typical Yorkshires, for stock or showing. Yellow or buff cocks, 7/6, 10/-; hens 5/-, 7/6 each, worth treble; approval anywhere receipt of cash or deposit.—Hawkes, Richmond-rd., Leytonstone.

CHAMPION leggy, upstanding Yorkshires, all cold room kept, and bred from best winning blood in Yorkshire, cocks, 7/6, 8/6, 10/6, 12/6; hens 7/6, 8/6, 10/6; properly mated pairs, 15/-, 17/6, 20/-; approval cash or deposit; 21 years breeder.—Frank Stevens, Great Ayton, Yorkshire.

CHAMPION Yorkshires.—W. Binns, Albert Terrace, Blackpool, can supply first-class birds from 12s. 6d. pair; see my winnings at Wigan (1st), St. Helens (1st), Blackpool (five 1sts), Preston, and Altrincham (two 2nds), etc; on approval; satisfaction guaranteed.

POWICK'S champion Yorkshires in all classes, the same strain as the winners at all leading shows, cocks, 7s. 6d., 10s. 6d.; hens 5s. 6d., 7s. 6d. each; pairs mated to breed winners, 12s. 6d., 15s. 6d., and 20s. per pair; no rubbish; ten days' approval.—Wm. Powick, Eastfield House, Dewsbury, Yorkshire.

THE old Yorkshire breeders' birds are all cold-room bred and reared. Clear, ticked, green marked, and Cinnamon marked; cocks, full song, 5s. 6d., 6s. 6d., 8s. 6d., 10s. 6d.; hens, 3s. 6d., 4s. 6d., 5s. 6d., 6s. 6d.; seven days' approval; cash or deposit with CAGE BIRDS.—J. Pickles, 5, Wardman Street, Keighley, Yorkshire. x266

H. GRAHAM, 11, Linwood-grove, Longsight, Manchester, has for disposal few grand typical Yorkshires, cocks, 10/-, 12/6; pairs, properly matched for breeding show birds, 15/-, 20/-, 25/-; also this season's winners, see reports of principal shows; every bird guaranteed own breeding, seen any night after 6.30 or week-ends.

YORKSHIRES.—Good cinnamon-marked buff cock, 20/-; fine yellow hen, 10/6; buff hen, 10/6; yellow hen, three buff hens, 8/6 each, all prize bred; lot £3 3s.; or exchange for good talking Parrot and cage, or pedigree Pom. or Yorkshire Terrier puppies to value; mutual approval.—Hodder, 6, Banner-st., St. Luke's, E.C.

AMBLER'S classical Yorkshires, winners in keenest competition. Having selected our breeding stock, we have for sale the choicest stock of Yorkshires in the Fancy, long typical cocks, full of style, and a magnificent collection of yellow and buff hens, correct type and feathered like silk. Our strain has been noted for over 20 years for breeding the biggest champions on the show bench; three 1sts, two 2nds, Manchester, 1906. This is a chance seldom met with to secure such classical birds at such reasonable prices; approval; satisfaction guaranteed; stamp particulars; few pairs, matched to breed winners, 15s. pair.—17, Lytton Road, Bradford.

CAN spare two yellow cocks, unflighted, both winners, 20/- each; two buff cocks, one grand stock bird, winner, 35/-, brother to my clear buff, big winner, young buff cock, son of above, 15/-; about 12 hens, yellow and buff, from 7/6. These birds are Radley's strain direct. Approval, deposit.—Ross, Second-av., Halifax.

SAMUEL DEAN, 24, Crossley Street, Gt. Horton, Bradford, Breeder and Exhibitor of high-class Yorkshire Canaries, including Greens x259

CHAMPION YORKSHIRE CANARIES.

Have only four pairs of my best left. Will sacrifice at 20/-, 30/-, and 40/- pair; bargains.—Address at once, R. Philpot, The Garth, South hill, Guildford.

SATISFACTION GUARANTEED.

Yorkshires, grand long slim upstanding birds, full of quality, bred from birds that have won all over, no fancy price, pairs 12s. 6d., 15s.; cocks, 10s., 7s. 6d.; hens, 5s. 6d., 6s. 6d.; approval.—J. Sheard, Sackville Street, Ravensthorpe, Yorkshire.

WORKING MEN,

Breed your own winners. Private breeder and exhibitor offers surplus stock; rare chance for novice. Six selected matched pairs, 20/- pair. Six yellow hens, 7/6 each. Ten buffs, clear or marked, 6/- each. Healthy high-class cold room bred, from birds, costing £1 to £5 each; approval.—Saml. Russell, Steeton, Keighley, Yorkshire.

COWGILL'S YORKSHIRES.

Birds that I have sold have won over 40 1st prizes this season in the keenest of competition, which is proof of their quality. I have still some good ones for sale, for show, or stock; matched pairs from 15s. to 50s., cocks from 8s., hens from 7s.; approval; cash or deposit; stamp reply.—115, Washington Street, Girlington, Bradford.

MUST CLEAR, REGARDLESS OF PRICE.

Thirty high-class Yorkshires, clears and cinnamon-marked, cocks and hens, all related to my previous winners. Have not had time to exhibit this last season owing to being in business. Extra good in feather, type, length, and position; approval; all letters answered.—Albert Wooler, Grocer, Belle Vue, Shelf, Halifax.

IF YOU ARE

Requiring Yorkshires, you should try me, for satisfaction, both in price and quality; typical stock birds, all colours, finest blood procurable; cocks 6s. and 8s. 6d. upwards; hens 4s. 6d., 6s. 6d. upwards; properly matched pairs, 10s. 6d., 15s., upwards; all related to winners; week's approval, deposit.—Kemp, 270, Girlington Road, Bradford.

LAWRENCE LANE

breeds his winners; he don't buy them; pairs matched for breeding winners from 15/- to 25/-; single cocks, 10/- to 20/- each; grand clear buff pink-eyed cock, 15/-; also yellow cinnamon-marked cock, 1905, first Blackburn, second Burnley, 1905, and fourth late Altrincham Show, only times out, 40/-; approval; satisfaction guaranteed, or money returned in full.—16, Fountain-st., Barnoldswick, Yorkshire.

YORKSHIRE AND NORWICH PLAINHEADS

Yorkshire and Norwich Plainhead. Special Notice.—Have some splendid stock birds for disposal, all colours, colour fed or natural; cocks from 5s. 6d.; hens from 3s. 6d.; special matched pairs, 8s. 6d., 10s. 6d., 12s. 6d., 15s., 20s. per pair. No better value offered. Clean and healthy. Satisfaction guaranteed. Testimonials arrive daily. Seven-day approval. Note address. — Spence, Breeder, Mount Pleasant, Norristhorpe, Liversedge, Yorks.

THE CHAMPION WINNING STRAIN.

Winner of the Championship Diploma, Crystal Palace, 1906. Having about 60 pairs, we have decided to clear them out for a speedy clearance at 15s. to 20s. per pair, cocks standard length, hens feathered like box, also a few green cocks, 10s., 15s., 20s., no green hens, sure to give satisfaction; seven days' approval, P.O. or deposit; stamp reply.—Gill and Pickup, 1, Cragg Street, Great Horton, Bradford. x268

GREAT BARGAINS.

Through ill-health. First pair Yorkshires, winners, will breed Palace winners, 45/-, with ornamental breeder, well worth £5. Second pair yellow Yorkshire cock, over 7 in., clinker, with green hen, breeding cage, 18/6, cheap 30/-. Yellow marked Yorkshire cock, slim, like silk, 8/6, cheap double. Large Norwich hen, 6/6. Best Roller ever heard, ornamental box cage, 20/- lot, cheap 35/-. 3 ft. dome flight, cost 25/-, sell 8/6. All birds pink of health, breeding form; lot £4, first pair worth more; approval.—Sleep Bros., Buckfastleigh.

KNIGHTS' YORKSHIRE AVIARIES.

One hundred and twenty pairs high-class Yorkshires, in all varieties, without doubt the finest selection of sale stock in Yorkshire of this variety, unrelated, properly matched pairs from 12/6 to 40/- pair; single stock cocks from 8/- to 30/- each; fine selection of breeding hens from 6/- to 20/- each, all cold room bred, reared, and kept; all approval, cash or deposit; few nice exhibition specimens left, from 20/- each. My 25 years' practical experience and study of this variety solely (the last 12 devoted to this occupation only) is perhaps an equal guarantee of purity of stock offered as if I had kept for exhibition purposes an even strong team, and advertised such as an inducement for sale of stock. Again, am not, or ever have been, proprietor of bird stores, or dealer in all classes and variety of cage birds and cage bird requisites, as my bird rooms are connected with my own private residence in a private street, and conducted by myself in person in every detail, and all birds are selected by myself only, and despatched without extra charge for travelling cage, etc.; full price list, together with my newly-published booklet, "The Whole Art of Colour Feeding and Training Yorkshire Canaries," sent post free to all on receipt of 2d. in stamps; old 50 years address.—Jonas Knight (author of "The Yorkshire Canary: Its Breeding and Management"), Allerton, Bradford, Yorkshire.

CUTHBERTSON'S YORKSHIRES

still to the front, winner of over 100 prizes and cups, including the Taylor cup for third year in succession; grand stock birds and winners for sale cheap; approval; stamp, reply.—Cuthbertson, Manor House, Hughington, via Darlington.

WINS CHAMPIONSHIPS.

I earnestly ask you for trial order to prove I give satisfaction. Sent on week's approval at my own risk; cash or deposit. Having finest stock in West England, and sold some most prominent on show bench, which wins championship and medals. This strain wins 200 prizes. Cocks, 5s. 6d., 6s. 6d., 7s. 6d., 8s. 6d., 10s. 6d., 12s. 6d., 15s., 20s.; clears or ticked hens, 3s., 3s. 6d., 4s. 6d., 5s. 6d., 6s. 6d., 7s. 6d., 10s. 6d., 12s. 6d.; pairs, matched, 8s. 6d., 10s. 6d., 12s. 6d. upwards; Sib-bred cocks and hens for light muling, same price.—C. Baker, Herbert Street, Bedminster.

BENNETT'S

Champion Yorkshires, highest awards, ten guinea challenge and other cups, Palace, etc.; finest strain in the world; few properly-matched pairs cheap, same blood as those supplied by me to England's most successful exhibitors of Yorkshire Canaries; price list free.—59, Waverley Road, Great Horton, Bradford.

WILCOCK'S YORKSHIRES, NORWICH.

I can supply you with either Yorkshires or Norwich Plainheads, for either stock or the show bench, all bred from my winners at all the leading shows, no better blood in the Fancy, pairs from 12s. 6d., 15s., 20s., 30s.; cocks or hens, from 7s. 6d., 10s. 6d., 15s., 20s. each; 3 days' approval.—14, Chapel Street, Eccleshill, Bradford, Yorkshire.

Shackleton's Yorkshires

Still lead the way. See reports of all principal shows. Some splendid birds for either show or stock; prices reasonable.—Stamp and address for particulars, The Paragon, Girlington, Bradford, Yorks.

HIRST'S YORKSHIRES

win at all big shows. See reports. Twenty-five cocks for sale, guaranteed my own breeding, 10s. to 40s. each; clears, Cinnamon marks, few good pairs and show birds; approval; inspection invited.—29, Charter Street, Accrington.

SUTCLIFFE & SON.

Cinnamon marked Yorkshires still lead the way. Having won the cinnamon-marked competition for the present season, we have some grand birds for sale; matched pairs from 20s. to 40s. a pair; state wants; can be seen on receipt of a post card; three days' approval; stamp for reply.—1, Back Kitson, Windhill, Shipley, Yorkshire.

Yorkshires. Yorkshires.

Quantity and quality, with cheapness combined, all on approval, and guaranteed best value in England; cocks, 5/6, 6/6, 7/6, 10/6; hens 3/6, 4/6, 5/6 upwards; pairs, 8/3, 9/6, 10/6, 12/6, 15/-, 20/-, upwards. Many show birds amongst them; travelling cages, 3d. extra. Full extended price list free.—W. Rudd, The Bird Specialist, Norwich.

CHAMPION YORKSHIRES.

SPECIAL Notice.—Write or call at any time and see my splendid lot of long, slim, straight, upstanding Yorkshires; every bird in the primest condition, with plumage like silk; every cock warranted singing; all cold room bred and kept. I have them in all colours except Greens, and all on seven days' approval; cash or deposit; Yellow cocks, orange-yellow, 8s. 6d., 9s. 6d., 10s. 6d.; Buffs, cocks, 7s. 6d., 8s. 6d., 10s. 6d.; Orange-Yellow hens, 4s. 6d., 5s., 5s. 6d.; Buff hens, 3s. 6d., 4s., 4s. 6d.; inspection invited.—Shaw, 97, Essex Road, Islington, London, N.

YORKSHIRES.

First Prize and Three Specials.

"6, Market Street, Blackhill, co. Durham.—The pair of Yorkshires I got last March from you, bred me 14 young ones. I also showed the Cock bird, he took 1st and 2 specials, and special for Best Yorkshire in Show (Member's Class), yours truly, J.T."—**Matched pairs, 8/6, 10/6, 12/6, 15/-, £1; Buff Cocks, 5/6, 6/6, 8/6, 10/-; Yellow Cocks, 6/6, 7/6, 8/6, 10/6; Hens, 3/-, 4/-, 5/-, 7/6. 7 days' approval.**

ARTHUR THOMPSON,

197, Bradford Rd., Frizinghall, BRADFORD

YORKSHIRES

3 FIRSTS, 4 SECONDS and 6 THIRDS.

This testimonial should prove at once the quality and fair dealings you will receive if you place a trial order with me. From "11, Ashwell Street, Leighton Buzzard, Feb. 2nd 1907.—Just a few lines to inform you that the Yorkshire Cock you sent me has won 3 Firsts, 4 Seconds, and 6 Third Prizes, in good competition. Thanking you for your honest dealings. F. Collyer to J. Taylor, Frizinghall, Bradford." Fine, long, thin, racy, yellow Yorkshire Cocks, 6/6, 7/6, 8/6, 10/6, 12/6, 15/- each. Some slashing Buff Cocks, full of quality, at 5/6, 6/6, 7/6, 8/6, 10/6, 12/6 each. All on full song and standard length (some over). Grand matched pairs for breeding winners at 8/6, 10/6, 12/6, 15/-, 20/-, 25/- per pair. Clears, Ticked, Green Marked, Cinnamon Marked and Clear Pink Eyed. Champion lengthy Yellow Hens at 4/-, 5/-, 6/-, 7/-, 8/6 each. Buff Hens at 3/-, 4/- 5/-, 6/-, 7/6 each. All in the best of health and feathered like glass. Cold-room bred and kept. Inspection invited at any time. Best and largest stock in Bradford. Seven days approval at my risk.

CRESTS & NORWICH.

If you want Crests or Crestbreds with plenty of head feather, size, and proper shape, you cannot do better than give me a trial. They are "Joyce's," "Barnett's," etc., strains. Large Crestbred Cocks, well brawed, and head feather to beak end, at 8/6, 10/6, 12/6, 15/-, 20/- each. Crested Cocks, 8/6, 10/6, 12/6, 15/-, 20/- each, with large well centred crests on. Grand accurately matched pairs for breeding, at 12/6, 15/-, 18/-, 20/-, 25/-, 30/- per pair. Large Crested Hens, 7/-, 8/6, 10/6, 12/6, 15/- each. Crestbred Hens at 6/6, 8/6, 10/6, 12/6, 15/- each. All cold-room bred and kept, and on 7 days approval at my risk. Also large Bullfinch type Buff Norwich Plainheads, Cocks at 6/-, 7/-, 8/6, 10/6, 12/6 each. Yellow Norwich Cocks at 7/6, 8/6, 10/6, 12/6, 15/- each. Properly matched pairs, to breed winners, at 8/6, 10/6, 12/6, 15/-, 20/- per pair. Some very large Buff Hens at 4/-, 5/- 6/-, 7/6 each. Yellow Hens 5/-, 6/-, 7/- 8/- 10/- each. Clears, Ticked and Variegated. Seven days approval. Illustrated Price List post free.

EASY PAYMENT SYSTEM.

I can supply Yorkshires, Norwich and Crests, Cocks or Hens, on the Easy Payment System. Birds sent off at once on receiving first payment. Send stamp for full particulars and terms. State wants. All birds sent on 7 days approval at my risk. Only and original address.

J. TAYLOR,

9, Northdale Road, Frizinghall, BRADFORD.

YORKSHIRES—continued.

WHERE DO THE BIRDS COME FROM?

E. TAYLOR, BIRD SPECIALIST,

3 & 7, Thornton Road, BRADFORD,

can conscientiously assure all lovers of Birds, all dealers, and the Fancy generally, that, if this question is to be held as being confined to **GOOD** birds, the answer is, very decidedly, that they come from the above address! And, so far as the broad acres of good old Yorkshire are concerned, the Birds sold by **E. TAYLOR** do credit to that extensive county. Therefore, when you are on the market for all classes of Cage Birds, in addition to the finest selection of Cages, Aviaries, Bird-room Appliances, and all the relative and important Foods and Specialities, let **E. TAYLOR**, of Bradford, be the **first** man in whom you repose your confidence. You will promptly discover that this course of conduct will lead you straight to the high road of success, and guide you far away from the bye-paths of failure and disappointment. As a work of information, guidance, and reference my Illustrated Catalogue and Price List is simply invaluable to all parties interested. It contains level-headed **FACTS**, which will pay your perusal, and throws some splendid side-lights on Ornithological Study. **You can have** it sent you for two penny stamps to cover postage, or Bird Price List will be sent post free.

Yorkshire Cocks.

E. TAYLOR,

Bird Specialist,

3 & 7, Thornton Road, BRADFORD.

IF NOT, WHY NOT

Send me your orders? If you require Yorkshire Canaries of the correct type, at reasonable prices, allow me to send you the birds you require, carriage paid, on seven days' approval. I have over one thousand birds to select from, including many winners and matched pairs for breeding winners. Light-feathered upstanding Yorkshire cocks, in full song, 6s. 6d., 7s. 6d., 8s. 6d., 10s. 6d., 12s. 6d., 15s. each. Racy Yorkshire hens, 3s. 6d., 4s. 6d., 5s. 6d., 6s. 6d., 7s. 6d., 8s. 6d., 10s. 6d. each. Properly matched pairs, 8s. 6d., 10s. 6d., 12s. 6d., 15s., 17s. 6d., 20s. per pair. A few winners at reasonable prices. Send me an order; it will convince you and your friends that I give the best value money can buy. All my customers receive satisfaction. "Frebly Street, Edinburgh, February 2nd, 1907. I received the pair of Yorkshires safely, and I must confess that they are by far the best pair of birds I have ever seen at the price; in fact, I paid double the price to another dealer, and did not get such good birds.—E. Gardener to Miss Storey. "423, Ley Street, Ilford, February 3rd, 1907. Received birds, and am very pleased with them. I was much surprised at their good condition after so long a journey.—H. Briscoe, to Miss Storey." "141, Pennant Street, Ebbw Vale, February 2nd, 1907. Birds to hand. I am very pleased with them, and thank you for your prompt attention.—W. Bethell, to Miss Storey." "Hawthorns, Brighouse, February 3rd, 1907. Received birds yesterday. They look well and healthy, in trim feather, and very neat. Many thanks for same.—J. Cheetham, to Miss Storey." "138, Babell, Swansea. Received bird in grand trim, and am thoroughly satisfied. Many friends have seen him, and have decided to send you their orders.—J. Thomas, to Miss Storey." "Canal Bank, Bony Bridge, February 2nd, 1907. Please send me the following. . . . . I have seen the two hens you sent my friend, and he owns he could not get the like anywhere else for the money he paid.—J. Logan, to Miss Storey." "114, Neath Road, Plasmere. I am pleased to say the hen arrived safe, and gave every satisfaction.—R. Beth, to Miss Storey." I have hundreds of thousands of similar letters open for inspection. Remember I send birds, carriage paid, on seven days' approval, at my risk. New illustrated list free.—Miss E. L. Storey, Crowle, Doncaster.

Southend-on-Sea Aviaries.

Those Requiring Something

good at reasonable price should send to me at once, being a breeder of high-class Canaries. Champion long slim Yorkshires, standard length, or large Bullfinch-type Norwich Plainheads, cocks in full song, 7/6, 10/6, 12/6, 15/-; grand Norwich or Yorkshire hens, 5/6, 7/6, 10/6; pairs correctly matched for breeding winners, 12/6, 15/-, 20/-, 25/-; no rubbish; three days' approval.—B. Soanes, 92, Devan-st., Lowestoft.

SITUATION WANTED.

Canary Manager (specialist), at home or abroad, to royalty or nobility, first-class testimonials.—Address, Enthusiast, 6, Library-pl., Jersey, Channel Islands.

EVERYONE

desires to obtain the best possible value for their money whether the Birds are of the higher or lower priced order. This is but natural. Hence I respectfully invite all requiring CRESTS, CRESTED BREDS, YORKSHIRES, LIZARDS, CINNAMONS, BORDER FANCIES, PLAINHEADED NORWICH, some of the best shaped and sized with good heads, nests, etc., in England (ask for prices), SONGSTERS, HARTZ MOUNTAIN ROLLERS, MULES and MULING HENS to read my advertisements under these respective headings in this week's CAGE BIRDS, or send for full extended Price List, post free upon receipt of address.

All Birds on approval, cash, or deposit.

For pure LANCASHIRES, HIGH-SHOULDERED BELGIANS, SCOTCH FANCIES, DUTCH FRILLS send for before-named List.

For Easiest of Easy Payments

see particulars of my

ORIGINAL BIRD CLUB.

Distance no object, no double prices, and no "Catches" in it; simply a straightforward business method.

NOTE.—All Amateurs should try my Special Matched Pairs of Prize-bred Norwich Plainheads at 10/6, 12/6, 15/-, and 20/-. Crested ditto, 15/-, 20/-, 25/- and 30/-. Yorkshires, 12/6, 15/-, 20/-. These are the *Best Value* ever offered.

Travelling Cages, 3d. extra.

See last week's CAGE BIRDS for testimonials.

"EGGERTINE."

It is the best, purest, and greatest bone and muscle forming food ever known, as the analytical reports of most eminent authorities prove. It will bring hens into sound and robust condition for breeding as nothing else will. This during the past twenty years has been proved by thousands. It is a genuine egg food made with fresh laid English eggs, with white, of course, included (and NOT foreign preserved yolk of egg) with other valuable properties combined. **Tins**, post free, **1s. 3d.**; large size, **2s. 6d.** There is a saving in the larger size.

P.S.—"CAGE BIRDS" PICTURE POST CARDS supplied by me and can be strongly recommended as Works of Art.

W. RUDD,

Practical Bird Specialist,

AFRICAN GREY PARROTS.

If you are intending to purchase an African Grey Parrot, I shall be pleased to hear from you. I guarantee to give you satisfaction. I only deal in Parrots of the very best quality. I have for sale this week the following birds. These are all in the pink of condition, chatteriug and whistling. 5 African Greys, 25/- each, £5 the lot. 2 African Greys, 30/- each. 1 Finch Amazon Parrot, saying 50 to 50 words, sings tunes, etc., 50/-. 5 Rose Cockatoos, 8/6 each, £2 the lot. Talking African Greys, saying 100 words and sentences, from £4 upwards. Postal Orders should be made payable at Park Place, Liverpool. All birds sent on approval. Trade supplied.
ADAMS, Park Place, **LIVERPOOL.**

BOOKLET FREE.

FINEST Talking Parrots. I only deal in Parrots that will make first-class talkers; no rubbish. I am willing at all times to send my Parrots on four weeks' trial and three months' talking guarantee. Why? Because all my Parrots are young, strong, and reliable. My lifetime has been spent among grey Parrots, both at home and abroad. I guarantee every customer every satisfaction. Grey Parrots are my special fancy. I have trained them, know their wants, and can give every purchaser a bird that will please him in every way. I can supply grey talkers, not thinkers, that will say almost anything, at reasonable prices. Before you purchase a grey or green Parrot, send for my Booklet, entitled "Talking Parrots." All my birds are sent on four weeks' trial, at my risk. Send postcard for catalogue.—Mrs. Forster, Princes Park Aviaries, Violet Street, Liverpool.

OUTDOOR BUDGERIGARS. AVIARY BRED.

Don't wait until everyone wants to start breeding. Greens, 5/-; selected, 6/- pair; Cocks, 2/6; Hens, 3/-. Yellows, 10/-; selected, 12/-; Cocks, 5/-; Hens, 6/-. Cockatiels, 10/-; selected, 12/-; Cocks, 5/-; Hens, 6/-. No better strain in England, every bird **perfect.** With every pair of birds I send two Husk nests free. Remit 6d. for postage.
PEARSON, Budgerigar Specialist, **GREENWICH.**

The improved **"SECURE" BREEDING HUSKS** for successfully rearing Budgerigars. Never fail to pieces as other kinds do. They have been the favourite for 16 years, and still remain unequalled. Competition and comparison increase their popularity, and every bird fancying paper has advised its readers to prefer them to other kinds. Principal Zoos, Parks and Budgerigar Breeders use them. Price **4/6** dozen, smaller quantities **5d.** each. No agents and no second quality. Pamphlet, invaluable to amateurs, entitled "Budgerigar Breeding," free on application. Send post card and read it before buying any husks at all.
HARPER, Upper Villiers Street, **WOLVERHAMPTON.**

Advertisements continued on page 147.

HAMMERSMITH.

A Chaffinch match was sung at the "Duke of Edinburgh" between W. Golding (Chiswick) and Alf. Stone (Hammersmith). Mr. Cooke's spacious room was nearly crowded, 65 men witnessing the match. Alf. Stone won easily by about three score, after a fine race, in which Golding's bird missed nearly half his score by not finishing properly. Linnet handicap result:—Long Jonah, 1st; H. W. Cooke, 2nd; C. Forrest, 3rd.—DARKEY LAWRENCE, Timekeeper.

Housing and Keeping of Foreign Birds.

By WESLEY T. PAGE, F.Z.S.
(Continued.)

YELLOW-BELLIED SPOTTED TANAGER.

(Calliste xanthogastra.)

This also in general appearance is similar to *C. punctata* and *cuttata*, but is shorter; the inner webs of larger wing feathers are edged with rich brown; sides of chest, abdomen and flanks, golden-yellow, merging into the green of the under parts; top of crown and sides of face, washed with golden-yellow. It may be summed up as a brilliant bird, clad in refulgent green, thickly spangled with velvety black; beak, legs and feet, greyish-brown. Total length, 4¼ ins.; tail, 1½ ins. Habitat: Bolivia and Peru.

RUFOUS-THROATED TANAGER.

(Calliste rufigularis.)

This is another spangled bird, rich in contrast, and of great beauty. Adult male: The breast and upper back are thickly spangled with velvety black, on a ground of golden-yellow, washed greenish on the back; top of head and sides of face, blackish speckled with darker; throat and a streak lining the black sides of face, rufous; middle and lower back and upper wing coverts, bright green; larger wing feathers, blackish edged with bright green on their outer webs, rich brown on the inner webs and ends; tail, blackish with outer edgings of green; remainder of under parts, greenish; beak, legs and feet, greyish-brown. Total length, 4½ ins.; tail, 1¾ ins. Habitat: The tropical valleys of the Andes, near Quito.

THE GOLDEN TANAGER.

1. *(Calliste aurlenta.)*

SCLATER'S GOLDEN TANAGER.

2. *(Calliste sclateri.)*

(1) Adult male: Various shades of rich gold-colour, yellowish on top of crown and eye region; thickly spangled with velvety black on the upper back; ear coverts, black; few indistinct spanglings on nape; tail and flights, blackish; outer edges of wing coverts, primaries and secondaries, golden-yellow; beak, blackish; legs and feet, dark greyish-brown. Total length, 5 ins.; tail, 1¾ ins. Habitat: New Granada. Mr. W. Goodfellow found this bird rather common in the highlands of Ecuador, at an altitude of about 5,000 ft. He describes it as being a truly fine bird, with rich golden plumage, jet and black ears. He saw a caged specimen which had been in captivity for some time; it was very lively and tame, and was fed almost exclusively on orange and banana. (2) It is somewhat doubtful if this bird is entitled to specific distinction. Its principle variations from *aurlenta* are brighter and paler top of head and eye region; almost chestnut coloured under parts; and black upper tail coverts edged with yellow. Total length, 5½ ins.; tail, 2 ins.

TSCHUDI'S GOLDEN TANAGER.

(Calliste gulchra.)

A most beautiful and striking bird, not yet imported alive to this country. Adult male: Wings, tail, ear coverts, and beak region, black; general body colouring, dark golden-yellow; throat and upper breast, golden-chestnut; the front of head is also tinged golden-chestnut; the upper back is spangled with black; the larger wings except the flights, have their outer edges yellow; beak, legs and feet, greyish-brown. Total length, 5¾ ins.; tail, 2⅜ ins. Habitat: Peru.

VENEZUELAN GOLDEN TANAGER.

(Calliste arthusi.)

Known to science since 1831, but not yet imported alive to this country. Adult male: Upper parts, except wings and tail, golden-yellow, spangled with black on the upper back; ear coverts, tail and wings, black; wing feathers, except flights, have their outer edges golden-yellow; throat, golden-yellow; remainder of under parts, dark chestnut; beak, legs and feet, greyish-brown. Total length, 5¾ ins.; tail, 2¼ ins. Habitat: Venezuela.

(To be continued.)

Canary Plague.

Do you fear that fearful scourge?
Send for Dr. Clarke's renowned book on **SEPTIC FEVER.** 6d. Postal order.
C.B. OFFICES, 154, Fleet St., LONDON.

"CAGE BIRDS" BY POST.

The Subscription Rates for this Journal are as follows

13 Weeks	**2s. 6d.**
26 Weeks	**5s. 0d.**
52 Weeks	**10s. 0d.**

The Annual Subscription will, in future, include
A Free Copy of "Cage Birds Annual."
Copies are posted to Subscribers every Thursday evening promptly and regularly.
THE MANAGER, "Cage Birds."

For Show ADVERTISEMENT TARIFF, see last issue.

Burnley and Dis. C.B.C. will hold a young bird show on June 15th, and their annual show on Oct. 4th and 5th.

We are asked to state that Mrs. Bate, of Woodhouse, has gone out of the cage bird Fancy, and has sold all her birds.

We have had so many answers to our advertisement that we find it impossible to reply to each. Kindly thank each one.—W. and J. Nield (Ashton).

Mr. A. Wake (Middlesboro') writes:—"I enclose fee for another advertisement in Cage Birds. I have had a very good sale this year, which speaks much for your paper."

A new society has been started at Paignton, called the Torbay Ornithological Society. Mr. E. C. Parnell (of Parnell and Son) has been elected hon. sec., and his address is 12, Princes-street, Paiguton, S. Devon.

Secretaries of Cage Bird Societies in Scotland kindly note that the City and County of Perth Ornithological Association have altered the date of their open show to November 23rd, a week later than last year.—Jas. A. Irvine.

Mr. Chas. White (Kirkcaldy) has sold his noted winning Missel Thrush, "Stormer," at a long price, to Messrs. Brown and Arrighi (Edinburgh). This bird has never been beaten by one of its own kind. I hope it will keep its old place in the Crystal Palace Show this time.—R. Robertson.

As each year comes round, a crop of new societies solely devoted to cage birds seems to spring up, while the percentage of "deaths" on the part of clubs is small. The cage-bird hobby seems to be spreading widely and rapidly, and, provided each club is properly managed, we see no end to progress in this direction.

Hy. T. Davis (Llanelly), of Williams and Davis, writes:—We must again congratulate you on your Birthday Number this year. What a contrast between No. 1 and that issue! I was extremely sorry to hear of Mr. Maxwell's loss. We were only talking about his aviaries the Saturday before, when the "Bird World" came out, saying we must put one up the same, as our's was getting too small. I trust he will soon recover his great loss, and we shall see him once more taking the challenge bowls, etc., at the Palace.

The "Bird World Magazine" for February is now out and makes the Third Number of what promises to be the greatest treat that the genuine lover of birds has ever had provided for him. Handsome cover in two colours. Exquisite frontispiece. Many interesting articles lavishly illustrated. Contents of No. III.: Frontispiece in Colours. "The Kingfisher," by Miss M. L. Medland. (Mr. C. P. Arthur Melksham says:—"The best plate of Kingfisher I have ever seen.") Chirps and Chatter. Our Letter Box. Plates and Pictures: The Kentish Plover, Young Great Tit, Even-marked Yorkshire Canary, Common Singing Canary, Reed Bunting in winter plumage, Frigate Bird, White Penguin, Secretary Bird Killing a Snake, Representative Vultures, Some Famous Racing Pigeons, The Dipper or Water Ouzel, Blue Sugar Birds, Juvenile Efforts at Drawing Canaries, Australian Night Heron, Hey Diddle Diddle or the Dabchick and the Pelican. Articles: The Dipper, by S. A. Sandy; Canary Management, by Wm. Fairlie; A History of Birds, by W. P. Pycraft, A.L.S., F.Z.S. The Worshipful Company of Scavengers, by Frank Finn, B.A., F.Z.S. The Racing Pigeon, by H. Kendrick, Junr. Sugar Birds, by Miss Dyddgu Hamilton; The Woodcock, by John Flewelling; Little Bird Friends, by Miss H. B. Rutt. Altogether a charming and agreeably instructive publication indispensable to bird keepers. Subscription, 3s. 6d. per ann. (post free). Subscription, Foreign, 4s. per ann. (post free). Single copies, 3d. (post free, 4d.) from your bookseller. F. Carl, 154, Fleet Street, London, E.C.

A Momentous Gathering.

We mentioned last week that the annual meeting of Cage Bird Union delegates will be held at the Crystal Palace Show to-day (Saturday, Feb. 16th), at four o'clock, when the election of president and secretary for the coming year will be decided. We understand that there are several nominations for the vacant positions. Voting cards were sent out this week to all the delegates, and the Editor of this paper is acting as scrutineer. The future of the Union is in the hands of the delegates, and the cage bird world waits with the keenest interest upon their movements.

Mr. A. Cherry, show sec. Barrow and District C.B.A., has removed to 25, Island Road, Barrow.

Mr. G. Wheatley's address was incorrectly given last week as Milton Street. It is 20, Melton Street, Leicester.

Mr. R. P. Broome, Hon. Sec., S.Y.C.C., announces that he will be at the Crystal Palace Show on Saturday all day after two p.m.

Good luck to our grand bird paper, and may it grow still more.—Wishing you and your staff every success is the best wish of J. Teece (Arnold).

In answer to query for Durisco, it can be had from Messrs. John Lane and Son, 50, Berners-street, Oxford-street, W.—G. S. Smith, (Highworth).

W. Mather (Widnes) writes:—I have had a very busy time with demands for my inflammation cure. Your paper, Cage Birds, is a grand one to do business in.

J. H. Verrall writes:—Thanks to the kindness of your readers I am looking forward to being at the Crystal Palace Bird Show all Monday, and perhaps on Tuesday.

The Hucknall Torkard C.B.S. have altered their 1907 open show to November 1st and 2nd, instead of the 8th and 9th, owing to clashing with another exhibition.—J. Pepper, Sec.

Mr. E. Pass writes: I have removed to larger premises, and am now better able to deal with orders entrusted to me. My address is now 9a, Carlingford Road, Hucknall Torkard, Notts.

Fanciers are requested to note change in address of the Secretary of the Wibsey and Dis. C.B.S. All communications should now be addressed to E. W. Johnson, 53, Smiddles Lane, Bankfoot, Bradford, Yorks.

Would the gentleman who lives at Ely, Cambs., and who unsuccessfully prosecuted a certain Nottingham dealer about six weeks ago kindly communicate with me?—J. Burge, Whittington Moor, Chesterfield.

Mr. F. F. Potter writes:—The City of Hull C.B.S. have fixed Nov. 22nd and 23rd for their thirteenth annual open show. Will secretaries please note, so as to avoid clashing. Judges, Messrs. C. H. Houlton and J. C. Barnes.

I am always delighted to secure my paper, Cage Birds. Great credit is due to Mr. Norman, likewise yourself, for bringing before us such an excellent paper and plates, the last special number being a treat.—W. Gouldson (Devonport).

With reference to my advertisement in Cage Birds, of Crest and Crest Breds, I am pleased to inform you that I have sold all my surplus stock this week-end through it. I am giving you my warmest thanks.—H. McColl (Wallsend-on-Tyne).

Your report on Auchterarder Show says in the Dark Mule Class 1st and Special, Ross, the Perth winner. Now Mr. Ross's bird was 1st and Special at Auchterarder right enough, but my bird was the winner at Perth of 1st and Special.—Jas. Ovenstone (Grangemouth).

D. G. Davies (Cardigan) writes:—Seeing a correspondent wants to know where he can get "Durisco Disinfectant Wash," he can have this from any decent ironmonger—Morses, of Bristol, is one that makes it—or any colour merchants.

Record Sparrow Slaughter.

The Witham (Essex) Sparrow Club has closed the season with a record of 35,541 Sparrows killed. This is claimed as a record. Three members contributed 3,000 birds each.

Help Wanted at Crewe.

The Committee of the Crewe Ornithological Society, writes Mr. A. Wilkinson, the sec., of 49, Vincent Street, have decided to hold a prize draw for the purpose of clearing off debts from their open show and other causes. They hope they may thus be enabled to make a fresh start. I hope fanciers will kindly give us their support, and not let us fall.

Aberdeen Societies Amalgamate.

A meeting of the Aberdeen Ornithological Society took place on the 9th inst. The conditions of amalgamation of the Ornithological Club and this Society were concluded in a very harmonious way, which bids well for the good of the fancy in this district. The date of the Show has been changed from 1st and 2nd January to 6th and 7th December. Increased classification, increased prize money and specials will be given. Fanciers will do well to keep an eye on Aberdeen.—W. B. Mackie, Sec.

SCOTTISH EDITION.

The above Edition of "Cage Birds" will be suspended until the start of the Show Season next October. All copies issued will contain the same matter, Scottish fanciers receiving equal consideration with our other readers.

THE MANAGER,
"CAGE BIRDS."

THE CAGE BIRD UNION.

The delegates meeting called for Saturday, February 16th, at the Palace Show, will be held in the Board Room at 4 o'clock. Several nominations having been made for president and secretary, voting cards have been sent out for their election, which will be counted and the result made known at the meeting. Among other items suggested for discussion are: A definition of a Novice and Amateur to be adopted by all affiliated societies.

An amendment to Rule 17, prohibiting non-members of the Union from exhibiting at Union Shows.

Late entries.

Appointment of auditors, and

Receive Council's report and balance-sheet up to date.—Geo. W. F. Lythgoe.

OBITUARY.

MRS. JOHN BOWMAN.

John Thomson (Edinburgh) writes:—It is with extreme regret I have to announce the death of Mrs. John Bowman, wife of Mr. John Bowman, a Scotch Fancy breeder of no small repute. Fanciers of Edinburgh and Leith district particularly will extend to Mr. John Bowman, their heartfelt sympathy in his recent sad loss.

MRS. CARR: MR. WALKER (Middlesbro').

I regret to have to inform you of the death of Mr. Walker, a member of the Middlesbro and Teeside C.B.S.; also Mr. J. Carr, our chairman, has lost his wife, after a very short illness. All that knew them will join us in tendering sympathy to their relatives. —Arthur Wake, Hon. Sec.

MR. R. TAYLOR (Greenock).

Fanciers will regret to hear of the death of "Bobbie" Taylor, who died at 8, Trafalgar Street, Greenock, on Feb. 6th, from heart trouble and dropsy. He was a keen fancier and exhibitor, away back in the eighties and nineties. In his day he showed some of the best British going. "Bobbie" possessed one of the kindliest of hearts, and was ever willing to assist the Fancy in the shape of money or guaranteeing classes. He was fond of rambling in the country, observing bird life, and as I think of the rambles we had together, and the numerous arguments we had on birdie matters, going along the country lanes, I am conscious that I have lost one of my best chums. Mr. Taylor leaves a widow to mourn his loss.—Peter Pettigrew.

Mr. W. Stafford has removed from 9, Chatsworth Avenue to No. 24, Stafford Street, Stockport.

I must say how very pleased I was with the "Bird World." It ought to be in every home whether fancier's or not. I am sure the illustrations alone are well worth the money charged for the whole magazine.—Clarence Redgate (Heanor).

Mr. Jas. Drysdale (Edinburgh) writes:—We have cleared £92 by the Prize Drawing on behalf of Mrs. Aitken (Newcraighall), which was advertised in Cage Birds last week. Mr. J. Heron acted as secretary to the Drawing Committee, who are much gratified at the success of the undertaking.

A particularly useful little work of reference is "Health and Strength Annual" for 1907, published from 27, Fetter Lane, E.C. It contains records, hints, and instructions for every athlete, and physical culturist, and all lovers of healthy outdoor and indoor pastimes. The price is sixpence.

Kindly mention that my father has been ill with influenza, and that is the reason that enquiries have not been attended to. He was at Nantwich Show on Friday, and must have caught a fresh cold, and that all communications will be attended to within a day or two.—Wm. Heaton (Nantwich).

We recently reported a case where the owner of a valuable dog sued a railway company for its loss during transit. The basket in which the animal was caught fire, and the dog was burnt to death. The owner recovered £300 from the M.R. Company. A motion to expedite the hearing of the appeal has just been refused by the Appeal Court.

REVIEW OF SCHEDULE.

Hetton-le-Hole (Durham).—Feb. 23rd. Nine classes. Judge, Mr. T. Clemmison. Nor. 3, Crests 1, A.O.V. 1, Brit. 3, Gift 1. Prizes 10s., 5s., 2s. 6d. Fee 1s. 6d. Entries close Feb. 18th to C. Storey, 10, Princess Street, Hetton-le-Hole, R.S.O.

CLUB REPORTS.

Y.C.C. OF IRELAND.

Committee meeting, held at 24, Gardener's Place, Dublin. Seven members present. Mr. Dewitt (chair). Agreed that Mr. Battyo should be selected to judge show next November. Following resolution was rescinded:—"That all birds not showing a distinctly-marked surface feather to go in clear classes." Messrs. Lambert and Emo attended to audit the club accounts, and, as they required some explanation on serious matters, they agreed to finish the audit on 15th inst.—W. C. Sholedice, Hon. Sec.

EXETER AND DIS. C.B.S.

Programme for 1907.—February 5th: Impromptu debate, "Pairing and How to Pair." March 5th: Paper, "British Birds and How to Feed them," by Mr. W. H. Cummings. April 2nd: Paper, "Hints on the Management of the Bird Room," by Mr. Walter J. Down. May 7th: Paper, "The Norwich Plainhead," by Mr. R. H. Folley. June 4th: First Feather Show (discussion on exhibits). July 2nd: First Feather Show (discussion on exhibits). August 6th: First Feather Show (discussion on exhibits); the place and date of this show is subject to alteration. Sept. 3rd: Paper, "The Breeding Season and its Results," by Mr. W. Evins. Oct. 1st: Washing exhibition, by Mr. J. Rushmer (silver medal for best exhibition given by novice, presented by Mr. J. Rushmer). Nov. 5th: Arrangements for annual exhibition (this fixture is subject to alteration). Dec. 3: Judging competition, prizes awarded. Jan. 7th, 1908: Annual meeting. Annual subscription, 2s. 6d. Names for membership will be received by the Hon. Sec., R. H. Folley, 28, Rosebery Road, Exeter.

DULWICH AND PECKHAM C.B.S.

Programme for 1907.—Thursday, March 7th: Lecture on British birds, illustrated by lantern slides taken from photographs, by Messrs. W. Hodson, Hon. Sec., and A. E. Butler, Esq. Thursday, April 4th: Lecture on the breeding and exhibition of Canaries, by J. Robson, Esq. Thursday, May 2nd: Table show of British birds; judge, W. H. Vale, Esq.; also country ramble (date to be fixed). Thursday, June 6th: Discussion on the Norwich Plainhead, opened by W. J. Cranfield, Esq. Thursday, July 4th: First Feather Show; judge, J. Robson, Esq. Thursday, August 8th: Lecture on colour feeding, by W. Norris, Esq. Thursday, Sept. 5th: Subject to be announced in Fancy Press. Thursday and Friday, October 17th and 18th: Fourth annual Open Show at Peckham Public Hall; judges, Messrs. J. Robson, G. E. Weston, W. Vardy. Thursday, Nov. 7th: Washing exhibition and remarks on the preparing of Yorkshires for exhibition, by H. E. Tringham, Esq. Thursday, Dec. 5th: Smoking concert and presentation of special prizes.

SHIPLEY O.S.

The Reunion among Yorkshire Societies.

The annual dinner of the above was held (Feb. 9th) at the Victoria Hotel, Shipley, when a most excellent repast was served. At the after proceedings, which took the form of a smoking concert, a very large company assembled, including many ladies. Amongst the many visitors present were the following well-known fanciers:—Mr. James Hartley (Lidget Green), Mr. Gladwin (London), Mr. T. Tillotson (Otley), and Messrs. M. Broadley (President of the Yorkshire Union), E. B. Denton, R. W. Alderson, E. Broadley, and H. Bailey (Windhill). We were fortunate in having in the chair Mr. Fred Hammond, the popular Secretary of the Amalgamated Yorkshire Societies, and under his genial presidency there was not a dull moment. In his opening remarks, Mr. Hammond referred to the split in the Yorkshire societies which took place a year or two ago, and said that the arrangements were almost completed whereby a reunion would take place which would make one strong union, more powerful than ever before. He paid a fine tribute to the friendliness which had been shown by the delegates of the two Unions, and compared the spirit now shown with that of twelve months ago, when all was bitterness and strife. He was of the opinion that the split had not been without good results, as the new Union would be on a much better footing. Already new societies were showing an eagerness to join, and he was pleased to announce that the Shipley Society had already made application. He congratulated the Shipley Society on the success of the President, Mr. D. Marsden, in winning one of the Amalgamation novice medals, and also of the success of Mr. H. H. Towers in proving himself the champion novice of the year with a splendid total of 96 points. He hoped these two young fanciers would be even more successful in future years. Mr. Hammond then announced the results of the members' competition for the past season, which were as follows:—1st H. Dobson, 50 pts. (cup); 2nd D. Marsden 50 pts; 3rd H. H. Towers, 42 pts.; 4th H. Hudson, 36 pts.; 5th P. Mason, 34 pts; 6th H. Bradshaw, 33 pts.; 7th W. Sowden, 32 pts.; 8th H. Stubbs, 20 pts.; 9th J. Whitaker, 19 pts. Novice competition: 1st H. Bradshaw, silver-plated waiter, presented by Mr. H. Dobson; 2nd H. Stubbs, special, presented by Mr. P. Mason. The balance in hand is £11 13s. 10d. A capital programme was excellently rendered, each contributor being heartily applauded. Among the performers were Mr. Bradley, Mr. T. Cawthera, Mr. E. Broadley, Mr. Clegg and Master J. W. Earnshaw.

HOW TO MAKE LIGHT BUNS.

By using Eiffel Tower Bun Flour the most inexperienced person can make *light* Buns and Cakes with certain success. Try a 1d. packet. Save Eiffel Tower Labels for 10/6 picture free.

Great Palace Show Number Next Week.

DO NOT MISS THE COLOURED PLATE.

We have been accused of ransacking the dictionary to find superlatives previous to the issue of each of our special numbers. There may be an element of truth in that. But it is also equally certain that our readers themselves, if one may judge by the hearty and unqualified approval given by them in writing after each special number, have an equally hard task to find fitting and appropriate adjectives for their commendation of our efforts.

We do not propose to say very much about next week's great Crystal Palace Show Number, except that we hope with your co-operation, dear readers, to make it superior to any Crystal Palace Show number yet issued from these offices. A coloured plate which, we venture to think, will not lose in popularity to any of its forerunners, will be the chief attraction, apart from a full report of the Great National Show of Cage Birds. Advertisers will doubtless not be slow to take advantage of the wide circulation this number always achieves, and we earnestly impress upon them the necessity for sending in their announcements as early as possible, and in any case not later than first post next Tuesday. Advertisements may be handed in at our stall at the Crystal Palace Show, where we hope to meet many new friends as well as all the old ones who regularly visit that function.

SOUTHEND AND DIS. F.S.

Monthly meeting on Feb. 7th. It was decided to have four quarterly members' shows, in March, June ("First Feather"), September and December; with the annual open show November 19th and 20th. After the general business, Mr. A. E. Pattrick gave a washing exhibition, which opened the eyes of several members who had never witnessed bird-washing before. Members of this Society feel proud of such a fancier in their midst, for his leisure time is always at the disposal of the novice. —A. J. Phillips, Sec.

LEITH O.S.

First monthly meeting, held Feb. 9th, Labour Hall, Smith's Place, President Jas. Lumsden presiding over a good attendance. Rules were gone over and, after a few alterations, passed. Five new members enrolled. Election of Committee resulted in Messrs. Geo. Barclay, Wm. Hook and Jas. Duncan being elected; and Messrs. Wm. Carson and David Moffat were elected Trustees. The Society, which is open to the County of Edinburgh, invites breeders of Scotch Fancy, Norwich, Border Fancy, Canaries and Mules, and exhibitors of British and Foreign birds, to become members. Any information regarding entry fee and subscriptions can be had from the Secretary, Geo. Brown, 9, Hermitage Terrace, Leith.

LOANHEAD AND DIS. C.B.S.

A meeting of the Loanhead and Dis. C.B.S. was held in the Volunteer Hall on Feb. 9th. A good number of members were present, with Mr. A. Gilchrist, President, in the chair. The rules, after a little discussion, were unanimously adopted, and the Sec. instructed to have them printed for March meeting. Four members of Committee were appointed—namely, John Gule, David Dalgleish, Adam McLead, and William Nelson, the two first-named to act as auditors. The members present agreed to admit new members to the end of March. Three new members were admitted—nauely, J. Hamilton, R. Fisher (Dalkeith) and A. and J. Thomson (Newton Grange). Since meetiug, S. Rutherford (Leith) has joined. I have also another enquiry (through Cage Birds' notice) to-night from Musselburgh. This gives us a membership of 18 at time of writing. Wishing our paper continued success.—W. B. Smart, Sec.

GREEN CANARY ASSOCIATION.

At their monthly meeting, held on Jan. 24th, Mr. Metcalfe in the chair, a letter was read from the Liverpool B.B.A. in reference to the disqualification of Yorkshire Greens at their November show by Mr. Mundell, and asking the G.C.A. for an official opinion on the question of square feathers in Greens. It was unanimously decided "that square feathers across the shoulders of the birds are a natural defect," and are not in any way an act of fraud on the part of exhibitors. It was also decided to publish this opinion in the Fancy Press, and to notify all judges at our patronage shows "that birds were not to be disqualified for this defect." Of course, the defect will count against the bird according to its extent. It was also decided that we have our usual dinner and prize distribution in March, and a joint committee of the G.C.A. and the Liverpool B.B.A. have been elected to take the matter in hand.—S. Hadwin, Sec.

LANCASTER AND DIS. C.B.S.

The monthly meeting was held on Feb. 2nd in the Market Hall Coffee Tavern rooms, Mr. S. Mulliner in the chair. A good majority present; two new members made, and first feather show date fixed for June 29th, 1907. Mr. S. Mulliner, Prospect Street, and Mr. J. H. Winn, Freehold Avaries, Lancaster, were chosen as judges of same. A table show was arranged for at the meeting night, but owing to the severe cold no Canaries were staged. The British fanciers having the show to themselves, a good table of Linnets was judged by the Chairman, S. Mulliner, Esq. His awards were as follows:—1st W. Walley, a splendid one; 2nd and 3rd W. J. Fisher. A judging competition followed; the honour was gained by J. H. Winn, closely chased by H. Capstick and R. Akister. The next meeting is arranged for Wednesday, March 6th, at 7.30 prompt; also a table show of Yorkshire pairs and any variety of British birds. J. H. Winn, Esq., will judge; a judging competiton to follow.—H. J. Brown, Hon. Sec.

LANCASHIRE C.A.

Members met last Saturday, when a good muster turned up. The report as to the election of officers and judges was confirmed, and a vote of thanks was accorded the scrutineer. It was decided to thank Mr. James (Canada) and Mr. Green (Redhill) for their kind offers of medals to be competed for by our members at the Palace Show. Next meeting will be held at Littleboro' in March; the Secretary will advertise time and place. A list of officers will be found in issue of Cage Birds dated Feb. 2nd. —Jas. Law, Hon. Sec.

WEST LONDON F.A. BOHEMIAN CONCERT.

Our Bohemian concert at Bush Hotel on Thursday last was a great success. We had a splendid programme and a very select audience. Our only regret was that the hall was not larger, as a great number could not be admitted. The chair was taken by Mr. B. Stevenson, while Mr. W. H. Mugford proved himself an able musical director. Some splendid singing was rendered by Messrs. W. H. and J. J. Mugford, W. Greenhead, R. R. Pollard, B. and P. Stevenson; the humorous items given very successfully by Messrs. Fred Searle, H. Walker, and D. Maybank. Selections by "The Bohemian Trio" were also much appreciated. A mystifying conjuring display was given by Li Foo Chung, a Chinese conjurer, assisted by Little So Sen. During the interval phonograph selections were given by Mr. J. Pieroth.—J. Dewhurst, Hon. Sec.

CITY AND SUBURBAN A.C.B.

Mr. C. A. House's lecture, entitled "The Breeding Season; what it may yield," drew 36 members to listen to him at the above Association's headquarters on Monday last, Feb. 11th. After the passing of the minutes, the Chairman (Mr. A. C. Burn) alluded to the gratifying list of candidates for nomination—viz., Messrs. Francis, Herring, Menhenett, Rouse and Watling —and the election of F. Vincent, remarking that he anticipated this as the result of the annual show, the strong financial position, and to the fact that the pair show was the best held in London this year. A vote was taken for the judge for the Finch show, which resulted in Mr. G. E. Weston, with 16, and C. Prior, with 10 votes, being elected, to be submitted to a final vote by the whole of the members. [Mr. Weston asks us to state that he has withdrawn his name in favour of Mr. Prior.—Ed. "C.B."] The payment of prize-money and presentation of special prizes won at the late Pair Show took place, the Chairman announcing that altogether 8s. 7d. prize-money had been returned towards the expenses of the show, which was well received. The appearance of Mr. W. Pranco after his recent illness (preventing him from showing the birds he had entered) was the signal for a very hearty welcome. A vote of sympathy was passed to Mr. Maxwell in his recent serious loss. The Chairman, in a short, breezy speech, introduced Mr. House to the members, and called upon him for his lecture. Prefacing his remarks with a few words upon the Cage Bird Union (a subject brought up by the Chairman, but adjourned till the next meeting), Mr. House entertained the members to a most lucid and exhaustive exposition of what the breeding season may yield. At the close, questions were plied by Messrs. F. Turnber, F. J. Martin, A. W. Curtis, and J. Pooley; and a long discussion followed over the question of the lecturer's contention that two-thirds of the progeny of birds followed from the hen's side, instances being given in support of it in horses and poultry, thus reversing the theory of years gone by, and which was now dawning upon the minds of breeders of poultry to-day. A hearty vote of thanks to Mr. House was carried, and a vote of thanks to the chair closed a pleasant evening.—V. Wynn, Hon. Sec.

CLUB NOTICES.

No charge is made for notices of forthcoming meetings, but they can only be inserted once. Should secretaries desire to secure immediate insertion of their announcements **exactly as written** they can do so by prepayment at the rate of three words a penny.

Ashington, Hirst and Dis. C.B.S.—Feb. 26th, Harmonic Hall, Ashington, at 7 p.m. All fanciers invited.—Jos. Miles, sec.

QUESTIONS & ANSWERS

DOUBTS AND DIFFICULTIES SOLVED BY SPECIALISTS.

Queries will be answered under the following conditions:—

(1)—*All questions must be clearly written in ink (or typewritten) on one side only of paper, and must conclude with either the correct name of querist, or o pseudonym, or initials.*

(2)—*The proper name and address in full of querist must always be written on a separate sheet of paper and enclosed with the query. In no case must the address appear on the query.*

(3)—*Queries intended for different specialists must not be written on the same sheet of paper.*

(4)—**Queries must not include** *or be included in orders for books, instructions re advertisements, or any other matter for publication.*

(5)—*The department to which the queries refer must be stated in bold letters on the left-hand corner of the query.*

(6)—*If an answer in the same week's issue is desired, queries must be posted to reach us by* **Monday's first post** *at latest. Queries will be dealt with in the order in which they are received, and only as space permits. The earlier queries are received the better attention they are likely to have.*

(7)—*Queries relating to illnesses of birds, except enquiries as to cause of death (for which see Post Mortems) will be answered by return of post on receipt of a postal order for sixpence and an addressed stamped envelope. Queries of an ordinary nature will be answered by post, if desired, on receipt of a postal order for one shilling and a stamped addressed envelope.*

(8)—*All who require letters of complaint written to advertisers must state grounds for doing so clearly and fully, and enclose a fee of sixpence to pay postage expenses, &c., otherwise their letters will not receive attention.*

(9)—*All queries must be addressed* **the Editor, "Cage Birds,"** *154, Fleet Street, London, E.C. Only queries so sent will be answered. Postcards are not admissible.*

NOTE.—Readers are requested to carefully study past numbers and current issue before submitting questions. By doing so they may save trouble and unnecessary repetition.

THE following gentlemen represent CAGE BIRDS staff of **ADVISORY EXPERTS.** Queries must in no case be addressed to any of them individually, but to the Editor.

CANARIES.

NORWICH PLAINHEADS.

Answered by J. H. PAYNE.

Cock Wheezing (Anxious).—I think your bird wants bracing up, as it has no doubt run down after the chill. You say it wheezes a little; this must be attended to as well. Give it in two tablespoonsful of water 15 drops of Tolu, 5 drops of parcgoric, and 5 drops of glycerine. Let it bave this for ten days, then give on alternate days, in the same quantity of water, 10 drops of tincture of quinine. You may give him this for a fortnight or three weeks. Twice a week let it have a little egg food, to which add 5 drops of Parrish's chemical food. I think you will find it will be fit for breeding by the time you will need it.

Dumb for Twelve Months (J. Mac).—A bird that is seven years old and has not sang a note for twelve months is just about as unsatisfactory a start as you can have, and I should strongly advise you not to place any reliance upon him. In fact, my advice is not to waste your time with him, but get another one.

Hen Drooping Wings (J. H. B.).—Some birds have a habit of drooping the wings a little, and I should say your hen is one of these. As you say it is in splendid health and very vigorous, and also a young bird, there is not much doubt but what it will breed all right, and you need have no fear on this score. There is nothing you can do to remedy this defective wing carriage.

Producing Colour (T.F.A.L.).—To get colour into your Norwich Plainheads, I should advise you to use a yellow green cock. You will want to get a bronze green, and not one of the Liverpool grecus, as they are not producers of the colour we want in a Norwich. This will be readily seen when we look at the fonl marked birds of this variety, the clear parts of them being very pale in the buffs, and of a lemon colour in the yellows. Your question is a very clear one, and quite plain to me.

Hen Going Into Moult (P.T.).—The change of room was no doubt the cause of your bird going into moult. The tonic you have been giving your bird is a good one, and you cannot do better than continue it. You may give it for another fortnight or three weeks. Keep the bird in a cosy corner away from any draught, and cover over at night with a warm cloth. Give twice a week a little boiled carrot.

Cock Making Chuckling Noise (Bird Lover).—(1) Give your buff Norwich cock, in its drinking water, 15 drops of the juice of a fresb lemon, to which add half a teaspoonful of honey, which dissolve in a little warm water. Give this fresh every day for a week, and then give, on alternate dâys, for a fortnight. (2) Give your other bird, which you say seems weak, 10 drops of tincture of quinine, in the drinking water, fresh daily for a fortnight or three weeks. Let him have twice a week a small teaspoonful of egg food, to which add 6 drops of Parrish's chemical food. Let both have a piece of sweet apple to peck at, which place between the bars of the cage.

Cock Off Song (Cornbrook).—Discontinue the packet seed, and give as staple diet plain Spanish canary seed. You may give twice a week a little of the following mixture as a treat: Hemp, niga, and German rape. Give in the drinking water, fresh daily, until you see he has got well, 15 drops of good port wine, and 5 drops of tincture of quinine. Let him have as much maw seed as will stand on half-penny twice a week, and a little boiled carrot.

Hen Bare on Neck (T.D.E.).—I see no reason why your hen should not breed, especially as you say she has already dropped eggs a few weeks back. For the bare place on the neck, apply with the tip of your finger a little sulphur ointment. Let her have in the drinking water, now and again, a few drops of the juice of a fresh lemon. Feed on plain canary seed instead of the mixture you name. Twice a week give a little hemp, German rape, and inga seed. Give a spray or two of watercress two or three times a week.

Matching Yellows and Buffs (Standerton).—You say your birds are white, slightly tinted with yellow. I fancy your description wants to be transposed, and read, yellow, slightly tinted with white. These are what are termed buffs, as you surmise. If your hens are the same colour, then you will want to get yellows to match them, that is if you wish to breed any yellows. But if you are not wishful to do this, and do not mind having all buff youngsters, you may pair those you have together for one season. Let the two cocks have twice a week a little egg food, to which add 5 or 6 drops of Parrish's chemical food, and two or three good pinches of maw seed weekly. The young you have from the Norwich cock and yellow cinnamon hen, which you say are marked, would be termed variegated. Some birds have a habit of drooping the wings a little. This will not affect the breeding if he is as you say well and singing.

YORKSHIRES.

Answered by H. W. BATTYE.

Breeding Cages (J. A. L.).—(1) My own breeding cages are 16½ in. high, 10 in. across, and 8 in. from back to front. Some people prefer them bigger, and they are no worse for that, but, of course, take more room. (2) You should get a reasonably good pair of stock birds from £1 up to £3. (3) Yes, I see no reason why the bedroom over the kitchen, and facing east, should not answer your purpose. See you have some system of ventilation.

Gone Off Song (Fluffy, W. R.).—I don't think from what you say in your letter that the Yorkshire cock you have will be of much use to breed with this coming season, until it gets to the latter end. At any rate, follow the advice given to "Willing to Learn" in last week's CAGE BIRDS, when your bird may show an improvement as soon as the milder weather arrives.

Wheezing (Troubled).—I am afraid your hen is not over sound, and, personally, I do not care to breed with, or, I might say I don't care to try to breed with this kind of hen, as they seldom rear many birds, and the young they rear are often unsound, and I should not advise you to breed with her. Give the cock bird 12 drops of Parrish's chemical food in its drinking water, and continue your present way of feeding. You may treat the hen the same, and as soon as the present severe weather abates it may improve.

Mating up Yorkshires (Paris).—You want to know how I would advise you to mate up the following birds:—No. 1, cock, clear yellow; No. 2, cock, yellow, slightly ticked; No. 3, cock, heavy variegated; No. 4, cock, heavy cinnamon marked; No. 1, hen, clear yellow; No. 2, hen, yellow, slightly ticked on wing and neck; No. 3, hen, heavy cinnamon marked; No. 4, hen, all cinnamon. Kindly repeat your query, and say whether No. 3 cock is green variegated or cinnamon variegated. You state that Nos. 1 and 2 cocks and Nos. 1 and 2 hens are yellows, but you do not say whether Nos. 3 and 4 cocks and 3 and 4 hens are yellow or buffs. Until you give these particulars I cannot assist you. Inform me what colours all the birds are, whether yellow or buff, and as full a description as you are able to give of each bird, in regard to its type, size, feather, etc., when I shall be pleased to advise you.

CRESTS AND CREST-BREDS.

Answered by W. E. GREEVES.

Crestbred Cock Loose in Feather (A.G.B.).—Your bird wants a tonic. Parrish's chemical food I have found one of the best for birds. I prefer to give it direct into the beak, one drop every morning until he gets better; or, instead, you may put six to eight drops in the drinking water every day for a week. You might also give a little egg food twice a week, over which sprinkle a little maw seed, and a small quantity of hemp twice a week. Also give a supply of good shell grit. If your room is warm give a bath, but be careful that the water is the same temperature as the room; see that the bath is given in the morning; if given in the afternoon the bird does not dry so well. Fresh watercress, free from frost, and as dry as possible, will be beneficial.

SCOTCH FANCIES.

Answered by R. WRIGHT.

Yellow Hen Out of Sorts (J.H.B.).—Your hen seems to he suffering from overheated skin. The use of vaseline is all right. Rub again gently, but every second day rub in a little whisky instead. Feed very plainly, and give boiled rape seed three times a week. She should breed all right during the coming season.

BORDERS.

Answered by J. PATTERSON.

Various (Admirer).—Separate all cocks from amongst the hens, and run into single cages by themselves. Keep the hens in larger cages, three or four together; allow them a good hop between the perches, so as they may strengthen their systems by the use of their wings. Keep the cocks at one side of the room, and the hens at the other. Feed the former on plain seed, a little rape every alternate day. Give twice a week a half teaspoonful of egg food, with a pinch of maw seed over it; any not very forward give half a teaspoonful hemp twice a week. Feed hens the same, only add a pinch of inga seed twice a week. See that they have plenty of grit, cuttlefish bone, and crushed egg shells, weekly, until the time of putting them up for breeding. (2) Clean out and wash all breeding cages and accessories with warm water. Add to water a little ammonia, and ½ oz. black roll tobacco. Give a good scrubbing with a brush and soap; rinse well in clean water. Let them remain outside for 24 hours till dry, then leave them for a week; sandpaper all woodwork inside, and give one or two coats of good enamel. I prefer sky-blue colour. Treat all nest-boxes in the same way, and store away until required.

Pairing Queries (Nancy).—I really could not tell you whether your hen will breed this year or not. If she is in perfect health, as you say, I would risk her, only if you have any doubt procure another one, and if she fails you you will have the other to depend on. I do not advise more than one hen to each male, but find it safe to have one spare hen to every five pairs. (2) Let your buff cock that is backward have a little egg food mixed with Osborne biscuits—three biscuits to one egg. Allow him half a teaspoonful, and add a pinch of maw seed; mix amongst it three drops chemical food. (3) Keep all cocks away from the forward hens, as advised "Admirer." (4) The latter end of March, if winds are mild and weather favourable, will be soon enough.

Feeding (J.S.).—You will have better success if you will follow advice to "Admirer." Birds fed on mixed seed as a staple food do not generally thrive and remain healthy any length of time. I generally allow about one teaspoonful per bird, mixed among the gravel once a week when cleaning out and renewing the gravel; it gives them plenty of exercise to scrape it out.

LIZARDS.

Answered by BARKER CLEGG.

The Origin of the Lizard (Inquisitive).—Beyond the record that the Lizard Canary (not such a perfect bird as we have to-day) was bred by the weavers of Nottingham, Spitalfields, and Norwich, in the 16th century, we have nothing of a definite character reliable enough to say that it was bred on a systematic basis. Linnæus tells us in his "Systems of Nature" that there were two distinct species of Canary, one he calls *Fringilla Beutrocea*, a native of Madeira, and the *Fringilla Canaria*, of the Canary Islands. Later, Dr. Heinekin mentions the first-named, and his interesting description of these birds leads us to believe they were beautifully spangled. The same writer tells that in their wild state these birds interbred with the Citril and Serin Finch, both being of the same genus, maintaining that they further promulgated their species. If we accept this we have the origin of the Lizard. We hear little more about these birds until the societies in this country held their annual shows, when birds were exhibited and valuable prizes awarded. The standard of excellence was made up of certain properties, such as the colour of the cap, with nice formation, soundness of body colour, and regularity of markings. No bird would do for showing that was more than a year old, for the second moult always produces some irregularity which would disqualify it. The London Fancy bird appeared at the same time. Coming to the present age, I might say these birds have been bred on scientific principles, maintaining the uniformity of markings and colour to a high degree of perfection; and I have no doubt but that the Lizard Canary will be more popular in the generations that follow us. I am quite satisfied, myself, in accepting the conclusions arrived at upon the origin of the Lizard, from the old writers, until I find something more reliable. We have some good stock in the country. May we do our utmost to preserve it!

GREENS.

Answered by S. HADWIN.

Breeding for Colour (K.S.).—By mating your clear yellow hen with a green cock you will get a big majority of variegated youngsters. You may occasionally get a self-coloured bird from this cross, but the bulk will be variegated, especially as from the reading of your note the hen is bred from clears. These variegated's will contain grand colour either for crossing with clears for colour purposes or for breeding greens. Of course, for green breeding, you would have to pair the variegated birds with greens. If you want to simply breed marked birds and clears of good colour, then it would be better to get a variegated bird bred as above, so that the youngsters would not be too heavily marked.

ROLLERS.

Answered by F. A. LESTER.

Treatment not Successful (D. A. Nunan).—You must have patience; you surely did not expect the bird was going to recover immediately and sing. I believe if you feed him as you are doing, and see that he does not take cold he will come all right in time; it is a very hopeful sign that he remains active and sprightly. His feathers curling over his shoulders are a good sign also. Change his diet occasionally, giving apple instead of onion. Egg food, half-teaspoonful once a week.

General Questions (H. A. V.).—Size of box cage, 10in. high, 6in. deep, 16in. wide, two perches on a level, as wide apart as possible. Fix wire fronts by boring holes (say, two or three), one at centre and one each side, through top of box cage; leave these wires about ⅛in. long, then make three corresponding holes in bottom cross piece and cut the wires off to ⅛; this will allow you to raise front to lift out. Young cocks not covered up will get loud and neglect the teaching of the schoolmaster; not too dark at first. You can start Roller breeding in cold room about April if birds are ready; it would be too risky before.

Roller not Singing (J. Mc.).—Sorry the advice has not had the desired effect, but your feeding is wrong; give the rape and canary only and discontinue the hemp at once. Tie a small piece of string to the wires and he will perhaps play with that instead of the wires; also give a fair-sized piece of Spanish onion raw between the wires, and I hope that you will hear your bird again. A British-bred Roller would be the best; 12/6 to 15/- is a fair price for a songster. Now is the best time to buy.

German Cock Picking Itself and Wheezing (W. R.).—Thoroughly overhaul your cage, and try and find if the bird has redmite; if he has you will have to thoroughly cleanse the cage with boiling soda-water and see that it is perfectly dry before returning the bird to it. Discontinue the seed you are now giving it, which (excepting the canary) I am unable to identify. Give equal parts of German rape and canary, and also twice a week a half-spoonful of egg food. Give in water one teaspoonful of the following mixture: 1d. glycerine, 1d. simple syrup, 1d. Ipecacuanha wine, 1 teaspoonful of whisky; mix well before using.

German Roller Puffed up and Panting (Seaweed).—Your bird appears to be in a very bad way, and I expect by this time it will be too late to treat him; however, if he is still alive try the mixture as advised to "W. R." in this week's issue, and in addition put in a very warm position. Nearly all these cases that are given to me occur with freshly imported birds that have been bred and kept in a temperature of 80 deg., and of course they will at once go wrong when brought into a much lower one. Your feeding is correct. Most birds sleep on one leg. But change the perches, giving one round and one square; round off sharp edges.

Bird Wheezing (Beginner).—I do not think there is much the matter with your bird; discontinue all the extras and feed only with rape seed and canary; give between the wire a piece of onion (raw) about the size of a walnut, and I think this will clear his chest and lungs of the slight inflammation. I do not see you have much cause for alarm.

Roller Cock not Moulting (Guidance).—Your birds being apparently in good health and song will be fit to breed with. You do not say what room they are now in, but if the same room you intend to breed in it will not matter; but if you are keeping them warm and put them in a cold room they will doubtless immediately drop into moult. Better wait; it is early yet, and a little waiting may be time saved in the future.

IMPORTANT NOTE.

Two or more Advertisements coming from the same advertiser, even if sent in different names, are reckoned together and counted as one Advertisement.

MISCELLANEOUS CANARY QUERIES.

Answered by J. NORTH.

Loss of Neck Feather.—You kindly answered my query in issue of September 22nd last. My bird has not recovered her feathers or moulted; the feathers are coming off all round the neck. Very lively and singing. Excreta still slimy. Do you think it contagious?—M. BURKETT.

I cannot just now make the reference, but I have frequently advised on the same subject, and have generally succeeded in effecting a cure by the simple application of sulphur either in the dry state or made into a lotion with a little glycerine and milk. When the loss of feather can be traced to liver trouble (as I think it can in this case), the diet should consist of a full allowance of salad, fruit, or boiled carrot. I do not consider this disease (so far as I can trace it without seeing the bird) infectious; still, I should not keep such a hen flying with other birds, for if the loss of plumage is in any way attributable to parasites it might spread to the others. Have you tried the sulphur application?

Removing.—As I am removing to another house May 28th next, I should like you to give me your experience of shifting at that time?—ANXIOUS.

I could have given you a more helpful answer if you had mentioned how far you were going to move from one house to another, what means you were using for removal, road or rail. However, I do not think you need be anxious over the matter, and you would do well to remove your stock by just wrapping the cages in brown paper or any canvas or cloth wrapper. Put the parcels on a hand truck, and take them straight to their new house if within walking distance, hang them up in their place, and uncover them in about half an hour, or if you move them at night time unpack them in the dark, and let them, when they wake up in the morning, find themselves "in pastures new."

Making Canaries Bathe.—How can I make two cock Canaries bathe? Instead of washing in their bath water they drink it. Sometimes I spray them, but when I put them in a dry cage they sit on the perch and make no attempt to dry themselves?—NOVICE.

"Anyone may lead a horse to the water, but no one can make him drink." But Canaries are not horses, and a way can generally be found to induce them to do what is wanted of them. First of all, run the bird into another cage, and dust some insect powder over him. Let his usual cage be thoroughly cleaned, and perches scrubbed in warm water and dried; put in the bath and return the bird without delay. If he does not then bathe of his own accord dip him in, and bang up the cage in a bright and warm position, inside a southern window is a good place. Should this fail, it shows the bird is out of health, and must be treated accordingly.

Hens Feeding Each Other.—Got CAGE BIRDS twelve months ago, and have not missed a number since. Wish such a valuable paper had been out thirty years ago. (1) I have three hen Canaries in one cage, and they feed each other. Can you explain why? (2) Would there be any difficulty in mating a cock Ribbon Finch with a hen Canary?—SWALLOWFIELD.

(1) So far as my observation extends, I am very much inclined to think that there is a good deal of common falseness in hens that appear to feed each other. Canaries are a greedy tribe, and do not give anything away. When the hens seem to be feeding each other I fancy they are only kissing, and I take it they do this, not because they have any affection for each other, but just because it is usual, in their set, to do so. One thing they cannot be false about, and that is the indication that the approaching breeding season is affecting them; do not, however, allow such evidence to hurry your arrangements, for, as a rule, there is no good done by pairing up before the end of March. (2) No one could say there would be no difficulty in mating a Ribbon Finch with a Canary hen. It is a field that has not as yet been explored, but it offers great attractions, and it would be well worth your trial.

Pairing Query.—Will a four year old cock Canary pair with a last year's hen? The cock has never been beside any kind of bird within the last four years.—NO NAME.

The actions of Canaries are controlled entirely by their instincts, and they do not learn any lessons by experience. Birds that are not old or diseased are bound to breed when the warm weather arrives, and a cock Canary would find no fault with a young hen, nor would he fail to make her a suitable mate because he was three years her senior. Many breeders of experience consider such alliances to be more productive than those of two young birds.

Cock or Hen?—(1) Doubtful as to sex of one of last year's brood? It never sings. Do not all cocks sing? (2) When kept with the mother bird the two showed signs of nesting. (3) When separated into different rooms, mother bird seems uneasy and tries to build, plucking her own feathers. (4) Young bird only twitters. What is its sex? (5) Both on seed diet, no salad or egg food. Is this right?—MERLIN.

(1) It is often a matter of difficulty to say which are cocks and which are hens; especially is this the case with young and imperfectly developed birds. When one cannot see the birds, and has to rely on a written description of their behaviour, the aforesaid difficulty is intensified. No; all cocks do not sing at all times, but my impression is that your bird is a hen. Such a normal bird would be singing if a cock. (2) It is too early yet to decide the sex of some birds. (3) Such early stimulation is not wise, and is likely to upset a bird, perhaps for the season. Keep them parted till end of March. (4) Answered in No. 1. (5) No egg food, but salad, sweet apple, or boiled carrot may be given with advantage.

Enlargement and Treatment.—(1) Canary hen has enlargement near vent, yellowish colour, and about the size of split pea. She does not moult nor seem in pain, but is quite lively, but the part is bare of feathers? (2) Cock Canary, six years old, and bred with for first time last year, was a splendid singer, but has now gone quite "off song," and seems in a low and listless way. Have given 15 drops of Parrish's chemical food in drinking water.—M.V.G.

(1) Apart from making an examination of your Canary hen, I am very much inclined to think that the enlargement you speak of is nothing more than a natural accumulation of fat. Anyhow, I should not advise you to do anything to it, as I think you will find the hen will go on all right. (2) Your cock bird is not so young as he used to be, and it is not at all unusual for birds that have been kept in small cages for several years to become docile, and even indolent. They seem to find whistling too much like hard work, and so leave it alone. Your treatment with chemical food is quite correct, so go on with it, giving also some spring salad when obtainable, or slices of sweet apple or boiled carrot, of course, in addition to usual seed diet.

Swelling on Side of Head.—Canary has swelling on right side of head, which is inflamed; the eye is ucarly closed, and there is a watery discharge from both eycs. The inside of throat seems to he sore, and the bird does not close its beak properly. It sits drooping very much, is rough in plumage, and wings hang down. It is also very loose in its bowels. I have put it on bread and milk sop, and bathed its eyes and mouth with criuusou fluid. He has been previously kept in an open wire cage, but I have now run bim into a box cage, and keep bim in a well ventilated room.—C.S.

Your bird is evidently in a deplorable state, and most bird lovers would end the trouble in the shortest possible way. It is not for me to say that your bird has got diphtheria, or typhoid, or Canary scrofula, although it seems to have got a little of each, and there can he no doubt it may infect other birds. I should strongly advise you to kill it and cremate its body; also be very careful to thoroughly cleanse and disinfect its cage and surroundings. The only remedy I can suggest is borle acid solution, one drachm of the acid to a pint of hot water. You might bathe the affected parts with this lotion every night and morning, and also let it have the same to driuk in place of plain water. It is not poisonous.

BRITISH BIRDS, MULES AND HYBRIDS.

Answered by G. E. WESTON.

Breeding in Indoor Room. (G.C.).—It is quite impossible to say what birds will, and what will not, agree, when turned loose into a room. Some individuals of certaiu species turn out very peaceably inclined towards their neighbours; others prove shocking bullies. All I can do is to advise you to keep your eyes open, and if any of tbe inmates of your indoor aviary (or bird room) turn out incorrigibly interfering or pugnacious, to remove them at once. Of the speeies you meution, Yellowhammers, Chaffinches, and Bullfinches would be unlikely to breed therein—tbe first-named being the most unlikely, the latter perhaps a little more likely to do so. Why not try pairs of Linnets, Goldfinches, and Siskins? You could also put in a Canary hen or two; but no cock Canaries. You do not mention the size of the room, but you must strictly limit the number of couples if you want to stand any cbance of success. Read reply to "Lino" this week for food, etc.

A Remarkable Recovery (M.A.B.).—I am indeed pleased to hear the Bullfinch, about which I advised you in the Birthday Number, bas made such a satisfactory recovery. I remember you said its "eyes have shrunk to half their usual size, while its stomach appears much swollen." It certainly seemed an entirely bopeless case. It only serves to confirm the accuracy of a brother philosopher's remark that "You never can tell." The biscuit and maw seed, also the mealworms, may be continued for all time, though they need only he offered now and agaiu as "special treats." The chlorodyne should be gradually discontinued, and dropped altogether. Hints on the diet of Bullfinches are given another querist this week. Canary, German rape, and tcazle, with a little linseed and maw, should constitute tbe staple dict, with a pinch of hemp and a feed of sunflower seeds now and again, tbe latter tbe more frequently of the two.

A New Reader Enquires (A. S. Brackenridge).—Always pleased to help new readers. But you should certainly read and couform to the rules, or you cannot expect to get your queries answered. It is clearly stated that questions for different specialists must not be mixed up togctber. With regard to the Cauary which bas gone into moult, if you shift birds from warmed to unheatcd rooms you must be prepared to take tbe consequences. Almost every week fanciers are warned not to do such a thing. He may pull together when the genial days of spring arrive. This query should have been sent to our Mr. Payne. The Border Fancy is constipated. Get a pennyworth of sulphate of soda from a chemist, and dissolve in two tablespoonfuls of drinking water as much as will just cover a shilling. Leave this on the cage six bours or so, tben changing to plain water. Repeat dose next day if it seems necessary. This query should have been sent to our Mr. Patterson. It is absurd to be "afraid" to let a healthy Goldfinch bathe; the chances are that if you do not it will soon be unhealthy. Let him have a dip every morning. The food for Goldfinches was given last week; see replies to "G. Travers" and "B.L." There is no need to give a Linnet egg food to get it into breeding condition. At the same time, a little will not hurt the bird, given occasionally; maybe he will not eat it, though. How do you know your Linnet is a cock? If the bird was caught last season, yet has never sung, I should bc inclined to suspect it was a hen.

More Outdoor Aviary Breeding (Lino.).—Your proposed outdoor aviary, 12 ft. by 4½ ft., would accommodate a dozen pairs of small birds very comfortably, with a reasonable prospect of one or other of them breeding. It should be roofed right over. I have in many very recent answers given hints on fitting such a place up with nesting sites, etc.; also spoken of the difficulties and uncertainty attending attempts to breed with pairs of different species of birds mixed together. For food you would need to give the principal seeds, canary, hemp, teazle, summer rape, and sunflower, in separate hoppers, or dishes, this being the only economical method. The other seeds I frequently recommend for seed-eating Britishers (see replies to "Young Fancier" and "G. Travers" last week) should be given in small quantities, according to number of birds kept, and varied from day to day; also the green foods recommended these querists are the correct ones to gather and use freely. During the breeding season a dish of lightly-damped insectivorous food, rich in ants' eggs, should be supplied fresh daily, and any sprays from fruit, rose bushes, etc., infested with blight (green, or "smother" fly.

A Piping Bullfinch and Cuttlefish (A. H. C.).—You need have no fear about giving your piping Bullfinch a piece of hard cuttlefish to peck at. It will go him good, and in nowise affect his voice. Birds most certainly need something to demolish (Hardbills, that is), for it keeps their beaks in order, and amuses them not a little. Give him about a dozen sunflower seeds daily; these will provide exercise in the same direction, and good food to boot.

A Greenfinch; Also Canary Seed Sample (New Reader).—The sample of canary seed is not at all bad; it is small, but plump, and nice to the taste. You will he quite safe in using it, though of course, better can be bought. Your Greenfinch's cage may he infested with red mite. If so, you will have to get shut of them, or you can never expect to see him in trim plumage. Follow advice given "R.M." this week. If a Greenfinch gets a free supply of sunflower seed, he asks for little more. It should he supplied in a separate dish, where possible. In his seed hopper may bo kept the following mixture: Canary and teazle, one pint of each, hemp half-a-pint, linseed and summer rape a quarter-pint of each. Give a pinch of "tit-bits" in the seed line now and agaiu for a change. Green food: Flowering groundsel tops and dandeliou heads, seeding chickweed, dandelion, shepherd's purse, plantain, thistle, etc., young and tender dandelion leaves, watercress, lettuce, rape or canary seedlings, according to season of the year. He should have just a nice feed daily. In the spring, summer, and autumn the seeding kinds can be freely given.

Enquiries on a Bullfinch (R. M.).—The raising of the tail is only, I feel sure, a natural characteristic of the bird. So, I fancy, is the occasional "bulge" on the throat—due to the passage of food. Tbis is seen very plainly in all young birds (nestlings). The loss of feathers which you describe reads suspiciously as though due to the red mite. Are you sure his cage harbours none? Throw a white cloth over it for a nigbt or two, and examine it closely in the morning for traces of the pest. If found, dust the bird well with Keating's Insect Powder, or pure pyrethrum powder (obtainable from a chemist), seeing it gets down among the plumage, and specially under the wings, at root of the tail, and round the neck. The cage should be stoved in a moderately warm oven for 15 to 20 minutes, or thoroughly scalded (every crack and crevice) with boiling hot water, whichever may seem most suitable to you. What kind of cage it is you do not tell me. Gently anoint the bare spot daily for a week or so with just a very tiny smear of hazeline cream. How you are feeding the bird you do not state.

Dead Redpoll (F. Tattersall).—It does not come within my province to tell the cause of death of birds, even if I were able. If you will look up our post-mortem rules, you will see that it is the especial privilege of our Mr. North to receive all corpses, and they should be sent direct to him, with the proper fee. Canary seed alone is no food for a Redpoll. He should have teazle, summer rape, and a little linseed and maw, with occasioual feeds of hemp and other "titbits."

Siskin going Bare (Miss A. H.).—I am afraid your bird is troubled with red-mite. Follow advice given "R. M." this week, using the hazeline cream, too. Butter should not be given to a Siskin; it is quite unnecessary, and might well prove harmful. Let the bird have half-a-teaspoonful of maw seed daily. You should get a copy of Mr. House's manual on Canary breeding, published from this office, post free 1/2. Our "Annual" you will also find extremely useful, post free 8d. It contains a helpful chapter on the diseases of cage birds.

Bullfinch Queer (Miss U.).—Get a pennyworth of citrate of iron from a chemist, and dissolve a tiny pinch (just a few granules only), in every two tablespooufuls of drinking water. Give fresh daily, and continue for a week or ten days. This will act as a "pick-me-up," and correct the watery nature of the excreta. But see you do not give it so strongly that it has a pronounced constipating effect; watch its action on the bowels. Try to get the bird to eat a little Osborne biscuit daily which has been steeped in new milk, squeezed dry, and well sprinkled with maw-seed. Get a little stimulating liniment (that known as Ertell's liniment if you can), and gently massage the legs with this every day. Any chemist will let you have something suitable if you explain its purpose to him.

Concerning Linnets (Watson).—A cage 4 ft. 6in. long by 20 in. high by 11 in. deep, would hold eight or nine Linnets comfortably for moulting purposes. I presume your Linnet is well on in soft moult, and in that case you can do nothing but wait patiently for him to get through with it. Feed him well, on the lines advised a querist at length the other week, and keep him in an equable temperature. Put half-a-teaspoonful of Parrish's chemical food in its drinking water, fresh daily, until he recovers. A teaspoonful of a mixture of gold of pleasure, inga, thistle and dandelion, in equal parts, would be beneficial to Linnets, given twice a week.

An Old, Old Query (Experiment).—I have written times without number in this column (and just recently, too) that hen Canary Mules will go through all the forms of breeding (if one may so put it). They will build nests, lay eggs, and sit out their time, but the eggs are unfertile. If fertile eggs be put under them, however, they will hatcb them, and they generally rear the young in first-class style, making most assiduous feeders—good mothers all round, in fact. If you put Linnets' eggs under her she will rear the young all right; I know no hen more fitted and likely to do so, unless it be a kindhearted hen Greenfinch. It really doesn't matter whether you put a cock bird with the hen Mule or not; if well fed she will desire to nest in due season. At the same time she will go to nest a little earlier if you find her a suitable mate. A cock Canary would do, or even a rank cock Mule. She will come into breeding condition some time during April (or early May) if you feed her up as you would a muling hen Canary.

Mule Breeding (Hopeful).—You should at once adopt one of the two following plans:—Either put the cock Linnet and cock Goldfinch in the breeding cages with their Canary mates, or else hang them close to each other (cock to hen) so that they can see one another and become acquainted. In the latter case you would put them together for breeding about the second week in April. I can't tell you any exact date, for that depends entirely on the condition of your Britishers, and only you yourself can answer for the latter. Keep with your own Goldie the hen which has been previously used to a Goldfinch, and let tbe Linnet have the other hen. If you have double breeders, with a wired centre partition, you can put cock one side, hen the other, and withdraw the slides when the hens seem desirous of going to nest, which they will show by carrying pieces of nesting material about in their beaks. A cock Redpoll and hen Greenfinch should get along nicely in a cage 2 ft. by 10 in. by 11 in., though undoubtedly a cage 3 ft. long would be better.

Water Ousel or Dipper (E. D.).—Water Ousel is not the correct name of the "black bird with white breast and a short tail" which frequents brooks. That is only a local name, Dipper being correct. It is a most difficult bird to keep in captivity over any but a short period; even in the Zoo they fail to get the species to thrive. Probably the root of the trouble lies in the difficulty of finding an acceptable substitute for its natural diet. It is by no means a common bird, but a much localised one. If you could succeed in putting a Dipper on the show bench you would perform a highly uncommon feat. You should read No. 3 (February issue) of the "Bird World Magazine," to which my friend Mr. Sandy contributes a most interesting account of his efforts to keep Dippers in captivity. He believes they could be successfully kept if hand-reared from the nest.

Aviary and Fittings (Avis).—Your aviary 14 ft. by 6 ft. by 5 ft. will hold 30 to 40 small birds the size of a Canary very comfortably. But small Foreign birds do not enter into my department, and any questions respecting them must be sent to our Mr. Page. You do not attempt to describe the aviary in any way, and this does not help one to answer your question. Many of the ordinary self-filling seed-hoppers designed for aviaries will take sunflower seed quite easily, or can be made to do so by cutting away a little of the sloping piece of wood inside them. Any earthenware pigeon hopper would also take it. A corn merchant who makes a speciality of fanciers' goods would show you several suitable patterns. Personally, I always served my sunflower seed in shallow, flat earthenware dishes, with a good rim on them; large flower-pot saucers I believe they were.

Show Points and Wild Seeds (D. Johnston).—The show points of all the species you mention are set out in the section devoted to "Standards" in CAGE BIRDS ANNUAL. The show points of the Norwich Canary were very graphically described by Mr. Vardy in his article on this breed published in the supplement to our recent Birthday Number. I do not know of any book devoted to the wild seeds used by British bird keepers. But a little booklet with a most useful chapter about them can be sent you post free from this office on receipt of postal order value 1/2.

Breeding in an Outdoor Aviary (E. Watson). The size of your place, 6 ft. by 5 ft. by 2 ft. is very unsuitable for an outdoor aviary. The depth from front to back, 2 ft., is not nearly sufficient. If you have any cats about you will soon find this out. For breeding results, two or three pair are all it would accommodate with any chance of success. You could try Linnets, Goldfinches, and Redpolls. Probably your best plan (certainly the most profitable) will be to turn some pairs of Budgerigars into it; but on this point you must consult our Mr. Page. The latter would be more expensive than the former. Cover the stone floor with the "sharp sand" used by builders, adding on top a dressing of grit suitable for birds. You would need to rake out and renew the upper surface from time to time.

German Hen Bullfinches (A. A. Allen).—I am afraid you could not have read your CAGE BIRDS very carefully, for several dealers were offering hand-reared, etc., German hen Bullfinches in our last issue, and no doubt will be doing so in the present issue. Have another careful glance through the advertisement columns.

Another Outdoor Aviary (Saddler).—Your place, 4 ft. by 2 ft. by 2 ft. is really very small, and I doubt whether it ought to contain more than one couple. I feel sure you would do better if you divided it down the centre (wood partition) and put one couple in each compartment. I should feel inclined, personally, to mate the four as follows: cock Linnet and hen Goldfinch, cock Greenfinch and hen Bullfinch. You would be likely to breed Hybrids, if luck attended you; but no one could be absolutely certain of doing so.

Blackbird not Singing (H. Brown).—It is quite early for a bird which is kept, practically, entirely out of doors, to be singing yet, especially in view of the severe weather lately vouchsafed us. No doubt when a few genial, Spring-like days put in an appearance you will hear his flute-like notes. Your feeding is fairly correct; and I note you say your bird seems in excellent health. I cannot add anything on the matter of diet to the hints given "C. A. L." in our issue last week. If you like to give your bird a tonic, get a bottle of Allen and Hanbury's Byno-phosphates, and put a small teaspoonful into his drinking-water daily for a fortnight or so. It can do him no harm, any way.

Chaffinch not Singing (Alphonso).—If your Chaffinch is not a house-moulted bird, there is nothing surprising in the fact that he is not on song yet. It is really too early in the season to expect to hear him invite his lady-love to "tiddle-me-dear," or "kiss-me-dear," whichever form of amusement he may prefer. No doubt later on he will issue the invitation very fluently. In our issue of a fortnight ago (No. 264) I went into the feeding of the Chaffinch at length, and I must refer you thereto for particulars on the point. Give the bird two or three mealworms daily. On alternate days offer a dessertspoonful of sunflower and a teaspoonful of hemp and niger seeds mixed. This treatment should soon bring him into high condition.

Dead Linnets (A. C. Bennett).—The "white spot, like a tiny pea, above the tail," is the oil-gland, a natural possession for any Linnet, or other bird. Its use is to store away oil, which the bird utilises to anoint its plumage. In Ducks and aquatic birds generally, it is of quite large size. Thus you will see that the "spot" which you thought bad some connection with the death of your Linnets, could not possibly have had any connection therewith. It is very astonishing, however, how many people imagine it to be some noxious growth or symptom of serious trouble! It should never be meddled with unless palpably out of order and painful to the birds. If you desire an expert opinion on the deaths, send a body to our Mr. North, following the rules set forth under the "post-mortem" heading in our query columns.

Pairing a Siskin (Standerton).—You say you have three hens, two Norwich and a German; but you do not say whether yellows or buffs, and it is essential to know this. If one of the Norwich hens is a yellow, I should certainly select it as the mate for your Siskin—in fact you could run the Siskin with both hens if you choose, adopting the same methods as Canary breeders when running one cock with two hens. The German hen would be practically certain to throw youngsters somewhat small in build; otherwise there is no reason why you should not use her. If your Siskin sings "very hearty nearly all day," as you say he does, then he must certainly be on full song. He could hardly sing much "fuller," could he? Your cage, 30 in. by 12 in. is of very suitable size for one muling couple.

FOREIGN BIRDS.

Answered by WESLEY T. PAGE, F.Z.S., M.B.N.H.S.

Avadavat Bald.—My Avadavat is almost bald, and is still plain brown, not bright red like those in the shops. Is my diet correct?—H.J.H.

These pretty and interesting little birds, if kept in a cold room, confined in a cage, are apt to go bald, though in a garden aviary, with plenty of space for exercise, they take no harm out of doors. Again, in a cage, they have a bad habit of plucking each other, or it may be the result of weakness and debility. If in a cold room, bring it into a room in which a fire is burning most of the day. If it is being plucked by its companions, cage it up separately till in condition again; while if it is in a debilitated condition, keep it warm, and once a week make its drinking water just saline with Epsom salts; on other days just colour same with Parrish's chemical food; or, better, if the bird eats the damped sponge cake, drop three or four drops of the chemical food on same daily. Keep it in a warm room, and let it have the opportunity to bathe on all genial days. Examine the bird and cage to see if they are infested with mites; if so, spray the bird with quassia solution, put in a clean cage, and bake or scald and thoroughly cleanse the infected cage.

Madagascar Lovebird. My hen died egg bound, as I found an egg on opening her. Was my treatment correct? How can I treat to prevent this happening again?—H.E.G.

You did all you could for the bird under the circumstances, but I think you did not continue it long enough. You certainly did not take it in time; it should have been treated to the oil and steam bath as soon as you noticed its puffed condition, and the treatment should have been repeated every half-hour till relief was given. After such treatment the bird must be kept in some warm place, and strictly out of all draught. It is very regretable you have met with this misbap, as the breeding of this species is not at all common. Nesting at this season of the year is very dangerous, more dangerous with birds kept indoors than with those in the open air. Prevention is better than cure, and I should advise you to get some old mortar rubbish; crush this, and mingle with the grit on sand tray. Also deal in like manner with all egg shells left from your table, and always keep a piece of cuttlefish in the cage.

Budgerigars.—(1) The ceres of my pair of Budgerigars are very much alike, though one caresses and feeds the other. Do you think I have a true pair? (2) What is the correct diet for Grey Singing Finch, and do you think I have a male—it only chirps?—A.S.

(1) I should say you have a true pair, but you will easily ascertain this a little later, for as the weather gets warmer and the birds come into breeding condition the cere of the male will become a deeper blue, that of the female reddish buff, though in some few cases the cere of the female remains pale blue. (2) Possibly you have an immature bird, and that in the brighter weather it will come into song; there is practically no outward difference between male and female. If your bird continues only to chirp when May or June comes round you may be pretty sure you have a hen. You did quite right to put the food hoppers inside the cage under the circumstances. Diet:—Canary, white and spray millet, green food, grit, cuttlefish, and water. Give tender lettuce as green food for the next two months, and you might stimulate it with a mealworm daily if it will eat them. As soon as they are obtainable, give it such plant lice and bugs as you can capture.

Birds for Aviary.—(1) How many birds can I keep in my aviary, 12 ft. by 5 ft. by 8 ft. high? (2) What birds will do in it? (3) I have in cages Zebra, Gold and Bullfinches, Linnet, Siskin, and Canaries. Would these agree altogether? (4) Could I have a pair each of Budgerigars and Pekin Robins?—MIXED BIRDS.

(1) For breeding purposes, one pair of birds, the size of a Norwich Canary, to each foot frontage of the aviary. For a collection of birds only, you could keep 60 of same size, or say a third more of small Waxbills and Finches. (2) Zebra, Ribbon, Gouldian, Long-tail, Rufus-tail, or Ruficauda, Pectoral, Chestnut, and Diamond Finches; Mannikins in variety; Avadavats Orange-cheek, Grey St. Helena, and Zebra Waxbills, Grey and Green Singing Finches, Diamond Doves, and small Quails as ground birds. (3) All those you name would live and breed together in harmony, if your aviary is suitably fitted up. (4) I cannot advise you to keep Budgerigars with Finches, Buntings, etc.; though they live together in harmony for months, sooner or later you will be picking up your other birds maimed or killed. The conditions are not equal, and they have no chance if a Budgerigar turns nasty. Pekiu Robins are quite safe; they will not harm the smallest of their companions. At the same time, they have the failing of making a meal occasionally of the eggs of other birds. I have assumed that you have a shelter shed as part of your aviary, and my replies are based on that assumption.

Grey Parrot in Bad Feather.—My bird is a good talker, and about four years old. It is always scratching itself, and feathers are always falling. If I blow at her the loose fluff comes off. I give no slops. What can I do to remedy this?—J.F.W.

Your bird must be in a very weak condition. Dinneford's magnesia and other drugs should not be given indiscriminately. The bowels must be kept gently moving, not loose. The bird's skin is evidently in a somewhat heated condition, or it is infested with parasites; you had better keep treating with the quassia solution. For the next month or six weeks well colour its drinking water (china drinking vessel) with Parrish's chemical food. Keep a piece of cuttlefish in its cage, and give a small leaf of fresh and tender lettuce daily. Also give plain biscuit twice a day, and you can with advantage put three drops of the chemical food on same. Keep warm and out of draught. You must persevere with the treatment. Such cases are usually a work of time. If other symptoms should develop, seek advice at once.

Java Sparrow with Tape Worm.—One of my Javas died, and on being opened a large tape worm was found inside. Are such cases common? Are the other birds likely to be infected? What is the remedy? I lined the house of my garden aviary with straw for warmth; when can I take it down? Will the Diamond Doves and Quails thrive on the same diet as the small birds?—L.A.F.

Such cases, while not absolutely uncommon, are yet not of everyday occurrence, and I do not think, considering the conditions under which your birds are kept, you need fear for the others. If you notice another case in time for treatment, cage the bird up, and mingle some areca nut powder with its soft food. I should not remove the straw till the first week in April, and if there should be any nests already started in proximity to it leave such parts untouched till eggs are hatched and young leave the nest. I do not believe in mixing seeds even for aviaries; however, keep separate hoppers of canary and white millet seeds; and supply, as a mixture, hemp, teazle, and summer rape; and another of sunflower, oats, and rice in the husk. The Diamond Doves and Quails would find all they needed in the above. Cut the feathers of one wing, with the Quails, or they may injure themselves in new quarters. It should not be necessary to repeat this after the moult. Supply coarse grass, fine rootlets, and hay, and the Diamond Doves will build their nests in the branches.

Cockatoos and Parrakeets.—I want a pair of birds that will be a contrast in colour from Green and Rosella Parrakeets in another enclosure. Would Leadbeaters or Rose-breasted do, and would they agree with Budgerigars?—M. SCOTLAND.

I cannot advise you to keep either Leadbeaters or Rose-breasted Cockatoos with Budgerigars, or even with other Parrots, save, perhaps, Amazon or Sulphur Crests; even then it must not be attempted unless the enclosure be a large one. A pair of Pennants, Mealy Rosellas, or White-eared Conures, would go well with your Budgerigars, and make a pleasing variety. Either would thrive on a mixture of canary, white millet, and oats; with hemp and sunflower seeds as extras. Providing they were not crowded, you could keep a pair each of Pennants and White-eared Conures—or Mealy Rosellas and White-ears with the Budgerigars. The Pennants are about

the size of a Rosella, and the Conures slightly smaller than a Cockatiel.

What Parrot or Parrakeet?—Can you name my bird for me from description herewith, and what is its value?—"WHAT IS IT?"
You appear to have some variety of the Indian Ring-necked Parrakeet, most possibly a female of the common species (*Palæornis torquata*). It may be possible you have an immature male; this you can readily ascertain after the next moult, for if a male it will have a red and black ring round the neck, while if a female it will retain the slightly indicated green ring. Newly imported birds of this species can often be purchased for 5/- and even less; but, of course, an acclimatised, tightly feathered specimen, which was also a good talker, would be worth very much more.

POST MORTEMS.

Mr. J. North, 435, Oxford Road, Reading, will examine cage birds for a fee of 1s. 6d. each bird; for a reply direct, 2s. 6d.; analysis, 21s. Subjects for post-mortem examination must be sent packed in a box direct to J. North, with fee. Any sent to the office of this paper will be thrown away, and if a fee is enclosed the loss will be the sender's.

Canary (W.W., Bath).—Bird died of hemorrhage of the liver and inflammation of the lungs.

Canary (E.B.J.).—Your bird's sudden death was caused by apoplexy, resulting from softening of the liver.

Canary (W.H.).—Enlargement of liver and then rupture of blood-vessel of that organ was the cause of death.

Canary (178).—"Canary Scrofula" was the cause of death. Its retention with other birds would have been likely to cause further trouble.

Budgerigar (A.H.P.).—This male bird was in high breeding condition. He seems to have been eating too much, his liver was enlarged, and his death was caused by apoplexy.

Cardinal (Mr. Sitwell).—An apoplectic fit was the cause of this bird's sudden death. His enlarged liver, plump body, and beautiful plumage suggest he lived too well. More exercise and more ripe fruit or vegetables might have prolonged his life.

Canary (Miss K. Burns).—Sudden death caused by apoplectic fit, resulting from enlarged condition of liver. More fruit and salad is suggested. A reply by post to address given has been returned as insufficient.

GENERAL.

Answered by the EDITOR.

An Apology (J.G.B.).—All's well that ends well.

Cutting (A. Venables).—Thanks for interesting extract.

Catalogue of Palace Show (Miss Ashford).—We can send you this on receipt of a postal order for 1/2.

Bird Trapping (New Reader).—Write to Trower and Co., Caledonian-rd., London, N.; also consult the local police sergeant.

Report of Local Show (W. C. Freeman).—Always pleased to receive items of this nature. Thanks for kind remarks.

Query on Crests Held Over (A. G. Beeston).—Space will not always allow of queries being replied to the same week, but we do our best where it is a case of illness.

St. Kilda Wren (G. Pridham).—Many thanks for your pretty little sketch. It is, however, unsuitable for reproduction in either CAGE BIRDS or the "Bird World."

Seed Importers (J. Penrice).—Spratts, Carter's, Hindhaugh's, Macqueen's, and other advertisers in our pages are all large importers of bird seeds. Consult our advertisement columns.

Copy of Paper (John Thomson).—Many thanks, sir, for your courtesy in sending us in such an interesting paper. The Fancy are indebted to you and the lecturer for your thoughtfulness. Thanks for good wishes.

German Paper (W. Rodger).—Address your advertisement for German Toy Pigeons to the "German Feathered World," Leipsic. Send it along in English, which they will translate into German at your request.

Old Clothes (Cymro).—Sorry we can't assist you further. Try the Editor of "Lloyd's," and wait for an answer in his column. The Sub-Editor says refer to Petticoat-lane. That's where he is getting his rig-out for the Palace.

Book on the Catching of Wild Birds (M. English).—There is no book, so far as we know, dealing solely and specially with bird catching. We can send you copies of CAGE BIRDS, containing some articles on the subject, for sixpence.

Books on Australian Birds only (W.H.W.).—Several (but most expensive) works are obtainable. If price is no object to you, write again, and we will ascertain the complete bibliography of the subject for you. There are no cheap works available.

Kind Wishes (Hy. T. Davis).—Your friendly expressions were very greatly appreciated in this office, and you need be under no apprehensions of my "shuffling off this mortal coil" just yet. The cage bird Fancy keeps me very much alive, and gives me other things to think about besides ailments.

Index (H. V. Johnson).—When last we went to the trouble and expense of compiling and printing an index to CAGE BIRDS, for sale at a penny per copy, we sold the glorious total of twenty copies, and that experience makes us hesitate about producing another. Readers of CAGE BIRDS don't seem to want indices.

Perch Holder and Red Mite Trap Combined (J. W. Gilland).—Couldn't possibly say whether your idea is worth depicting in "C.B." until we see it. If sent in as an illustrated idea, it would have to take its turn, and we have scores of these it has not been possible to deal with yet, or even acknowledge.

Sutton-in-Ashfield Show (J. Pepper).—We really cannot inform you when or whether the Sutton Secretary sent to "C.B." to advertise their open show for 1907. If the query is of vital importance, perhaps it can be referred to the Secretary himself, who is the proper person, we imagine, to answer the question.

Photos of Judges (J. W. Ellwood).—We find the greatest difficulty in satisfactorily reproducing most excellent photographs in CAGE BIRDS, so great is the speed at which the paper has to be produced, and your pictures would not stand an "earthly" chance of being recognisable. Sorry. Will send results at Palace as requested.

Infringing on a Patent (Geo. Atkinson).—The registration of a patent is such an easy matter nowadays that the slightest variation upon somebody else's idea seems to entitle the originator of the variation to a new patent. Consult a patent agent, and he will give you reliable advice on the point. We are, unfortunately, not able to.

Attaching Reporters' Names to Reports (T. Edwards).—We agree with you this far, that where "stabs in the dark" are practised or tolerated in reports, the custom should be eliminated by instructing all reporters to sign their criticisms, but where the knights of the pen are straightforward, reliable, and considerate to every exhibitor, we hold there is no necessity for such a stipulation. Thanks for good wishes.

Where to Purchase a Roller Canary from (John J. Evans).—We are repeatedly stating in these columns that we cannot recommend individual advetrisers to the detriment of others. You must consult the advertisement columns of CAGE BIRDS, use your own common sense, and our deposit system.

When Does Responsibility Cease? (Colour Fed).—If your statement is correct, you are liable for the loss of the bird sent, and you must recover (or try to recover, which is not quite the same thing) the value of the bird from the railway company. It is not surprising to hear that a man wants both birds and money. It's human nature to want all you can get. But an appeal to a man not to be unfair, if made properly, may effect wonders. We hope it will in your case.

EDINBURGH NORWICH & M.B.S.

Monthly meeting, when nine new members were enrolled. There not being any business of importance, a discussion took place as to admitting Scotch Fancy to the Society. A notice of motion was given that we admit Scotch Fancy, and this will come up at our next meeting. A committee was appointed to visit various halls and recommend the most suitable.—W. DUNLOP, Secretary.

NORWICH PLAINHEAD CLUB.

I am on the point of revising the names and addresses of members. I should be glad if all those who have signified their willingness to join will please send on their names and addresses along with their subscription, viz., 2s. 6d., so that their names will appear in the new year book. Members whose addresses are incorrect in the old book can now have them corrected. All not having paid their subscription for last year will be struck off the list, according to rule.—J. RAYNES, Secretary.

READING AND DIS. C.B.S.

A very successful and interesting monthly meeting was held at Palmer Hall on Feb. 6th. About 50 present. A special feature was a washing exhibition given by three members, Messrs. Howlett, Packwood and Brooker. Mr. Yates was also to have displayed, but was regrettably prevented by illness. Much valuable information was imparted to all present, and highly appreciated. A hearty vote of thanks accorded the exhibitors brought this profitable evening to a close.—G. A. CHARLES, Sec., 94, Grange Avenue, Reading.

WIBSEY AND DIS. C.B.S.

The following is the list of prize-winners in our members' shows, and number of points obtained:—S. Shaw 1st, 122 pts.; C. Bastow 2nd, 96 pts.; D. Thornton 3rd, 88 pts.; Taylor Bros. 4th, 80 pts.; F. Pickles 5th, 65 pts.; J. Crowther 6th, 57 pts.; S. Wilkinson 7th, 49 pts.; W. W. Ellerton 8th, 40 pts.; H. Norton 9th, 26 pts.; E. W. Johnson 10th, 15 pts.; Bairstow and Chapman 11th, 14 pts. Messrs. Bairstow and Chapman have won the special for most entries and least points, with an average of one point per entry.—E. W. JOHNSON, Secretary.

LEICESTER C.B.S.

Annual meeting, Hare and Pheasant Hotel, High Street, Jan. 23rd, Mr. T. West presiding. Balance-sheet showed a good balance in hand on the year's working. Following were elected officers for 1907:—Hon. President, Sir John Rolleston; Hon. vice-Presidents, Messrs. J. R. MacDonald, M.P., H. Broadhurst, J. Hurley, John Adams, J. T. Biggs, and T. J. Thorncloe; Hon. Solicitor, Mr. J. Hincks; Hon. Auctioneer, Mr. J. H. Tricks; Chairman, Mr. W. Stevens; Vice-Chairmen, Messrs. G. Edwards and J. Adams; Treasurer and Secretary, Mr. J. Heighton, 65, Biddulph Street, Highfields; Trustees, Messrs. J. Adams and W. Judd; Committee, Messrs. T. West, A. Highton, J. W. Hartshorn, H. Marriott, F. Archer, E. B. Hunt, G. Wheatley, and H. Gray; Auditors, Messrs. G. Harrison and A. Lowe.

The most serviceable, striking, yet tasteful and economical

LIVE BIRD LABELS

are those obtainable from "Cage Birds."

For the convenience of readers we have had printed a quantity of address labels suitable for use when despatching live birds on journeys by rail, etc. These are printed in red ink, on paper gummed at back, and

LIVE BIRDS
THIS SIDE UP.

WITH GREAT CARE.

If delayed will die.

A Group of British Cage Birds.

By ISAAC THOMAS.

A few Hints and Observations on some Popular British Birds.

THE POPULAR GOLDFINCH.

MANY are the birds claiming the admiration of British bird fanciers, but few more so than the sprightly Goldfinch, called here in Yorkshire King Harry Redcap. Unfortunately, of late years this beautiful bird has so greatly decreased in numbers that as a last resort aid has been invoked of Parliament to preserve it, and other sweet little birds, from extermination. The Goldfinch is undoubtedly one of England's most beautiful wild birds, and a grand songster. It is about five inches in length, the hen being a trifle smaller, though the difference can scarcely be distinguished, except by experienced fanciers. In the hen you will generally find that the feathers over the beak are light brown instead of black; the blaze does not extend past the eye, and the black feathers on the head are tipped with brown, as are also the small feathers at the shoulder end of the wings.

This bird's nest is a masterpiece of bird architecture, generally built in the forked branches of an apple or pear tree. It is composed of moss, wool, and other materials, and lined with horse or cow hair, with an inner and softer lining of the down of dandelions and groundsel. The exterior is often covered with lichens, which makes it difficult to distinguish from the tree in which it is so neatly built. The eggs are generally five in number, of a pale greenish blue, spotted and streaked with purple and brown at the thick end. At the end of 14 days of incubation the young are hatched; they are fed on the soft seeds of thistle, dandelion, groundsel, etc., which is first digested by the parent birds, and then brought up from the crop into the mouth of her young. These young finches are called Greypates until they have properly moulted. The Goldfinch often produces 3 or 4 clutches per year.

BULLFINCH AND CHAFFINCH.

The Bullfinch is another of our most beautiful finches, and has long occupied a prominent position as an interesting cage bird. It has a beautiful red breast, delicately-shaded grey back, and deep purple-black head, tail, and wings, the latter crossed with a beautiful bar of white. It is but a poor song bird, but possesses the power of imitation in a high degree, and can be trained to pipe any tune if taken from the nest and reared by hand. I once had the pleasure of hearing one of these lovely birds pipe the tune of "Soldiers of the Queen." The Bullfinch builds as a nest a somewhat rough structure composed of twigs and fine roots, roughly lined with horsehair. A favourite nesting-place is the thorn-hedges on the sides of railways. The eggs are generally 5 in number, of a pale-blue colour, speckled and streaked at the larger end with purple. I find they generally hatch on the 15th day of incubation. The sex of the young cannot be discovered until they begin to moult, when streaks of red will begin to show on the breast of the male bird. The latter, when house-moulted three or four times, has a great tendency to moult out black at the finish; this, I conclude, is caused by unnatural feeding.

The Chaffinch is a lively bird, and in his breeding costume is a picture to be admired. As an architect, he is equal in his profession to the Goldfinch. I will not describe his colours and build and flight, because he is well-known to all bird lovers. Not only is his cheerful "pink, pink" heard in all country lanes, but you can hear and see him regularly in our large towns, even in the busy thoroughfares of London. This bird builds a most beautiful compact little nest, on a branch close to the trunk of a tree, or on a piece of loose bark attached to the tree, and also in tall hedges. The nest is composed of moss and lichens, and lined with horsehair and feathers, and, like the Goldfinch's nest, is often overlooked owing to its close resemblance to the tree in which it is built. The Chaffinch often lays five eggs of a dirty greenish blue, spotted or streaked with reddish brown. The young are fed direct from the bill of the parents, with caterpillars and various insects. So far as I have observed, they also feed from the crop like the other finches I have described.

LOVED FOR HIS CHEEK.

The Greenfinch is perhaps the least interesting of the finch tribe; but I dearly love him for his "cheek" when tame or hand-reared. He was the first tame bird I ever saw. My father had this bird for 16 years, and money would not have bought him, and at the end of that time he met his death by violence. We left him hung out at the front door one Sunday evening and went for a walk; when we came back poor Dick was dead; in fact, there was little left of him, he having been pulled through the cage wires by a cat. People who knew no better used to say it was a Canary, for he had turned nearly yellow after so many moults.

This bird was wonderfully cute. Every Sunday afternoon we used to bring down his cage from the wall and open his door. Out his lordship would come on to the table to take his weekly dip in a shallow dish of water, which he did with much gusto; he never left the dish until he had splashed out all the water. He would then hop out on to the table, and shake and trim himself with much pride. I then used to go to the cupboard and rattle the paper bag containing the sugar, when he would fly straight to the bag, where we could hear him rustling about and cracking the small grains of sugar. Sometimes he would stay in the bag as long as ten minutes, and when satisfied out he would come and have a regular frolic, flying from one picture to another, and when satisfied back to his cage he would go, and again trim himself. This bird's untimely death cast quite a gloom over our family.

THE SISKIN AND LINNET.

It has often been a matter of surprise that this beautiful little bird is not better known amongst fanciers, though its merits are fast attracting attention, and before long I think the Siskin will become a popular cage bird. The plumage of the Siskin is of a lemon yellow and green throughout, and this colour contrasts most admirably with the black of the head and the rest of the plumage. It is a good bird for muling, and will mate freely with a Canary. It has been known to breed in this country, though rarely. It breeds chiefly in the pine forests of Norway and Sweden, and migrates to this country in the winter.

If you wish to find the Linnet in his natural home, take a walk into the rough land near the edge of a moor or wild waste ground, or to a remote moorland village where bad farming prevails. Clean, good land has no charms for this lovely songster. Its plumage is subject to great variation. The young Linnet of the year has a plumage of greyish brown, each feather edged and tipped with darker brown. The primary wing and the tail feathers are dark brown, edged with white. Until after his first moult this young bird is known as the Grey Linnet. These birds then become a beautiful red or pink on the breast, which colour disappears at a house moult. Although so plain in colour, these birds are beautifully marked; their lovely pencilled breasts and grandly-marked backs make them a study for an artist. Their colours are beautifully blended. The Linnet is very fond of building his nest in the furze which abounds in the wild districts in which he loves to dwell. His song is very melodious. The eggs are often five in number, of a bluish-white colour, spotted at the larger end with purple and reddish brown, though they vary much in colour, and are sometimes white. This bird can be recommended as a good muler.

AN INTERESTING LITTLE FELLOW.

The Redpoll is an interesting little fellow, and the smallest of the Finch tribe. Its name is derived from the deep crimson red on the crown of its head, which is much less on the head of the female. The adult male has also a handsome red breast and rump. It is a native of Norway and Sweden, and comes to this country in the autumn, generally about the middle of September. It is an aviary favourite, and a good muling bird. It can be taught to perform many tricks, will draw up its water in a bucket, or pull along a miniature railway truck to get its seed. As a cage bird it is a general favourite.

(To be continued.)

THE CANARY BREEDING SEASON

Will soon be with us and all who contemplate cultivating Canaries for pleasure or profit, should immediately procure the Standard Work on Canaries :—

HOUSE'S CANARY MANUAL

PRICE ONE SHILLING. Post Free 1/2.

Superbly illustrated by the Champion Canary Artist, Mr. H. NORMAN. EVERY BIRD DEPICTED IS A VERITABLE MODEL, and shows the breeder what to aim for. Some idea of the popularity of this Practical Manual may be gathered from the fact that under the title of "The British Canary," it has passed its Third Edition entering upon a Fourth Edition of 5,000 copies under the new title of "HOUSE'S CANARY MANUAL." The following Summary of Chapters, etc., will show you how completely the ground is covered:

Aviaries and Cages.
Show Cages.
Perches.
Breeding Canaries.
The Young Birds.
Food for Nestlings.
Hens Refusing to Feed.
Sweating Hens.
Young Birds Dead in Shell.
Red Mite.
Clear Eggs.
Moulting.
Exhibiting.
Diseases (treated very fully).
Every variety of Canary is treated upon at length and illustrated.

Mr. HOUSE has thoroughly revised and brought this work up-to-date and incorporated a chapter on the "Roller or Singing Canary."

Send 1/2 now and secure a copy hot from the press.

F. CARL, 154, FLEET STREET, LONDON, E.C.

FIFTY COPIES of the Third Edition slightly soiled—9d. each to clear.

NATIONAL BRITISH BIRD AND MULE CLUB.

Committee meeting, 25, High Holborn, Jan. 31st, 1907. Present, Mr. Fulljames (in the chair), Messrs. Silver, Lott, Trower, Fawkes, Hathaway, Page, Vale, Dewhurst, Cooper, Sandy, Goodchild, Plumbridge and Carr. A letter was read from Mr. A. E. Bailey, stating that he was now exhibiting in the name of "Bailey Brothers," and would he be eligible to compete for the club's cups and medals? Proposed by Mr. Vale, seconded by Mr. Trower, that hon secs. write calling Mr. Bailey's attention to rule 20, and asking for further particulars. A letter was read from Hon. Solicitor, again offering to receive and count voting papers. Hon. secs. were instructed to write and thank Mr. Nichols for his kind offer. A letter was read from the Secretary of the North London C.B.S. expressing the wish of the members to join the members of the N.B.B. and M.C. in their annual outing. It was proposed by Mr. Trower, seconded by Mr. Cooper, that hon. secs. write, giving them a hearty welcome. Proposed by Mr. Cooper, seconded by Mr. Vale, that the club's annual outing take place on May 25th, further particulars as to time and place to be published later, and that hon. secs. write to all London societies interested in wild bird life, giving them a cordial invitation. A letter was read from Miss Reeves, asking the Committee's advice respecting the use of silkworms as a food for hand-feeding young Hybrids. After a long discussion it was unanimously agreed that hon. secs. inform Miss Reeves that the Committee had well considered her request, and, although neither they nor anyone they knew had fed young Hybrids on silkworms, they saw no reason why they should not be a most beneficial food. The silkworm was a smooth-skin caterpillar, and most useful in the feeding of insectivorous birds, and was largely used in Italy, both in the caterpillar and dried pupæ state, for insectivorous birds. Mr. Vale informed the hon. secs. that he had nominated birds for the Hybrid cup at Dulwich and Peckham Show, but the word "cup" did not appear in catalogue. Hon. secs. were instructed to make inquiries respecting this grave mistake. Mr. Carr read to the Committee the winners of the club cups and medals, but, a slight alteration having to be made, a list of same will be published later. Hon. Treasurer read the annual balance-sheet, which was considered very satisfactory, considering the amount of unpaid members. This will be published after the annual general meeting at the Palace. This led up to the object of the meeting—viz., to consider the best means to increase the membership of the club.. Various suggestions were put before the Committee and duly considered, but all led up to the one thing—viz., to put the club on a better financial basis, so that the club could pay cash down for medals, etc. Medals could then be sent to the winners as soon as possible after the respective shows, instead of having to wait until subscriptions came in sufficient to pay for a few, and getting the rest on credit. The Hon. Treasurer said this could only be attained by members paying their subscriptions when due, and not letting them run on for two or three years. In several cases he had written four and five times, and could not get subscriptions or resignation. He thought that all members on the books not paying their subscriptions or tendering their resignations in accordance with our rules were liable by law for their subscriptions. It was expressed by the Committee that all members who had not paid their subscriptions, and had at heart the good work the club had done and was still doing, would endeavour to do so at once. By so doing, they would lighten the task of the Committee and further this good work. Mr. Trower said, although there was a slight loss on the club's first annual dinner, he would propose that another dinner take place at a convenient date. This was seconded by Mr. Dewhurst, and carried unanimously. Proposed by Mr. Frostick, seconded by Mr. Carr, that Mr. Vincent, 32, Murphy Flats, Borough Road, S.E., become a member of this club. Proposed by Mr. Frostick, seconded by Mr. Sandy, that Mr. A. C. Rouse, 67, Coldharbour Lane, Denmark Hill, S.E., become a member of this club. Proposed by Mr. Browning, seconded by Mr. Trower, that Mr. F. Collins, 6, Union Street, Camborne, Cornwall, become a member of this club. A hearty vote of thanks to the Chairman concluded the meeting.—PLUMBRIDGE and CARR, Hon. Secs.

BLACKPOOL AND FYLDE DIS. O.S.

Washing exhibition, Feb. 7th, at the Bay Horse Hotel, Poulton, kindly lent by Mr. J. Johnson. The room was well lighted up and very pleasant. The idea of going down to Poulton (which is about four miles from Blackpool) was for the benefit of some members living down there, and in the hope the Blackpool Society will enroll some more. Sergeant Geo. Young and Mr. Joseph Crossley volunteered to give the exhibition for the benefit of the younger members of the Society. Sergeant Young commenced by showing how to hold a bird, and explaining his idea of the washing process. He then set about his work in masterly fashion. Under his hands the bird soon put on a greatly improved appearance. The birds were kindly provided by an esteemed fancier at Poulton, Mr. J. Kirkham, except two Yorks. Mr. Crossley took with him. Mr. Joseph Crossley claimed the next patient, and, after explaining his method of washing, told how he had seen birds washed by the noted Yorkshire fancier, W. H. Shackleton, an authority, as he had proved himself by winning the Yorkshire challenge cup three years in succession. Mr. Crossley then commenced by washing the tail and wings first, and said he believed in getting the birds through the mill as quick as possible and into the cloths, and he very soon had his bird on the sticks in first-class order. He said he had used different kinds of soap, but he liked Pears' the best of any he had tried. Mr. Lightbown then claimed the table. He varied from the style of Sergeant Young and Mr. Crossley, and used Buttermilk soap, and was very partial to a Norwich show case for drying purposes. After taking his birds out of the cloth, he believed in brushing them down with a badger hair brush. The next member to try his hand was Mr. James R. Crossley, a young member of the Society, who went about his work more like a professional than a novice. The next and last was Mr. Binns, who showed himself a promising novice. There were about 20 members present, and all agreed that the evening had been well spent. Mr. Johnson, the landlord, generously promised his room any time the Society wanted it, and said he wanted someone to wash his Parrot, which he had brought into the room, but all declined his offer.

BLACKBURN LINNET F.A.

Singing contest on Saturday, Feb. 9th, at the club headquarters, "Old Red Lion," Snig Brook, Blackburn. There were a great number of friends present to witness the singing, which was of the highest quality. Thirty-four birds competed. Prizewinners:—1st, W. B. Bentley; 2nd, D. Bentley; 3rd, W. H. Topping; 4th, R. Leeming; 5th, J. Harrison. Judges: M. Blace, C. McGreevey and P. Blackshaw.—P. HAYHURST, Secretary.

LINNET CONTEST AT HULL.

Held at the Prince of Wales Inn, St. James's Street, on Feb. 9th, when 20 birds competed for four prizes. First, R. Dearlove; second, S. Saul; third, J. Marshall; fourth, R. Dearlove. Judges, Messrs. E. Mawer, R. Booker, S. Saul. Thirtieth annual Linnet singing contest will take place on Whit Monday. Anyone wishing to join our society can do so by applying to Secretary, E. Mawer, 14, Eastcheap, Hull.

LLANDWROG.

First annual show was a huge success, considering it was confined to a radius of about three miles; we hope to see some open classes next time. Entries numbered about 140 in all, including some very fine exhibits shown in good form, chief among which we might mention a clear cap Golden Lizard (shown by Mr. Winnard, which won the cup for best Canary in show), and the Bullfinch belonging to Mr. J. Williams, which took the cup for the best British bird in show. Great credit is due to Messrs. Winnard and Chittock, the Secretaries, and their Committee, for the admirable way in which arrangements were carried out. Mr. E. Llyfnwy Hughes judged, and we heard no grumbling.

NOR. PLAIN.: 1, 2, 3, Winnard, first clear yell., good head and chest, nice style, excellent wings and tail, rich tone of colour, full of quality, put down in grand form, second clear buff, lovely quality, beaten in colour only, third another typical bird, not much to choose between the three, a grand team; vhc, Addie; hc, Marston; c, Jones. A.O.V.: 1, 2, 3, vhc, hc, c, Winnard, all Lizards, first clear cap gold, nice clear-cut cap, well spangled, second gold, not quite so good in spangle, third silver, another good one. CAN., UNFLI.: 1, Marston, nice typical buff Nor., good colour and quality; 2, Jones, Nor., rather dirty, or might have won; 3, Griffiths, nice typical York., good style and quality; vhc, Jones; hc, Hughes; c, Parry. MULE OR HYB.: 1, Hughes, buff Goldie-Canary, nice size, good blaze, shown in grand condition; 2, Chittock, Goldie-Canary, not quite the size of winner, but good; 3, Thomas, yellow Goldie-Canary, rather too small; vhc, Jones; hc, Hughes; c, Winnard. BRIT. GOLDFINCH: Grand class; 1, Hughes, a clinker for colour, shapely, rich blaze, fine deep tanning, excellent moons and buttons, wins well; 2, Winnard, good shapely Finch, nice blaze, moons and buttons, not quite the size of winner; 3, Jones, shapely bird, not quite the colour or condition of winners, but will make a good one after moult; vhc, M. Jones; hc, Hughes; c, Williams. BULLFINCH: 1, spl, Williams, splendid colour and shine, good clean-cut cap, rich crimson breast, one of the best seen for some time; 2, 3, Winnard, leader, another, a good one, not quite so rich in breast colour, third nice hen, put down in grand form; vhc, Chittock; hc, Jones; c, Thomas. A.O.V. BRIT: 1, Thomas, Greenfinch, rare size and colour, wins well; 2, Jones, Redpoll, good bib, feathered like wax; 3, Owen, Redpoll, not so steady, but equal in other respects; vhc, Parry; hc, Hughes; c, Williams. SELL., 10s. 6d.: 1, 2, 3, hc, Winnard; vhc, Chittock; c, Jones.

Food for Infants, Invalids, and the Aged.

The particular and important feature of Benger's Food is that it can be prepared to suit any degree of digestive power, according to the directions on each tin. In this way it wins back health and strength.

The "Lancet" describes it as "Mr. Benger's admirable preparation."

GOLDTHORPE AND DIS.

Annual show of Canaries and British birds. Some very good specimens were staged. Mr. W. Brotherton (Rotherham) judged, and his awards gave satisfaction.

CLASS 1. YORKS.: 1, spl, hc, Owen, real good head, back, wings and legs, just a bit loose under, but wins; 2, 3, vhc, Senior, second grand colour, stands like a soldier, vhc a little gem, true type, seemed down with a cold or would have been on the heels of winner; c, Hall. CLASS 2: 1, spl, Owen, nice shape, good feather, splendid legs and tail; 2, 3, Senior, second full of breed, true type, on the heels of first; 3, Hall, good bird, a little less well shown; 1, spl, Owen, extra good type, close as boxwood; 2, Senior, grand Cinnamon marked, might have won had its owner seen to drying it more carefully. CLASS 3: 1, spl, Owen, very nice quality, close as wax; 2, Senior, brimful of quality, like a bit of silk. CLASS 4: 1, 3, spl, Owen, first a good head, well up on legs, wins, third nice one, close on second; 2, Senior, true Yorkie, but not in best show condition, close upon the second. CLASS 1. NOR.: 1, spl, Owen, short body, good wings; 2, Senior, splendid shape, real little gem, but on the small side; 3, Hollingworth, short-set bird, good quality, but not well washed. CLASS 2: 1, 2, spl, Owen, two very fair birds. CLASS 3: 1, spl, for best bird in show (no name), winner nice short body, wings and tail, silky feather, medium size; 2, Senior, heavy marked, but grand type; 3, Jackson, a nice bird. CLASS 4: 1, 2, spl, Jackson, grand Nor. hen, close on the heels for best in the show, but beaten in feather; 3, Senior, useful hen for breeding purposes, nice head and chest; vhc, Hollingworth, good bird. LINNET, ETC.: 1, spl, Senior, grand Linnet, splendid colour, stands like a top, but not very large; 2, Rudge, grand little Siskin; 3, Hollingworth, Linnet, of nice colour and feather; vhc, Jackson, the gem of the class, but had hurt his wing; hc, Cumberbat. GOLDFINCH, ETC.: 1, spl, Rudge, real good Bullfinch; 2, Cumberbat, Goldfinch, grand one, pressed winner; A.O.V.: 1, spl, Rudge, grand Yellowhammer, if taken care of should hold his own in a good class; 2, Jackson.

DON'T MISS NEXT WEEK'S GREAT ISSUE.

NANTWICH.

This old-established fixture—i.e., the forty-sixth annual—took place on February 8th and 9th, the venue being the Town Hall. Cage birds were staged on the platform, and the stewards made the best use of the space at their command, which by the way was none too much or the light any too good to get a decent view of some of the exhibits. Entries came up very well, except a few of the Norwich classes, which was a little surprising, considering a well-known breeder of this variety was handling them. Yorks were a fine lot, quality being well to the fore, some well-known winners having "all on" to hold their own in several classes. Mules were provided with but one class, which contained some crosses of a very high order, being headed by a nice specimen of the Canary-Bullie persuasion; the Britishers were a lovely lot, some grand birds, both hard and soft-billed, being on view. In this section was found the winner of the special for best bird in the show, Mr. Brotherhood's charming Waxwing gaining this distinction, being staged in marvellous condition. In Mr. Powell the Society have a Secretary whose abilities for that post are well adapted, carrying out his duties with credit to himself and to those he represents. The exhibits were well looked after and cared for at the hands of capable stewards. Mr. F. W. Heaton judged Canaries, Mr. W. O. Barlow taking the remainder; and on the whole their awards left little or no cause for grumbling.

NOR. YELL., CL., TKD., ETC. (4): 1, 2, Sandiford, leader very typical specimen, nice full head, short tail, rare colours and quality, second hardly so chubby as leader, crosses wings a bit, still a good one; 3, Hirst, not so stout as leaders, extremely stylish, nice quality and condition; 4, Horne, built on finer lines. BUFF (3): 1, Cook, wing marked, nice type, good head, good colours and mealing, fair wing carriage; 2, Sanders, cap marked, rare good head and chest, nice quality and colour; 3, Rathbone, nice variegated. UNFLI. YELL., CL., TKD., ETC. (5): 1, Hirst, marked eyes and wings, lovely colours and quality, in grand condition; 2, Sandiford, very fine clear, nice type and colour, fair quality; 3, Crimes, rare good head, nice type, just a trifle long; 4, Gaskill, very fair bird, worth its place. BUFF (7): 1, Pegg, nice clear, of good colour and quality, cobby and in good order; 2, Grime, good head and chest, nice colour, good condition; 3, Williamson, uncvenly marked, nice quality; 4, Cook, good clear, of nice type and feather, pressed third closely; vhc, Williams; hc, Grimes; c, Lover. HEN, YELL. (3): 1, Cook, very typical, good colour and quality; 2, Grime, again nice type, colour and quality; 3, Pegg, very level colours and quality of feather. BUFF (7): 1, Sandiford, gem of a clear, beautiful type, colour and quality, we liked much; 2, Pegg, nice variegated; 3, 4, Crimes, full head, short thick neck, good chest, etc., short tail, we preferred for second place, fourth nice quality var., fair shape; vhc, Rathbone; hc, Gaskill; c, Williams. YORKS., YELL., CL., ETC. (9): 1, 4, Sandiford, leader grand clear, fine colour and quality, well drawn, neat head, good position, fourth very fine thigh ticked, best of colour and quality, good type, must have pressed hard; 2, Walsh, not the length or colour of winner, good quality and stand; 3, Hirst, var., nice length, type and pose, might have gone up one; vhc, Weedall; hc, Hawley; c, Perry; absent, Gibbons. BUFF, CL., ETC. (7): 1, Hirst, thigh ticked, grand length and position, nice colour and quality, well mealed; 2, Hawley, nice length and style, loses quality to winner; 3, Sandiford, very fine clear, rare type and feathers; 4, Brayshaw and Jowett, on the large side, worth the position; vhc, Horne; absent, Gibbons. HEN, YELL. (6): 1, Brayshaw and Jowett, clear, very nice type, fair colour; 2, Perry, cap marked, good type and position, better colour, but for being a bit patchy on back; 3, vhc, Southam, nice length, colour and quality. BUFF (5): 1, Sandiford, lovely type and quality, tail well folded; 2, Walsh, rattling length and position, neat waist, best of wings and tail, presses; 3, Hewson, lovely quality, well drawn, stands well, close up; 4, Hawley, hardly the length of leaders; vhc, Horne. CAN., A.O.V. (3): 1, Leigh, wing marked, dark crest, nice length of feather; 2, Beaty, neat little Green Border; 3, (Miss) Gordon, green crest, nice length. MULES (12): 1, c, Leigh, grand Canary-Bullie, nice colour and lovely condition; 2, Ward, nice Linnet-Bullie, in lovely bloom; 3, Grime (no notes); 4, res., Coffy, leader very fine, dark Gold.-Canary, good size, nice condition; vhc, Lover, Horne, Wardleworth; a good class. LINNET or GOLDFINCH (10): 1, res., Davies, medium size, nice face and wing bars, good buttons and breast colour, bit puffy; 2, Megaw, good blaze, grand wing bars, nice condition, loses breast colour and buttons, will improve with another moult; 3, Howe, rich-coloured blaze, nice shape, lovely tanning, steady, nice condition, must have pressed hard; 4, hc, Lee, decent Finch, damaged wing tips; hc, Williams; c, Weedall. BULLFINCH (6): 1, 3, Coffy, leader grand bird, good size and shape, lovely back and breast colours, well cut cap, in good order, easy first, third hardly so shapely or so good in condition as winner; 2, Dakeyne, nice size, good cap, not the shape and colour of leader; 4, Williamson; res., Hemmings; hc, Bradburn. A.O.V. SMALL (15): 1, 3, Beaty, nice Nuthatch in good condition, third fair Redstart, looking a wee bit soft; 2, Brotherhood, well-known Redstart, in perfect feather and condition; 4, Parkes, nice yell. Greenie, good colour, body and wings; res., vhc, Lover, very good Yellowhammer, well marked, in good trim; vhc, Coffy; hc, Lee, Mackwell, Coffy; c, Parham; very interesting class. A.O.V. LARGE (8): 1, hc, Brotherhood, well-known Waxwing, in the best possible condition, takes spl for best British, also spl for best bird in the show; 2, Howe, very fine Hawfinch, well marked, steady and in lovely bloom; 3, Weedall, grand Redwing, in rare fettle; 4, Southam; res., hc, Law; c, Nield. FOR. (5): 1 2, 4, Beaty, winner very nice Pekin Robin, good size, in lovely feather, second good black-headed Gouldian Finch, perfect tail, nice condition, looked a bit cold when we saw it; 3, Jackson, very fine grey Parrot, in nice feather; res., Norton, good coloured yell. Budgerigar. SELL., 20s. (14): 1, Spilsbury; 2, Sanders; 3, vhc, Williamson; 4, hc, Hirst; res., Law; vhc, Leigh, Brayshaw and Jowett; hc, Weedall. SELL., 10s. 6d.: 1, Pegg; 2, Crimes; 3, 4, vhc, Williamson; res., Leigh; vhc, Brayshaw and Jowett.

EAGLE C.B.C. (CLAPHAM.)

The Seventeenth Members' Show, held at the headquarters, "The Eagle," Park Place, Clapham, resulted, as on former occasions, in a good collection of high-class birds being staged. If the numbers were slightly below some of the previous shows, the deficiency was amply made up for by the quality of the exhibits that faced the judge. When the club was started some five years or more ago the Canary exhibitors were by far the strongest section of the club, but this state of affairs has been quite reversed, as on looking at the catalogue we find there were just a dozen Canaries competing, and those owned by four members. Being the last show of the season, the competition for the handsome gold medal offered by the club for the most points gained by a member with six nominated birds at each show throughout the season was very keen, and Mr. Hathaway carried this off by his lead of three points over Mr. Vale at the last show, the points on this occasion being equal. Mr. Vale, however, secured the gold centre medal for second most points. The silver medal for most points in the champion section fell to Mr. Sandy, while Mr. Emms won the bronze for second most points in the same section. Mr. Hathaway also won for the first time the electro-plated cup for the best British bird. Mr. Sexton was also well favoured with specials, taking the silver medal and case of carvers for most points in amateur section. Mr. Culling took the special for best Goldfinch in amateur section, the same bird taking the special for best Goldfinch in the show; and in the latter instance we thought he was very lucky. The list of specials, as usual, was a good one. The Hybrids staged by Mr. Vale were quite a feature in themselves, and contained a very uncommon cross, the Twite-Greenfinch, showing both parents very distinctly; a Linnet-Goldfinch, Redpoll-Goldfinch—a very taking cross; but the premier honours fell to a Siskin-Greenfinch. The Canary Hybrids were headed by his light yellow Mule, followed by a splendid light buff; and in the Norwich class Mr. Vale also scored with his buff clear. Mr. Hathaway staged some good birds in the Yorkshire class. In the British classes Mr. Sandy staged a couple of grand Goldies, which were separated by Mr. Emms with a bonny Finch. Mr. Vale's Siskin and Mr. Culling's Twite were also well above the average, the former being a well-marked and good-coloured bird, while the Twite was a monster, and beautifully pencilled. Mr. Clarke, with his Bramble, separated two very sweet Bullies shown by Messrs. Frostick and Sandy respectively. In the A.O.V. class Mr. Sandy again scored with a big, well-marked Yellowhammer, second at Reigate a few weeks back in a big class. The small insectivorous class was headed by Mr. Hathaway's Blackcap, in the pink of condition, his Robin being third. "Bobbie" was quite at home and evidently was content with his quarters, for he was singing sweetly all the evening. Mr. Frostick's exhibit, a nice Bearded Tit, attracted much attention. The unmoulted class was a hot one to judge, and Mr. Turnber won with a very nice Goldie. We liked vhc (Barker) Goldfinch very much; it has a splendid blaze and is well worth moulting. Mr. C. T. Maxwell judged.

CHAMPION SEC., NOR.: 1, 2, 3, Vale. YORKS.: 1, 2, 3, Hathaway. A.O.V.: 1, Vale. HYBRIDS BETWEEN TWO BRIT. BIRDS: 1, 2, 3, vhc, hc, Vale. CANARY HYB.: 1, 2, 3, vhc, Vale. BRIT. GOLDFINCH: 1, 3, Sandy; 2, Emms; vhc, Hathaway; hc, Vale. LINNET: 1, Vale; 2, 3, Emms. SISKIN, REDPOLL, ETC.: 1, vhc, Vale; 2, Culling; 3, Hathaway; vhc, Emms. CHAFFINCH, ETC.: 1, Frostick, Bullie; 2, Clark, Bramble; 3, Sandy, Bullie; vhc, Vale, Chaffinch. A.O.V.: 1, Sandy; 2, Vale; 3, Hathaway. INSECTIVOROUS, SMALL: 1, 3, vhc, Hathaway; 2, Frostick. DITTO, LARGE: 1, Hathaway; 2, Vale. FRESH CAUGHT CLASS, FINCH: 1, vhc, Turnber; 2, Hathaway; 3, Frostick; vhc, Barker; hc, c, Culling. PAIRS: 1, Hathaway, Linnet and Greenfinch; 2, Turnber, Greenfinch and hen Bullie. AMATEUR SEC., GOLD OR BULL.: 1, Culling; 2, 3, Sexton. SISKIN, ETC.: 1, Barker; 2, Sexton. A.O.S. DARLINGTON C.B.S.

On Wednesday, February 6th. Mr. A. Wake (Middlesbrough) judged the first of the table shows, which were for matched pairs of Yorkshires, Norwich, Canary muling and Hybrids, with the following results:—YORKS.: 1, Stephenson; 2, 4, hc, H. Carter; 3, P. M. Carter; vhc, Grainger; c, Lumley. NOR.: 1, Stephenson; 2, Richmond; 3, 4, W. Allan. MULING: 1, Crosling; 2, Hildon; 3, P. Carter. HYB.: 1, Brunskill; 2, Grainger.

WEST LONDON F.A.

Annual pair show, on Saturday last, at Bush Hotel, W. R. L. Crisp judged Yorkshires, and J. Robson all other sections. CHAMPION. CRESTS: 1, 2, 3, Turner. NOR.: 1, 2, Battison; 3, Leithbridge. YORKS.: 1, 2, Bennett; 3, Stevenson. AMATEUR NOR.: 1, 2, 3, Lack. YORKS.: 1, 2, 3, Robinson. NOVICE. CRESTS: 1, 3, Shepherd; 2, Mugford. AMATEUR. NOR.: 1, 2, Podd; 3, Weston. YORKS.: 1, 3, Roberts; 2, Bond. ANY SECTION HYB. BREEDING: 1, 2, 3, Dewhurst.

WIBSEY AND DIS. C.B.S.

Last members' show, February 9th. Seventy-eight birds were staged, and were judged by Mr. J. Wilman in his usual able manner. CLASS 1: 1, Shaw; 2, Bastow; 3, vhc, Crowther; 4, c, Thornton; hc, Norton. CLASS 2: 1, Crowther; 2, Norton; 3, Taylor Bros.; 4, Shaw. CLASS 3: 1, 3, 4, Shaw; 2, Bastow; vhc, Ellerton; hc, Thornton. CLASS 5: 1, Crowther; 2, Thornton; 3, Shaw; 4, Taylor Bros.; vhc, hc, Bastow and Chapman; c, Ellerton. CLASS 6: 1, c, Thornton; 2, 4, Crowther; 3, Taylor Bros.; vhc, Shaw; hc, Pickles. CLASS 7: 1, 3, Thornton; 2, 4, c, Pickles; vhc, Norton; hc, Bastow. CLASS 8: 1, Wilkinson; 2, Shaw; 3, 4, Crowther; vhc, Taylor Bros; hc, Ellerton. CLASS 9: 1, Ellerton; 2, 3, Bastow; 4, Taylor Bros. CLASS 10: 1, Shaw; 2, hc, c, Wilkinson; 3, Pickles; 4, Bastow; vhc, Taylor Bros. CLASS 11: 1, 4, Shaw; 2, Taylor Bros.; 3, Pickles. CLASS 12: 1, Taylor Bros.; 2, Shaw; 3, Wilkinson; 4, Bastow; vhc, c, Pickles; hc, Norton.

ESTABLISHED 102 YEARS.

HINDHAUGH'S

"SPANISH" SEED.

Absolutely the finest the World produces—Boldest & Cleanest.

MONEY CAN NOT BUY FINER.

SPECIAL OFFER:—

56lbs. for 13/- CARRIAGE PAID IN U.K. Cloth bag included gross. (excepting Ireland).

This very special offer is made to introduce this "GRANDEST OF ALL SPANISH CANARY SEED" to all bird fanciers and includes delivery to any station in England, Wales and Scotland having through communication with the North Eastern Railway from Newcastle, by passenger train. It must be noted, however, that, our stock of this Extra Quality, Fine Large Seed having been entirely cleared out by the enormous response to our advertisement in the "Cage Birds," it will be a few days before our next parcel arrives, and even then, it will again have to go through our special cleaning machinery to make it as perfect as possible. So all orders will be dealt with as received, and despatched as soon as possible. Please get your orders in as quickly as possible to ensure early delivery.

Apart from the above Special Offer for 56lbs. Carriage Paid. We quote as follows:

DISTANCE NO OBJECT.

"Sample A" Finest obtainable Re-cleaned Spanish Canary Seed	10/-	per 56 lbs.,	2/9	per 14 lbs.	
"Sample B" Very Fine Bold Re-cleaned Spanish Canary Seed	9/-	" "	2/6	" "	
"Sample C" Really Good Bold Re-cleaned Spanish Seed	7/-	" "	2/-	" "	
Best Re-cleaned "Turkish" Canary Seed	6/-	" "	1/9	" "	
Really Good Fine Canary Seed, clean but small grain	5/6	" "	1/6	" "	

Packed in paper parcels up to 28lbs., free. Over 28lbs. should have 3d. extra remitted for cost of cloth bag to ensure safe delivery. *These prices are free on rail.*

Carriage by passenger train (payable by buyer) is only :—(in England, Wales and Scotland)

Above 50 miles and not exceeding 100 miles :—7d. for 14lbs.	11d. for 28lbs.	1/9 for 56lbs.	
100 " " " 200 " 10d. "	1/2 "	2/4 "	
Over 200 any distance .. .. 11d. "	1/6 "	2/11 "

YORKSHIRE GREENS.

Round or Square, Which?

SIR,—The letters of Messrs. Barratt and Hadwin do nothing much except endeavour to show that Mr. Mundell is not a strong judge, but one who needs to be told what he must do. Those who know William from Bradford will not believe this. Whether these birds were disqualified before or after luncheon, I am positive Mr. Mundell exercised his own will and judgment in the matter. In my former letter I wrote Wellington Hall, not Hotel. I may be wrong, it is many years ago, and I write from memory. Anyway, I remember distinctly that Mr. Galloway was the secretary, because I had some talk with him about these Greens. I have ever thought Mr. Hadwin a funny fellow; now I am certain he is. He says Greens are not alone in having square feathers, but he does not tell us any other bird which has. Why? Then he goes on to say the feathers are not in a place noted for colour or for bronze! The back of a Yorkshire Green not a place noted for colour! Mr. Hadwin are you really serious? Every breeder knows that we want a good green back, but, unfortunately, we often get bronze with our green. He hedges my fifth question by saying that Liverpool men only used to show Greens. That is a long time since, Mr. H., and all the disqualifications have not taken place in Liverpool. This question has never been properly settled. It has always been shelved. If those who suffered disqualification at the hands of Mr. Mundell are willing to submit to an honest test, I would suggest that the birds in question be sent to some independent fancier, not a Green breeder, not resident in the Liverpool district, and someone who would be above suspicion. Before being sent off, the square-edged feathers should be pulled, and if, when the new feathers appear, they are square-edged, a most vexed question will have been settled once and for all. The lunch query I leave to Messrs. H. and B. with regret that they have such a poor opinion of one of our strongest judges.—LANCASHIRE LAD.

AN AGED SKYLARK.

SIR,—The following appeared recently in the Press:—"A Skylark, owned by Mr. Fred Bateson, 11, Artillery-street, Roundhay-road, Leeds, died yesterday. It would have been 19 years old next June, and was in full song all last summer." Do you think this a record? I may add that the bird had six perfect legs. Wishing your valuable paper every success, the "Bird World" as well.—F. CALVERT.

BRUTALITY IN CORNWALL.

SIR,—The letter by Mr. Pease, in your last week's paper on the "Inhuman Bird-Catching" in Cornwall, made me feel quite miserable. Is there nothing that can be done to stop it? Could not the Society for the Protection of Wild Birds do something in the matter?—ALICE E. PRICE.

THE CAGE BIRD UNION.

SIR,—In reply to your correspondent, Mr. William Reid, my remarks on the resignation of 36 members are not quite correctly reported. What I said was "that a large majority mentioned that it was owing to our affiliation to the Cage Bird Union, that they were reluctantly compelled to resign membership," or words to that effect. Naturally everyone did not use the same words, and since our annual general meeting, on January 23rd, two more resignations have been received, and the same reason given.—JOHN TYSON.

SIR,—Reading CAGE BIRDS of February 9th, I came across a letter signed "James Reid," asking who was this tub-thumping William Reid who wrote a letter in reference to the above in the February 2nd issue of CAGE BIRDS. If I might give my opinion of William Reid by his letter, I say he is a gentleman and a fancier, as by his letter of February 2nd he only speaks facts, because I am sure that if a voting paper were sent to ever member of every club that has joined the Union the result would be that the Union would not have a third the strength it has got to-day, and there will have to be a great change in the rules to keep the societies together or we shall soon find the greater portion of the members on the barred list for showing at shows not under Union rules, for as the rules stand now Union members pay to be barred and the non-Union members pay nothing to come in. Again, this said James Reid says that the William Reids of the Fancy are the people who spell its downfall. I don't think so, for if all fanciers were as gentlemanly in their letters as William Reid they would do. And again, this said James Reid says he does not wish to doubt Mr. Tyson's word, but would like to know what he did say. I don't think CAGE BIRDS would exaggerate or shield anything that is said and done in the fancy. That is the benefit of having a reliable fancy paper, and if James Reid had read CAGE BIRDS of January 26th he would have seen what Mr Tyson said, and I know that the members of the L.C.B.A. believe what Mr. Tyson says, because he has the entire support of the members of the L.C.B.A., or they would not have given him a free hand in this catalogue question coming before the Union; and, again, James Reid says there are cranks in every club. Well, I will leave it to him to judge, but I will say to James Reid, "Judge not lest ye be judged," and after reading his letter I can't but say that it is very near time his cage-door was opened to let him get back along with his own flock—the bullies. —J. H. NEAL.

SIR,—Some people appear to have a natural aptitude for abusing other people who do not happen to hold the same opinions as themselves, and your correspondent, James Reid, must come under that category. Such a virulent letter as that which appeared over his name in your last issue can only be the outcome of an ill-conditioned mind, and I do not think that the officials of the C.B.U. will thank him for taking up the cudgels on behalf of the C.B.U. in such a manner. I believe that I would be perfectly in order if I were to return his compliment, and ask: "Who is this tub-thumping James Reid, that he should assume that, because a man dares to voice his opinions through the medium of the Fancy Press, he is trying to constitute himself the Archangel of the Fancy?" However, I will refrain from asking the question, as I have not the slightest desire to know who or what he is, and I believe that the majority of your readers will agree that a man who writes in the strain adopted by James Reid is best unknown. He says that I seem to think that everybody must fall into line with me. He must know that he is only talking nonsense. No such thing was ever suggested, as I believe in every man being allowed to have his own opinion. As for ruining the Fancy, that is another matter of opinion, but I believe that the Fancy would be so much the richer if there were fewer men of the stamp of James Reid in its ranks. He must have been very much annoyed at the publicity that was given to the fact that 36 members of the L.C.B.A. left their society on account of the C.B.U., and he tries to insinuate that your paragraph in "Twitterings" was not correct. I think he may take it for granted that, had there been any other reason given by any of the 36 members of the L.C.B.A., to account for their resignations, it would have been stated, if only in justice to the C.B.U. I do not think anyone could expect a withdrawal of members from the Manchester Society on account of the C.B.U., seeing that it originated there, but the fact that at least two have resigned shows that there is not unanimity even at home. James Reid says there are cranks in every club, and, after reading his letter, I have no hesitation in saying he is quite correct, so far as, at least, one club is concerned (that is, of course, if he belongs to any club). I would like to inform James Reid that the petty interests of Willian Reid and his tribe (by "tribe," I presume James Reid means the hundreds of fanciers who object to the C.B.U.) consist solely of a desire to see the Fancy progress by leaps and bounds, and not to have it crippled by the one-sided actions of a few. As for disheartened and disappointed clerks and scriveners, the only persons whom I believe this fancier-like description could be applied to are those of the stamp of James Reid, and I do not believe there are many like him, at least I know of none, the fanciers around this district being all men who work for the good of the Fancy. Now, sir, I would like to ask you again if you cannot take a plebiscite of members of the C.B.U.? The Fancy would then know whether the Union was popular or not, and if the vote went against the Union it would, no doubt, be dissolved. If, on the other hand, the vote went in favour of the Union, there is not the slightest doubt that the large number of fanciers who at present object to it would work for it, and try to make it a success, as they would then know that the majority of fanciers were in favour of it, and that, in their opinion, it was for the good of the Fancy. This would settle this controversy at once. In conclusion, sir, I would like to ask James Reid to keep to the question at issue in his future correspondence, and avoid personal abuse, and his correspondence will receive every attention, otherwise it would be treated with the contempt it deserves. Fair criticism is all right and generally does good, but personal abuse is unbecoming to any man. —WM. REID.

CAGED PARROTS LAYING EGGS.

SIR,—Thinking this cutting from this morning's "Advertiser" (Monday) might be interesting to your numerous readers, I have sent it on to you.—W. KING.

"A Parrot which came into the possession of Mr. John Leyh, of 10, Moorgate Street, E.C., 15 years ago, and which has been kept by him ever since, has lately started laying eggs. The bird was fully grown when Mr. Leyh obtained it but he did not learn its actual age at the time. On November 20th, 1905, the first egg was laid. It was found lying in the cage one morning. The following day there was a second egg, but no more appeared until this month. On February 5th, 1907, an egg was found, and another on February 8th."

[This is quite a common occurrence. Mr. J. F. Hills had a Parrot, we believe, which laid its first egg when about a century old.—ED. "C.B."]

PROPOSED TESTIMONAL TO MR. LE CLAIR, Hon. Sec. S.N.P. Club.

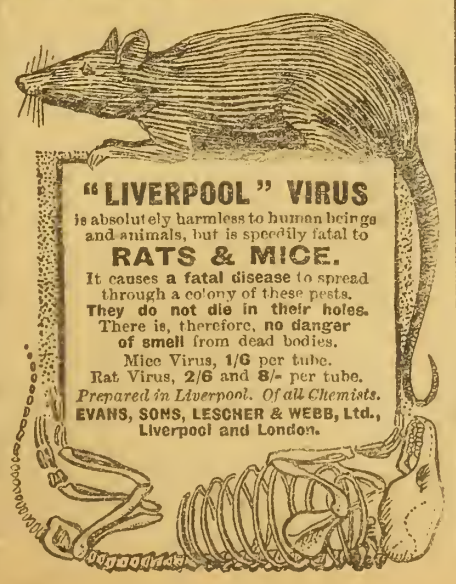
SIR,—As our hon. treasurer, Mr. Matthes, has taken the matter up, and sent an appeal to all members, I should feel obliged if they would kindly forward donations to him. I have sent what I had in hand, viz., 1 guinea. —W. R. MILES.

EARLY MULES.

SIR,—Having read in last week's issue, Mr. Goulding's letter re "Early Goldfinch Mules," I thought it might interest your readers to know that a young fancier here, Mr. William Wright, paired a fresh-caught Linnet to a young Norwich hen which was ready to nest. She laid four eggs. Result: Three fertile, one clear; two died in shell, and one hatched out February 6th, which, at the time of writing, is four days old, and doing well. Is there any other case of so early Linnet Mules as this?—FINDLAY MCGILLIVRAY (Bo'ness).

FORRES SHOW.

SIR,—The epistle appearing under the above heading last week, is neither helpful to the Society nor the Fancy at large. Mr. MacAlpine and myself had at least the courage to sign our names, which seemingly "Caberfeidh" had not. I have no wish to enter into a controversy with the same.—DAVID ROSS.



"LIVERPOOL" VIRUS
is absolutely harmless to human beings and animals, but is speedily fatal to
RATS & MICE.
It causes a fatal disease to spread through a colony of these pests.
They do not die in their holes.
There is, therefore, no danger of smell from dead bodies.

IS IT A WILD CHAFFINCH HYBRID?

SIR,—While out in the country last Thursday (Feb. 7th), I caught a Chaffinch, or what I am inclined to think is a Chaffinch Hybrid of some kind, as it is of a peculiar colour, and of different habits, etc., to that of the true Chaffineh, but I cannot yet come to a definite conclusion about it. I have been in hopes of hearing it utter its call note, thinking, if it did, I might learn something, but as yet I have not heard it utter a note of any kind. It appears to like its new home, as it is as tame as if hand-reared. I cannot say this of any other Chaffinch I have caught, and I have had a great many in my time. I have no doubt but that this bird is a male, because of the richness of colour he possesses. He is a deep red body colour right down to the extreme end of under-tail coverts, and, instead of it having a slatey blue cap, as true Chaffies have, it has a rich mahogany-coloured cap. Have any of your correspondents had one similar to this? I congratulate you on the excellent Birthday Number you gave us.—A. WAKEFIELD.

BIRMINGHAM BOOMING.

SIR,—Please find report of our general meeting. Our balance shows an increase of £2 12s. 6d. on last year. You will see we have been ablo to arrange a very attractive list of fixtures for the next few months' meetings, and shall be pleased to welcome fanciers and their friends, as we consider it the best possible manner of making the Fancy popular. —H. C. WILKINS.

[There is no doubt that attractive society programmes, such as have been arranged by the City of Birmingham C.B.S., helps to keep the Fancy from stagnating.—ED. "C. B."]

PRINCIPLES OF HEREDITY APPLIED TO BIRDS.

SIR,—During the past few weeks I have been reading your CAGE BIRDS with much interest, especially the information in connection with Hybrid birds. I am not a keeper of cage birds, but am much interested in them because, as a student of heredity for some few years, I have to include them in my studies in order to thoroughly study the principles of heredity. From my studies, so far, I have come to the conclusion that the skeleton frame and white, nervous system comes from the female side, and that the intelligence, that is, the grey matter of the brain and nerve cells, and also the skin, comes from the male side. I write to ask you if you could give me any assistance in my studies, no matter how small it may be, in regard to any particular points other than the above, which are particularly inherited from the male or female parent in Hybrid birds. Supposing that a hard-billed cock bird was mated up with some soft-billed hen bird, if such is possible, would not the Hybrid bird have a hard bill, that is, bills like the male parent? Then do not the claws of the feet of the bird always follow that of the male line? An answer to these small questions, and any other particulars you like to give me, would be very much welcomed by me.—HEREDITY (Cardiff).

[The mating of a hard-billed bird with a soft-billed one has, so far as we know, never yet been accomplished, and is not thought possible by most aviculturists. Neither, we believe, have young been bred from two species, differing materially in the structure of their feet.—Ed. "C. B."]

DOG BISCUIT FOR CANARIES.

SIR,—I have a large aviary out of doors, in which I keep my Canaries. In one division I have one cock Blackbird and two Thrushes. I feed the Thrushes and Blackbird on meat, dog biscuits, broken up and soaked all night. I took in their fresh food the other morning. They had part of a saucer left from the day before. I put it down on the table where the Canaries are, and forgot it. Now, what I want you to notice is, that when I went in afterwards the Canaries had cleared it all up. Why should we not give them a change in their food sometimes? I cannot see what there is in meat dog biscuits to do them any harm. I am an old fancier, and hold in giving my birds a change in their food sometimes. I generally take the tablecloth into the aviary and shake the crumbs. They are all down directly, and clear them all up. I keep them out of doors all the winter, and I would not wish to see a more healthy lot of birds. They have been in full song through all this cold weather.—HY. PETTIT.

A STRANGE EPIDEMIC.

SIR,—I have a trouble with six of my birds, and I see W. F. H. and R. E. G. ascribe it to highly-scented soap, but three of my birds have never seen soap of any sort. I myself put it down to giving them chemical food of too strong a character. They could clean the lower mandible on the perch, but had no chance of cleaning the upper. I have shown them to friends, and they think it strange I should not have written before, but only being a novice at both letter-writing and bird-breeding, I thought I would leave it to some more able pen than mine.—A. ORBELL.

STILL THEY COME!

SOCIETY FOR CHOPPINGTON.

SIR,—A meeting was held on Feb. 2nd, at the Railway Hotel, Choppington Station, when a Society was formed for Choppington and district, upwards of 30 members joining. The following were elected as officials: President, Mr. G. R. Turner; vice-presidents, Mr. Huntly, Dr. R. A. Morris, E. Reed; chairman, H. Seely; treasurer, E. B. Atkinson; secretary, J. Dixon, station master, Choppington Station.—H. SEELY, chairman.

CAGE BIRD SOCIETY FOR PAIGNTON.

A meeting of fanciers was held at Paignton on February 5th, under the presidency of Mr. H. Whitley, of Primley House, for the purpose of forming a cage bird society.—The chairman explained this was by no means in opposition to the Fanciers' Association, which had no opportunity of open shows for cage birds, but to supplement it. Plymouth had a successful cage bird society, and he saw no reason why one should not be a success at Paignton. It was unanimously decided to establish such a society, to be called the "Torbay Ornithological Society." Mr. Whitley was elected president, Mr. W. J. Ham vice-president, Mr. J. B. Eastley, hon. solicitor, Mr. Puddicombe hon. auctioneer, Mr. W. Drew auditor, Mr. J. L. Sharp hon. treasurer, Mr. C. Parnell secretary, Mr. T. H. Veale chairman, Mr. J. Webber vice-chairman, and the following committee of twelve: Messrs. Daw, Bastard, Fletcher, Jeffery, Mugford, Nicks, Heathman, J. Parnell, Evans, Hodge, Badcock, and Captain Innes. Members' subscriptions were fixed at 4s. yearly, junior members, under 18, 2s.; subscribers of 10s. 6d. and upwards to be patrons. The area of membership was the county of Devon, and the shows to be open to the kingdom. It was decided to hold a first feather show for members and an open show, the dates to be fixed by the committee.

A NEW SOCIETY FOR CRESSWELL.

A largely-attended meeting was held at Cresswell, at the Rose and Crown, Feb. 9th, to formulate a schedule for a show to be held on Feb. 23rd, to be open to men who wished to form a new society for Cresswell and district. About 30 fanciers promised their support, and a number of specials were promised by local tradesmen. Mr. W. Roslyn (Mansfield) attended the meeting at the invitation of the Cresswell fanciers, and gave an address on the management of such societies. The address was enthusiastically received, and a hearty vote of thanks was accorded him, and, in replying, Mr. Roslyn promised that when the society was well on its leap he would give them his popular lecture on the "Anatomy and Physiology of Birds." Mr. F. Pearson has been elected chairman, and presided in an able manner, with Mr. Clarence Pressley as secretary. It is expected that the new Society will become affiliated to the C.B.U. as soon as it is formed and the election of officers has taken place.

NEW NORWICH SOCIETY FOR GLASGOW AND THE WESTERN COUNTIES.

SIR,—A largely-attended meeting of unattached fanciers was held in the Good Templars' Hall, Glasgow, on Feb. 9th, for the purpose of forming a new Norwich Society. That veteran fancier and judge, Mr. Peter Pettigrew, was called to the chair, and after having explained that there was plenty of scope for another Norwich Society in Glasgow, Mr. Dick Gadsden (Hamilton) moved that we form such a Society. Mr. John Roulstone (Glasgow) seconded. The title for the new Society was next considered, and after various motions, and a discussion of an animated nature, it was agreed by a narrow majority that it be known as 'The Glasgow and Western Counties Norwich Canary, Mule British and Foreign Bird Club." The following were appointed to office:—President, Mr Peter Pettigrew; vice-presidents, Messrs. Alex. McFarlane (Glasgow), Alex. Brownlie (Larkhall), John Young (Glasgow); treasurer, Mr. Andrew Malcolmson; secretary, Mr. J. H. Adam; committee, Messrs. D. McKenzie (Glasgow), D. Johnstone (Hamilton), J. Roulstone (Glasgow), G. McAlpine (Quarter), John Erskine (Glasgow), J. Rodie (Motherwell), J. Herbert (Glasgow). It was decided that the annual subscription be 3s. 6d., while the meetings of the club will be held on the last Saturday of each month, at 122, Ingram Street, at 7 p.m. Shows were also arranged for the months of February, March, April, and May. The classification for show to be held on Saturday, 23rd inst., is: (1) Nor. Plainhead or Crest pairs; (2) Bor. Fancy pairs; (3) A.O.V. Canary pairs; (4) Muling pairs; (5) Hyb. pairs. Any fanciers of Norwich, Crests, Borders, Yorkshire, Lancashire, Cinnamon, and Lizard Canaries, Mules, British, and Foreign Cage Birds desirous of becoming members can have full particulars from J. H. ADAM, 15, Alexander Street, Sandyford Street, Glasgow.

Green Canaries for Exhibition Purposes.

By Mr. J. W. METCALFE, Liverpool.

The Manchester and N.C.O.S. have an Entertaining Evening Discussing Greens.

Over 40 members and friends of the Manchester and Northern C.O.S. turned up at the last meeting, to hear Mr. Metcalfe discourse on the topic of "Greens for Exhibition Purposes."

This is a new subject for the Manchester Society, very few of its members having studied the breeding of Greens; but it speaks well for the coming popularity of the variety, when such a large number came to hear the paper—many coming long distances from outlying towns—and I think it would pay the Committees of our specialist clubs, at any rate the less popular, or rather those varieties not universally popular, if they would send out lecturers on their particular branch of the Canary culture. For instance, Crests have got into a very poor way in Manchester, though one time it held some of the best, and, of course, there is no demand for lectures; but if specialist clubs would force their varieties a little more into localities where they are not popular, interest would be revived, and it might be the means of gaining new breeders, and make all varieties as universally bred as are the Yorkshire and Norwich.

The Yorkshire Green is, in my opinion, the handsomest of the Canary family—the ideal colour, markings, nerve, and general smartness, making it particularly pleasing to the eye, and from its hardiness should be a favourite with breeders.

The Norwich Green is not so pleasing a specimen, not so much on account of its not having attained such perfection in type and colour as the Yorkshire, but because it looks too heavy and cumbersome, the stout build of the Norwich hardly lending itself to the dark colour of the bird.

Mr. Metcalfe, in opening his lecture, said it was the first time he had met the Manchester members as one of them, and was proud to belong to such a body of fanciers, although he became a member by winning a special prize. He thought the offering of these free memberships was a very good way of making new members. It cost the Society very little, while it gained members in new varieties, who would probably continue to be members.

Mr. Metcalfe spoke of the rapid progress made, especially with the Norwich Greens, and said that, though years ago Greens were judged for colour only, it was still the first consideration, and meant a lot in the bird's chances of winning. Still, at the present time, both the Yorkshire and Norwich Greens were as good in type as the Clears. Greens should be the same shade all over the body. The greatest depth of colour was in the cheeks, butts of wings, and rump, but they must try to get the same colour throughout.

The Buffs carried more colour than the Yellows, having more depth of colour, and it was advocated to breed for colour from buff birds.

The faults to be avoided were smokiness, or blurring down the back, and showing light underneath, and also bronziness. Bronzed birds should not be used for breeding

The pencillings should be distinct, and go down the backs to the thighs, the faults in pencilling being broken markings, and dull.

All birds well pencilled down the thighs denoted good colour, the pencilling really going with colour, and he maintained that the colour came from the cock birds.

Mr. Metcalfe had something to say in excuse of the square feathers, but to me his arguments were not convincing. Some years ago several Greens at Manchester were disqualified for alleged trimming of feathers, and though the same arguments were put forward, and the committee gave the exhibitor the benefit of the doubt, I don't think they were convinced that these square feathers were a natural growth. Several of the feathers were examined under a microscope, and they did not appear to be natural, or to have been frayed by rubbing.

Mr. Metcalfe, after giving the standard, and describing the shape of Greens, gave a very practical outline of the selection of stock for breeding purposes, four pairs being considered sufficient to commence with.

No. 1 Pair—Self Yellow cock and Self Buff hen, as big and dark as possible, showing plenty of leg, and dark in leg, the hen to have quality and type, scrificing size and have quality and type, sacrificing size and

No. 2 Pair.—Self Buff cock and Self Yellow hen, as near to No. 1 pair in type, if possible counteracting any faults in the first pair.

No. 3 Pair.—Both foul birds. Cock foul in wings and tail only, and a shade light in colour. Hen foul in wings, tail and body, but avoiding fouling round the vent.

No. 4 Pair.—Heavily-marked Yellow cock and heavy-marked Buff hen. As this pair is to make the strain, get them as near perfection as possible, getting as typical birds as possible, if an evenly marked strain all the better, but selecting the birds that were the heaviest marked.

Graft these into your birds, type and colour being obtained from No. 1 and 2 pair, pure Yorkshire type from No. 4.

Keep as many Selfs as possible of the desired colour, pairing Self to Self from the progeny of No. 1 and 2 pairs, and then introducing the young from No. 3 and 4 pairs, using from the last pair birds as free from cinnamon blood as possible, and avoiding light or pink legs.

The same remarks applied for making a strain of Norwich, except, of course, the alteration in type.

After giving an explanation of moulting and preparing, and washing for exhibition, Mr. Metcalfe concluded his paper, and the Chairman declared the meeting open for discussion.

DISCUSSION.

Mr. Blackshaw said Mr. Metcalfe, in speaking of No. 1 and 2 pairs, had said, if there are any faults, remedy them in No. 2 pair. He asked what were the faults to avoid.

Mr. Metcalfe replied, he had had fully explained in his paper the faults, and advised getting good colour in the cocks, and type in the hens.

Mr. Blackshaw: Do you prefer a Yellow cock for No. 4 pair, as this is the pair that is to improve the strain?

Mr. Metcalfe said that, personally, he preferred a Yellow cock, though the opinion was that the best colour seemed to be got from Buff cocks.

Mr. Jones: What length is the smallest hen you would use?

Mr. Metcalfe: Get as long a hen as possible. Short birds were easily bred from long birds. He could hardly define exactly the shortest hen he would use.

Mr. Hill: Was it absolutely certain to get dark-legged birds when breeding for Greens?

Mr. Metcalfe: Yes, as birds are bred darker in feather they will naturally get darker in legs and beak.

Mr. Raynes said Mr. Metcalfe had mentioned that the clear Norwich showed crest properties.

Mr. Metcalfe said no, the Crest properties were chiefly in the Norwich Greens; but they were improving them in type each year by breeding from heavily-marked Norwich.

Mr. Raynes said he didn't like the type of the Norwich Green bird of the present day, being much too small in breast. When that was improved, he would go in for that variety, but at present they were very far removed from the proper Norwich type. He also said Mr. Metcalfe didn't like the Cinnamon introduced into the Greens. How was it so many cinnamon-marked and pink-eyed Clears were in the Liverpool breeding rooms? If it was not put into these Greens, where did it come from. He had noticed pink-eyed birds being shown by Liverpool Green exhibitors. He thought a little Cinnamon blood was good; but why did the Green breeders put it in if they lost colour by it?

He also thought that the foul-marked Greens were rather encroaching on the variegated Norwich, in which classes many ought to be shown.

Mr. Metcalfe said he only knew of one man in Liverpool who had these Cinnamons in his room, and this was what he called a "Green sport."

The pink-eyed birds shown by Liverpool men were not bred in Liverpool, but came from the Norwich breeders round Blackburn. Ninety per cent. of these Cinnamon sports appeared in the Yorkshire Greens, very few appearing in the Norwich. He had introduced Cinnamon blood on the hen side.

The young were a wonderful colour the first year, and he thought he had attained his object, but it all disappeared with the first moult, and in the second year the birds had no colour at all. Liverpool breeders would tell you that Cinnamon blood ruined the Greens for colour, but it was all right for improving the feather.

As regards encroaching with Foul birds, so long as the classes did not say green to predominate, they were all right, showing, as they did, many of the heavily-marked Norwich would beat foul Greens if classed together.

Speaking of Crests, Mr. Metcalfe retaliated by asking Mr. Raynes where the heavy brows in the clear Norwich came from. Mr. Raynes replied, by pairing birds together with big heads.

Mr. Metcalfe admitted that there were many Crest-bred birds still in the Greens, and admitted they had no heads, but were improving this fault, and were doing so with the clear Norwich bird's help, buying heavily-marked birds from Norwich breeders, and these men did not realise what they had been parting with.

Mr. Hadwin: Referring to Cinnamon blood, it can be introduced for a good purpose, but not for improving colour, except in a particular way. The best colour is got on a soft-feathered bird, and as the Cinnamon blood softens the feather, by that means the colour was improved; but it must be introduced on the hen side, the hen having no influence on the colour of the young, but on the feather only.

He didn't quite agree with Mr. Metcalfe that the birds bred thus, deteriorated in colour after their moult.

He didn't object to Crestbreds, if pure-bred Crestbreds. The green Crestbred had better colour and greater depth of colour than any of the Norwich Greens, and he attributed this to the breeding of Buff to Buff so much.

His ideal pair would be a Crestbred cock and a Cinnamon hen, but the young cocks from this cross must be thrown out altogether and not used, or the faults of Greens would appear.

In his opinion the colour of the Greens can be improved by softening the feather, by introducing Cinnamon blood for this, but for no other purpose.

The legs should correspond in colour with the colour of the birds in all varieties.

Mr Pease said years ago the Lizard breeders in Oldham and district were exercised in their minds by the appearance of light legs and beaks, and, after considerable thought, they came to the conclusion that it was due to using canary seed, and started to feed on dark seeds—hemp and rape. He didn't know whether that was the reason, but anyhow the light legs and beaks had disappeared, a statement which raised a smile all round.

Mr. Bladon said Cinnamon blood would improve both the colour and the quality of feather, but it must only be by the hen.

Mr. Hadwin said, in reply to a query, that for every 25 per cent. of Cinnamon blood introduced into Yorkshire Greens, 75 per cent. had been put into the Norwich Greens, and that type had suffered, as the crossing of Lancashires on to the Cinnamons had spoiled the Norwich properties.

Mr. Jones said the lecturer had stated they had resorted to Clear birds to improve the Greens in type. What advantage could the clear Yorkshire breeders get from the Greens?

Mr. Metcalfe replied: To get colour from.

Mr. Pease, in moving a vote of thanks to Mr. Metcalfe for his paper, and Mr. Hadwin for his remarks, said it was a great pleasure to hear from these great breeders remarks on the subject of Greens, and it contrasted with the old days when a fancier had to pay very dearly for his scraps of knowledge.

Mr. Raynes seconded the vote of thanks, which was carried with acclamation.

Mr. Metcalfe responded that it was a pleasure for him to give his own experiences, and what he had picked up from other breeders, and that he hoped it would all be for the benefit of the variety.

(The above report is by Mr. G. W. F. Lythgoe.)

NOW READY!

AN ENTIRELY NEW SERIES OF

COLOURED POSTCARDS OF HYBRIDS.

On this Series the following are . . . . beautifully portrayed by Mr. H. Norman :—

(1) Jonque Four-pointed Goldfinch-Canary.
(2) Goldfinch-Bullfinch.
(3) Goldfinch-Redpoll.
(4) Greenfinch-Bullfinch.
(5) Linnet-Bullfinch.

PROTECTION OF WILD BIRDS.

Mr. Walter Collinge's forcible remarks on the great harm done by the various Acts for the protection of wild birds, in his presidential address to the Midland Counties Gardeners' Association, have, according to the "Worcester Advertiser," been hailed with satisfaction by the agriculturist. They will not be read with feelings of unmixed approval by readers of Cage Birds. Mr. Collinge, who, it will be remembered, is professor of the Zoology Department of Birmingham University, pointed out to a Press representative on Tuesday that the first of the six Wild Bird Protection Acts, which was passed in 1880, showed signs of very hurried preparation, certain birds which were the most useful and the most deserving of protection having been entirely omitted. This Act has remained the foundation of all subsequent legislation. "Now," continued Mr. Collinge, "consider what the effect of this legislation has been. Various kinds of insect-feeding birds, such as the Rook, Starling, and Blackbird, have increased to such an extent that they have become fruit-eating birds as well, and cause an immense amount of damage, and they have helped to destroy other birds that are of real use. These birds, I consider, should be thinned out, but there are three—the Sparrow, the Wood Pigeon, and the Dove—which should be all but exterminated. Almost any sort of measure should be taken against them—poison, traps, what you will. I know sentimentalists will cry out against me, but other things must be considered besides sentiment. The agriculturist is surely sufficiently handicapped already. He has to contend with insects and fungi as well as the bird pests. Take, for instance, the case of a man on a small holding, with some rows of peas, strawberry beds, and a few fruit trees. It is no uncommon thing for him to leave his peas in the evening loaded with full pods and to find them practically stripped by the Rooks in the morning. Thousands of pounds worth of damage are done in the fruit districts by bird pests. On the other hand, there are certain birds, such as the Kestrel, the Owl, and all birds which are entirely insect-feeders, to whom I would afford every protection possible. Of course, if that were done it might be found that they increased too rapidly; then a change in the law would have to be made. There are 12 or 15, however, which must be thinned down, and there are the three I have mentioned which should be exterminated.

PARROT FOOD

Mr. F. H. JUDGE writes:

4, Fryent Cottages, Kingsbury, London, N.W., July, 1906.

I thought you would feel interested to hear of the success I have achieved by using your excellent Parrot Food. I exhibited for the first time at Great Missenden, on July 12th, my green Amazon parrot, in an amalgamated class of English and Foreign birds, and was successful in carrying off first prize. Her excellent plumage was much commented upon, and I attribute this to having always fed her on your food, which sustains her through her moults and keeps her in good health.

SOLD IN PACKETS AND TINS.

Booklet on "Parrot Keeping and Feeding," post free for three penny stamps.

The Popular Plainhead: My Experiences of the Norwich Canary.

By W. VARDY.

(Continued from page 10 of the Birthday Supplement.)

THE ROOM AND THE CAGES *(Contd.)*

In my last instalment I spoke of my young Canaries keeping very wild when thrown into the very large flight I at one time had in my room. This happened more especially when they were left therein to moult, as readers will, no doubt, have gathered, for it was when I went to cage them up, to get them used to their show-cages that I had trouble, through their knocking their plumage about. I don't say anything about throwing young birds into a flight for a little while before they break into moult, as that may help them to gain vigour through the exercise they get. But they should be fetched out again in good time, for you must have your birds under control. It is no use having to try and steady them after they have moulted and are in good form, as in nine cases out of ten they knock themselves out of form again. In short, I don't favour the use of a large flight for young birds which are wanted for the show-bench. I find the large flight-cages mentioned previously answer all my requirements; and the youngsters come to no harm, and can get plenty of exercise, even in a double-breeder with the centre slide pulled out.

There is one thing a large flight may be said to be useful for, and that is, to winter one's stock birds in, and especially the hens. A good romp round during the autumn and winter will do those good, and they are easier to manage when so put up, leaving one with more time to devote to the birds wanted for the shows. If you have a big team to moult and colour-feed for the show-bench, I am sure you can do with all the time you can save yourself. In the 5 ft. flight-cages, however, there is plenty of room for stock birds to exercise in, and one filling of the hopper and water vessels answers for a decent number of birds, and none of them get "out of hand" through being therein.

Coming to the fittings of the cages, I may first say that I have them all enamelled light-blue inside and black outside. This, of course, is more expensive at the outset than having them white-washed, or done over with the sanitary water-paint so many fanciers now use, but I feel sure that it effects a saving in the long run. The cages always look very nice, and, after the various washings and cleansings they go through at different periods, they come out looking "as good as new," as the saying goes. The cleaning is a much easier matter, too, when one has cages to deal with which have been well enamelled.

I never use false-bottoms, or sand-trays, as they are called, much preferring a small turn-rail (cut out directly underneath the door), through which I rake the dirt, seed-husks, etc., which from time to time accumulate. I could never see any real necessity for the false bottoms; on the other hand, they make the cages heavier and form a refuge for red mites. Further, they often stick when in use, and cause you to have to give the cages a shaking before you can get them to pull out, which is bad when hens are on the nest; also, some dirt is sure to slip over the sides on to the cage-bottom, and this you have to rake out in any case if you want to have quite clean cages. So why not rake it all out? It can be done without making any noise.

I have four perches in each breeding-cage, two in each compartment, lodging on the cross-bar at a suitable distance apart. All my birds feed from the floor of the cage. For this purpose the front lath (which carries the feeding vessels) does not want to come up too high from the cage-bottom, from two to two-and-a-half inches being suitable. Perches which run lengthwise (along the front) I will never have, for they are a nuisance to fix and to remove for cleaning, and always get very foul and dirty from the excreta which falls on them from the upper perches. The style of perch I like is an oval one (or oval at top), varying from half-inch to five-eights broad. It does not do to give young birds perches which are too wide for their feet to grasp, for this will result only in a crop of "slipped" back-claws. Many fanciers make a mistake in this direction.

The drinking-vessels I use are glass, fitted on the cage-front with a wire hanger—I believe they are known as the "top-hat" pattern, and have a flat side, which goes against the cage. They may be bought at most bird-shops. My seed-hoppers are of wood, with a glass back, which slides out at will—the well-known pattern, the wood sides of which look like the letter V turned upside down. They can be got to hold a nice quantity of seed, and you can always see at a glance when the stock needs replenishing. These seed-hoppers can be bought of a length which enables you to use them in the centre of a cage, when, if the latter has the dividing-slide in, it does to supply both compartments yet only takes one filling.

As regards the egg-drawers, I don't know that there is much to choose between the various patterns. Some fanciers use the sort that allow the cage-doors to drop into a groove at the back, and find them all right I have no doubt. And so, I suppose, with the other patterns. In this district, however, most of the breeders use a particular form of egg-pan which is made in the neighbourhood. It is simply a small, round, plain, white pot, about three-quarters of an inch deep, and about as much round as a half-crown-piece. This is stood on the bottom of the cage, just inside the door, and at back of the turn-rail. Thus if any of the egg-bread gets knocked out of the pan—and this generally happens—it is an easy matter to just open the turn-rail, and fetch out every crumb with the rake, when there can be no danger of the birds' picking up sour or stale particles.

WINTER FEEDING.

Before I give you my idea as to mating stock to produce the best results in exhibition Norwich Plainheads, perhaps a few words on feeding the birds during the winter months may not be out of place. Now a good many fanciers make a mistake at the end of the moult. Whatever birds they have fit for exhibition they proceed to force with stimulating food into very high condition. Now, although show birds must be in good condition—very good condition—they should never be fed, if it can be avoided, into very high condition. The fancier should endeavour to stop just short of the latter. If he keeps packing his showbirds with rich egg-food, and inga and hemp, and other stimulating seeds, he will find that when the latter part of the autumn and the early part of the winter are very mild (which often happens), his birds will come into rank breeding condition. This is bad; for then the keen snaps of frost we generally get during January and early February simply cut these birds up, and they go right out of condition, often finishing up in a soft moult, which, of course, as likely as not, spoils them for the breeding season. Further, birds in rank condition never look their best on the show-bench. They are restless and bouncing about, and pull themselves up tight, so that they look all out of shape. You will often hear fanciers, at the late shows, saying that a certain winning bird has "gone off" through being too forward in condition. Some breeders, when they have had a good hen get into this rank state, have paired her up, preferring to chance the very early date, rather than chance her "falling to pieces." So the young fancier should be careful not to overdo the rich food in the belief that it is necessary to keep his birds up to show form. A little high feeding is good just after the moult; but it doesn't want keeping up afterwards, except as a treat to the birds now and again.

My own show-birds during the winter (by which I mean after the moult and onwards) get good, sound Spanish canary seed only, the best I can buy, as a staple food. Twice a week I give a tenspoonful of colour-food, made with egg, old, home-made bread, and pepper, and once a week about a teaspoonful of linseed. The colour food keeps up the high colour of the plumage, and is a safeguard should a bird drop a feather or two, or get them knocked out going to and from a show, as is unavoidable almost at times, for then there is always some colouring matter in their blood, and any new feathers are not so likely to come patchy in colour. The linseed keeps up the gloss (or bloom) on the plumage. In addition, I let the birds have plenty of baths, which are splendid for hardening the feather and producing condition. I also keep my exhibition birds covered over—that is, with a light linen cover at front of their cages—for this keeps them clean, and helps one to do without much hand-washing. Nothing spoils a bird quicker than frequent tubbing with soap and water.

Coming to my stock birds, these I also feed during the winter months on the finest Spanish canary seed, never having anything else in the seed-hoppers on the fronts of my cages. Inside the cages I put, twice a week, a small bit of hemp and linseed; three times a week in severe weather. I feed in this way until February, when I separate the cock birds from the hens (the reason will be explained later), and give them (the cocks) a bit of egg-food twice a week. The hens I also give a bit of egg-food to twice a week, and I increase their supply of hemp. When I say a bit, or a small bit, I mean not more than half-a-teaspoonful to each bird. This is plenty, as they come on soon enough without a lot of stimulating food, and especially egg-food, which on no account should be over-done. The new-laid eggs I boil ten or twelve minutes, then either beat them up with a fork, or put them through an egg-grater, and mix them with an equal bulk of the crumb of old, home-made bread.

I mate my birds the last week in March, or the first week in April, according to the weather. This will sound late to some, especially those who have the idea that about Valentine's Day (Feb. 14th) is the proper time to pair up. Right down in the South it may be possible to pair up earlier than the date I have mentioned, and experience no ill-results. But long experience has taught me that the end of March is quite early enough for the Midlands. Those who try to start their birds off before are almost sure to have brought home to them the truth of the saying, "More haste less speed." Young fanciers should not be mis-led by those who write to the Press about the wonderfully early nests, eggs and young birds they have got.

A little earlier on I spoke of separating the cock-birds from the hens about the beginning of February. Now this I consider very necessary to successful mating. If the two sexes are put in different rooms, so much the better. If this cannot be managed, then the hens should be put as far away from the cocks as possible, and a screen should be placed between the two stacks of cages, so they cannot possibly see each other. The reason for this is that birds will mate at sight—a hen will mate with a cock she sees in the cages over the other side of the room, and when this happens the breeder is in for a lot of trouble. Sometimes the birds will mate simply through hearing one another "call." When two birds take a fancy to each other by such means as these they will not accept the attentions of the mate the breeder himself chooses for them, and the position becomes awkward. Therefore, the young fancier who wants to properly mate his stock should always separate the cocks from the hens on the lines above advised, until he himself thinks it time to begin breeding operations. If he can put them in different rooms, he will be well advised to do so.

(To be continued.)

CANARY NOTES IN BRIEF.

By Claude St. John.

PREPARING FOR THE SEASON.

Many a look-ahead fancier will be getting his breeding-cage ready for the coming season now. This may mean much or little, according to the general condition of the cages. But one general method should be followed in this annual overhaul. All fronts should be removed, and, except where the insides are done with hard enamel, the inside scraped as clean as possible. Then a good washing out with strong, hot soda and water, using a small, bristly brush that can be worked well into the corners. Whitewash or distemper the insides of those that are not enamelled, but do not use freshly-slaked quicklime to make the preparation.

DISADVANTAGES OF LIMEWASH.

Avoid the use of fresh lime. That is the main object of these notes. It is sometimes recommended as a fine disinfectant and insecticide. It is so, undoubtedly. Nevertheless, I have so often come across cases of blindness, or eye complaints, following its use that I consider it best to forego its other good qualities. Whenever it is used it should be thoroughly slaked and exposed to the air until its heat has disappeared. A simple compound of whiting mixed with hot water, to which is added a little boiled paste made with common flour and a small quantity of size, and applied with a distemper brush whilst warm, makes an excellent whitewash that will not easily rub off the boards and that is perfectly harmless to the birds if they should pick it off and eat it.

THE CAGE FRONTS.

Don't forget, when putting on the cage-fronts after cleaning, to carefully examine the wires and fasteners, loops for drinking vessels, etc., and make good all little defects that may have arisen. In short, make everything as sound and secure as possible whilst the cage is unoccupied.

THE BIRD'S VOCAL ORGAN.

It is so generally believed amongst teachers of bird anatomy (to use a term as merely a convenient one), that a bird's tongue plays no part whatever in the production of sound, that a German professor's statement respecting the song of the Roller must come as a surprise. In singing the notes represented by the consonants, n, t and d, this authority tells us the bird's tongue must touch the palate just as is the case with man. Perhaps a new theory will arise to embrace the essentials of both doctrines. One thing is certain, however, that the vocal organs of the Roller are developed to a higher degree than almost any other class of bird.

LATE MOULTS.

A late and protracted moult is, as most fanciers know to their cost, a most fertile cause of birds being out of condition when wanted to pair, and of the first round of eggs being infertile. To remedy this, just try the effect of a mealworm a day for a week or two, and, meantime, keep the bird quite free from draughts. The effect will be simply wonderful. Few fanciers seem to realise the value of mealworms for hard-billed birds in picking them up when out of condition, and helping them over a protracted or cross moult. But Canaries have been so long kept without such delicacies that when first offered they are almost invariably ignored. But, no matter; just pinch the worm's head, pass a pin through one of the last segments of its body, and press the pin into the end of the bird's perch. The bird may hold aloof from the first for a hour or so, but it is surprising how quickly they acquire a great fondness for them.

CANARIES' MANDIBLES ROTTING OFF.

The curious case recorded of Canaries' upper mandibles rotting off is so seemingly suggestive of a cancerous disease that, coming so soon after the reported occurrence in scientific circles of the disease in birds, would it not be wise to endeavour to get these cases examined by a bacteriologist. Certainly anything of this kind which shows a decided contagious or infectious tendency, is best dealt with stringently at the commencement, with a view to stamp it out at its source. Non-malignant tumours are not uncommon in cage birds, and I have seen them on fresh-caught wild birds, so there is probably no reason why those of a malignant nature should not occur in birds also.

DON'T OVERDO THE EGG FOOD.

Do not be over-generous in disposing of egg-food just yet. A teaspoonful of soaked German rape seed will be more beneficial for the next few weeks in lieu of egg-food. The latter, given once a week, will be often enough in all ordinary cases. It will also provide an efficient substitute for green food when frosts are about.

An admirable Food of the

ILLUSTRATED IDEAS

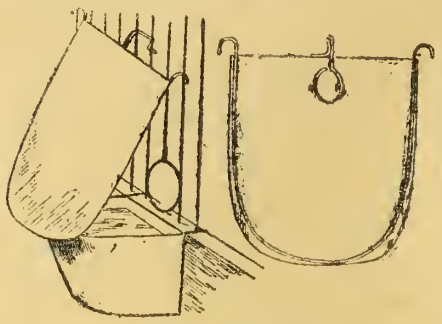
Under this heading we shall illustrate weekly some idea useful to the bird-keeper. Readers are invited to send us particulars of any novel and practical appliance of use in our hobby, either in cage, bird-room or aviary, with a rough sketch of same where possible. Every "Illustrated Idea" used in this column will entitle the sender thereof to a postal order for two shillings and sixpence.

No. 75.

A WATER PROTECTOR.

Sent by J. W. Sturdy, 3, Bond Street, Grove Road, Hunslet, Leeds.

I am sending you an idea I have found very useful in my aviary. It is a water-protector made of a piece of thin tin, cut a little larger than the drinking-glass or tin. Solder a piece of wire on either side and one in the



A Water Protector.

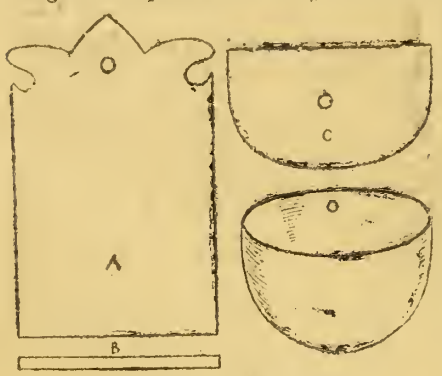
middle; then turn the ends round to fit on the cage-front above the hole for drinking purposes. It will then slide up and down to allow of taking the drinker out to wash. Fanciers will find this idea very useful where cages are kept one on the top of the other, to keep seed and dust from the cages above falling into the water.—J. W. STURDY.

No. 76.

A COCOANUT NEST.

Sent by J. C. Eagleton, 39, Leicester Street, Norwich.

Nothing can come up to cocoanut-shell nests for general utility. The birds take to them more readily than pottery, and if made neatly nothing looks better. First get your nut; choose a big, round one, and this will make you two nests. Tie a string round the centre, and make a pencil-mark along the string. With patience and a saw you will



A Cocoanut Shell Nest.

then be able to cut through the nut in a very short time. Now take a piece of wood (A) 6 ins. by 4 ins. by ⅜ in. thick, shaped to pattern with a fret-saw, and another piece (B) 4 ins. long by ½ in. thick, shaped triangular; glue this to A and bottom bracket (C) to give strength. Fasten the nest to the bracket with a small screw through the side of the nut, and one through the bottom. These nests will last for ever, painted white or varnished. Fix your perches close up to the back to help keep the nest steady.—J. C. EAGLETON.

THE YOUNG NATURALIST.

Prizes of 1s. and two of 6d. each will be given for respectively the best and two second best cuttings or original bits about birds. Competitors must be children under sixteen years of age. All efforts must be briefly and clearly written, and ON ONE SIDE OF THE PAPER ONLY.

Two stars indicate the Winning Contribution; one Star the runners up.

Uncle Peter often wonders how his nephews and nieces spend their prize money, and he always hopes that they put it to some use connected with birds. Perhaps some of you buy a new pet for the prize, or seed for your old favourites, or furniture for the cage or aviary. A very good plan would be to buy a good, reliable book about birds. Uncle Peter is surprised to see how very few letters he gets about foreign birds, and he supposes that because they cannot a good, cheap book to tell how to treat them, many people are afraid to try Foreigners. That is a great pity, because many of them are very beautiful and interesting, and quite easy to manage. So Uncle Peter advises all who read his column to save up their money, and with it buy one of the excellent little books about birds which the Editor of CAGE BIRDS has in preparation.

Nests of Birds, Poultry, etc., should be regularly sprinkled with KEATING'S POWDER, especially when hens are sitting. Don't forget to do this just previous to the eggs hatching, to destroy the Red Mite. It kills all insects, harmless to everything else. Sold in tins, 3d., 6d., and 1s each.

** Weaver-Birds.

The Weaver-birds are among the most remarkable nest builders known. In Africa and other tropical countries they are found building huge nesting places that are frequently mistaken at a little distance for the huts of the natives. Numbers of these sociable Weavers unite their labours and stack up cartloads of grass upon a camel-thorn tree, and in the flat underside of this structure they make cosy nests, well protected by the thick thatch from wind, rain and sun. Other Weavers make their nests like great bottles hanging neck downwards, and this neck is the entrance to the home. They appear to build in this way as a protection from tree-snakes, which could easily reach an ordinary nest resting on the branches, but cannot get in a hanging nest of this shape. Some of these Weavers are also Buffalo-birds.—MARION ILLINGWORTH (aged 12), 242, Great Horton Road, Bradford, Yorks.

* The Longtailed Tit.

One day last spring I found a nest with two dear little eggs in. The nest was like a deep cup with a hood over the top and a hole in one side. When I went down a week after there were seven or eight eggs in the nest. The hen laid about twenty eggs altogether, and hatched them. About a week after we found the nest had been destroyed, and we thought it must have been a Stoat, for a Stoat had destroyed a Bullfinch's and a Robin's nest near by. This bird belongs to the Tit family. The chief food is grubs and insects' eggs that it finds in dead boughs. They also love sunflower seeds; they will sometimes take them from your hands. They are very fierce when caught. Their beaks are very hard, and the Great Tit will draw blood from your hand.—G. CLARK (age 13), Beaulieu Schools.

* The Blue Titmouse.

Last summer a pair of Blue Titmice built their nest in a small hole on the side of our house, and in our bedroom there was a hole through which we could see the nest. After a few days we saw eight small white eggs, with a few red spots on them. We watched them till they were hatched. One morning we did not hear the young Tits chirping as usual, so we went to look; but they were gone. In the garden we found them hopping about; it was a pretty sight to see them. We put them all into a tree, so that the cats could not get them. The next day they were flown, but we still see the old birds about the garden, and we hope to have them again next year.—VICTOR EDWARD RUDKIN (age 11), Eagle Cottages, Witham, Essex.

The Yellow Wagtail.

My uncle has a bird called the Yellow Wagtail. It is very tame. I catch flies for it, and it takes them from my hand. On Sunday morning it got out of its cage into the yard, and never offered to fly away. My father just walked to it, picked it up and put it back into its cage. I think it is a very pretty bird. My uncle is going to show it at the bird show.—From JOS. REECE (age 13), 57, Penwyonar Street, North Ormesby, near Middlesbro'.

CITY OF HULL C.B.S.

The monthly meeting of our society, held on February 4th, at the Oddfellows Hall, Charlotte Street, before a goodly muster of members. Amongst other business, an interesting syllabus for 1907 was drawn up. There were enrolled nine new members for the new year, which brings the membership over 60, and we are sure there are many more fanciers in the district that would benefit by joining the society. Particulars may be had from the Secretaries or any of the Committee, who will be pleased to hear from anyone wishing to join.—F. F. POTTER, Hon. Sec.

BRISTOL C.B.S.

Annual general meeting, Horse and Groom Hotel, Frogmore Street, 6th inst., Mr. W. Bull, Chairman, presiding. Balance-sheet showed a cash balance of £2 4s. 11d. in hand, which I am sure reflects great credit on the Secretary, Mr. C. E. Brown, who has worked hard to promote the interests of this new society. The members present were not slow to recognise same, and express regret at Mr. Brown being unable to carry on the good work he had so ably started.

The following were elected officers for 1907:—President, Major W. Gibbs, M.P.; vice-Presidents, Messrs. R. B. Beaston, F. Capern, J. A. White, F. G. Eastman, W. H. Stenchombe; Hon. Solicitor, W. H. Cook; Hon. Auctioneer, Mr. Parker; Chairman, W. G. Bull; vice-Chairman, C. E. Brown; Treasurer, W. H. Manley; Secretary, J. Munro, Victoria Villa, St. John's Lane, Bedminster; Hon. Assistant Secretary, T. Quarman; Committee, Messrs. Davis, Heaton, Fowler, Tristian, Burgess, Taylor; Auditors, Messrs. Clark and Hoyle.

It was decided to reduce radius open to membership to a distance of 30 miles as defined by railway from Bristol Station (present members excluded). Our membership keeps increasing, our latest recruit being Mr. T. Andrews (Bath), making a total of 62 paid members. Anyone thinking of joining will receive a hearty welcome at our monthly meetings, which are exceedingly interesting, including, as well as the business of the society, lectures on breeding, debates, instructions in washing, staging, etc., table shows, judging and washing competitions. Meetings first Wednesday in every month.—J. MUNRO, Sec.

WILD BIRD LIFE

All communications for this column should be written on one side of the paper only, duly authenticated with the name and address of the writer, not necessarily for publication, and sent to H. Norman, Editor, "Wild Bird Life," "Eastcote," Alma Road, Carshalton, Surrey, by Monday in each week. Original observations and records invited.

February Notes.—The Great Tit.

This last week has seen a decided change in the behaviour of the common House Sparrow. Winter is not yet over, but the days are already longer, and the extra hour or so of daylight is affecting the feathered tribe. The Sparrows were quarrelling upon the roof, and rumbling under the eaves in much the same manner as they do in the month of May. The Thrushes, Tits, and Hedge Sparrows visit the garden in pairs, and may be seen chumming together along the hedgerows. The big Missel Thrushes are no longer in flocks; it is seldom we see more than two or three in company. Grassland is their favourite feeding ground, and some of them are so big and lusty that they look more like Pigeons than Thrushes. All through the period of snow and frost, Skylarks, like other birds, have had a hard task to live, their principal food consisting of green stuff of some kind. Upon one occasion I saw no less than five feeding together round a turnip; they were simply eating the green tops. Another time I stood within a dozen feet of one busily pecking the blades of grass where they were visible above the snow.

Great Tit.

Fortunately the Skylark is a general feeder, and in times of stress is able to eat almost anything there is to be found. In quite rural districts it is no uncommon sight to see them mixing with the Sparrows and Finches in the stock-yard, or rummaging among the chaff and refuse thrown out in front of the barn doors. To-day, as we went over the downs, they were as merry as crickets, toying and playing with each other; in some cases, short, sharp tussles for supremacy took place, the victor chasing his rival off the ground. Here and there, the clear silvery notes of a forward bird were ringing in the air, sounding so sweetly, coming as they did, after such a lengthened period of silence. At present the landscape is dreary and dull, but the melody of the Skylark reminds us of sweet scented clover fields, and daisy-covered meadows. There is generally some particularly bright spot in our past that we wish to keep green. It may be the notes of the Lark, or the flute-like melody of the Blackbird, calls back the incident, and then the song appeals to us, with tenfold force, be it in breezy March, or in dreary mid-winter. From now onwards, through spring and summer, until the fall of the leaf, the Skylark will discourse sweet music to us; he richly deserves to be what he is—the universal favourite of all lovers of wild birds' song.

Some birds have already commenced to improve in plumage. The glossy green on the wild Drake's head has brightened considerably, and the male Dabchick has a ruddier crown; but perhaps of all wild birds, the Tits show most advance in colour. The beautiful little Blue-tits are almost perfect; the hen Great Tit is wonderfully coloured for a lady. While we admire her, the cock bird alights close by; and few of our British birds can compare with him for beauty of plumage. His head is glossy blue-black, extending to the neck, surrounding a pure white patch which shows up conspicuously; his under parts are pure yellow, with a blue-black mark down the centre. It is no doubt these contrasting colours which make the bird so attractive. He is active and sprightly, and as quick in his movements as the smaller Blue Tit.

The habits of this bird are very similar; it visits the gardens for the fat and nuts hung out for them, and will cling in every imaginable attitude. It is then we are able to study the bird at our leisure. There is no prettier sight in bird-land than a party of these Tits, with possibly a few Creepers or Nuthatches, hunting through the woods in winter. One is able to hear them approaching some time before they come in sight, and then they pass by, all to quickly, their pretty ways and cheery notes giving a touch of life and beauty to the dull woodlands.

Notes and Queries.

A Wandering Gull.

A Seagull hatched at Rossitten, in the Baltic, and marked with a silver ring, was recently shot on Lake Leman in Scotland, his age proving that it is possible he had made the journey at least twice in his short life-time.

Robin Legends.

We have many nursery rhymes and legends respecting this universal favourite. The following lines, however, are new to me, as possibly they are to many readers. Let us hope that future generations of Robins will be as kindly disposed to wicked birdy men as the Redbreast in the legend.

"He brings cool dew in his little bill,
And lets it fall on the souls of sin;
You can see the mark on his red breast still
Of fires that scorch as he drops it in."

Wise Birds.

The Owl family is considered to be a wise one; no doubt they have gained this character more by looks than by deeds denoting wisdom. Although not desirous of taking away the good name of the slayers of mice, I think there are other birds quite as deserving of commendation. The Raven, the Crow, the Jackdaw and Magpie are all birds, judging by looks, that should be credited with the power of using their brains. If you happen to have the opportunity of watching either of these, see how he puts his head to one side, apparently in deep thought before proceeding to carry out any unusual action. An instance of this occurred some time ago. A hand-reared Magpie was given a very hard walnut (the first he had ever seen). It was a curio to him, and he eyed it intently, left it on the ground, and flew to his perch. Here he sat quietly for a time, as though thinking out the problem; he then returned to the nut, and deliberately hammered at the centre until it split in two. Did he actually think out the difficulty? And how did he know where to split the nut? Surely the Magpie should be numbered among the wise birds!

An Extraordinary Bullfinch.

The "Scotsman" prints a paragraph respect the friendship existing between a cock Bullfinch and a cock Linnet. Although this is unusual, it is just one of those incidents which we can easily understand, as when in captivity birds and animals make strange friendships. Later on a nest of young Bullies was introduced to the cock Bullfinch. He at once proceeded to feed them, and he reared them until fully fledged. And yet experienced birdkeepers can do nothing with the cock Bullfinch either in mating or rearing.

Rooks nesting.

My house stands nearly in the centre of our town of 42,000 population, it is four storeys high, with a yard of 35 ft. long, and about 13 ft. wide. At the bottom we have an aspen beech tree, 9 ft. round at the trunk. The Rooks have for many years built one, two and three nests in it. The tree is about 10 ft. higher than the top bedroom. Three years ago only one nest was built, although every morning, at daybreak, about eight to a dozen Rooks came and held a committee meeting for about ten minutes, and then off they flew. In the spring following, the heavy winds blew this old nest down, which was about a yard deep and would have filled a good-sized wheelbarrow. They have come again this week to the same old branch. Do you think they will ever build again? They came last spring just the same, right up to the end of March, but did no building. Could I do anything to help them by keeping out of the yard? They are only about 5 yards from the top-room windows, but these we do not use. I might tell you, when we examined the old nest there was a small nest built on one side of it something like a Linnet's or Goldfinch's, lined beautifully with moss and feather.—OBSERVER.

PARROT LOVERS

Should send post-card immediately for our new enlarged book entitled "Parrot Prattle" (registered copyright, infringers and imitators will be proceeded against). This book contains 120 pages of very interesting facts, and gives valuable advice and hints to all parrot buyers. Full details of our original system of selling Parrots on four week's trial, at our risk, which we were the first to introduce. We sell Parrots of all descriptions on four weeks' trial, at our risk, before settlement. Cheapest and best in the Kingdom, and any Parrot sold by us, and not giving full satisfaction, will be exchanged any time within twelve months. Remember we lead and others try to follow. Write to other dealers as well as us, and judge for yourselves. Lists of Parrots for sale and above book post free on receipt of postcard.

ALWAYS USE OUR

DEPOSIT SYSTEM.

We are not responsible for the statements made in advertisements, nor for the *bona-fides* of either buyers or sellers. In all transactions the adoption of our Deposit System should be insisted upon.

IMPORTANT.

SEND THE FULL COMMISSION.—If the full commission does not accompany the deposit, the vendor will not be notified of its receipt until the amount deficient, plus the extra postage incurred, has been paid to us.

HOW TO REMIT.—Under no circumstances will Cheques or Post-dated Money Orders be accepted as deposits. Uncrossed Postal Orders must be sent and the numbers taken for safety.

RULES.

1.—PROCEDURE.—The intending purchaser should send to this office the amount of the purchase (our deposit fee included), and at the same time he should communicate with the seller, stating what it is he requires sent on approval. We acknowledge receipt of the deposit to both parties. In all cases the depositor should give his name and address, and also that of the vendor, and must write same clearly and distinctly.

2.—END OF TRANSACTION.—The deposit is retained by us until we hear from *both* parties that the transaction has been completed. If a sale has been effected, we hand the amount deposited to the seller. If a sale has *not* been effected, we return the amount to the depositor. The transaction must be conducted by the parties themselves. We merely hold the deposit.

3.—AMOUNT OF COMMISSION.—The fee is 6d. for each £1, or fraction of £1, and it must be sent at same time as the deposit.

4.—IMPORTANT POINTS.—The depositor must decide within forty-eight hours of the receipt of the goods whether he will keep or return the same, unless, that is, some other period of approval (of which we must be advised) is agreed upon by both parties. The depositor must at the same time notify us of the fact that he has returned the goods. If the goods are not returned within the said forty-eight hours, we reserve the right to send the deposit to the seller after the expiration of that period. And should the seller fail within three days to notify us of the receipt of his goods back again, the transaction will be treated as ended, and the deposit be returned to the depositor.

5.—A SATISFACTORY PURCHASE.—When a transaction has been completed to the satisfaction of both depositor and seller, both parties must at once return the deposit receipts as a guarantee of its completion. The depositor must at the same time instruct us to pay over the deposit to the seller.

6.—GOODS ALREADY SOLD.—If the goods are sold before our deposit note reaches the seller, or, if for any other reason he declines to do business, he must at once return the deposit note to us. Failing its receipt, we reserve the right to return the deposit to the sender after the expiration of three days.

7.—FRESH TRANSACTION.—In case no sale be effected, a deposit is available for purposes of a fresh transaction, provided another deposit fee be paid.

8.—GOODS IN TRANSIT.—Goods in transit are at the seller's risk, and any damage or loss sustained on the journey must be borne by the seller. But goods not approved of must be properly packed and returned by the same means as were used in sending the same.

9.—PAYMENT OF CARRIAGE.—The payment of carriage must be a matter for arrangement between the vendor and depositor. We do not undertake to settle disputes affecting questions of carriage. But in the absence of other arrangements the purchaser is liable for the carriage of the goods, and if the goods are sent on approval and returned, each party pays the carriage one way.

10.—DISPUTES.—In case of a dispute, the decision of the Editor is final.

PREPAID ADVERTISEMENTS

UNDISPLAYED.—Three Words a Penny up to eighteen words, MINIMUM Fourpence. One Half-penny per Word for each word over eighteen.

IMPORTANT NOTE.—Two or more Advertisements coming from the same advertiser, even if sent in different names, are reckoned together and counted as one Advertisement.

Headlines or Footlines 6d., 9d., 1/-, 1/6, according to size.

Postal Orders must be sent as far as possible. All moneys should be made payable to F. CARL. Advertisements close Tuesdays first post in each week, and should be sent to the Advertisement Manager, CAGE BIRDS, 154, Fleet Street, London. Terms for Display Advertisements on application.

Are your Birds ready? Have you got the correct Nesting Material?

DODGE'S FICTITIOUS COW HAIR

is the only material with which birds will build a natural nest. They build as soon as you give it to them, and being a non-conductor the eggs are kept warm when the hen is off.

Try it and you will see a nest.

2/6 per lb., sufficient for about 20 nests. ½ lb. sample, 1/-.

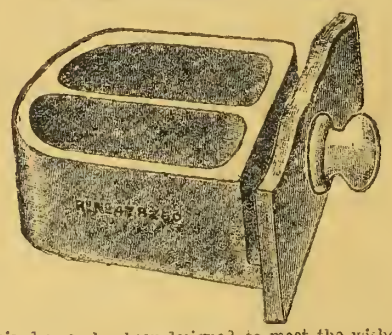
MORTEN DODGE, M.P.S.,
Manufacturing Chemist,
Strangeways, MANCHESTER.

PARR'S POTTERY

NEST PANS, DRINKERS, FOUNTAINS, BATHS (Oval, Round and Square).

"Duplex"

Cut Partition Drawer.



This drawer has been designed to meet the wishes of Breeders so the foods can be separated instead of mixing together. Thus having one drawer instead of two. Made in two sizes.

Mr. C. A. House, Claude St. John and J. North all say it is a good idea.

Wire door falls into the groove and is not in contact with food.

OPINIONS OF VALUE AND SATISFACTION.
"Berkshire Asylum, Wallingford, Feb. 15, 1907. Many thanks for the cage, which I received quite safe. I am well satisfied with it and think it a marvel of cheapness."
"Barras House, Folkestone, Jan. 30, 1907. I received cage quite safely, and must say it is a beautiful cage for so reasonable a price.—B. V. to W. Rudd."
"Richmond, Holywood, Co. Down, Feb. 12, 1907. Received cage. Everyone who has seen it says it is a marvel of cheapness. It is the best equipped cage at the price I have ever seen.—J. Burnside to W. Rudd."
"Ellesmere, Maudeville Road, Enfield Wash, Jan. 30, 1907. Received breeding cage, most prompt in executing your orders. Greatly satisfied with cage.—G. Morton to W. Rudd."
W. RUDD, The Bird Specialist,
NORWICH.

AVIARIES & CAGES FOR BIRDS;
and How to Make Them.
By I. W. HINTON.
JUST COMMENCED a most interesting series of articles which will be eagerly read by all bird lovers. Not only are the various kinds of Aviaries—outdoor and indoor—fully described, but a lot of useful information respecting their inmates is also included.
In Nos. 2,171, 2,174, and 2,183 of the ENGLISH MECHANIC.
Price 2d. each of all Newsagents, or post free from the Office for 7½d.
A specimen copy on receipt of Post Card.
ENGLISH MECHANIC, CLEMENT'S HOUSE, KINGSWAY, W.C.

THE HYGIENE OF BIRD KEEPING.
By W. GEO. CRESWELL, M.D., L.R.C.P., F.Z.S.
Price 1/1, post free from CAGE BIRDS Offices,
154, FLEET STREET, LONDON, E.C.
OPINIONS OF THE PRESS.
LANCET: "This little book will be welcomed by all lovers of birds, whether ornithologists, aviculturists, or the owners of a single pet songster. The author deals with his subject in a thoroughly practical and scientific manner, and the results of his experiments prove the fallacy of some rule-of-thumb theories. . . . The book is well illustrated."
COUNTRY LIFE: " . . . a surprising amount of really valuable advice for all who keep small birds, whether in cages or aviaries. . . . Those who approach the subject with an open mind must admit the cogency of the author's arguments; and these, backed by a very wide experience at first hand, will prove hard nuts to crack for many of the champions of the 'good old methods.' . . . We venture to think that his experience will pave the way for a revolution in the methods of bird keeping in the near future."

MEDICINES.
DIARRHŒA, inflammation cure, used most of the leading exhibitors of the day; advice given free; 7d. per ounce free.—Mather, 65, Albert-rd., Widnes.

PANNASSINA.
A medicinal preparation for Canaries and all kinds of cage birds, prevents and cures asthma, wheezing, loss of song and all diseases caused through damp and cold; is an excellent stimulant, and takes the birds easily through their moult. This speciality has built up a 30 years' reputation entirely on its own merits, invariably effecting a cure after every other remedy has failed. In 6d. and 1s. tins, postage 1d. extra. If you cannot obtain it from your tradesman, apply direct to W. J. Hammond, 19, Anstey Road, Coldharbour Lane, Camberwell, London, S.E. Agents wanted.

FOUND AT LAST.
BRONCHORINE.
Cure for Asthma, Bronchitis, Loss of Tone, and Wheezing; Ideal Tonic for all Cage Birds; taken readily.
"66, Meston Street, Birches Head, Stoke-on-Trent. Jan. 2nd, 1907. Send 1s. 6d. bottle Bronchorine. I am one that does not believe in trying to cure half dead birds, but find Bronchorine fine to have by you to give birds when they come back from shows this weather.—B. Peake." "King Street, Melton Mowbray. Jan. 3rd, 1907. Send early 1s. 6d. bottle Bronchorine, have run out; don't want to be without it; find it very good remedy for colds.—W. Jackson." "73, Tudor Street, Liverpool. Aug. 22nd, 1906. Forward as soon as possible another bottle Bronchorine. The last one has given me every satisfaction, and has nearly cured two birds which were suffering from chronic asthma.—J. Jones." Price, 9d., 1s. 6d., and 3s. bottle.—Crawley, 112, Radford Boulevard, Nottingham.

Knowles, Bird Specialist, Richmond-hill Aviaries, Blackburn.

PALACE WINNER.

My noted Waxwing, "Ambition," was the best at the Palace (see report); he is for disposal; also others, to moult champions, at 20/-, 25/-, 30/-; stamp reply.—Bailey Bros., 109, Gloucester-rd., Bristol.

B. McCORMICK, Deceased.

I have for disposal the whole of the late gentleman's stock; a good chance for a bargain. All winners. Chaffinch, 5/-; Bramblefinch, 5/-; two Linucts, 6/- each; Goldfinch, 7/6; Siskin, 6/-; also a number of selected non-moulted specnuens, cheap. Carrying boxes, baskets, and show cages to be cleared, by request of relatives; stamp particulars.—Gamage, Portia-ter., Swansea.

Goldfinches, Bullfinches, Linnets.

Beautiful cock Goldfinches, large selected, for showing and muling, 3/-, 3/6 each, three 6/-; hens 1/-, three 2/6; cock Bullfinch, 1/6, 2/-, three 5/-; hen Bullfinch, 1/6, 2/- each; singing cock Linnet, 1/-, three 2/6; selected, for showing and muling, 1/6, 2/-; cock Larks, 1/-; large cock Greenfinches, 9d. each; cock Redpoll, 6d., three 1/3.—Matt. Hopkins, Bird Specialist, 38 and 41, Fylde-st., Preston, Lancashire.

HARRY ALLEN.

Same as last week, still winning 1st, 2nd, and 3rd prizes this week. Gentlemen, if you want some big fine healthy Linnets, I can supply you, as I keep nothing but the best, and always do my best to satisfy my customers. Big fine well-pencilled cock Linnets, stand well, 2/- and 2/6; extra picked birds, sure mulers, and very tame, 3/- and 3/6 each, will soon make a name for their owner, either for muling or showing. Fine healthy cock Linuets, singing grand, in a polished singing contest cage, with a packet of my special mixture and instructions how to feed, 4/- the lot. Young house moulted Linnets, finger tame, singing hard, with cage, 7/6 and 8/6 each, no rubbish, real bargains, and taught by my champion; singing contest cages, 1/6 each, special ones, same as I keep my champions in 2/- each. I am selling the secret and management of Linnets, showing how to make them sing at one another with their wings down, at a very small price; send stamped envelope for particulars; all Linnet keepers should have this, especially novices. Four packets of my special mixture, 1/-.—"208, Brunswick-st., Sheffield. Dear Sir,—I received Linnet on Wednesday afternoou, and ran third at the contest at the week-end, beating seventeen birds for third place, twenty competing, so I need hardly say I am delighted.—W. Reynolds to H. Allen."—All orders sent receive prompt attention; no delay, no disappointment; send at once!—Harry Allen, 42, Brown Hill-eres., Harehills-lane, Leeds.

Siberian Mealy Redpolls

English caught, giant cocks, rose pink breasts, heads nearly white colour, champion winners or mulers, 7/6, 5/-, 2/6.—Clapham, 101, Cambridge-st., Norwich.

Not just taken from the Nets, but all properly on seed and well caged. British and Russian Goldfinches, British and Russian Bullfinch Cocks, Linnets, Siskins, etc.

Send for my List before deciding elsewhere. Some exhibition specimens. Also extra fine Raven Black Bullfinch and Light Cinnamon Linnet. Certain Winners. Read up-to-date opinions.

"25, Este Road, Falcon Road, Clapham Junction London, S.W., Feb. 16, 1907. The Goldfinch arrived quite safe. I am quite satisfied with same. S. Dodd to W. Rudd."—"9, Lenham Road, Thornton Heath, Feb. 12, 1907. Goldfinch to hand safely. I think it a splendid bird for the money. I hope to have further dealings in the future.—W. J. Martin to W. Rudd."

Finest he ever saw.

"23, Kent Road, Liscard, Cheshire. Feb. 9, 1907. Bullfinch arrived safe. Well pleased with it. The finest I have ever seen. R. H. Penner to W. Rudd."

W. RUDD, The Bird Specialist, Norwich.

Don't miss Next Week's "C.B."

PALACE WINNER.

My Bramblefinch was 1st at the Palace (see report); he is for disposal; also others I have selected to moult out real champions next season; stamp reply.—Bailey Bros., 109, Gloucester-rd., Bristol.

IRWIN & CO., LURGAN,

offer large cock Goldfinches, 2s. 6d., 3s. 6d.; Bullfinches, 2s.; Siskins, 2s. 6d.; Bramblefinches, Larks, Linnets, Greenfinches, Chaffinches, 1s.; approval, deposit; dealers supplied; stamp reply. x267

GOLDFINCHES, BULLFINCHES, LINNETS.

Beautiful English cock Goldfinches, 2/- each, three 5/-, six 9/-; special picked for singing, muling, 2/6, 3/- each. Cock Linnets, singing, and beauties, 1/- each, three 2/6, six 3/6. Cock Bullfinches 2/-, three 4/-, picked ones 2/6; hens ditto, 1/-. Cock Bramblefinches or Greenfinches or Chaffinches or Yellowhammers, 6d. and 9d. each, three 1/3. Cock Larks, 8d., 10d.; caged off, singing, 1/- and 1/6. Cock Redpolls, 6d. See back numbers for scores of testimonials from successful Mule Breeders. Established 1879.—J. Saudiford, Bird Specialist, Preston, Lancs.

THERE ARE TWO WAYS

of buying birds. One is by sending away your money and having to put up with what you get in exchange for it, and the other is by buying from a man who sends his birds on approval, and refunds your money in full if you are not perfectly satisfied. I was the originator of this approval system in connection with wild birds, and am still the only one who sends wild birds on approval all the year round. Splendid large Worcestershire cock Goldfinches, in pink of health and condition, 2/6 each, three 6/6. Specially selected larger birds, to moult for exhibition or muling, 3/-, 4/-, and 5/- each. Hen Goldfinches, 1/- and 1/6 each. Cage moulted cock Goldfinch, in splendid song, just right for muling, 5/-. Grand large cock Siskins, very steady and full song, 3/6 each. Cock Bullfinches, splendid health and condition, 2/- and 2/6 each. Grand country-caught cock Linnets, with nut brown backs and red breasts, 1/- each, three 2/6, six 3/6. Few very large and warranted in song, 1/6 each, three 4/-. These Linnets are exactly the same as those supplied by me to the Linnet singers of "Leeds," "Hull," "Bolton," "Durham," "Leigh," etc., etc., and I have sold hundreds of contest winners during the past 16 years. Cock Goldfinch Mules, pure Finch song, 5/-, 6/-, and 7/6 each. Two real stormers, used to catching and sing anywhere, 10/- each. Hen Mules, 1/6 each. Cock Greenfinch Mules, Canary song, 4/-, 5/-, and 6/- each. Hens, 1/6 each. Muling hen Canaries, splendid large birds, 3/- and 4/- each. One two-year-old, hand-reared Lark, in full song, sing anywhere and anytime, a veritable street ringer and contest winner, 20/- lowest. Every description of cages in stock, from 3d. to £5. Dealers should send stamp for full trade list of sizes and price of cages. Self-acting spring net traps, warranted to catch and hold any bird, from Wren to Rook, 24in. long, 1/- each, 18in. long, 9d. each. These net traps are by far the largest and best traps on the market; they have entirely superseded the old-fashioned ones, and are being used by all the leading Nightingale catchers. Patent self-setting and self-acting trap cages, 1/6 each. Clap nets of all sizes in stock. Send stamp for full printed list of all catchers' appliances, as used by all professional catchers throughout United Kingdom and many of the Colonies. Thousands of testimonials published in this paper alone, and piles of them open for inspection. Visitors to Birmingham are requested to call and inspect stock, open from 9 a.m. to 9 p.m. daily. Please note new address, by far the largest best stocked, and only centrally situated stores in Birmingham.

W. GORE, 131, GOOCH ST., BIRMINGHAM.

British Bird Exhibitors

MOULT YOUR OWN WINNERS.
Hybrid and Mule Breeders, breed your own Winners.
Read of Success received this last two weeks. No fancy prices.

"Mr. Thomson, Markinch. Jan. 17th, 1907. Sir,—Bullfinch I purchased from you won 1st at Scottish National, Edinburgh, this month, beating all the English and Scotch cracks in a class of 38."

"Mr. Turnbull, Jedburgh. Dec. 8th, '06. Glad to let you know of my success with Goldfinches you sent me, winning 1st and 2nd Jedburgh, 3rd Selkirk, 2nd Hawick, 2nd and 4th Carlisle. Send me two more beauties and a show cage." "Mr. J. J. Brain, Glastonbury. Dec. 4th, '06. I must thank you for Goldfinch for prompt dispatch. I received him in the evening and I showed him next morning, and won 1st in a large class. Thanks for same." "Mr. Turnbull, Jedburgh. Jan., '07. Goldfinch has added another 1st to his successes." "Mr. Asburg, Hucknall Torkard. Sir,—Goldfinch you sent me stands 1st at our show in a good class." "Mr. Higgins, West Mallony, Kent. Jan., '07. Glad to inform you Bullfinch you sent me won 1st and special at Canterbury in a large class. Thanking you for such a good cheap bird." "Mr. Lee, Bandon, Cork. Glad to tell you I bred the light Mule, 1st and special Cork Show, from birds purchased from you." "Mr. W. Dyke, Longridge. Send a cock Goldfinch and hen Bullfinch. Pleased to see the Hybrid Goldfinch-Bullfinch I bred from the birds I bought from you has won 1st and special Leeds, Class 19, 3rd Halifax, 1st Leek, 2nd Hamilton, 2nd Hinckley, 1st Portsmouth, etc., etc."

Mr. Veitch, Jedburgh, Scotland, writes:—"Send cock Goldfinch, 3s., two hen Bullfinches, 3s. Glad to say young Goldfinch purchased from you won me two 1sts Hawick, 1st and special Kelso, 5th Edinburgh, Class 33, 3rd Galashiels, twice 2nd at our show." W. Jones, Altrincham, December 6th, 1905:—"Send two cock Linnets and two cock Siskins. Am pleased to say I won 2nd and 4th at Altrincham, Open Class with birds purchased from you." Mr. Ewan, Kirn, writes:—"Goldfinch arrived safe, and won 1st and special at our show." Mr. Weedall, Winsford, January 30th, 1906:—"Send another good Bullfinch. Glad to say last two have won 1st and 2nd every time shown. Unfortunately, best one just died; other won 4th large class at big Crystal Palace Show."

I sell more British Birds than any man alive. Thousands weekly, which enables me to pick so many winners. Beautiful British cock Goldfinches, guaranteed, **3/-, 4/-** and **5/-** each. Cock Bullfinches (Palace Winners), **2 6, 3/-, 4/-** each; Cock Linnets, **1/6** and **2/-** each; Cock Greenfinches, **1/-**. Large Hen Bullfinches for Hybrid Breeding, **1/6** and **2/-**. House Moulted Linnets, **5/-**. Cock Bramblefinches, **1/6, 2/-**; cock Chaffinches, **1/6, 2/-**. All above picked from thousands, and sure to moult winners.

Show Cages to suit any of above species, 2/-; three 5/6. Box Cages, enamelled, **1/9** each. (Estbd. 1879.

J. SANDIFORD, BIRD SPECIALIST, PRESTON, LANCS.

VERY RARE.

Magnificent cock Nutcracker, beautiful plumage (one of these birds won special for rarest British bird at the Palace), see report; stamp for reply.—Bailey Bros., 109, Gloucester-rd., Bristol.

Real Siberian Goldfinches

READ OF SUCCESS.

Last arrival of these wonderful Siberians, with full scarlet-coloured blazes, like giants; full moulted, and perfect in every way; hundreds of winners sold every year; price 5s., 6s., and 7s. 6d. each; two, 9s.; hundreds to select from. Just a few Testimonials, scores like these:—Mr. McNunn Castle Douglas, Nov. 25, 1906. "Glad to let you know the Siberian I got in 1904 won 1st and Spl. Dalbeathe on Jan. 1, 1905. Since then 1st Kirkcudbright; again this year at same place another 1st and Spl., also 1st and Spl. at Carlisle, 1906. 1st and Spl. Ayr and Silver Medal. Send me another good one at once." Mr. Murdock, Girvan: "Siberian Goldfinch arrived safe, and won first prize. Thanks for same." Mr. Richardson, Thurso, Nov. 16, '05: "Send Siberian Goldfinch, Bullfinch, and Siskin for enclosed P.O. A friend of mine won first last year with Siberian purchased from you." Mr. Ewan, Kirn, writes: "Glad to say Goldfinch won first and special at our show." Mr. Mark, Selkirk, writes, 1905: "Russian Goldfinch to hand; he was singing two hours after arrival." Price, Russian cock Goldfinches, 4s. and 5s.; two, 7s. 6d.; Siberian cock Bullfinches, like Blackbirds, 5s. and 6s.

Show Cages for any of above Birds, 2/- each.

CHAMPION CRESTS & NORWICH PLAINHEADS.
These are the two varieties I keep, and no one in England has better. Last Season I had three Fanciers breeding for me with birds of the highest quality. Neither money or sound judgment has been wanting in getting one of the finest stocks in the world together; and remember I don't exhibit now I breed for my customers to win. Hundreds of Winners sold by me, and reasonable. 30 years breeder. Have had the honour to judge at over one hundred shows. If fanciers cannot get the right birds from me, where can they get them? All on approval.
T. BILLINGTON,
220, COLWICK ROAD, NOTTINGHAM.

can spare clinking unflighted, marked buff cock, 25/-; another ditto, 10/6; one 1905, clear, good size, 12/6; variegated yellow, small side, lovely quality, colour, 15/-; five good buff hens, 5/- to 10/- each.—18, Honeywall, Stoke-on-Trent.

CHAMPION NORWICH.

Having selected my breeding stock, I have a few grand pairs to part with cheap, 10/6, 12/6 pair; odd cocks, 7/6, 8/6, 10/6 each; odd hens, 4/6, 5/6 each; Border hens, 2/6 each; Yorkshire cocks, 7/6 each.—Matt. Hopkins, Bird Specialist, 38 and 41, Fylde-st., Preston, Lancashire.

DISSATISFACTION.

Dissatisfaction is unknown to all my customers. From me you get the birds that you require. I send you any Canary you require carriage paid, upon seven days' approval, at my risk during the time of approval. I have some of the best Norwich in England, including many winners and matched pairs for breeding winners, all at reasonable prices; state requirements. I offer exceptional good value in typical cocks at 6/6, 7/6, 8/6, 10/6, 12/0, 15/-, 20/- each; hens 3/6, 4/6, 5/6, 6/6 to 15/- each; matched pairs from 8/6, 9/6, 10/6, 12/6, 15/- upwards. See what customers say:—"North View, Farnham, February 16th, 1907. Norwich cock to hand. I am well satisfied with bargain. I have instructed Editor to pay you the money.—A. Fay, to Miss Storey." "Six Row, Ashington, February 16, 1907. I am well pleased with the bird. I have been an exhibitor many years, and have never seen such value from any other dealer as the good quality you send at a reasonable price.—J. Smith, to Miss Storey." "115, Middle-st., Pontypridd, February 16th, 1907. The two Canaries arrived in splendid condition. I can strongly recommend you to all my friends, as I am sure they are bound to get every satisfaction with the quality of birds you supply, and your method of doing business.—A. Moon, to Miss Storey." "Midland-rd., Barnsley, February 15th, 1907. Received the bird, and I must say that I am more than satisfied. Several friends have seen it, and they all with me think it a beauty. Wishing you every success.—R. Williams, to Miss Storey." "18, Frias-st., Long Eaton, February 16th, 1907. Received bird in good condition. Many thanks for same. I am highly satisfied. Wishing you every success.—J. Parker, to Miss Storey." "Main-rd., Masbro, Rotherham, February 15th, 1907. Received birds safe. Am highly satisfied with them. J. Bradley, to Miss Storey." I have thousands similar to the above open for inspection. New illustrated Price List post free. Travelling cages, 2d. each; all Canaries sent carriage paid on seven days' approval at my risk.—Miss E. L. Storey, Crowle, Doncaster.

OWING TO PRESSURE OF BUSINESS.

Having just sold largest birds at good prices, can now sell pairs, same strain, from 7/6 to 15/; must clear.—Pass, Cage Maker, 9a, Carlingford-rd., Hucknall Torkard, Notts.

LATEST OPINION OF MACKLEY BROS.' BIRDS.

"High Street, Uppingham, Rutland. Jan. 12th, 1907. Dear Sirs,—The two Birds arrived safe, in the PICTURE OF HEALTH; they are the BEST TYPE of Norwich Plainhead I ever saw. I am HIGHLY DELIGHTED with them. I shall certainly recommend you to all I have the opportunity of so doing. I never had the favour done me from any one FIRM but yours by sending birds on approval without the Deposit System. Trusting the Firm of MACKLEY BROS. may live and reign for the sake of their customers.—Yours faithfully, J. Waddingham to Mackley Bros."

Postal and Telegraphic Address: **MACKLEY BROS., (Jacob Mackley), NORWICH.**

SANDIFORD'S FAMOUS Norwich.

See Palace report with birds direct from my own blood. 1st Unflighted Yellow, Class 30, and other prizes, etc.

READ OF SUCCESS FROM BIRDS
I have supplied, also of our noted Wins at all leading Shows, including Derby, Leek, Hinckley, Carlisle, Gateshead, Sunderland, Crewe, Edinburgh, etc., etc. Won this Season—34 Firsts, 28 Seconds, Gold and Silver Medals, 50 Specials, etc. At Hartlepool, N.P.C. Cup Show against all the cup fighters, 8 birds—4 Firsts, 2 Seconds, 2 Thirds.

Also, in the year 1900, we won **50** First Prizes, Seconds, Specials, etc. 1901, **44** Firsts, **30** Seconds, Specials, Cups, etc. 1902, **40** Firsts, **40** Seconds, **35** Thirds, Scores of Specials including Championship Medal for Best at Crystal Palace. 1903, **35** Firsts, **40** Seconds, Specials, etc., including the N.P.C. Challenge Cup, which we won at Three Shows against all others Five Shows, also Gold Medal at the N.P.C. Club Show for best Norwich. 1903-4, Won **50** Firsts, **40** Seconds, 25 Thirds, N.P.C. Challenge Cup second year in succession, also 2 Gold Medals at the International Show, England v. Scotland, 1 for Best Norwich in Show. 1905, Won **30** Firsts, 25 Seconds, Spls., etc. If my strain can't claim to be the best on earth none can.

I am offering for two weeks only 20 Grand Matched Pairs, to breed Winners, at **20/-** pair, must clear. Also other Pairs at **25/, 30/-.** Odd Yellow or Buff Cocks, **10/-, 15/-, 20/-, 25/- 30/-.** Odd Yellow and Buff Hens, **10/-, 12/-, 15/-, 20/-.** All on approval two days. If you want the blood that wins order at once.

Mr. McIver, Port Glasgow, Jan. 8, 1906.—"Sir, The Norwich Cock you sent me won 1st and Special in class of 11, against all coloura." Have scores like this.

Established 1879.

J. SANDIFORD. Canary Breeder, **PRESTON, LANCS.**

IMPORTANT NOTE.
Two or more Advertisements coming from the same advertiser, even if sent in different names, are reckoned together and counted as one advertisement.

SILK'S CHAMPION NORWICH.

My name and fame as breeder of Norwich Plainheads is so well known to every fancier that my birds need no paper recommendation. I breed to sell. Most of the leading champions have been bred and sold by me, my vast business having been built purely upon recommendation, not on paper bounce. If you were disappointed last year with Norwich purchased elsewhere, try a pair from a strain of many years' standing. Success certain. Every pair on approval, money returned if unsatisfactory, or deposit with Editor. Satisfaction guaranteed. Champion pairs, 15s. 6d., 20s. 6d., 25s. 6d., 30s. 6d. per pair; some tip-top cocks and hens, yellow or buff, 7s. 6d., 10s. 6d., 12s. 6d., 15s. 6d. each. Don't risk unreliable strains, but send to the fountain head, or a season's work may be wasted. Remember, all on approval, willingly.

Judge A. E. Silk, *THE AVIARIES,* **Whitstable.**

NORWICH PLAINHEADS.

The quality for price is not unsurpassable, but cannot be elsewhere equalled. Besides the prices given below, I also have Greens, Cinnamon Greens, and Cinnamon Marked.

Telephone 7304 Central. Telegrams, "Lukullan, London."

C. A. LUER, 121, Leman Street, London, E.

HERE'S A RECORD.

On Tuesday, Feb. 12th, 1907, I sent away 132 Roller Canaries, all at retail price. This does not include the many I sent away at wholesale prices to dealers in all parts of the kingdom. I think I can safely claim to hold the record as the largest retailer of Roller Canaries in England. This enormous trade has been built up solely by the sheer merit of my birds, as the public know full well that they cannot get the quality of birds only from me. I have at the present moment over 400 pure St. Andreasberg hollow Rollers in stock, which can be inspected at any time. All are in full rolling song day and gaslight, with long hollow and double rolls, sweet silvery trills, soft roulades, waterbubble runs, piccolo trills, Nightingale jug-jug, hollow bell rolls, deep bass tours, bell, harp, and gong notes, etc., etc., and guaranteed entirely free from any harsh notes whatever, price 7/- and 8/- each. Special Bandmasters, which excel in the deep bass and hollow bell tours, 10/- each. Pure Roller hens, guaranteed same strain as above cocks, 2/6 each. Also a few special contest masters, specially selected from song boxes for me, and now fit to win contests immediately, 15/- each. Loud, free singing Hartz cocks, in full, vigorous song, 6/- each, two 11/-, or seven 35/-. Hartz hens, 2/- each, 3/6 couple. These Hartz cocks are often sold as Hartz Mountain Rollers at fancy prices by unscrupulous dealers. Singing box cages, 1/- and 1/3 each. Roller song cabinets, with folding doors, made specially for my Rollers, 2/3 each. Week after week I have published scores of testimonials, all speaking in highest terms of praise of the quality of my Rollers, and during that time have received thousands that have never been published at all. Few more given below. Kindly note.—Full name and address published with every letter, also correct date. "Academy-buildings, Inverness, Feb. 1st. Sir,—Roller arrived safe, and am very well pleased with it, and will likely get an order or two for you.—Yours, F. Kelly." "Reepham, Norfolk, Feb. 3rd. Sir,—Received Roller safe, and just the one that suits me in colour and in song; started singing ten minutes after arrival (after nearly 24 hours' railway travelling).—Yours, Jno. Wasey." "6, Willow-grove, Southport, Feb. 4th. Sir,—Fourteen days ago I had one of your 8/- Rollers, which has turned out a splendid bird, and just what I wanted for breeding. Please send me another at 7/-, and also one at 10/-.—Yours, A. Williams." "39, Summerbank-rd., Tunstall, Feb. 4th. Sir,—I am keeping the Roller, as he has turned out to give every satisfaction, and singing nicely.—Yours, J. Lovatt." "Feb. 4th. Sir,—Received Roller, in grand condition, and started to sing very soon, and I am well pleased with him, and think I shall have another order for this week.—Yours, D. Jones." "6, Lady Pit-st., Beeston-hill, Leeds, Feb. 4th. Sir,—Please send me a premier contest singer at 15/-. I got one of your Bandmasters last year, and was well satisfied. I cannot get any good enough in Leeds.—Yours, G. Ibson." "5, Barnes-rd., Workington, Feb. 6th. Sir,—I had a Roller from you about two months ago, and it sings day and night. Kindly forward me a hen to match.—Yours, John Hughes." "Callander, Scotland, Feb. 11th. Sir,—I got a Bandmaster, 'a perfect bird,' from you about three weeks ago, and would not sell him for double the money I paid for it.—Yours, R. Hill." (This bird was ordered from me solely to test it against an English-bred Seifert Roller, costing 20/-.—W. Gore.) Hundreds more letters similar to above open for inspection at any time. Every bird sent safely and warmly packed (no matter how cold the weather) in special travelling cages, with seed and water to last 48 hours, on a full week's trial, solely at my own risk, during the whole time, either on receipt of cash or deposit with CAGE BIRDS, and money refunded in full if every satisfaction is not given. Compare my prices with others, and, above all, I ask you to compare the song of my birds with that of any other costing more money. I don't care if the other costs double the money. I shall be satisfied with result. My Rollers have been repeatedly tested against birds costing up to 40/- each in this manner, but never yet have I been informed that my bird came out of the trial second. I have and am at present supplying all the principal breeders, connoisseurs, etc., with birds, and never fail to give entire satisfaction. May I send one on trial to you also? Please note new address, by far the largest stores in Midland Counties, and 400 Rollers to select from.

W. GORE, Direct Importer,
131, Gooch Street, Birmingham.

Don't Keep the Roller

if you are not thoroughly satisfied with it, as we believe in thoroughly satisfying our customers; that's why our business has grown so enormously, and, incidentally, it is the reason why we have to keep the largest stock of Pure Rollers in Birmingham. Reasonable prices for reliable birds and absolutely straightforward dealings. We send all our Rollers on seven days' approval entirely at our own risk, either cash to us or CAGE BIRDS Deposit System, and if you are not thoroughly satisfied you only have to return them, and we will either replace them or refund your money in full, whichever you prefer. What could be more straightforward? We have grand consignments of pure St. Andreasberg Rollers, with long deep, sweet soft hollow bass rolls, water-bubbling runs, deep bass tours, bell, harp, and gong notes, etc., etc., and are guaranteed free from any harsh or objectionable notes, 7/-, 8/- each. Extra special Schoolmasters, which far excel all others in their deep bass and hollow rolls, 10/- each, two 18/-; hens 2/6 each, two 4/6. Hartz Mountain Rollers, good, loud, clear, day and gaslight songsters, 6/- each, two 11/6; hens, 2/- each. (Notice to the Public.) Our Hartz Rollers are not Belgians palmed on the Public for Hartz Rollers and sold at 1/3 stick less than they can be bought. Ideal Roller breeding cages 2/6 each; few second-hand, slightly used, from 30in. long, 2/6, 3/- each. Roller singing cages 1/3, 1/6 each. Kindly read few of the following testimonials for proof of the quality we send out:—"10, George-st., Scarborough, Jan. 16.—Dear Sir,—Received the Roller quite safe, and I am highly pleased with it. I have instructed CAGE BIRDS to pay deposit to you.—Yours, H. Harrison." —"28, Oakland-st., Miskin, Jan. 18.—I received the Roller quite safe, and am quite satisfied. I have written to CAGE BIRDS to pay deposit to you.—Yours, W. Reed."—"34, Britannia-st., Leek, Jan. 19.—Gentlemen,—The Roller arrived quite safe and gives great satisfaction. Your way of sending them does you great credit. I shall certainly do my best for your straightforward and honest dealings. You may make what use you like of this testimonial.—Yours, J. Birch."—"197, Grove-la., Handworth.—Dear Sir,—I should be glad if you would select me another Roller similar to the one I had from you three weeks ago. I am pleased to say that the three Hartz Rolers, also the three Goldfinches I had from you this season, gave every satisfaction. I have dealt with you for years, and have always found whatever purchased has been as you have represented them to be.—Believe me, yours, Will. Hy. Darby."—Parker and Wilden, Bird Merchants, 257 and 258, Farm-st., Birmingham.

MISS STOREY.

Miss Storey has the finest and purest collection of genuine trained Rollers in England, every bird in full song by day and artificial light, singing their pure Roller song. Every bird is cold room bred and kept. These are the genuine Rollers (not cross-bred rubbish). My stock consists of high-class British bred Rollers, bred from and related to the best of contest singers and winners. Cocks, in full song, 15/6, 17/6, 20/-, 23/-, 30/-. A few extra special at 40/-, 50/-, and 60/-. Hens to match same, 4/6, 5/6, 6/6 each. Genuine trained St. Andreasberg Rollers, with full change of song by day and artificial light (no common German rubbish these), 8/6, 10/6, 12/6, 15/-. Pure Roller hens, 3/-, 3/6 each. Hartz Mountain Roller cocks, in full song by day and gaslight, very loud free songsters, 6/-, 6/6, 7/- each. Matched pairs for breeding songsters, 8/6, 9/6. The quality of my birds speaks for itself. I have many thousands of testimonials open for inspection, of which the following are a sample:—"Crushier, co. Clare, Ireland, February 16th, 1907. Received Roller safe. He commenced to sing the same day. I am awfully thankful for such a good bird.—P. Grcelish, to Miss Storey." "23, Travess-st., St. Helens, February 15th, 1907. Bird arrived safe. The time for approval is up, and I am keeping the bird, as it is a little marvel at singing. Would not take twice the amount I paid you for him. Will give you more orders.—J. Lawton, to Miss Storey." "115, Middle-st., Pontypridd, February 16th, 1907. The St. Andreasberg Roller you sent me is a most beautiful songster. It is all that you claim for your birds in the papers.—A. Moon, to Miss Storey." "8, Long-row, Coalville, February 16, 1907. I thank you very much for the bird, which gives every satisfaction; it is an excellent songster. I could not wish for a better. —J. Wilkins, to Miss Storey." "The Square, Dalry, February 15th, 1907. I am very pleased with the birds. The Roller is a beauty. I am sending you more orders now I know the honest way you have of dealing, and the splendid singers you supply.—A. Gray, to Miss Storey." "41, Six-row, Ashington, February 16th, 1907. I consider the bird you sent me the best value I have ever seen for the money I sent.—J. Smith, to Miss Storey." "62, Longcoast-way, Perth, February 17th, 1907. Bird received all right. I am well pleased with it. It is singing nicely, and has a very good full note.—R. Taylor, to Miss Storey." "22, Sligo-st., Lumphinnan, February 16th, 1907. I am highly pleased with the Roller; it is a real first-class songster. Many of my friends are sending you their orders for birds like mine.—J. Walker, to Miss Storey." If you want further proof, allow me to send you the birds you require, carriage paid, on seven days' approval at my risk. Illustrated list free.—Miss E. L. Storey, Crowle, Doncaster.

HARTZ Mountain Roller Cocks,

All in full song, and Hens, both imported and Home-bred, in the finest breeding condition. I have the Largest Collection of **Choice Pedigree Roller Hens** ever got together in one lot. They comprise pure Seifert and Trute Hens, and I can honestly recommend these to all breeders wanting Reliable Breeding Stock to produce the best money can buy. You can give 10/6 or more, and cannot get better blood or stock. Can be seen.

IMPORTED—Trained Cocks, 8/6, 10/6, 12/6, 15/-, 20/- and upwards; Hens, same strain, 3/6 and 5/- each, pairs 10/6, 15/-, 20/- All on seven days' approval, cash or deposit.

HARTZ SINGING, NOT TRAINED, COCKS, 5/6 each. Extra selected, with better notes, 6/6; Pairs, 8/6. Strong Hens, 2/3 each.

Home-bred (guaranteed) Trained Trute and Seifert Cocks 10/6, 12/6, 15/-, and 20/- each; Hens, guaranteed same strains, strong, healthy, and in the best of breeding condition, 4/6, 5/- each. These have been purchased direct from the breeder and trainer, and can be recommended. Remember, it is no use breeding from good Cocks and common Hens if you want good results.

Untrained—Strains unknown, Cocks 5/6, 6/6, 7/6; Hens, 3/6.

Full printed Instructions, how to keep in health and song, sent with every bird as for the past 30 years. Beware of copyists and their "catch" methods.

See my advertisement on page 159.

If you want to know about these beautiful and interesting songsters, send for my book
'Profitable Canary Breeding as Practised in Germany'
By Albert Rettich, Esq., author, breeder, and judge of the leading singing contests. Price 9d., or in larger type and gilt cover, 1/3; to be obtained from the publisher and sole owner of copyright, W. Rudd, or from the office of "Cage Birds."

W. RUDD, The Bird Specialist, **NORWICH**

THE old Yorkshire breeder's birds are best of quality, cold room bred, clears, ticked, yellows, or buffs, cocks, full song, 6/6, 8/6, 10/6; hens 3/6, 4/6, 5/6, 6/6; pairs, properly matched for breeding, 10/6, 12/6, 15/-; seven days' approval, cash or deposit.—Pickles, 5, Wardman-st., Keighley, Yorkshire. x268

MURGATROYD AND SON, breeders 21 years, runners up for Yorkshire Amalgamation 25 guineas Challenge Trophy, 1906, also winners Yorkshire Amalgamation Challenge Cup, 1905 and 1906. This is proof that this strain is one of the best. We have a few for disposal, cocks, long and stylish, hens, feathered to perfection; prices reasonable; four days' approval; stamp reply.—25, Lytton-rd., Girlington, Bradford.

AMBLER'S Champion Yorkshires.—Having selected our breeding stock, we offer for sale the choicest stock of Yorkshires in the Fancy. Long, racy cocks, perfect type and quality, hens of wonderful length and style, feathered like marble, just the sort that breed champions. We have sold more noted and championship winners than any firm in the world for over 20 years, including six of the best Yorkshires living this season, which have won all before them. This is a chance seldom met with to secure such quality at the price; stamp particulars; satisfaction guaranteed; approval.—17, Lytton-rd., Bradford.

IF YOU ARE

Requiring Yorkshires, you should try me, for satisfaction, both in price and quality; typical stock birds, all colours, finest blood procurable; cocks 6s. and 8s. 6d. upwards; hens 4s. 6d., 6s. 6d. upwards; properly matched pairs, 10s. 6d., 15s., upwards; all related to winners; week's approval, deposit.—Kemp, 270, Girlington Road, Bradford.

SAMUEL DEAN, 24, Crossley Street, Gt. Horton, Bradford, Breeder and Exhibitor of high class Yorkshire Canaries, including Greens. x259

HARTLEY'S YORKSHIRES.

Highest awards at leading shows. Splendid cinnamon marked and dark eyed birds for disposal; reasonable prices; approval.—53, Harlow-rd., Lidget Green, Bradford, Yorkshire.

W. BROWN, CHELSEA,

can spare the following guaranteed prize-bred Yorkshires, from his noted Palace, cup, etc., winners:—Two buff cinnamon marked cocks, full song, 15/- each; buff variegated hen, winner two 1sts, 17/6; buff cinnamon marked hen, 12/6; clear buff hen, 12/6; yellow hen, 10/-; no rubbish, cold room bred; approval; stamp reply.—12, Upcerne-rd., Chelsea, London.

WORKING MEN,

Breed your own winners. Private breeder and exhibitor reducing stock; novices' grand opportunity, no fancy price; selected matched pairs, 20/-, worth double; slim racy hens, well up, 5/-, 6/-, 7/6; stock cocks, 10/6, 12/6; approval.—Samuel Russell, Steeton, Keighley, Yorkshire.

LAWRENCE LANE

has some long slim stylish Yorkshires to part with, feathered like wax, related to my winners at Burnley, Rochdale, Wigan, Great Harwood, Ormskirk, etc.; pairs, matched to breed winners, 15/-; single cocks, 10/6 each, cold room; approval; satisfaction guaranteed or money returned in full.—16, Fountain-st., Barnoldswick, Yorkshire. x268

THE CHAMPION WINNING STRAIN.

Winner of the Championship Diploma, Crystal Palace, 1906. Having about 60 pairs, we have decided to clear them out for a speedy clearance at 15s. to 20s. per pair, cocks standard length, hens feathered like box, also a few green cocks, 10s., 15s., 20s., no green hens, sure to give satisfaction; seven days' approval, P.O. or deposit; stamp reply.—Gill and Pickup, 1, Cragg Street, Great Horton, Bradford. x268

KNIGHT'S YORKSHIRE AVIARIES.

One hundred and twenty pairs high-class Yorkshires, in all varieties, without doubt the finest selection of sale stock in Yorkshire of this variety, unrelated, properly matched pairs from 12/6 to 40/- pair; single stock cocks from 8/- to 30/- each; fine selection of breeding hens from 6/- to 20/- each, all cold room bred, reared, and kept; all approval, cash or deposit; few nice exhibition specimens left, from 20/- each. My 25 years' practical experience and study of this variety solely (the last 12 devoted to this occupation only) is perhaps an equal guarantee of purity of stock offered as if I had kept for exhibition purposes an even strong team, and advertised such as an inducement for sale of stock. Again, am not, or ever have been, proprietor of bird stores, or dealer in all classes and variety of cage birds and cage bird requisites, as my bird rooms are connected with my own private residence in a private street, and conducted by myself in person in every detail, and all birds are selected by myself only, and despatched without extra charge for travelling cage, etc.; full price list, together with my newly-published booklet, "The Whole Art of Colour Feeding and Training Yorkshire Canaries," sent post free to all on receipt of 2d. in stamps; old 50 years address.—Jonas Knight (author of "The Yorkshire Canary: Its Breeding and Management"), Allerton, Bradford, Yorkshire.

CUTHBERTSON'S YORKSHIRES

still to the front, winner of over 100 prizes and cups, including the Taylor cup for third year in succession; grand stock birds and winners for sale cheap; approval: stamp, reply.—Cuthbertson, Manor House, Hughington, via Darlington.

WINNERS CHAMPIONSHIP.

I earnestly ask you for trial order to prove I give satisfaction; sent on week's approval at my own risk, cash or deposit. I claim to have best collection in West England, and sold some most prominent on show bench, which wins challenge cup and medals; this strain winners 200 prizes; Yorkshire cocks, standard length, feather like wax, 6/6, 7/6, 8/6, 10/6, 12/6, 15/-, 20/-; hens 3/6, 4/6, 5/6, 6/6, 7/6, 8/6, 10/6, 12/6; clears or ticked pairs 8/6, 10/6, 12/6, 15/-, 20/-; Sib bred cocks or hens, for light muling, same price.—C. Baker, Herbert-st., Bedminster.

LIVE STOCK STORES,

Station Square, Harrogate, and Hull.

Having just purchased the stocks of two well-known exhibitors, we are in a position to supply single birds, cocks or hens, yellows, buffs, marked, and cinnamon marked, for show bench or stock. We have already sold some of these to leading exhibitors, but have a considerable number to dispose of. They are a magnificent lot, and we can supply cocks from 12/6 and hens from 7 please state wants.—Send for sample bag of our special grit, as used by all the Yorkshire Fanciers.

Bailey and Swanger's Yorkshires

have once more taken the very highest honours at the Crystal Palace, winning championship best bird, also champion diploma best bird, also medal best bird; in addition, we have won the Y.C.C. £21 cup, against all comers two years running; what better proof of our stock, and every bird our own strain. Our motto is quality, not quantity. Send stamp for prices and particulars.—24, Sandy-la., Allerton, Bradford.

IMPORTANT SALE.

Having purchased from Mr. Fuller his entire breeding stock of Yorkshires and Britishers, and being short of room, I am offering them at a low price to effect a quick sale. Most of them are prize-winners, and are birds of exceptional merit, which have been got together at great expense. Fanciers requiring birds to breed winners right away will do well to invest in the following pairs. Every bird is in the pink of condition, and the cocks are in full vigorous song. No 1, yellow cock, cinnamon marked hen, both winners, 60/-; No. 2, buff cock, yellow hen, a grand pair, 45/-; No. 3, ticked buff cock, yellow hen, another grand pair, 40/-; No. 4, yellow cock, foul wing, buff hen, splendid quality, 30/-; one pair Norwich, yellow hen (winner), buff cock, dirt cheap, 30/-; a few good pairs, 12/6 upwards; also odd cocks and hens from 5/-. The British include cage moulted and selected specimens for moulting, as follows:—Goldfinches, Bullfinches, Linnets, Greenfinches, Twites, also one Corn Bunting, one Hawfinch, show cases and cages; for price and particulars enclose stamp.—Note, everything three days' approval, cash or deposit. If you want genuine bargains, apply early.—F. Lockton, Castlegate, Grantham.

stamped.

COWGILL'S YORKSHIRES.

Birds that I have sold have won over 40 1st prizes this season in the keenest of competition, which is proof of their quality. I have still some good ones for sale, for show, or stock; matched pairs from 15s. to 50s., cocks from 8s., hens from 7s.; approval; cash or deposit; stamp reply.—115, Washington Street, Girlington, Bradford.

BENNETT'S

Champion Yorkshires, highest awards, ten guinea challenge and other cups, Palace, etc.; finest strain in the world; few properly-matched pairs cheap, same blood as those supplied by me to England's most successful exhibitors of Yorkshire Canaries; price list free.—59, Waverley Road, Great Horton, Bradford.

WILCOCK'S YORKSHIRES, NORWICH.

Southend-on-Sea Aviaries.

Yorkshires, finest strain in the world, highest awards, see show reports, properly matched pairs to breed own winners, 15s. to 25s. per pair; odd cocks, 9s.; hens, 6s.; cash or deposit; three days' approval; stamp, reply.—A. E. Pattrick, 115, North Road, Southend-on-Sea, late Bradford House. x267

IF NOT, WHY NOT

Send me your orders? If you require Yorkshire Canaries of the correct type, at reasonable prices, allow me to send you the birds you require, carriage paid, on seven days' approval. I have over one thousand birds to select from, including many winners and matched pairs for breeding winners. Light-feathered upstanding Yorkshire cocks, in full song, 6s. 6d., 7s. 6d., 8s. 6d., 10s. 6d., 12s. 6d., 15s. each. Racy Yorkshire hens, 3s. 6d., 4s. 6d., 5s. 6d., 6s. 6d., 7s. 6d., 8s. 6d., 10s. 6d. each. Properly matched pairs, 8s. 6d., 10s. 6d., 12s. 6d., 15s., 17s. 6d., 20s. per pair. A few winners at reasonable prices. Send me an order; it will convince you and your friends that I give the best value money can buy. All my customers receive satisfaction. "Frehly Street, Edinburgh, February 2nd, 1907. I received the pair of Yorkshires safely, and I must confess that they are by far the best pair of birds I have ever seen at the price; in fact, I paid double the price to another dealer, and did not get such good birds.—E. Gardener to Miss Storey. "423, Ley Street, Ilford, February 3rd, 1907. Received birds, and am very pleased with them. I was much surprised at their good condition after so long a journey.—H. Briscoe, to Miss Storey." "141, Pennant Street, Ebbw Vale, February 2nd, 1907. Birds to hand. I am very pleased with them, and thank you for your prompt attention.—W. Bethell, to Miss Storey." "Hawthorns, Brighouse, February 3rd, 1907. Received birds yesterday. They look well and healthy, in trim feather, and very neat. Many thanks for same.—J. Chectham, to Miss Storey." "138, Babell, Swansea. Received bird in grand trim, and am thoroughly satisfied. Many friends have seen him, and have decided to send you their orders.—J. Thomas, to Miss Storey." "Canal Bank, Bouy Bridge, February 2nd, 1907. Please send me the following. . . . . I have seen the two hens you sent my friend, and he owns he could not get the like anywhere else for the money he paid.—J. Logan, to Miss Storey." "114, Neath Road, Plasmere. I am pleased to say the hen arrived safe, and gave every satisfaction.—R. Beth, to Miss Storey." I have hundreds of thousands of similar letters open for inspection. Remember I send birds, carriage paid, on seven days' approval, at my risk. New illustrated list free.—Miss E. L. Storey, Crowle, Doncaster.

FACTS FOR FANCIERS.

E. TAYLOR, BIRD SPECIALIST,

3 & 7, Thornton Road, BRADFORD,

is one of the best-known men in the above line of business. His operations on the Bird Markets of the country date back from the year 1858. He is, therefore, no mere mushroom development, and is known both at home and abroad. His transactions have been recognised and patronised by Royalty, and awarded many gold and silver medals, in due recognition of the splendidly high-class character of his stock and exhibit, and for the marked superiority of his operations as a breeder, dealer, importer, and exporter of Canaries of every known variety. If you are on the outlook for Birds, or are seeking Bird Appliances and Specialities of **any** class, then **E. TAYLOR,** of Bradford (and 22, Thornton's Arcade, Leeds) is **THE** man you want to know. Don't make the mistake of mixing up the name of **E. TAYLOR** with that of any other dealer. Send for E. Taylor's Catalogue, and you will receive something well worth studying. You can have it gratis, post-free, and with business-like promptitude, and you can put your faith to its honesty and accuracy. Strictly honourable dealing guaranteed, and no effort spared to give satisfaction all round.

TWO lovely cock Greenfinch Mules, offers in cages, drinkers, nest pans, etc.—Hughes, Bailey-st., Oswestry.

or the prices did not suit, please write me stating requirements. I can offer you from the largest collection in the world, consisting of thousands upon thousands. This can easily be proved; in fact has been proved over and over again by such persons as a representative of this paper, as well as Mr. J. Robson and Mr. C. A. House, besides hosts of other well-known experts.

See my advertisements under respective headings. All on approval. Cash or deposit.

Read further proofs of value given, besides about 300 unpublished of recent dates forwarded to Editor for inspection.

4, Alexandra-st., Warsop. February 16th, 1907.—I thank you very much for sending me such a beautiful bird. I had only had it a short time when it started to sing.—J. W. Drury to W. Rudd.

22, Alun-ter., Mold. February 7th, 1907.—I received the Goldfinch-Canary Mule quite safe and in splendid condition. He sings beautifully, and I am quite pleased with it.—H. Roberts to W. Rudd.

One has to be very careful, etc.

10, Eve-pl., off Jack-la., Dewsbury-rd., Leeds. February 10th, 1907.—Birds arrived safe and sound. I think them fine for the money. If I want more shall send to you. You are a very straightforward man. There are so many frauds that advertise that one has to be very careful.—R. Emms to W. Rudd.

It proves, etc.

59, Minard-rd., Catford, London. February 9th, 1907.—Received birds safely, in good condition. Many thanks for sending the two in place of those lost in transit. It proves the fairness of your dealings, and does your business great credit.—H. Marshall to W. Rudd.

Fine type, quality, etc.

Aberdeen, February 9th, 1907.—Bird arrived in good condition. A fine type and good quality. Highly satisfied.—J. W. Sutherland to W. Rudd.

Best catalogue ever got, etc.

Crouberry, February 9th, 1907.—I am pleased to inform you that the hen arrived quite safe, and I am highly satisfied with it. Thanks for prompt attention.—J. Bryce to W. Rudd.

A long time.

Burnley, Lancs.—I received balance, 9/-, with thanks. As I have done business with you a long time now, I shall be only too pleased to purchase anything from you. I can safely say you are the most straightforward man I ever dealt with.—W. Russon to W. Rudd.

41, Wemyasbill-row, Overtown-by-Wishaw. February 13th, 1907.—I received the birds all right, and I am highly satisfied. They have far exceeded my expectations, being wonderful value for money.—C. Reid to W. Rudd.

Delighted.

P.O., Millbay, Plymouth. February 14th, 1907.—I am writing to say that I am delighted with the Canary. He sings beautifully.—Miss Cox to W. Rudd.

22, Neill-st., L. Broughton, Manchester. February 16th, 1907.—Received Hartz Mountain Roller safely yesterday. He is a pretty little thing, and was as lively as a cricket after the long journey. He started to sing ten minutes after he was unpacked. —W. Howard to W. Rudd.

Can honestly say the best.

27, Waverley-park, Edinburgh. January 27th, 1907. —Birds arrived in fine condition, and very highly pleased with them. I have had birds from other advertisers, and can honestly say yours are the best value I have yet received.—A Ritchie to W. Rudd.

Third repeat, etc.

Llandovery. February 6th, 1907.—I have sent you another order, making the third in a fortnight. This shows for itself your straightforwardness with your customers.—G. P. Morgan to W. Rudd.

From a well known breeder and exhibitor.

The birds arrived here safe, looking none the worse for journey. They are giving every satisfaction. Highly pleased with the buff cock, undoubtedly the best buff Norwich in this town. Could have sold him in less than twenty-four hours after his arrival at a good price.—J.H.R—— to W. Rudd.

[Name and address impressed for obvious reasons, but originals of all letters can be seen, in envelopes, with official post marks, at my office.—W.R.]

May be sure he will, etc.

Castletown, Albridge. February 14th, 1907.—Birds arrived quite safe. I am very pleased with them. They are a splendid pair, and wonders for the money. I have never seen nicer. You may be sure I shall recommend you to my friends.—Hy. McCreery to W. Rudd.

NOTE.—All Amateurs Should try my Special Matched Pairs of Prize-bred Norwich Plainheads at 10/6, 12/6, 15/-, and 20/-. Crested ditto, 15/-, 20/-, 25/- and 30/-. Yorkshires, 12/6, 15/-, 20/-. These are the *Best Value* ever offered.

Travelling Cages, 3d. extra.

Is "Asthmarine"

ALL THAT HAS BEEN CLAIMED FOR IT?

Let the following answer:—

Hillside, Balcombe-rd., Haywards Heath. February 2nd, 1907.—Please send one bottle of Asthmarine. I have always found it work wonders with my birds, but have just run out of it.—W. Eagle-Bott to W. Rudd.

Ettrick Grove, Sunderland. January 30th, 1907.—A friend of mine gave me some of your Asthmarine for birds, and as it did our Canary a great deal of good, will you please forward two bottles?—G. J. Milburn to W. Rudd.

St. Conana-ter., Kirkcowan. January 2nd, 1907. Please forward me three bottles of Asthmarine. I have found it a wonderful medicine. It has completely cured two of my birds that had never sung a note for months.—J. Welsh to W. Rudd.

This remedy has the largest sale of any similar article by far. Beware of imitations! For all lung affections it is marvellously efficacious—not a fiver burner, but both soothing and healing. 9d. and 2s. 6d. per bottle, post free. Once used, always kept ready for any sudden attack.

"EGGERTINE."

It is the best, purest, and greatest bone and muscle forming food ever known, as the analytical reports of most eminent authorities prove. It will bring hens into sound and robust condition for breeding as nothing else will. This during the past twenty years has been proved by thousands. It is a genuine egg food made with fresh laid English eggs, with white, of course, included (and NOT foreign preserved yolk of egg) with other valuable properties combined. Tins, post free, **1s. 3d.**; large size, **2s. 6d.** There is a saving in the larger size.

Woodbine Cottages, New Street, Dordon. January 28th, 1907.—I received pair of birds all right. I may say the Eggertine I had is a good food. I had a Canary that had sat for days muffled up in one corner of his cage, and I gave it some Eggertine, and judge of my surprise the next day to hear him singing again.—J. B. Mousley toW. Rudd.

After the stress of the Show Season your birds naturally require a pick-me-up. There is absolutely nothing in the Bird World that can compare with

RUDD'S CELEBRATED TONIC DROPS,

THE MOST INVIGORATING PREPARATION ON THE MARKET.

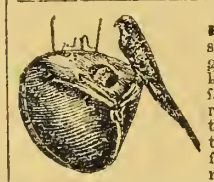
Arriving, Pennants, Rosellas, Adelaide Parrakeets, Parrot, and Bechinos Finches, Hornbills, Cranes, Storks, and Fancy Fowls.—F. C. Thorpe, Havenside, Hedon, Hull.

PEKIN Nightingales.—The majority of people buying these are unable to tell difference between the sexes, and this fact is taken advantage of by some unscrupulous dealers. If you would be certain of getting a cock bird, patronise a man who will guarantee sex in every instance, and send birds for your approval. I have a grand stock of the true Pekin Nightingales, in perfect health, cocks 2/-, hens 1/- each. Cocks warranted in song, 3/- each. These birds are easily kept in cages or aviaries, and cocks have a lovely song.—W. Gore, 131, Gooch-st., Birmingham.

BOOKLET FREE.

FINEST Talking Parrots. I only deal in Parrots that will make first-class talkers; no rubbish. I am willing at all times to send my Parrots on four weeks' trial and three months' talking guarantee. Why? Because all my Parrots are young, strong, and reliable. My lifetime has been spent among grey Parrots, both at home and abroad. I guarantee every customer every satisfaction. Grey Parrots are my special fancy. I have trained them, know their wants, and can give every purchaser a bird that will please him in every way. I can supply grey talkers, not thinkers, that will say almost anything, at reasonable prices. Before you purchase a grey or green Parrot, send for my Booklet, entitled "Talking Parrots." All my birds are sent on four weeks' trial, at my risk. Send postcard for catalogue.—Mrs. Forster, Princes Park Aviaries, Violet Street, Liverpool.



The improved **"SECURE" BREEDING HUSKS** for successfully rearing Budgerigars. Never fall to pieces as other kinds do. They have been the favourite for 16 years, and still remain unequalled. Competition and comparison increase their popularity, and every bird fancying paper has advised its readers to prefer them to other kinds. Principal Zoos, Parks and Budgerigar Breeders use them. Price **4/6** dozen, smaller quantities **5d.** each. No agents and no second quality. Pamphlet, invaluable to amateurs, entitled "Budgerigar Breeding," free on application. Send post card and read it before buying any husks at all.

HARPER, Upper Villiers Street, WOLVERHAMPTON.

C. A. LUER,

Scarlet Madagascar Weavers, 4/- each. Rose Cockatoos Red Breasted, 7/6 each. Pekin Nightingales, 1/- each, Grey Java Sparrows, 1/6 pair. White Bellied Mannikins, 1/6 pair Yellow Shouldered Whydahs, 12/6 each. Cock Cutthroats, 1/- each. Cockateals, 7/6 pair, Cock Budgerigars, 2/6 each. Adult Hen Budgerigars, 3/6 each. Adult Green Budgerigars, 5/- pair. Yellow Budgerigars, 10/- pair. Siberian Cock Goldfinches, 5/- each. Russian Cock Goldfinches, 3/6 each. Siberian Cock Bullfinches, 3/6 each. Telephone 7504 Central. Telegrams: "Lukullan, London."

C. A. LUER,

121, LEMAN STREET, LONDON, E.

JOHN D. HAMLYN

221, ST. GEORGE'S ST., LONDON DOCKS.

Arrivals week ending Feb. 16th, 1907.

1 good sized Chimpanzee, female, 1 adult Lioness, 1 Lion Cub, 1 Pinche Marmozet, 400 Mixed African Birds, 140 Budgerigars, 20 Yellow Budgerigars, 4 White Cockatoos, 1 Blue Tanager, 20 Yorkshire and 7 Norwich Canaries, 6 Rooks, 4 Jackdaws, 1 Mottled Starling.

Intending Purchasers will do well to send for February Price List before buying elsewhere. All mentioned in list is absolutely in stock and inspection is invited.

BUDGERIGARS. Arrival of genuine imported Australian Birds, a good opportunity to acquire fresh blood, 5/6 for adult hen and cock.

SELECTION I.—2 Bengaleese, 2 Silverbills, 2 Corn bassous, 2 Cutthroats, 2 Avadavats, 2 Weavers for 12/6

SELECTION II.—2 Blackheads, 2 Silverbills, 2 Weavers, 2 Javas, 2 Waxbills, 2 Avadavats, for 9/6.

Every bird guaranteed in perfect condition.

Beautiful Red and Black Grenadier Weavers, 12/6; Giant Longtail Red-shouldered Whydahs, 40/6; Red-faced Coly, 40/6; Mountain Wild Canary, 10/6; Cape Sparrow, 10/6; Madagascar Red Foudy, 5/6; Red-crested Cardinal, 6/6; Yellow-billed or Black-throated Cardinal, 7/6; Virginian Cardinal, 32/6; Cordon Bleus, 6/6; Fire, 6/6; Zebras, 6/6; Chestnuts, 12/6; Pintail Whydahs, 10/6; Russ's Weavers, 7/6, seldom imported, showing black and red; Superb Scarlet, Olive, Blue Brown and Black Tanagers; Parrots; Macaws; Cockatoos'

☞ 1,000 birds can always be seen any time between 8 and 6 o'clock, also Waterfowl and Animals.

Few Madagascar Lovebirds, 9/6 dozen; Bluewing Love, 18/6.

Java Sparrows, 6/6 dozen; Avadavats, 8/-; Blackheads, 6/6; Bengaleese, 12/6; Pekin Nightingales, 9/6; dozens only, cash with order.

Ten minutes from Mark Lane Station.
Telephone: 6341 Avenue.

PARROTS. PARROTS.

IF you want a genuine Parrot on four weeks' trial, send to us; satisfaction guaranteed and before paid for; all kinds of cages.—West, Riding Aviaries, Castleford.

CALIFORNIAN MOUNTAIN QUAIL,

twice the size of ordinary Californians, excessively rare, hardy, prolific, usual number of eggs 50 in a season, £4 pair, cheque with order; Latin name, *Callipepla picta*.—William Jamrach, Stoke Newington, London.

GATESHEAD C.B.S.

Annual General Meeting, February 13th. Good number of members present, including Messrs. A. Grey, J. Brown, F. F. Hawkins, W. Longstaff, J. Little, J. Kirkpatrick, J. Grieve, H. Johnson, J. B. Hubbuck, G Logan, G. Buck, J. Smith, D. Hope, C. G. Petterson, R. Lowery, F. Hayes, N. Jerden, A. Lister, F. Sanderson, T. Taylor, H. George, J. Weatherstone. The minutes of previous meeting were read and confirmed, one of these being to the effect that copies of the Cage Bird Union rules, received per Mr. A. Brown, he not forwarded to members, it being considered they were too much in the nature of an advertisement for certain advertisers. We are of opinion that rules of this description should be free from any advertisements whatever. The Committee having recommended that 9s. per class be paid as prize money in members' classes at 4s. 6d. first, 3s. second, 1s. 6d. third. This was accepted by the members, and paid to those present. The balance-sheet was read by the Secretary, and showed the income to be £159 19s. 11d., and the expenditure at £139 2s. 8d., leaving a balance of cash £15 5s. 3d. Assets, not including challenge cup, £5 12s., total. £20 17s. 3d., to be carried forward. The auditors, Messrs. F. F. Hawkins and J. Brown, reported that everything had been found in excellent order and correct. This was received with applause from the members present, and a vote of thanks was accorded to the Secretary and officials for their excellent management of the club's affairs. Election of officers for 1907:—President, Mr. A. Brown; Vice-Presidents, Mr. A. Grey (Morpeth), Mr. F. W. Latimer (Newcastle), Mr. J. Brown, Mr. R. Brewis, Mr. J. Joicey, Dr. Kapp, Mr. W. Clark, Mr. J. D. Philipson; Chairman, Mr. F. F. Hawkins; Vice-Chairman, Mr. J. Weatherstone; Secretary, Mr. Thos. Taylor; Assistant-Secretary, Mr. J. Grieve. Committee, Mr. J. Brown, Mr. W. Longstaff. Mr. J. Kirkpatrick, Mr. G. Logan, Mr. H. Johnson, Mr. G. Buck, Mr. H. George, Mr. Jas. Little, Mr. R. Lowery. Mr. F. W. Hayes, Mr. N. Jerden, Mr. A. Lister; Auditors, Messrs. Hawkins, Brown and Lister. The following were accepted as new members: Mr. R. Smith, 95, Woodhine Street; Mr. W. Mather, 122, Woodbine Street; Mr. G. Reed, 27, Clepham Street, Dunston; all of Gateshead. The Secretary intimated that he was unable to undertake the secretarial duties for the incoming year, as he was unable to attend the monthly meetings owing to business arrangements. The meetings were then arranged to take place once every six weeks, the first to be held on March 6th, 1907, and Mr. T. Taylor was then unanimously re-elected Secretary.—THOS. TAYLOR (Secretary).

PORTOBELLO C.B.S.

Meeting on Feb. 4th, 1907. Mr. W. R. Dunn (President) gave a very interesting washing exhibition, and explained the chief points of the process. In handling the birds he recommended members to take things calmly but firmly, as the birds soon submit to firm but gentle treatment. In soaping, brush as far as possible the way of the feather, the dirt round the eyes and beak being carefully removed. He preferred to wash underside of body first, as by doing this you softened the dirt on the flights and made it much easier to remove when the bird was turned. The whole process of soaping and rinsing should be got through as quickly as possible. After thoroughly rinsing and removing all traces of the soap, dry the bird with a soft, heated cloth; then carefully roll it up in a piece of old flannel cut to the necessary width, and leave it on its underside on a board in front of the fire for 10 to 12 minutes before putting it into the drying cage. He preferred to use brown Windsor or yellow soap made into a paste with a little water, and one drachm of horax to each ounce of soap. A little glycerine to be added to the rinsing water, as this serves to polish the feather. Birds should be washed five days before the show, and the first day after should be sprayed, and then brushed dry with a silk handkerchief—always being careful to brush the way of the feather. He would not advise members to wash their birds unless absolutely necessary. If the cages are kept covered during the moult with light muslin cloth, the birds should be in a fit condition for a number of shows without any hand-washing. The birds should be encouraged to take their bath at least twice weekly. Young fanciers were recommended to practice washing at first with Greenfinches, or any other hardy British Finch at their disposal, before attempting the handling of the more tender members of the Canary tribe. A feature of the exhibition was a drying apparatus, shown by Mr. Lamb, one of the members. One of the birds was put in this, but seemed to be longer in gaining vitality than those which were put in the drying cage made by Mr. Dunn. Two other members having successfully essayed the washing process, the meeting was brought to a close by a hearty vote of thanks being accorded to Mr. Dunn for his exhibition, and to the others for the part they had taken. Next meeting, first Monday in March, when Mr. John Bell will read a paper on "The Scotch Fancy Canary."—W. LECKIE and J. LEACH, Secs.

CARLISLE C.B.S.

The First General Meeting of the year was held in Mr. Bell's Refreshment Rooms, Botchergate, on the 29th January, but owing to the very wintry weather only a few members put in an appearance. The Secretary, also his assistant, Mr. T. J. Robson, resigned. The meeting was adjourned till the 12th of February, which resulted in a better attendance, The following officials were elected for the year:—Chairman, C. Cranston; Vice-Chair, Jas. McGuffie; Secretary, W. Thomas, 23, Pettril Street, Carlisle; Assistant Secretary, W. Wright, 17c, London Road, Carlisle, 71 members paid up. Room for meeting to be decided on later. Subscription 2/6.—JOSEPH J. ROBSON.

HULL C.B.S.

Syllabus for 1907.—March 4, Pair Show. Judge, Mr. F. Medley. April 1st, Discussion on Color Feeding and Rearing Young Birds. May 6th, Members' Nest Feather Show. Judge, Mr. Perkins. June 3rd, Members' Nest Feather Show. Judge, Mr. Brumby. July 1st, Classification for Open Show. July 13th, Half-Day Members' Show. Judge, Mr. Clews, Grimsby. Aug. 8th, Lecture on the Norwich Canary, by Mr. D. Hope. Sept. 2nd, Washing Competition. Judges, Messrs. Hope, Harland and Calam. Oct. 7th, Judging Competition. Judges, Messrs. Hope and Barwick. Nov. 4th, Specials and Stewards for Open Show. Dec. 2nd, Smoking Concert. Dec. 26th, Annual Members' Show.

PAISLEY & DIS. N.M.B. & F.B.C.

Annual Show, Painters Hall, Causeyside. A good turn out of pairs. Class I., Crest Pairs: 1, T. McCullock, an extra good pair, splendid entrance; 2, Skonce; 3, Bonar; 4, McLerie; 5, W. Elliott. Class II., Plainhead Pairs: 1, 2, J. Skonce, desirable pairs for breeding room; 3, 4, J. Sinclair, two good pairs to breed from; 5, T. Potts; 6, J. Sinclair. Class III., Yorkshire: 1, W. Elliott, fine pair, beautifully drawn, neat head, wings and tail; 2, R. Martin, a fine pair, not a feather out of place; 3, T. McNair; 4, J. Cowan. Muling Pairs: 1, P. Wylie, grand Goldfinch and lovely Yell. hen; 2, R. Campbell, must have given the judge some trouble to find first; 3, P. Wylie; 4, R. McLerie; 5, 6, A. Elliott. Hybrids: 1, 2, P. Wylie, Goldfinch and Bully, as steady as a rock; 3, R. McLerie; 4, T. Potts; 5, J. Cowan. The show was judged by Mr. Andrew Livingston, who gave every satisfaction.—R. MCLERIE, Secretary.

BORDER FANCY CANARY CLUB

Annual General Meeting held in Corn Exchange Hall, Edinburgh, Jan. 1st, Mr. Richardson (President) in the chair. Balance-sheet for 1906 showed, with balance from 1905, that club had a surplus of over £15, which was considered satisfactory. The new delegates were Mr. Wright (Carlisle), Mr. Dempster (Muirkirk), Mr. Lindsay (Motherwell); Auditors, Messrs. Duncan and Gilchrist (Coldstream); all other office-bearers re-elected. A motion by members in Brechin, seconded by Mr. Laidlaw (Hawick), that no member be allowed to win more than three club medals each show season. An amendment that medal question be left as before was put forward, but after some discussion the motion was carried by a large majority. Decided that, instead of guaranteeing novice classes, there be six medals given to different Societies for competition amongst members who have never won a club medal. A motion by Mr. Patterson, that green or cinnamon birds with white feathers in wings or tail be allowed to compete in green or cinnamon classes, was rejected. A letter was read from Mr. D. Smith saying there was a strong desire to hold a show of specialist clubs this year, and he moved that Border Fancy Club take part in it. After some of the members had spoken on the matter, it was decided that letter lie on the table. The President suggested that a small pamphlet be written on the Border Fancy Canary and sold to members to cover expenses of printing. This was agreed to, and Mr. Richardson, Mr. Bennet, Mr. Patterson and Mr. Arnot were appointed to carry it out. It was decided to have next general meeting at Edinburgh. A few new members were proposed and admitted. This being all the business, meeting terminated with vote of thanks to Mr. Richardson for presiding.—M. JAMIESON, Hon. Sec.

SWANSEA & DIS. C.B.A.

The adjourned general meeting, February 14th. A good muster of members turned up. Officers elected for ensuing year are:—Chairman, W. Robbins; vice-chairman, A.E. Taylor; committee, G. J. Rees, J. Evans, D. Jenkins, J. W. Ford J. H. Ford, J. E. Jeffries, E. M. Evans, R. Owen, W. T. Glover, J. Kirby, W. Bowen and W. Cheley; show managers, P. Jenkins and T. Gamage; C.B.U. delegate, D. Jenkins; hon. solicitor, J. Viner Leeder, Esq., auditors, J. Blackey and J. Gay. The secretaryship will be in the able hands of one of our most enthusiastic young members, Alf. Hitchings, 17, Treharne Road, Landore, Swansea, who, I am sure, will carry out his duties to the satisfaction of all. I regret I am unable to accept the office this year as I cannot spare the time, having recently gone into business, but I shall still be on the list of working members. I also take this opportunity of thanking all those who sent me letters congratulating us on the way we managed our last show. I am glad to say that our Society is looking in a very prosperous state, having, up to date, made 14 new members. We are also preparing our elaborate programme for the coming season in the way of lectures, table shows, washing exhibition, judging competitions, and also making a few attractive and educational experiments for new members, who are mostly young fanciers. We should be glad to receive the name of any young fancier who wishes to cast his lot in with us. Our annual show is fixed for our usual date, viz., November 6th and 7th.—J. EVANS (retiring secretary).

Dissensions in the Crest Club.

A Split over the Cage Bird Union.

Messrs. Clarke, Crisp, Greeves and Tyson resign on the spot.

This meeting was held on February 16th. Mr. R. L. Crisp occupied the chair and was supported by Messrs. King, Rhodes, Heath, Dobson, Barnett, Sands, Mills, Johnson, Greeves, Clarke, Pooley, Treasure, Lazarus, Broad, Prance, Robson, Stevenson, Dawn, Mennott, Crookes, Gale, Pearce, and Mr. J. Tyson, hon. sec.

Mr. Tyson read the report, from which we gathered that nothing of any great importance had transpired during the year, twenty-four new members had been elected, but on the other hand, thirty-three had not paid their subscriptions. £35 had been spent in supporting shows, which left a balance of £15 1s. 9d. in hand, and there were other assets of £60 value. The Novice question was still unsettled, but he hoped that some common decision would ere long be arrived at. He regretted to say that the members of the committee had not taken that lively interest in the club he would have liked, few had introduced new members, and none had sent suggestions, whilst some did not ever take the trouble to return the papers sent out to them. The question of affiliation to the Cage Bird Union had been considered by the committee, and 7 had voted against, 4 for, and 4 were in favour of the Annual meeting dealing with the matter. He drew attention to the trouble that might arise through their patronago being given to shows which had a different definition of a novice to that held by the Crested Canary Club.

Mr. Rhodes pointed out that in granting their patronage, the societies could easily be referred to the C.C.C. definition, and that must govern their classes.

Mr. Crisp said he was afraid Mr. Tyson was somewhat pessimistic; he was a croaker, and he should not be. He thought the balance-sheet most favourable, and quite the best ever issued by any specialist club. There certainly had been few members elected, but that was a mere nothing, every society had its ups and downs, and they must expect theirs. The result was good, and much credit was due to Mr. Tyson for the same. The club existed for the benefit of the variety, and he thought some of the balance in hand might go towards the cups which were not yet paid for. Mr. Rhodes proposed, and Mr. King seconded, that the report be adopted. On the motion of the chair, votes of thanks were given the auditors, Messrs. Heath and Clarke, and the hon. sec., Mr. Crisp saying that no man could have the interest of the Fancy more at heart than Mr. Tyson, no man could have worked so hard for it, and no man could have stood the reverses and rebuffs to which he had been subjected.

On the motion of Mr. King, seconded by Mr. Treasure, it was decided to take £5 15s. from the funds of the club to liquidate the debt on the cups.

Mr. Rhodes proposed, and Mr. King seconded, that the C.C.C. become affiliated to the Cage Bird Union. Mr. Rhodes said the Union had been formed for the good of the Fancy. If the rules were not all that could be desired, that could be amended. It should be the desire of every fancier to help whatever was brought forward for the good of the Fancy, in fact they could not do too much to help. The Cage Bird Union was not perfect at present, but improvement and amendment were sure to come.

Mr. J. S. Clarke expressed himself as in favour of the principle governing the Cage Bird Union, but he objected strongly to the manner in which it was being worked. He asked if the dualumvirate controlling the Cage Bird Union really represented the Fancy at the present time? The rules had been foisted upon the Fancy without proper discussion, and without the Fancy having a chance of expressing its approval or otherwise. It was an insult to ask a progressive Specialist Society like the C.C.C. to join a discredited rump like the Cage Bird Union.

Mr. Rhodes said, in London it only needed one society to favour a thing, no matter what its worth, for the others to oppose it. The Cage Bird Union was needed, and if they thought it was not doing right, they could, by joining help to make it right, and control its working.

Mr. Greeves was strongly against the proposal. The C.C.C. was formed to advance one variety, and it would be weakness on their part, and detrimental to their interest to join the Cage Bird Union. It would take their work out of their hands, and render them impotent. He thought the proposal came at a most inopportune moment, and it would look as though they could not manage their affairs.

Mr. Clarke: The executive of the C.C.C. is quite capable of managing its own affairs, whilst the Cage Bird Union is not competent.

Mr. Dobson thought they ought to join. If they disqualified and suspended a man, there was nothing to prevent him joining another club and showing, whilst there authority was only over the Crest Club; the Cage Bird Union exercised authority over the whole Fancy.

Mr. Treasure said union is strength, and they should have a voice in the management of the Cage Bird Union, and thus have a hand in pulling down the abuses which exist. On the vote being put, affiliation was carried by 10 to 8

Mr. Greeves: Shall I be in order in asking that this matter go before the members?

The Chairman: Unfortunately, it cannot. It is decided.

Mr. Clarke: Shall I be in order in asking you, Mr. Chairman, to accept my resignation.

Mr. Greeves: I also must resign.

Messrs. Clarke and Greeves then left the meeting.

The Chairman brought forward the question of registration and publication of breeders' names in show catalogues, saying that he desired to give honour where honour was due. If the proposal was carried it might make the price of good birds go down, but it would increase the price of the second raters, because of breeders getting the credit of breeding the champion birds thus sold.

Mr. Rhodes thought they should be careful as it might have far reaching results. It might affect the entries at shows. Could we give prizes to breeders so as to advance the idea a step, before committing ourselves to the fuller scheme?

Mr. Heath expressed himself as favourable to the motion, and suggested that rings should be purchased right away, so that all young birds bred this season could be rung and thus registered.

Mr. King spoke of the good registration did in the kennel world, and he thought it would do equal good in the Canary Fancy. At present the poor man breeds and sells. Is it right he should be debarred from the credit of being the breeder? Registration would be a good thing, and all would be gainers.

Mr. Rhodes said the man who showed and said he bred a bird he had bought, committed a fraud, but he thought the rules of the C.C.C. would reach him. He certainly thought they should proceed with caution.

Mr. Trance said old birds could not be rung.

Mr. Chairman; All good birds can be easily traced.

Mr. King then proposed, and Mr. Heath seconded, that the matter go before the members, for them to vote upon, and this was carried unanimously.

The Chairman said the Cage Bird Union were likely to bring out a rule governing the definition of a novice, therefore he thought it would be wise for them to do nothing at present, especially as their definition was likely to be the one adopted. On the motion of Mr. Johnson, seconded by Mr. Broad, that in all classes for novices, there must be at least three competitors or the show would not count.

Mr. Stevenson asked if something better could not be formulated in the way of patronage to shows than the 5s. specials. He thought they were not much valued.

The Chairman thought that points cups might be substituted.

Mr. Rhodes thought that the arrangement of specials was best left in the hands of the chairman and secretary.

The Chairman said the meeting having decided to join the Cage Bird Union, he must resign. He objected strongly to Rule 17, and considered it was altogether wrong. It should be carried further, they only ought to accept entries from affiliated members. He had a great objection to anyone dictating to him when he should, and when he should not show.

Mr. Heath: Rule 17 will be altered, it cannot stand. No one need resign because of that. Rule 17 is unworkable in its present state, and no big show could be run under it, therefore it must be altered.

Mr. Rhodes: Rule 17 is being dealt with by the Cage Bird Union to-day, and it would be a great pity for Mr. Crisp or anyone else to resign. There is some good in the Union, let us try and find it, and put out the bad. In all things we can find something to object to, but these things cannot be altered, unless those who object stay in and see that they are altered.

Mr. Tyson: I shall resign too.

BARNSLEY & DISTRICT C.B.S.

A meeting was held at the Malsters' Rest, Feb. 16th, upwards of a dozen members present, when it was decided to make strenuous efforts to pull the society together. The society is in a sound position financially, having a balance in hand of about £5, but has been let down by members taking only a passive interest in its management. The subscription for 1907 has been fixed at 2s. 6d., and it is hoped that all fanciers in the district will be able to see their way to become members. Given half-a-dozen workers this society has a bright future.—T. Coward, 22, Blenheim Road, Barnsley.

CINNAMON MARKED YORKSHIRE CANARY CLUB.

Committee meeting, Saturday next, February 23rd, Market Tavern, Bradford, 5.30 p.m., prompt. Business to complete final arrangements for smoking concert to be held at the Market Tavern, on Saturday, March 2nd. Mr. D. Sunderland has kindly promised to present the prizes to the various winners in the competition. The winners in the Open Competition are as follows:—Messrs. Sutcliffe and Son, first prize, with 140 points; Mr. J. Wilcock, second, with 100; Mr. H. Dobson, third, with 80; Mr. J. Hartley, fourth, with 67 points. In the Novice Competition Messrs. Ogden Bros. first, with 73 points; Messrs. Halmshaw, second, with 54 points; Mr. E. B. Denton, third, with 42 points; Mr. S. Lingley, fourth, with 19 points. All Fanciers are cordially invited to attend the smoking concert on March 2nd, at 7 p.m., when the prizes will be presented to the winners.—R. Garnett, 17, Woodville Terrace, Windhill.

NEWCASTLE GOOD INTENT C.B.S.

A Highly Successful Social.

A most successful social was held Feb. 5th, in the Co-operative Hall. Members and friends to the number of nearly 100 were present. After supper the evening was spent in dancing, singing, etc. The programme included some of Tyneside's finest talent. The songs of Miss Currah and Miss Elliott were greatly appreciated. Amongst the gentlemen who delighted the audience with their music were Mr. R. H. Thompson, Mr. T. Robson, Mr. J. Macdonald (Chairman, Wallsend S.B.S.), Mr. Walton, Mr. Craggs, Mr. Riley (violin), Mr. Pocock (concertina). Our worthy Secretary, Mr. Hutchinson, quite split our sides with the laughter he provoked when singing "Our Neighbours Down Below" in the local dialect, and those who stayed to the last were well rewarded in hearing Mr. Slack sing his comic song. Mr. Currah quite excelled himself in his two (too) humorous recitations. In the "Quack Doctor" he had a hit at many of the officials, from the one who ate too much on the occasion of Blaydon Show to him who was kicked by his mule and him who was "blown to pieces" by an explosion at the barracks whilst seeking green food for his birds. His recitation about the two Frenchmen quite brought down the house, whilst one or two juveniles flushed with envy at his fluent mastery over the French language. We are greatly indebted to Miss Craig, Mr. Martlew and Mr. Thompson, who kindly gave their services as accompanists. Mr. Shepherd, as is usual, most ably filled his position as Chairman in the unavoidable absence of our worthy President, A. J. Haggie, Esq.; and in presenting to Mrs. Curry a silver teapot and hot-water jug, and to Mrs. Hutchinson a gold and diamond brooch and gold chain, expressed on behalf of the members their great appreciation of the secretaries' abilities, their kindness and courtesy. He believed the Newcastle Society is to be one of the leading societies in the Kingdom, as it is now the largest in the North. To the secretaries was largely due the great success of the first annual show, it being almost if not quite a record for a first show; and there was no doubt that, as we get more known and established, and with two such able secretaries at the helm, our next show will far eclipse the first. To which Messrs. Curry and Hutchinson briefly replied, expressing their thanks for the handsome presents and their determination to work harder than ever in the interests of the Society. At 12 o'clock a most successful social ended, and so much was it enjoyed that it is hoped to make it an annual event.—T. C. Crawhall, Hon. Sec. and Treasurer for testimonial fund and social.

DARLINGTON C.B.S

Annual general meeting at their new club-room, the Half-moon Hotel, Northgate, Mr. R. Todd presiding. The Secretary presented the report and balance-sheet for the year, and both showed satisfactory progress; and although there was a loss on the open show held in December, there was still a satisfactory balance of £4 to carry forward to the next account. Officers for the coming session were then elected. President, E. D. Walster; vice-Presidents, H. Pike Pease, M.P., T. E. Bates (Mayor), Councillors Leach and Young; Chairman, R. Todd; Hon. Secretary and Treasurer, E. Brunskill; Assist. Secretary, R. M. Carter; Auditors, P. M. Carter and W. Allan. Next open show, Saturday, Nov. 30th, 1907, and a series of members' table shows, lectures, washing exhibition, etc., were arranged for. Ten new members have joined since the commencement of the year. The office-bearers for the past year were thanked for their services.

GRIMSBY & DIS. C.B.S.

Second Meeting. February 13th, Slatter's Room, 160, Freeman Street. Considering this is only our second meeting, we think we are doing remarkably well; having brought together nearly 30 members. Several new members were enrolled, as well as three honorary members. After considerable discussion, it was unanimously decided to hold an open show, the date being fixed for October 16th and 17th. J. C. Barnes was then selected to adjudicate, if convenient for him. After the business a judging competition was keenly entered into by the members. Our chairman, Mr. H. E. Stubbs officiated as judge. The varied opinions expressed in the competition brought out some interesting discussions. Next month we are to have a table show for British birds.—Harry Emerson (Hon. Sec.), 2, West Parade, Grimsby.

METROPOLITAN ASSOC. OF CANARY, MULE, AND HYBRID BREEDERS.

Fortnightly meeting at "Crown Hotel," Lavender Hill, S.W., on Thursday last. A judging competition in pairs matched for breeding took place, with the following result:—Champion section: F. J. Marsh, 1st; G. Kearney, 2nd; C. Peck, 3rd. Novice section: A. J. Head, 1st; F. Rides, 2nd; A. Allison, 3rd. Mr. John Robson was judge, and, in a subsequent lecture, he pointed out the several good and faulty points the twenty different pairs possessed. Messrs. Cooper Bros., F. Rides, R. Brownlie, G. Hartley, S. Blum, C. Gray, T. Sawyer, F. S. Matthes, Mrs. Tisdall, Mrs. Gill and Mrs. Peck were duly nominated for membership. The Chairman, Mr. F. J. Martin, was unanimously elected delegate to the Cage Bird Union, and, in thanking the members for their vote, mentioned that he had, with Messrs. G. Kearney, A. J. Head, W. McGregor, G. Saitch, C. Peck, seceded and left the Battersea C.B.S. The meeting closed with a hearty vote of thanks to Mr. John Robson for judging and giving so interesting a lecture.—A. J. Head, Sec.

NATIONAL BRITISH BIRD AND MULE CLUB.

Annual General Meeting.

The Annual General Meeting was held at the Crystal Palace on Saturday last, and was attended by a good number of London and country members. The Chairman, Mr. John Robson presided, and amongst those present were: Messrs. Maxwell, Dewhurst, Vale, Sandy, Hathaway, Frostick, Trower, C. Cooper, Goodchild, Page, Fulljames, Rouse, Lott. The country members came up rather stronger than usual, and included Messrs. J. Wilson (Workington), W. Lowne (Yarmouth), Galloway (Reading), Walsh and Bentley (Blackburn), Mrs. Skey (Plymouth), Mrs. Frostick, Mrs. Plumbridge, J. F. Hills (Sudbury), W. T. Plumbridge (Orpington), and the hon. secs., Plumbridge and Carr.

The minutes of the last Annual General Meeting were duly passed. One of the important items at the meeting was the reading of the Scrutineer's report of the result of the voting for committeemen for the ensuing year. Members appeared to be pretty well satisfied with the late committee, all being re-elected, Mr. Dewhurst heading the list. It is clearly stated in the voting papers sent out to all the members that they should not vote for Vice-presidents who are ex-officio members of the committee, yet, in spite of the notice, many members voted for Vice-presidents.

In reading his report on the work of the club for the past year, Mr. Plumbridge referred to three very enjoyable events—namely, the first Annual Dinner, which took place last March, when a very pleasant evening was spent, and the success was very largely due to the untiring efforts of Messrs. Trower and Vale in organising the affair and getting together a number of first-class artistes. The next event he referred to was the presentation to their late hon. sec., Mr. W. A. Lott, who had done such good work in the interests of the club, and there again they were indebted to Mr. Vale, who was responsible for the musical arrangements. The Annual Outing, which last May took the form of a visit to Epping Forest, where numbers of the members and fancier friends were able to study many of the wild birds in their natural haunts. These outings appeared to be very popular, another London society joining in the ramble. The weather on each occasion has been anything but pleasant in the past, but it is hoped that better luck may prevail this year, at any rate on May 25th next, when he hoped a good muster would sally forth thirsting for knowledge of our birds when at large.

Other events which had helped to make the monthly meetings pleasant and instructive were entertaining lectures by Messrs. Silver, Goodchild, Trower, and Page. These lectures were greatly appreciated by those who had the pleasure of hearing them, and the country members hardly knew the treats they missed. He tendered his best thanks to the Hon. Treasurer for keeping the club's account, and the committee, who gave up their valuable time in conducting the club's affairs.

Why will they not Pay Up?

He had one grumble—that was the dilatory manner in which members paid their subscriptions. This was a bugbear which greatly retarded the good work of the club, and gave the Hon. Treasurer a lot of unnecessary trouble.

During the past show season 37 medals had been offered for competition at shows, besides three valuable silver cups, but the competition generally was very poor, some medals going for a very small number of points, and several being withdrawn for want of the three members competing, as provided by the club's rules.

Mr. Plumbridge thanked the Fancy Press for publishing the notices and doings of the club, and wound up by tendering the resignations of himself and his co-hon. sec., Mr. Carr, as they both felt that if a secretary more in touch with fanciers could be found he might be the means of increasing the membership. The resignations, we need hardly say, were not accepted.

Mr. Bentley, in moving the adoption of the report, said he was quite satisfied with the work of the club for the past year, and wished he was in a position to attend the monthly meetings; but as it was he usually managed to attend the annual meeting at the Palace. Mr. Sandy seconded, and the report was accepted as read. Mr. Carr gave full details of the winners of the club's medals and cups. Nine gold, 17 silver, and 11 bronze medals had been offered for competition, one silver medal being won with three points. New designs for the medals were on view, and seemed to be a great improvement on the former pattern. They are well finished and bear the National Arms in enamel. The cups were won by Mr. Cunningham, with 13 points in the Hybrid section; Mr. A. Howe, with 137 points in the Hardbill section, and Mr. R. J. Howe, in the Insectivorous section. The Hybrid cup was really a walk over for Mr. Cunningham, as Mr. John Williams had secured over 200 points, but had omitted to nominate his birds in accordance with the club rules. Mr. Trower spoke upon the financial position of the club, which appeared satisfactory, but would be far better if the subscriptions came in more readily. Various suggestions were made as to the best methods of increasing the club's membership, and Mr. Wesley Page offered a gold medal and Mr. Trower a silver medal for the members introducing most new members during the ensuing year. Four new members were elected, including Mr. Arrighi, of Edinburgh.

The Chairman briefly recounted the work of the club for the past year, and the meeting was concluded with a hearty vote of thanks to him.

THE CRYSTAL PALACE SHOW.

A Sensational Event.

A Good Entry, Fine Weather, Splendid Management, Exciting Scenes, over £300 in Sales, and a Record Attendance.

Held Friday, Saturday, Monday, and Tuesday, February 15th, 16th, 18th and 19th.

Another Palace Show has come and gone, and when the history of the fixtures held at the Sydenham "Glasshouse," comes to be written, that of 1907 will be referred to as one of the most interesting of the series. Every Palace Show, as it passes, has some particular feature or features to distinguish it from others, and the one just concluded was in no wise singular in this respect.

The task of managing such a venture as the Great Bird Carnival is a huge one, and the man who undertakes it needs to be a born organiser if it is to be carried through properly. This year we had two past masters associated as managers, and both having been trained in a good school, and having experience behind them, what appeared to the uninitiated a truly stupendous undertaking, and likely to tax the powers of anyone, however able, was carried through with the same admirable celerity and despatch, method and order, which have characterised all past shows having Messrs. H. Lambert Brown and J. W. Ramsden at the helm.

THE HEATING ARRANGEMENTS.

Upon the present occasion they had to meet a state of things without parallel in the history of the show, and that was the matter of heating. At the exhibition of the National Cat Club, held in the same portion of the Palace, in December last, there was no heat and little light, and this state of things having become pretty generally known, it made many Cage Bird Fanciers anxious; we can well imagine the Show managers were anxious, too. But Messrs. Brown and Ramsden are not easily dismayed. They knew that the Show arena must be warmed. Cats might stand the cold, but the choice and delicate varieties of Canaries, British and Foreign Birds likely to be entrusted to their care, could not do without artificial warmth, while the comfort of visitors to the Show also had to be considered. The matter was tackled most energetically, and as readers of CAGE BIRDS will have seen by the announcement made a few weeks ago Mr. Ramsden succeeded in making arrangements for the Show to be properly heated.

The heating stoves on order were not used, for Mr. J. W. R. discovered a more excellent way. On entering the show many visitors were surprised to see a huge black cylinder running down the centre aisle. This was a hot-air pipe which had been specially fixed up so as to keep the temperature right, and others were also arranged round the sides of the show. Now heat cannot be kept up without coal, so 18 tons of the best Welsh smokeless coal were got in for the sole purpose of heating the Palace Bird Show. Mr. Ramsden was not leaving anything to chance.

TWO PLEASING FEATURES.

The Show was favoured with most genial weather, so that the full capacity of the new heating arrangements had not to be put to the test. Still, the improvement on last year's conditions was most marked, and earned the cordial appreciation of visitors, both fanciers and otherwise, and no doubt the birdies, wee and big alike, would have added their meed of praise had it been possible. The list of casualties during the show constituted a record—not, mark you, in its length, but in its smallness. There was not even a single dead Canary, nor yet a British bird; only one or two small Foreigners departed from this "Vale of Tears." And the management rightly takes pride in the fact.

Another thoughtful innovation was highly apreciated, more especially by visitors of the gentler sex. "How nice these chairs are." "How thoughtful to give us chairs to sit upon in such a cosy place." "What a comfort are these chairs." Similar expressions of gratitude were to be heard on each day of the show, and they referred to the provision of a double row of chairs down the centre aisle, close to the main hot-air pipe. Even the sterner sex did not disdain to rest hereabouts, especially when congenial company offered itself. This certainly was one of the most commendable of the new arrangements, and we only regret our arduous Press duties prevented our taking fuller advantage of it.

THE COMMITTEE.

The show managers' efforts were backed up most ably by the members of the L. and P.O.S. Committee, who were to be seen taking a very active part in the work which had to be done. Amongst them were:—Messrs. Laskey, Matthes, Mortlock, Couzens, Oldaker, R. J. Pretty, Boaler, Day, Graves, Greenway, Hazell, Picard, Pycroft, Brooks, Tringham Leclair, Johnson, Richardson, and Hodson. These Fanciers worked many long hours, and to excellent purpose, the comfort of both visitors and birds receiving their special attention. Our old friends—very old friends, as reference to our supplement will show—Messrs. Small and Grutchfield, were the "professional feeders," and got through their duties in their usual able manner, it not being too much to say that they were unwearying in their attention to both the birds and their owners. And some of the latter need delicate handling and an angelic temper, for the different ideas entertained about the feeding of the birds would astonish the most ardent "food reformer" that ever dined at Eustace Miles' latest restaurant. "Jimmy," however, and his coadjutor, were equal to all demands.

THE GATE.

The attendance of fanciers and the general public can only be described as splendid—on the Saturday it was really astonishing. From all over the country bird-lovers found their way to Sydenham, and it seemed like a return to the palmiest days of the world-known fixture. We question, indeed, whether anything quite so good as the "gate" here achieved has ever been accomplished before. Our own memory goes back a goodly number of years now, and we can recall no show at which the same enthusiasm, good fellowship, and keenness were to be noted. The show managers put the attendance down as an easy record—and they ought to know! Our visitors' book tells an interesting story of the distance many fanciers travelled to be present. What is even more gratifying to record is the fact that everyone seemed thoroughly pleased with the exhibition and to spend an enjoyable time. Should the fates decree the end of the old Crystal Palace many a sigh of regret will arise from the devotees of the cage-bird hobby or we shall be much mistaken. It was a pleasure both to meet and shake by the hand so many old friends and to make the acquaintance of so many new ones. May we meet again under equally pleasant conditions for many long years to come!

THE JUDGES' LUNCHEON.

The Judges' Luncheon was one of the brightest and best-attended functions of its kind it has ever been our pleasure to attend. An attempt to photograph the gathering was made on behalf of CAGE BIRDS, with what result will be discovered on another page. Mr. Crabb, the L. and P.O.S. President was in his best form and presided over the gathering in his usual genial manner. When the "good things" had disappeared, and the judges (and others too) felt recuperated after their heavy morning's work, Mr. Crabb proposed "The Health of the Judges," and expressed the pleasure it gave him to place before them so good a show, and to tell them that they had drawn a record number of exhibitors—never before had so many people sent birds to the Palace. The toast was very heartily received, and Messrs. Hills, Mundell and Rhodes were called on to respond as "old," "middling-old" and "young" judges respectively. Mr. Hills, when returning thanks, mentioned the interesting fact that this was the 30th year in succession that he had visited the Palace Show, and that on 27 occasions he had been honoured by being appointed to judge. Mr. Mundell evoked roars of laughter by several topical sallies he indulged in, which, as "after-lunch" remarks are always privileged, we shall leave to linger in memory only. He said he felt like a suffragette—presumably likening to policemen the exhibitors who would shortly charge down upon the poor judges and "cut them up" with caustic comments and other pleasant things. Mr. Rhodes spoke of the consideration the judges always received from the officials, and raised a laugh when he wound up a neat speech by saying: "We can always count on your goodwill and on the goodwill of the winners; but with those who are behind we are not, as a rule, so fortunate." Before breaking up, Mr. Crabb said he would ask the company to drink the health of "The Visitors," with which he would couple the name of Mr. F. White, a member of the Victorian Canary Society, in far-away Australia, who had come over on a visit to England with, as one object, the intention of seeing the present show. No doubt he would give them his impressions of the Fancy here as compared with "down under." He was pleased to note that they had received entries this year from Australia. The toast, which included prosperity to the Victorian C.S., was enthusiastically drunk. In reply, Mr. White said he was no hand at speech-making, and that he had not had a fair chance as yet of looking round. He was very pleased with the hearty reception he had met, and should carry away extremely pleasant recollections of the Fancy and the fanciers of England. At some future time he might put his impressions of the birds before them.

THE SALES.

At the sales office all was bustle and hard work as soon as the time of opening drew nigh. What a crowd waited patiently for the shutters of the "peep-hole" to go up! What a pile of coin of the realm quickly accumulated at the rear! And what a heap of bargains the lucky ones picked up! Although no sensational prices were paid by anyone, the total value of the sales will, we believe, come out well over £300. The highest price realised was £8 for Messrs. Bailey and Swanger's winning clear yellow Yorkshire, that sum being paid by a well-known London lover of the lengthy ones. Messrs. Haigh and Son's third prize exhibit in the unevenly-marked class went for £5, and Mr. Hodgson's third prize clear yellow for £5 10s. No highpriced Norwich or Crests were claimed, but some dozens of the former and three of the latter changed hands out of the open classes. Two cinnamons, Mr. Nelson's, found new owners at £5. A Lancashire of Mr. Green's was claimed at £3. Throughout the Lizard, Border and Novice sections "sold" cards were not uncommon, especially in the last-mentioned. The Limit classes had a regular raid made on them, the sales in every variety being phenomenal. Hardly a pair matched for breeding remained unsold. Mr. Ramsden said he had never experienced anything like it before, the demand for really good couples being absolutely more than he could cope with. Considerably over 30 pairs of birds found purchasers out of class 88 (Plainheads, price limit 35s.) alone. In the extra stock class, which had 80 odd entries, close on 60 pairs changed hands, and a considerable proportion of single birds also found new owners. This speaks volumes for the popularity and prosperity of the cage-bird hobby to-day, and we understand that the great majority of the buyers were people anxious to enter upon it. The cage section was also practically emptied by purchasers. In the British birds the sales were unusually heavy. Mr. Gill's albino Bullfinch found a fair admirer, who planked down £6 for it; and the winning Siberian Bullie was claimed at £2. Mr. Maxwell's Magpie had a claimant at £3 15s., Mr. Robinson's un-noticed Hawfinch at £4 10s., Mr. Francis's Hawfinch at £2, two Nightingales fetched £2 10s. and £2 respectively, and other sales among the Goldies, Siskins, Greenfinches, Bramblefinches, etc., totalled about £15. Several Hybrids changed hands, but not at long prices. Quite a number of Foreign birds found fresh owners, among them the Black-headed Caique, Lineolated Parrakeets, Blue-bonnets, Golden-breasted Waxbills, Avadavats, Diamond Finches, Japanese Tits, and a number of Budgerigars and Love-birds. Altogether, things were decidedly rosy down by the sales' office.

THE STALLS.

At the stalls big business was also being done. Inside the show, Messrs. Carters had their usual tasteful stand of seeds and bird-foods, and attracted the inquiring attention of a host of bird-keepers. Mr. Roehl had a fine display of Rollers and appliances suited to them, also every description of requisite for the bird-room. Incidentally, he mentioned to us that the demand for his new catalogue and price-list was so heavy that over £20 worth were given away on the Saturday alone. Outside the show itself, Mr. Newley, the well-known cage-maker, had a splendid display of goods designed to meet every need, and a more tasteful display of high-class, well-made and thought-out cages has seldom, if ever, been on view. He was kept very busy by the fanciers present. Messrs. Trower and Co., the well-known seed merchants, put up a grand display of seeds, foods, medicines and appliances. They cater very thoroughly for the bird-keeper, and we understand that heavy business came their way, Mr. Trower and his indefatigable assistant, Mr. Silver, being kept going all the time. Messrs. Hydes, whose reputation as bird-food specialists is a very wide one, also had a handsome and striking stand on which to show their many customers the specialities associated with their name. With them, too, business was brisk and bright. Our own stand was besieged by crowds of good friends, and admiration at our display of plates, books and the like was pretty generally expressed.

Comments of the Judges on their sections will be found on other pages.

THE JUDGES.

The judges were Messrs. H. T. Camps (Foreign), S. R. Compston (Lancashires and Lizards), S. Cook (British), J. Dewar (Borders and Scotch), J. Dobson (Limit), T. Heath (Yorkshires, Yorks. Greens and Cinnamons), J. F. Hills (British), W. Mundell (Yorks.), J. H. Payne (Norwich and Nor. Greens), A. Rettich (Rollers), R. Rhodes (Crests), J. Robson (A.O.V. and Limit), J. H. Roe (Hybrids), W. Swaysland (Foreign and Cages), G. E. Weston (British, and Foreign Gold and Bullfinches). All these gentlemen had their judging "slips" completed in good time, and catalogues with awards were on sale at an early hour. Taken on the whole, their decisions seemed to meet with very general favour, as we heard very few "grumbles" that could be called in any way serious. They were favoured with an excellent light in which to get through their tasks.

CRITIQUE.

CRESTS AND CRESTEREDS.
Mr. R. Rhode's Classes.

CRESTS, YELL. (4): 1, Stanger and Herdman, the well-known "Cock o' the North," left wing marked, dark crest, a clinking good bird, excellent substance for a yellow, beautiful broad, leafy feathers, nice big, flat breastpiece, well arranged and shapely; 2, Howard and Son, lightly variegated, dark crest, lacks the spread of leader, yet by no means a bad specimen, neat, fair-sized crest, splendid quality throughout, stout frame, set on good legs; 3, Woodland, green, nice expanse of crest, just a little shield-shaped, but well built up and neat, good body substance, not much between this and the second; 4, F. J. Green, wing and neck marked, excels in quality of feather, stout, shapely, neatly-clothed body, carries a neat crest, which is somewhat on the small side. BUFF, CL. BODY, DARK (2): 1, Mills, extra good frame, stout and of fine shape, feathers of extra good quality, headpiece beautifully neat, though a shade oval in shape, well finished off at back, grandly drooped, and holds a rare lot of feather, fine frontal, altogether a very nice specimen; 2, Brotherton, another wonderfully good-bodied bird, carrying plumage of the right texture, splendid expanse of crest, inclined to be shield-shaped, and not so well groomed as leader, otherwise little separates them. A.O.V. BUFF (6): 1, Cairns, a beauty, wing marked dark, thick-set, shapely body, lovely texture of feather, large, well-rounded crest, thickly built and well laid, fine sweep of frontal, a very taking specimen, whose worst failing is a centre a wee bit too forward, and that is but a trifling defect; 2, Horton, wing marked dark, with one or two light feathers in the crest, sweet bird, with a headpiece as round as a daisy, and quite as neat, excellent size and frontal, A1 body for size, shape and clothing; 3, Woollard, lightly variegated, nice substance and shape, excellent quality, big, well-built crest, with an extra good frontal, put down in fine form, and well worthy of its place; 4, Radley, green, fine-chested, upstanding bird, heaps of feather, in fact rather too much for him to look neat, lovely texture and colour, apparently has a very expansive crest, which, however, is not in good form, still, as he is only a youngster he should make up a clinker next year, thickly-built headpiece, with a grand sweep at front; vhc, Horton, variegated, not quite the equal of his stable companion, yet has a grand body and an excellent crest, inclined to lift a little when we saw him; hc, Tope, wing marked dark, clinker for quality, good-sized, very neat crest, well-centred and drooped, let down a little in body substance. CRESTED HEN (3): 1, 3 spls, Cairns, "Lovely Lady," and a very fitting designation, she being indeed a charmer, wing marked dark, beautiful broad feather on a stout, shapely body, topped by a clinking crest for size, and radiation round as a two-shilling piece, and thickly built up of veiny feather, drooped to perfection, neat as possible and put down in rare form, a much-admired exhibit; 2, Horton, yet another gem, lightly variegated dark, excellent body properties, and the perfection of broad, leafy feather, carries a very large beautifully-drooped crest, made up of layers of grand feather, perhaps hardly so perfectly rounded as winner's, yet really first-class, a well-known performer on the show bench, and we thought she was hardly looking so perfectly dressed, if one may so term it, as we have seen her on previous occasions; 3, Howard and Son, lightly variegated dark, a very nice hen, not quite of the same class as leaders, yet much above the average, good body and quality of feathers, well-shaped crest, trifle out at centre. CREST-BRED YELL. (3): 1, Tope, variegated, perfect picture for richness of colour and quality of plumage, good size, rare chest and head, well domed and clothed, wide entrance, pronounced lashing; w.c., Gate, a very nice-looking buff—a pity to be wrongly entered; absent, Mills. BUFF (8): 1, spl, Horton, the noted green, a lovely specimen for feather properties, wealth of body feather of very silky quality, broad and leafy, head lashed and covered to perfection, grand entrance and rise, neat beak, deep, well-rounded chest, a rare handful in substance, a very taking bird; 2, Dobson and Son, well-known North-country winner, and a clinker too, very massive frame, carrying heaps of feather of A1 texture, wonderfully wide, domed skull, grand browing and turn-over, a fine exhibit, but a little down in condition, or would have made a closer race of it; 3, Cairns, green, grand length, hardly so thick-set as leaders, almost their equal in quality, carrying an immense amount of feather, which is hardly stowed away as neatly as it might be, extra good in head properties, fine entrance and cushion, well browed, a more than useful bird; 4, Brooks, very nice variegated, upstanding, and a little slimmer than those above it, bold head, well lashed, good in rise and entrance, feather of really fine quality, put down in right good trim; vhc, Calver and Son, upstanding, fine-chested bird, rare good head for rise and browing, splendid leafy feather, presumably beaten in the turn-over; hc, Mills, green, shade smaller, yet a bird of substance and shape, sweet head, well cushioned and browed, full of quality; c, Tope, clear, of lovely feather texture, good, broad, rising skull, nicely lashed, fine shape and substance of body. HEN (5): 1, Cairns, "Dusky Queen," another grand one from Scotland, lightly variegated, simply full of quality, broad silky feather, and any amount of it both on body and head, stoutly-built and well over perch, wide, rising skull, with grand entrance, and set off with a very neat, small beak, charming hen, well worth her place; 2, Adnitt and Driver, heavy variegated, a little slimmer got-up, yet shapely and by no means short of substance, has a heap of feather of excellent texture, nice width of skull and entrance, put down in A1 form; 3, Brotherton, variegated, a good one, though a shade weaker in back skull than leaders, good frame, well clothed, nice beak and entrance, fine cushion and lashing, wide chest, really taking hen; 4, vhc, Tope, fourth a handsome, clear, massive frame, very neatly clothed with feather which excels in quality, grand domed skull and wide entrance, very neat beak, beaten, we presume, in quantity of head feather, vhc wing marked, another taking bird, also of grand size and quality, a trifle weaker in back skull compared with its stable companion.

NOVICE CRESTS AND CRESTEREDS.
Judge, Mr. R. Rhodes.

What an example the novices set the champions in this section! So good were the birds, both in numbers and quality, that one could not but wish the executive had given the novice crest breeders a little more scope to show what was in them. There was nothing sensational in the two classes, but there was a very high order of general merit. They were indeed a level lot. So even were they, that Mr. Rhodes must have had some difficulty in separating, looking at them without handling; the task looked a big one, but handling does make such a difference, and Mr. Rhodes is just the man to appreciate that difference. The novice crests and crest-bred were two good classes, well judged.

YELLOW TICKED NORWICH.

1st, Diploma, Challenge Cup, and Specials—E. BAKER (Cowes).

NOVICE CRESTS.

NOVICE CREST (18): 1, 3 spls, Pooley, rattling good, lightly variegated, carries an extra big, well-shaped crest, neat to a fault, and thickly made up of nice-quality feather, beautifully drooped and radiated, fine frontal, body of excellent substance and shape, and well clothed with good feather, taking exhibit this, which would have "tied up" some in the open classes; 2, vhc, hc, Mason, highly creditable trio, light variegated leading, very neat and nice, good headpiece of excellent size and shape, well centred and built, fine body, all there for quality, vhc a green, with a wide spread of crest, hardly the texture of its stable companion, yet all round a good one, hc almost green, fine body, headpiece of good size, just a shade twisted; 3, Gale, grizzled crest, somewhat slimmer in body, yet of fine shape, and carrying a sweet round crest, thick, neat, and nicely drooped; 4, Mrs. Crow, saddle and wing marked, good bodied bird, plenty of feather of the right texture, fine spread of crest, round and well built up, yet somewhat untidy, if well groomed might have stood higher; vhc, Archer, green, excellent body, dense crest, with size and good texture, very good frontal, fine droop, close up; hc, Clark, green hen, splendid veiny feather, good sweep of frontal, neat body properties of no mean order, nice bird; c, Johnson, smart grizzle crest for quality and body properties, good crest for shape and size, but too open in centre. CRESTBRED (21): 1, Pooley, green, slasher for size, thick-set frame covered with grand feather, and topped by a splendid domed skull, wide, good at entrance and well browed, A1 quality, another real good exhibit; 2, spl, vhc (2), Mason, fine green leading, rare good body, stout and shapely, big, bold head, lovely rise and lashing, well thatched, full of health and vigor, not far behind winner, both vhc birds grand-bodied variegateds, very good in body, head and feather properties, a very nice trio; 3, Gale, green, rare width of entrance over a neat beak, good cushion head, plenty of feather of nice texture, excellent body and shape, a promising youngster; 4, Cullington, handsome clear yellow, fine chest and head, lovely quality, great width of skull, which, however, is somewhat flat, very neat and taking bird; vhc, c, Johnson, splendid-bodied green, full of quality, leading, excellent skull and feather properties, c a slimmer-built lightly variegated, good rising skull, nice lashing, very fair substance of body; hc, Mrs. Crow, heavily variegated, not quite so stout as leaders, and seemed inclined to be nervous, good texture of feather, nice width and rise of head; hc, Reeves, very shapely variegated, with a good domed skull, and nice body substance; c, Price, good frame, well clothed with excellent feather, appearance somewhat spoiled owing to being colour-fed.

NORWICH PLAINHEADS.
Judge, Mr. J. H. Payne.

CL. YELL. NOR. (21): 1, Baker, very deep, rich solid colour, well extended down flights, good shape and feather, full of quality, wings well braced and tail well packed, in rare bloom; 2, Bishop, grand size and shape, magnificent quality of feather, good head and neck, flights and tail well packed, not so deep in colour; 3, Walker, beautiful quality, nice head, good shaped body, clear cut, nice wings and tail, not so rich or so deep in colour; 4, Morris, grand shape and quality, nice colour, deep chest, a bit slack in left wing; vhc, Brown, grand shape and quality, nice colour, slack at root of tail; Sandiford, grand shape and quality, good wings, rare head and neck, had been washing when judged; hc, Shaw, good colour and feather, nice back, too much fat on chest; Edwards, good shape and feather, nice quality, bit long in tail and slightly soiled; c, Bishop, nice colour and quality, too flat on head. BUFF (17): 1, Miles, magnificent shape and quality, rare head, neck and back, good size, nice undercolour and topped with a nice distribution of frosting, wings well braced and close in tail, in rare pomp; 2, Baker, grand youngster, lovely quality, rich undercolour, which was set off with beautiful mealing, good shape, rare back and nice head; 3, Seed, very rich undercolour, which would be greatly improved with a bit more meal, grand feather, nice shaped body, might be fuller in neck; 4, Shaw, magnificent shape, rare head and neck, good feather and colour, nice back, wings and tail, a bit soiled, or we thought might have been higher up; vhc, Adnitt and Driver, fine shape, nice wings and tail, fails colour and polish; hc, Morris, beautiful colour and quality, nice back, a bit browy; c, Edwards, nice shape, colour and quality, slack at left side. TKD. YELL. (20): 1, diploma, medal, challenge cup, spl, Baker, ticked on neck, the shape, size and substance of a good buff, lovely short, soft silky feather, nice head and full short neck, well-packed wings and good tail, gets well over the perch, rich colour, not quite solid on back, one of the best yellow ticks seen for years, and put down in quite artistic style; 2, Sandiford, thigh ticked, lovely quality, nice head, good colour, not so full and round in chest as the winner and not so good in wing carriage; 3, Baker, cheek ticked, beautiful quality of feather, nice rich, level colour, good back, bit slack right wing; 4, Veale, thigh and wing ticked, wonderful colour and quality, rare head, nice neck, not enough substance in body; vhc, Bishop, grand colour, nice shape, bit slack at left side of waist; Wilcock, marked head and wings, grand colour and feather, fails chest and too upright in carriage; hc, Hayhurst, good shape, nice colour and wing carriage, pale in colour on throat; c, Beardall, grand type, not so good in feather, and a bit patchy in colour on back. BUFF (22): 1, Baker, grizzled on back, lovely colour and full of quality, short wings and tail, neat head, good-shaped body, and well cut away behind, well shown; 2, Evans, ticked on head, beautiful-shaped body, full short neck, well let into a good pair of shoulders, deep chest, well up in quality, inclined to cross wings at tips at times, and not quite so clean at the waist as the winner, still a close race; 3, Miles, eye ticked, fine shape, full of quality, rich colour, nice wings and tail, not so tight in feather; 4, Wotton, marked neck, wings and rump, as close as a Java in feather, very rich undercolour and nicely frosted, good back, neat, well-packed flights and tail, its general contour spoilt by having too much fat on chest, or we think would have been higher up—keep off the sunflower seed, Mr. W.; vhc, Morris, ticked on head, nice back, good colour and quality, a bit slack on chest; Baker, ticked on shoulder, wonderful colour and grand quality, but a bit horny; hc, Beardall, rare shape, nice colour and quality, fails in head; Hayhurst, grand shape, full of quality, but soiled, head and neck marked; c, Cawston, heavily marked, nice colour and feather, too long in tail; Brown, neck ticked, grand feather and quality, a bit up on the leg. UNFLI. YELL. (29): 1, Sandiford, wonderful colour and quality, good-shaped body, short, well-carried flights and close short tail, a shade on the small side; 2, Bishop, fine-shaped body, good head and neck, level colour, nice feather, a shade slack at root of tail on left side; 3, Trengove, grand shape, splendid colour, nice head, good wing carriage, beaten in softness of feather; 4, Spinner, grand colour, good-shaped body, nice full neck, short wings and tail, trifle horny; vhc, Evans, good shape, nice quality and colour, a bit unsteady; Seed, good-shaped body, nice wing carriage, fails on chest; Boydon, lovely colour and quality, nice shape, crosses wing a bit and shows just a bit too much daylight under him; hc, Baker, grand colour, nice back, a bit fat on chest; Veale, grizzle capped, nice quality and colour, too slim built; Matthes, grand colour and quality, neat head, lacks polish; c, Brown, nice colour and quality of feather, a bit slack on chest; Morris, left wing marked, good-shaped body, nice quality and rare head, patchy in colour; Sandiford, good shape and feather, fails in colour. BUFF (34): 1, Evans, ticked over beak, magnificent-shaped body, lovely quality, grand head and full short neck, good wide back, neat wings and tail, nice colour, just a shade slack at waist, a fine youngster; 2, Trengove, grizzled on neck, good colour, grand shape, nice feather, beautiful back and short full neck, nice wings, another gem; 3, Irons, grizzled cap, wonderful colour, and beautifully mealed, good head, neck and back, crosses wings a little at times; 4, Cameron, neck ticked, grand shape, nice feather and quality, short wings and tail, beaten in substance; vhc, Brown, good feather, nice, neat short tail; Twine, good shape, nice quality, gone in neck; Lawrance, marked wings and left eye, good shape and feather, a trifle browy; Irons, grand colour, nice feather and quality, same fault and a bit wild; he, Ellis, rare type, fails colour and bloom; Veale, Battison, Collings; c, Baker, grand one for colour, nice back, fails in depth of chest; Dent, Irons, Beardall. YELL. HENS, CL., TKD., OR UNEVENLY MKD. (21): 1, Whetsone, wing ticked, magnificent quality, rare shaped body, nice head and neck, good back, wings and tail, level but not hot in colour; 2, Hulse, ticked on head, splendid quality of feather, nice head, good wings and tail, not so deep in chest as the leader; 3, Wotton, clear, grand shape, deep colour, deep chest and wide back, gone a bit in neck; 4, Morris, marked cheeks and wings, good-shaped body, rare head, a bit slack at thighs and pale in colour, short wings and tail, a rare one for a breeder; vhc, Irons, unflighted, grand colour, a bit thin in neck; Silk, good colour, short wings and tail a bit loaded on chest; hc, Adnitt and Driver, good shape, fails in feather; Baker, nice shaped variegated, fails in feather; c, Baker, lovely quality, nice head, slim in body. BUFF (25): 1, Cameron, clear, rare shape, good head, neck and chest, grand undercolour, well mealed, beautiful quality and feathered to perfection, good wings and tail, we thought won well; 2, Evans, grand shape, short, full neck, good head, well mealed, but not the depth of undercolour as the winner, or quite so clean at thighs; 3, Baker, beautiful colour and quality, nice close-fitting jacket, well mealed, not quite so full in neck and chest; 4 Midgley, magnificent shape, grand feather, short, well-carried flights and closely-folded tail, one of the very best, but not well staged; vhc, Spinner, grand colour and feather, close up; Adnitt and Driver, good shape, nicely mealed, beaten in feather; Morris, good shape and colour, gone in neck; hc, Brown, nice quality, very neat; Baker, nice feather and quality, bit long in tail; c, Fox, even marked, nice feather and well mealed, beaten in shape; Campbell, grand-shaped body, bit horny.

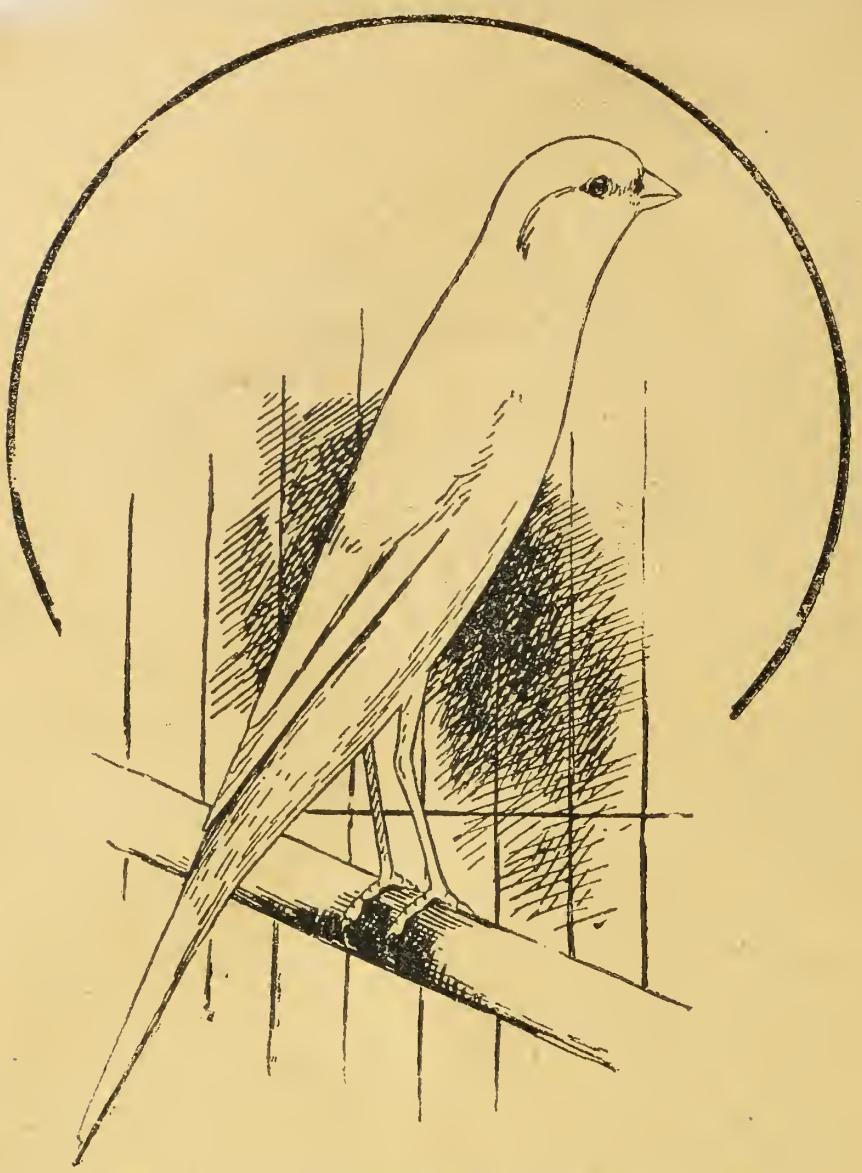
NOVICE NORWICH.
Judge, Mr. J. Robson.

These classes were filled with a nice collection of birds, and, good though they were, they were not too good, and not a bit likely to raise suspicions as to their genuineness, there being no indication of that professional finish which has caused so much heart-burning in days gone by, but rather was there occasion to say, "These novices have something to learn yet in the way of staging," for many of the exhibits betokened amateurish handling. Amongst the exhibits were many which, had they been in the hands of some of the professionals, would have been equal to landing high honours in the more advanced stages of competition. YELLOW (10): 1, Welch, very shapely, plenty of rich bright colour, nicely feathered, and well shown, given a little more substance of head would be a stormer; 2, Coventry, rich, even colour, well built, and nicely carried body, but, like winner, needs a stouter skull; 3, Keech, very typical in body, well balanced wings and tail, plenty of colour, and nicely feathered, wants a trifle more rise of skull; 4, Lawrence, a charming bird, full of quality, very sound and even in colour, grandly feathered, capital style, and well shown, we liked very much indeed; 4, Woodward, very smart in feather, brimful of quality, nice even colour, very shapely body, but just a wee bit slovenly in wing carriage; hc, Day, a bird of good body properties, with nice colour and feather, but rather mean in head; c, Lang, junr., nice colour and feather, but not so chubby and compact in body as the rest. BUFF (11): 1, Day, big bouncing bird, fine bold head and chest, good back and shoulders, full of rich colour under a cover of beautiful frosting, feathered very nicely and stands well; 2, Richardson, another fine bold fellow, with plenty of size and colour, good in head and back, capital carriage of wings and tail, needs tightening up a bit underneath; 3, Coventry, very neat, typical body, clothed with tight-fitting feather of grand silky texture, rich, even colour and well finished, beaten in size certainly, but a quality bird; 4, Bateman, very smart in shape, nice head, shoulders and chest, beautiful feather, but not so hot as those above it, still a real good Norwich; vhc, Steele, beautiful of colour, a real hot 'un, high quality of feather, but longer and slimmer; hc, Lawrence, very comely in shape, nice even colour, not so hot as some, but hot enough, lovely quality of feather, well staged, had rather hard lines we thought; c, Welch, grand shape and quality, stands well, but not so much colour. TKD., ETC., YELL. (7): 1, Allen, thigh marked, of beautiful shape, colour and quality, really a bonny bird, shown well; 2, Welch, thigh ticked, big, bold, upstanding bird, with plenty of colour, good chubby body, but not quite so full in head as we like them, well covered with good silky feather; 3, Richardson, grizzled on tail and chest, beautiful shape, nicely feathered and shown in A1 form; 4, Scott, very hot head and wing-marked bird, grandly feathered, nice, neat shape, and shown in capital condition; vhc, Day, very hot, marked on eye, wings and saddle, nice quality of feather, but hardly so stout in chest as we like; hc, Keech, thigh ticked, nice colour and shape, well feathered, might perhaps be a trifle fuller in head. TKD., ETC., BUFF (14): 1, Munro, wing ticked, nice chubby body, with a rich bright tint showing through the glistening meal, grandly feathered, and staged in a worthy manner; 2, Tottle, ticked on tail and thigh, lovely colour and quality, beautiful shape, and served up in grand style; 3, Welch, good chubby thigh ticked, beautifully feathered, hardly so rich or bright in colour; 4, Males, cap and wing marked, plenty of colour, nicely mealed, full of quality, but would not stand for anyone to see his beauty; vhc, Allen, variegated, very shapely, nice colour and feather; hc, Scott, as a bird of beauty, grandly modelled and beautifully feathered, but most peculiarly variegated; c, Price, big, good coloured, variegated, loses in shape. HENS (19): 1, Coventry, neck, wing and tail marked yellow, very nice shape, brimful of quality, grandly fed and nicely staged, a most useful young lady; 2, 4, Woodhouse, second head, neck and wing marked yellow, grand colour, nice stamp of body, neatly feathered and well shown, fourth rather more heavily marked, a regular little swell, capital figure and style, very neat in feather and plenty of colour, the sort to keep in a breeding room if one wants to breed colour and quality; 3, Johnson, ticked-headed buff, good bold hen, of capital shape, beautifully feathered, well frosted on a nice, rich, even ground colour; vhc, hc, Lawrence, vhc yellow, a gem for colour and quality, modelled on correct lines, a charmer indeed, hc an equally good buff, not one of the largest in the class, but in other respects she could more than hold her own, we liked this pair immensely; vhc, Keech, a real bonny buff, full of quality, most typical, and of grand finish, this and Mr. Lawrence's pair might have stood a trifle higher; c, Biss, head and wing marked buff, not so rich in colour, but nice shape and feather. UNFLI. (17): 1, Coventry, buff, of grand shape, well furnished throughout, nicely frosted on top of rich, even ground colour, capital feather and well shown; 2, Steele, rich-coloured yellow, of capital shape and plenty of quality, just a shade weak in head; 3, c, Richardson, variegated buff, of capital shape and colour, good quality of feather, but not quite level in front, a very useful yellow, plenty of colour, good shape, but looked as though he had been dried a little too quickly; 4, Males, very neat shaped eye and wing-marked buff, a bird of nice quality and colour, and well shown; vhc, Johnson, buff, of good feather and colour, hardly chubby enough; vhc, Woolf, really a topping yellow, full of colour, grand silky feather, stout chubby body, neat wings and tail, and well shown, might have gone up a bit; hc, Welch, thigh-ticked buff, bonny little bird of nice type, sound colour, and well mealed, but had come through the wash a bit horny.

NORWICH GREENS.
Judge, Mr. J. H. Payne.

GREEN, YELL. SELF (7): 1, Davies, splendid shape, nice colour and quality, short wings and tail, a trifle horny; 2, Ryno, not so bright in colour, but longer in body, good head and neck; 3, Dormer, nice shape, not so sound in colour at thighs, trifle horny; 4, Thompson, nice shape and feather, not quite sound in colour at throat; vhc, Thompson; hc, Thompson; c, Ryno. BUFF (8): 1, Thompson, grand shape and colour, good head, neck and back, wings well packed, in grand trim; 2, Ryno, good-shaped body, nice head and neck, splendid colour, not in the form of the winner; 3, Ryno, nice size, shape and colour, not so good in carriage of wings; 4, Thompson, nice colour and feather, not quite so chubby in body; vhc, Hales, good shape and feather, fails colour, looks like a hen; hc, Davies, fair colour, nice feather, fails in shape; c, Walker, good shape and feather, beaten in colour. YELL. FOUL (10): 1, Ryno, grand shape, nice feather, rich colour, of the correct grassy shade, good head and neck, wings and tail well packed, in good trim; 2, Ryno, good shape and feather, not quite so good in colour, nice wings and tail; 3, Davies, nice colour, good head, not quite so high in quality; 4, Thompson, good colour and feather, loses in shape; vhc, Helliwell; hc, Walker; c, Thompson. BUFF (16): 1, Strachan and Stephen, pied tail, lovely colour and beautiful shape, nice size and full of quality; 2, Jenkins, pied tail, grand shape, good feather, not quite so good in colour; 3, Hales, nice shape and feather, rare head and neck, hardly so bright in colour; 4, Johnson, pied tail, lovely quality, nice feather and clean skull, good shape, close up; vhc, Stewart, good feather, nice colour and back, bit fat on chest; hc, Ryno, pied tail, good feather; c, Hales, nice shapely hen, good feather.

HAVE YOU SEEN OUR PICTURE POSTCARDS?



THE 1st PRIZE YELLOW YORKSHIRE AT THE CRYSTAL PALACE.
Shown by Messrs. Bailey and Swanger.

OPEN YORKSHIRES.
Judge, Mr. W. Mundell.

CL. YELL. YORK. (20): Fine lot. 1, Bailey and Swanger, with a stormer, red hot in colour, rich, silky texture of feather, wonderful length, stands like a guardsman, perfect back, flights, and tail, well on leg, and delightfully shown; 2, hc, Radley, with a brace of beauties, former very lengthy, wax-like in feather, lovely position, superb quality, beautiful back and wing carriage, very close up, hc straight as a rush, tight as a bottle, magnificent feather, shade shorter than above, yet possessing true Yorkshire characteristics, worth its place; 3, Hodgson, wonderfully slim and of excellent stand, feathered to perfection, nice colour and style, with just wee bit more length would want stopping, good third; 4, Cuthbertson, superior quality and colour, well up in position, full of nerve and style, smooth as glass, lovely wing carriage, worthy of the honour; vhc, Cooper, fine lengthy specimen, A1 quality, stands well, fails a little in wing carriage yet a most bonny exhibit; vhc, Hirst, slashing feather, as tight as a Java, very stylish and of good length, good enough to win at majority of shows; hc, Shackleton, neat unflighted, soft silky texture of feather, all there for type, teeming with quality, with another moult will be heard of again; c, Gill and Pickup, another charming youngster, slim and upstanding, full of quality and style, not overdone with length, still handsome. BUFF (16): 1, 2, Shackleton, with a brace of the very first water, winner of an almost unique brilliancy, appearing as though chiselled out of marble, grandly drawn and of exceptional position, fine length of side, perfect back, magnificent in wing carriage, well on leg, neatly-folded tail, made one most envious, second sweetly moulded youngster, neat and narrow, lengthy and stylish, type bordering on perfection, delightful feather, stands on clever legs, a bird with a future; 3, Halliday, again a specimen of exquisite character, regular wedge, choice quality, fine length, rare back and flights, lovely front and neat in waist, somewhat pale in colour between shoulders, yet a true Yorkie, well deserving its place; 4, Bailey and Swanger, lovely salmon-tinged colour, delightfully frosted, slashing quality, beautiful outline, fine length, well on leg, shows for all he is worth; vhc, Cuthbertson, A1 quality and colour, nice stand, good back and flights, shadows of stoutness in waist, yet a pleasing exhibit; hc, Philpot, nice slim bird, full of quality and style, well up, standing on clever legs, neatness itself; c, Mason, grand long-drawn-out specimen, excelling in quality, A1 position, opens somewhat in tail, which tells against it. TKD. YELL (10): 1, Walsh, marked left wing, ablaze with colour, rattling feather, better position no one could desire, rare length, grand sided, showing thighs nicely, winner on many occasions this season, and not far off being the best yell. tkd. known; 2, Bailey and Swanger, thigh ticked, soft silky texture of feather, good colour, fine upstanding bird, full of nerve and style, in the pink of condition, very close on the heels of winner; 3, Ware, thigh ticked, when taking notes appeared very much down, and efforts of coaxing were of no avail, hard lines, Mr. W., no doubt good one when right, hence its position; 4, Amblers, marked left wing and back of head, very prettily drawn, slim and of rare length, feathered like a Java, straight as a gun barrel, pale in colour, yet a beauty; vhc, Gibbons, thigh ticked, wonderful position, fine length and well on leg, showing breed, one we liked; hc, Barnwell, grizzled on cheek, rare feather, nice position, good length, neat all through; c, Priestley, thigh ticked, unflighted, rich quality and colour, rather on the small side, but all there otherwise, no doubt will make up well with another year on its back. TKD. BUFF (12): 1, 2 spls, Bailey and Swanger, with their noted grizzled wing, this specimen was awarded special for best Yorkie in show, fully deserving same, its equal we have not seen for many a day, it was trained to the moment, and the admiration of all who observed its splendour; 2, Wilcock, marked left wing and head, slashing position, teeming with quality and colour, neatly mealed, wonderful back and flights, plenty strong enough, yet a bird one is bound to speak well about; 3, Amblers, marked left wing, magnificent feather, as smooth as a bottle, straight as a pencil, perfect back, lovely carriage of flights and tail, must have pressed hard for second place, a true Yorkie in every point; 4, Cuthbertson, marked left side of neck, stands beautifully, with feather shining like silk, fine long sided, well-filled back, best of wings and tail, showing nice finish, capital specimen, good fourth; vhc, Wood, marked right wing, lovely feather, grand type, not one of the biggest, but one of the best; hc, Warr, thigh ticked, smooth as wax, straight as a rush, well on leg, a very pleasing youngster; c, Holroyd, marked right side of neck, very lengthy, straight up, A1 quality, shade open on breast, yet neat. UNEVEN (10): 1, 2, Murgatroyd and Sons, with a brace of eye-openers, winner yellow, marked left wing and both eyes, exceedingly warm in colour, superb quality feather, slashing position, lovely back and wing carriage, very lengthy, stands on clever legs, second buff, marked both wings and eyes, smooth as wax straight as a gun barrel, rare length and position, with plenty of daylight between his legs, and shows for all he is worth; 3, Haigh and Son, yellow, marked both wings, head and right cheek, wonderfully slim, fine length, rare colour and quality, stands beautifully, well worth its place; 4, Ware, buff, marked wings, lovely drawn specimen, of great length, A1 quality, straight as a rush and as tight as a Java, best of backs, with wings carried to perfection; vhc, Wood, buff, marked wings and eyes, grand salmon-tinged colour, superior feather, excels in position, rattling length, a bird we much admired; hc, Gill and Pickup, yellow-marked wings and about head, ablaze with colour, neat outline, lengthy and leggy, well up, shown in the pink; c, Wilkinson, yellow marked wings and eyes, smooth as glass, rare length, stands like a guardsman, well on leg, true Yorkie. UNFLI. (29): Really choice lot. 1, Bailey and Swanger, with their noted clear, thus making its ninth win, this specimen is a real knock-out, is full of character, was staged in magnificent trim, no details of toilet have been omitted, and drew forth words of the highest praise from all who know what a true Yorkie should be; 2, Wilcock, buff, thigh ticked, another real charmer, feathered like wax, grand outline, better position no one could desire, perhaps not one of the longest, but decidedly one of the smartest, well put down, and is a credit to its breeder; 3, Hosford, yellow, clear, soft silky texture of feather, good colour, delightful position, nice length, grand back, flights and tail, wee bit wanting in length of leg, yet a most pleasing exhibit, and well worthy of its honour; 4, Wadsworth, buff, thigh ticked, lovely salmon-tinged colour, tight in feather, as though chiselled out of marble, well-filled back, fine carriage of flights, closely-folded tail, a bonny bird; vhc, Philpot, buff, marked right side of face, capital colour and quality, A1 position, very lengthy and well on leg, full of style, good one; vhc, Fellows and Flyn; vhc, Binns, clear buff, sweetly moulded, good position, rattling quality, nervy, staged in the pink of condition; vhc, Halliday, buff, saddle marked, well known, often described, looking grand; hc, Spencer, yellow, cap marked, excellent quality and colour, stands nicely, lengthy and possessing good legs, inclined to pull slightly thin in neck when handled, yet very neat; hc, Cawston, Ogden Bros., with exhibits full of true Yorkie characteristics, well shown; c, Edmondson, yellow, thigh ticked, very neat throughout, possessing rattling feather, fine length and style, good legs; c, Gibbons, yellow, marked neck, slashing quality, narrow and sweetly drawn, a true Yorkie; c, Ware, quality all there, nice position, well on leg, in fine trim. YELL. HEN (23): Grand lot. 1, 3, Shackleton, with a brace of most bewitching damsels, former clear, magnificent feather, rich colour, slim and of delightful symmetry, bordering closely on the ideal, providing a study to those who swear by the birds of "Grace and Beauty," latter unflighted, ticked left eye, one of the most enchanting wenches describable, with another good moult is a lady with a great future, and will want beating, both these hens were staged in such a wonderful fashion that one could see quite well that a master hand had had the manipulation of same; 2, Wilkinson, unflighted, slight grizzle right eye, wonderful length, superb quality and colour, best of positions, fine, long sided, capital back and carriage of flights, another year, with luck, will no doubt be heard of again, claiming many victories, she is quite a "lady of the lake"; 4, Holroyd, clear, soft, silky texture of feather, great length, rattling stand, beautiful back, wings and tail, unfortunately opens somewhat on breast or would have been a stormer; vhc, Webb, slightly grizzled head, full of quality and style, nice length and position, a very pleasing maid; vhc, Cuthbertson, clear, unflighted, capital feather, very stylish, lengthy and of good type, shown in fine trim; hc, c, Amblers, former marked right cheek, slashing quality, neatly drawn, grand position, lengthy and leggy, latter clear, all there for type and quality, but is inclined to be rather short, yet a bonny lassie, and with time should improve; hc, Edmondson, unflighted, possessing true character, lovely quality, well shown; c, Gibbons, marked wings and eyes, teeming with quality, lovely outline, neat and narrow, wee bit wanting in length. BUFF (24): Rare collection; 1, Fellows and Flyn, grizzled right eye, possessing splendour of a most dazzling description, quite a Venus, and filled one with amazement when observing a thing so beautiful, take care of her, friends, she is a topper; 2, Halliday, clear, another exquisite model, lovely expression, teeming with quality, neat and narrow, very lengthy, stands beautifully, close on the heels of winner, a bird of rarity; 3, Ogden Bros., marked wings, eyes and cheeks, tight as boxwood, splendidly drawn, fine length and position, a bonny damsel, well worth her place; 4, Amblers, ticked right eye, wonderful length, straight as a pencil, A1 type, not quite the quality of above, yet a pretty hen, and shown in fine condition; vhc, Haigh and Son, thigh ticked, smooth as glass, delightfully frosted, capital stand and full of nerve, wee bit short on leg; vhc, Bailey and Swanger, clear, feathered to perfection, splendid position, good length, very stylish, shade thick in waist; vhc, Shackleton, with his noted ticked neck, fine, long-drawn specimen, rattling feather, A1 position, might have gone up one; hc, Pattrick, marked right wing and right cheek, full of quality, nice type, good back and wing carriage; hc, Webb, sweetly moulded, A1 quality, lengthy and well on leg, good one; c, Wilcock, marked right wing, rare feather, stands grand, beautiful back and wing carriage, plenty strong enough; c, Wadsworth, thigh ticked, nicely feathered, stylish and of good length, neat and narrow, well put down. CINN., TKD. YELL (16): 1, Wilcock, marked right wing and head, rare colour and quality, wonderful position, capital back and wing carriage, showing plenty of leg, a magnificent specimen, real 18 carat, and a well-known winner; 2, Sutcliffe and Son, marked both wings and eyes, ablaze with colour, another that has fought many battles and won many victories, must have pressed hard for premier honours, a gem of the first water; 3, Brayshaw and Jowett, marked wings, head and neck, long, slim-drawn bird, standing magnificently on a clever pair of legs, delightful feather, one we much liked, good third; 4, Couzens, marked wings and eyes, red hot, soft, silky texture of feather, capital position, well on leg, grand carriage of flights and tail, a beauty; vhc, Hirst, marked wings, left eye and root of tail, warm in colour, stands like a guardsman, nice length and quality, good enough to win most shows; hc, Wharton, marked wings and about head, lovely feather, slim, and of rattling position, grand legs, neat all through; c, Hartley, marked wings, eyes and cheek, soft, silky texture of feather, well up, nice style, would be better with a little more length. BUFF (19): 1, Crisp, marked right wing and eyes, rich quality, beautifully mealed, magnificent position, lengthy and well on leg, fine condition, a most lovely specimen; 2, Denton, marked right wing, eyes and right cheek, feathered grandly, rare length, well up, splendid back and wing carriage, not very far behind, a gem; 3, Cooper, marked right wing, eye and head, exceptional colour and quality, richly frosted, very lengthy and of lovely outline, grand legs, good third; 4, Brayshaw and Jowett, marked left wing, eyes and neck, fine, salmon-tinged colour, well mealed, wonderful length, but showing signs of wear, gone in neck somewhat, which told against it; vhc, Holroyd, marked wings and eyes, great length, slim and neatly drawn, nice feather and colour, lacks a little in position, yet very bonny; hc, Hirst, marked right wing and right eye, stands grandly, full of colour and quality, might have gone up one; c, Denton, marked left wing and about neck, red hot, good length and position, rather inclined to cross flights, which holds it back. YELL. HEN (13): 1, spl, Haigh and Son, marked both wings and left side of neck, soft, silky texture of feather, lovely colour, lengthy and of grand outline, A1 position, quite a charmer, and hard to find fault with; 2, Wilson, marked wings and eyes, feathered like boxwood, delightful position, slashing wings and tail, not overdone with length, but possessing many great points, and very close up; 3, Cook and Son, marked left wing, yet another magnificent damsel, wonderful length, clinking quality and position, perfect in wing carriage, one of the very choicest, well worth her place; 4, Ogden Bros., marked wings and head, superior feather, and of nice colour, best of positions, lengthy and leggy, grand back and flights, a gem; vhc, Sutcliffe and Son, marked wings and head, full of quality, nice colour, straight up and of good length, might be neater in waist, still good; hc, Bennett, marked right wing and about head, ablaze with colour, well feathered, upstanding, neat all over; c, Hartley, lightly variegated, stands grand, silky feather, good length, sweet expression, choice stock hen. BUFF (15): 1, hc, Sutcliffe and Son, with a couple of clinkers, winner marked wings, eyes and neck, teeming with quality and of lovely colour, long, slim, and of excellent position, one of the very first water, and staged in rare style, hc marked wings and eyes, rich salmon-tinged colour, mealed splendidly, rattling type, very lengthy and full of style, a good one; 2, Cuthbertson, marked wings and eyes, possessing rare length, and of lovely outline, grandly feathered and of rare colour, well on leg, put down in slashing condition, not so far away; 3, Hartley, marked wings and about head, neat and narrow, long and slim, straight as a gun barrel, not a feather out of place, a really grand hen; 4, spl, Priestley, marked left wing and eyes, slashing quality and colour, sweetly drawn and of rare style, not one of the longest, but one of the smartest, well worth her place; vhc, Kent and Son, marked wings and right eye, stands well, A1 quality, nice length, good back flights and tail; c, Cook and Son, marked wings and head, superior feather, rattling position, very stylish, not over long, still all there otherwise.

NOVICE YORKSHIRE CLASSES.
Judge, Mr. T. Heath.

Be it amongst the champions or the novices, the bird of the broad-acred shire maintains its popularity, and the seven classes here provided for the novices drew just over 100 entries. Not only was the entry good, but the average standard of merit in all the classes was of a distinctly high order. There is no doubt about the matter at all, that to win in Yorkshire classes at all to-day, an exhibitor must, as they say in Yorkshire, have "all his water on." Amongst these novices at the Palace were many that could give a very good account indeed of themselves in open competition. Excepting that he was rather merciful to some of the frilly-chested ones, Mr. Heath was most happy in his awards, and they seemed to give satisfaction to the great majority, and verily the novices are harder to please than the veterans.

YELLOW, CLEAR, ETC. (20): 1, 2, Edwards, first long, finely-drawn bird, of splendid shape and style, capital colour, very fine in feather, but just a bit inclined to open on chest, second again good length, capital head and back, good wings and tail, not so cleanly drawn in waist, stands nicely and shows plenty of quality; 3, Watmough Bros., neat head, capital back and flights, not so neat in tail, well up on leg, and beautifully feathered; 4, Stamford, plenty of style, well up on leg, body nicely tapered away; wings and tail well carried, capital feather; vhc, Thomson, fine sleek head, neat wings and tail, grand quality, plenty of style, but needs just a trifle more length; vhc, Wilson, good length and heaps of colour, not quite so stylish; hc, Keyes, but for his frilled shirt-front a real good Yorkie, plenty of length and stands up to his perch; hc, Picard, a rattling good bird, very shapely and nice feather, but not shown at his best; c, Stout, very smart thigh ticked,

long and well tapered away, capital legs, neat wings and tail, beautifully feathered, we should have placed this higher up in the list; 892, Harrington and Son, not one of the longest, but grand Yorkshire typo and style; 906, Downing, very neatly feathered, stands well up, and is nicely modelled; 909, Miss Blagg, most charming bird, full of style, grand shape and quality, hardly long enough. BUFF, CLEAR, ETC. (11): 1, Dyson, a gem, fine head, neck and shoulders, nice clear run from shoulders to tail, rare carriage and shape, grand quality, nice colour and well staged; 2, Harrington and Son, magnificent quality of feather, very fine head and neck, body nicely tapered away from shoulders to tail, rare style, hardly so long; 3, Wood, very nice quality and carriage, good head, back, shoulders and wings, hardly fine enough in waist and tail; 4, Shaw Bros., but for being a trifle short-sided, a real bonny Yorkie, splendid feather, shape and carriage; vhc, Farmer, nice head and back, stands well, very silky feathered, but rather heavy in flights; hc, Nelson, fine head, neck, wings and tail, capital feather, very stylish, a wee bit hollow in back; c, Couzens, grand littl cbird, full of quality, nice shape and carriage, but hardly long enough for Mr. Heath, we should say. MARKED YELLOW (7): 1, Parish, head, check and wing cinnamon marked, capital shape, plenty of style and full of quality; 2, vhc, Couzens, head and wing cinnamon marked, stands well up on his legs, beautifully feathered, nice long side and well shaped, vhc saddle marked, of good shape and style, and beautifully feathered; 3, Phillips, head, check and wing marked, very stylish and nervy, stands well up, good wings and tail, just a wee bit flat-sided; 4, Thomson, very slim, stylish, wing marked, grand shape, full of nerve and quality; hc, Forder, variegated cinnamon, nicely modelled and well posed. BUFF MARKED (6): 1, Forder, head and wing cinnamon marked, nice head, neck and shoulders, neat wings and tail, good shape, but could do with just a trifle more nerve; 2, Keyes, wing marked cinnamon, plenty of length and style, good shape and nice feather, not so neat in waist and tail; 3, Shaw Bros., eye, neck and wing ticked, splendid shape and carriage, well braced wings and tail, plenty of nerve and brimful of quality; 4, Halliday, neck and wing marked, nice head and back, capital flights and tail, handles well, and is good in feather; vhc, Riley, head and wing marked, stands well and is nicely feathered, but is not so finely drawn; hc, Roberts, neck and wing marked cinnamon, capital shape and carriage, rather pale in colour. UNFLIGHTED (23): 1, Cross, very smart buff, nice clean run from head to tail, stands up well, shows plenty of nerve and quality too, in grand fettle, a clever win; 2, Keyes, very racy, stylish yellow, plenty of length, stands well up, capital wings and tail, just a trifle too flat in head; 3, Roberts, head and wing marked yellow, very smart throughout, capital feather and shape, and plenty of nerve; 4, Dyson, beautifully feathered and nicely-shaped buff, of good style, but needs a bit more length; vhc, Robinson, yellow, of capital length, style and shape, bit open in front; vhc, Shaw Bros., very warm coloured, long, stylish yellow, nicely feathered; vhc, Edwards, stylish, nice shaped yellow, of good quality, inclined to spread his tail; hc, Potter, nice feathered buff, stands well, good wings and tail, hardly fine enough in waist; hc, Simpson, shapely, nice feathered yellow, of good colour, does not get up quite enough; c, Bentley, yellow, of capital feather and style, but not quite so finely moulded; c, Waterman, very neat and stylish, grand feather, only wants a trifle more length. HENS, YELLOW (14): 1, Keyes, neck and wing marked, fine long hen, of capital shape, full of nerve and style, handles splendidly, beautifully feathered; 2, Wood, neck ticked, not so long, but grandly shaped, full of style, lovely feather; 3, Bentley, very sweet little bird, fine head and neck, well braced wings and tail, and plenty of nerve; 4, Watmough Bros., just a real good Yorkshire fra' Bradford, slim and neat, finely feathered and plenty of style; vhc, Couzens, real good-stamp of a hen, but she was not put down in the best of condition, and wtih the washing lessons these London chappies have had they should be expert laundrymen; hc, Bennett, nice head and back, good wings, stands well, but is rather stout in waist; c, Potter, well feathered and nice carriage, but just a trifle wide in tail; w.c. 957, Robinson; 966, Cross; 963, Couzens, all buffs in Mr. Heath's opinion. BUFF (11): 1, Phillips, grand shape and style, well bound flights and tail, beautiful tight silky feathers, plenty of nerve, and well shown; 2, Males, just a nice bonny little swell, not one of the longest, but a Yorkshire all over, and well put down, too; 3, Picard, very neat-bodied, slim-waisted, wing ticked, grand style and rare quality of feather; 4, Wood, wing ticked, of most beautiful quality, grand head, neck and back, stands well up, and uses her wings and tail, as a high-class Yorkshire should; vhc, Cross, splendid carriage and feather, good flights and tail, not so neat in waist; hc, Robinson, very neat body, rather short in tail, nice feather and nerve; c, Wilson, most charming little lady, indeed, a beauty in all respects; c, Couzens, nice head and back, very shapely, but she does not handle her wings well.

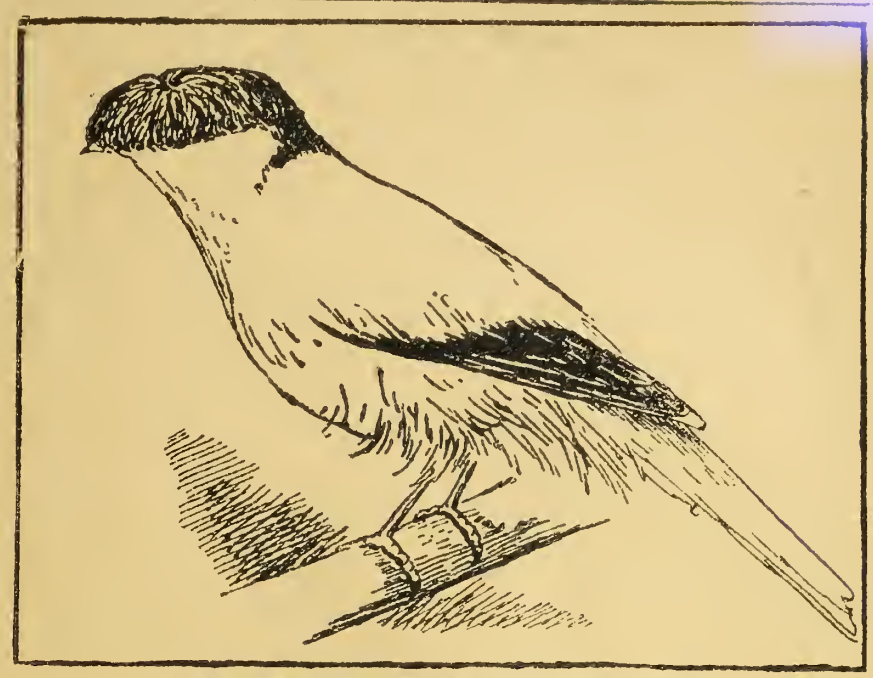
THE
BIRD WORLD MAGAZINE
FOR FEBRUARY
NOW READY.

BORDERS.

Judge, Mr. J. F. Dewar.

These charming little members of the Canary family topped the century, and were without the shadow of a doubt, tho finest lot of the wee sma' birdies ever seen at the Crystal Palace. Typo! It simply ran all over the section, and there was not a single class in which could not be found birds of the finest. Birds embodying all that goes to make up a high-class Border were well to the front. Fine and slim in shape, very erect in carriage, and with feather like unto floss silk, and so neatly wrapped around them, that it was like unto polished marble. Finished indeed were the Borders. Of the judging, what shall we say? We have seen Borders with the prize cards on them before, but never have wo seen them so well judged as on this occasion. Mr. Dewar knows what a Border should be, and he knows also how to find them, and when found how to place them. Border men could not find anything to cavil at in the awards, for they, like the birds who bore them, were A1.

YELLOW, CLEAR, ETC. (15): 1, Bennet, as straight as a dart, sweet neat head, fine neck and shoulders, wings and tail braced well up, full of swagger, and feathered like unto glass; 2, Wilson, very smart and slim, rare head and back, wings and tail of nice length and well carried, handles very nicely, and as full of quality as an egg of meat; 3, Willison, beautiful shapo and finish, carries himself like a soldier, neatly clipped up flights, tail not quite so evenly folded; 4, Jenkins, beautiful shape and carriage, hardly so firm in feather, plenty of colour, in fact some said it might have been rubbing up against some of Ramsden's colour food tins, but then they were prejudiced; vhc, Sloan, charming bird for shapo and style, very tight in feather, but a little lacking in that bloom one likes to see on a Border; hc, Pearson, grand carriage and feather, just a trifle full in cheeks, rare wings and tail; c, Hislop, not quite the shape we like, carries too much chest, but all there in feather and style. HEN (17): 1, Bennet, one word would describe this charming little lady, but did we use it we should hardly give her wonderful qualities the prominence they deserve, a gem she is without doubt, she is as proud as "A Beauty of Bath," and as shapely as "A Sandow Girl," whilst her clothes fit with the perfection of a Camille Clifford; 2, Pearson, this young lass might be all that we have said of the last and more, but unfortunately she had forgotten to wash her face before she left home, or else the London smoke had quickly spoiled her delicate complexion, she posed like a Venus, and in figure could hold her own with the best; 3, 4, Brownlie, third did well to get so far up in such good company, a rare bonny hen of exquisite feather and style, but not quite so sylph-like in proportion as the leader, fourth very nicely modelled, handles well, and holds herself like the little queen she is, hardly so fine in quality of feather as her stable companion; vhc, Evans, splendid shapo and carriage, very light in feather, but her toilet had not been completed, a Border should be as clean as a new pin; hc, Farrer, neat head, splendid back, wings and tail, not so good in neck, nice feather, carries herself A1; c, Jenkins, splendid feather and carriage, fine head, level, well finished back, grand flights and tail, but looked as though she had been enjoying this world's goods too well. BUFF, CLEAR, ETC. (19): 1, 6 spls, Bennet, talk about fineness of feather and glove-like fit of tho same, one had it here in the highest degree of excellence, in shape one could almost imagine he had been carved from the Border Club model, he handled well, and stood like a Grenadier; 2, Wilson, again a wonderful example of quality and fit of feather, staged in the pink of condition, wonderful style, if anything hardly so finished in neck as the leader, but a tight race; 3, Pennington, said to be a three year old, if so, he has retained the grace and slimness of youth in a remarkable manner, whilst age certainly has not spoilt the cut or quality of his clothes; 4, Farrer, a little gentleman of rare swagger and style, holds himself well, feathered like a Java, but inclined to be a trifle chesty; vhc, Young, most charming shape, and rare quality of feather, but seemed a trifle tired and jady, and did not brace his flights quite so closely as a first-class Border should do; he, Jenkins, a grand little bird for quality and style, very neat in head and nicely finished in front, but not quite level on back; c, Hislop, quality and style just what one would ask for, but in shape he is just a trifle too chubby. HEN (11): 1, 2, Jenkins, gallant Little Wales stepped in here and broke the sequence of Scottish successes, Dan, we congratulate you, oft have we admired this little charmer, and much as we like the Scotch lassies, we can worship a sweet young thing from Wales when it has the beauty of form and lovliness of feature to be seen here, second another little gem, "how happy we could be with either, were the other dear charmer away," the owner ought to be a happy man to possess such buds of beauty, and he did put them down in their Sunday best; 3, Bennet, very sweet in outline and wonderful quality of feather, but she seemed just a bit dejected, that she had allowed the family flag to be hauled down by those girls from Wales, and did not brace her wings as she should have done; 4, Wilson, very smart in carriage, beautifully proportioned, but not quite so wax-like in feather, still she is a beauty; vhc, Jenkins, grand feather and carriage, but just a trifle too matronly in shape; hc, Bennet, grand shape, and most exquisite feather, capital flights, but doesn't bring her tail up quite so smartly as she should; c, Woodman, very shapely and well



STANGER AND HERDMAN'S "COCK O' THE NORTH."
First Prize, Crystal Palace.

feathered, not so quict in hand. EVENLY-MARKED (8): 1, 4, spls, Wilson, buff of most exquisite quality, full of that delightful sheen which betokens the little bit which lifts above the average, wonderful shape for a marked bird, handles well, and marked with an evenness which is seldom seen; 2, 3, Farrer, second six-pointed yelow, very slim and shapely, grand quality of feather, and very neatly marked, very quick in hand, third nicely balanced four-pointed yellow, slim and stylish, and beautifully feathered, both a trifle warm in colour; 4, Barrie, four-pointed buff, grand quality and style, not quite so neat in eye marking, and a shade stouter; vhc, McVittie, nicely marked four-pointed buff, good style and feather, buff not so neat in flights; hc, Arnot and Jamieson, four-pointed yellow, well balanced wings, grand shape, style and feather; c, Atkinson, four-pointed yellow, but blotchy on eyes, good wings, nice shape and style. UNEVENLY-MARKED (12): 1, Wilson, wing marked yellow, plenty of colour, grand quality of feather, very stylish, neat head, good neck and back, well carried flights and tail; 2, Pearson, eye, neck, and wing marked yellow, full of quality; beautifully moulded, plenty of nerve, and handles well; 3, Pennington, again an eye, neck, and wing marked yellow, very smart in carriage, silky, well fitting feather, neatly moulded all through, and grand flights and tail; 4, Simpson, eye, neck, and wing marked buff, very neat head, grand shoulders and back feathered like glass, rare carriage, pressed very hard indeed; vhc, Farrer, buff, very similar in marking, grand wax-like feather, neat wings and tail, rare shape and style; hc, Cape and Murray, three-pointed buff, rather heavily marked on eyes, grand quality and sheen, well modelled body, and grand carriage; c, Evans, yellow marked head, eyes, and wings, very shapely, full of stylo and grandly feathered. GREEN OR CINNAMON (21): wonderful class indeed; 1, Bennet, green wonderfully rich and bright in colour, grand neck, shoulders, and back, stands beautifully, very silky and tight-fitting feather; 2, Jenkins, another green, sound in colour, but not quite so bright and vivid, splendid shape, most lovely style, and as tight as wax; 3, Beaty, very bright, but light coloured green, wonderful style, well moulded, and clothed in a tight-fitting jacket; 4, Arnot and Jamieson, rather light coloured cinnamon, very nicely-modelled, and beautifully posed, grand quality of feather, given a little greater depth of colour, and it would doubtless have gone higher; vhc (2), Farrer, both greens of capital colour and style, the one fails a trifle in feather, and the other is just a shade inclined towards embonpoint; hc, Hocking, grandly coloured green, stands well, and is very tight in feather, but just a bit too large; hc, Woodman, green of splendid colour and nice quality, but seemed somewhat soft and out of sorts; c, Hay, grand shaped stylish green, failing a bit in quality; c, Arnot and Jamieson, described as the winner of twenty-nine first prizes, a real good Border, splendid shape, full of nerve, and very tight in feather, we thought him if anything rather dull and dead in colour, and doubtless this was why he was so low down in the list.

SCOTCH FANCY.

Judge, Mr. J. F. Dewar.

One might write Ichabod over the Scottish section of the Palace show, it really seems to go from bad to worse. Plenty of specials and specialist judges, some English, some Scotch have been tried, but nothing seems to stop the gradual decline of interest in this section. However, the lateness of the show is responsible for much of this lack of enthusiasm. Only 19 entries toed the mark in the four classes, which we should say is an absolutely worst on record. With such a poor entry there was not much hope for quality, still, amongst the birds staged were a few that deserved more extended competition. Mr. Dewar handled the birds in his usual capable manner, and we heard no grumbling.

YELLOW (7): 1, Harden, very quick, nervy pied, plenty of side, long drive and good top end; 2, Wright, another grand quick actioned pied, not quite so long in neck, gets well into position, and handles nicely: 3, Willison, a real good clear, full of nerve, grand length of side, nice head and neck, but shows signs of the work he has been doing this season: 4, Longden, foul headed pied, grand shape, gets quickly in position, but is not long enough, or stout enough: vhc, Summerhill, large, shapely clear, but fails in drive, and not in the best of condition: hc, Fortunato, stylish clear, but needs length and top end; w.c. Harrington, a good foul buff. BUFF (6): 1, Wright, a really first-class green, grand head and neck, plenty of shoulders, nice length of side, comes well to the perch plenty of style: 2, 4 spls, Harden, big, long sided, rough-feathered pied, grand shape, length and style: 3, Longden, very quick handling, pied, but beaten in length of neck, nice shaped body and good tail; 4, Ross, foul head, not so much length of side, nice style; vhc, 2 spls, Willison, nice shaped clear, moves well, but not well staged; hc, Summerhill, stylish, quick handling, clear, hollow in shoulders. HEN, YELLOW (2): 1, Willison, long, shapely clear, nice head and neck, good shoulders, handles well; 2, Harden, quick, shapely clear, not so long in side, handles well. BUFF (4): 1, Wright, foul head, splendid shape, very quick in action, brings head well down, and uses his tail nicely; 2, 2 spls, Harden, shapely, quick actioned green, firm head and neck, good length of side; 3, Ross, very nice shaped clear, but we could not get her to show, she seemed soft and out of sorts; 4, Lowe, well shaped clear, nice action, does not get head down so low as leaders.

LIZARDS.

Judge, Mr. S. R. Compston.

GOLD CLEAR CAP (8): 1, 3, 4, hc, Rukin, big work, in straight rows, good size, a fair cap, and shown in good form; 2, Dewsnap, well placed, work distinct, not in the best of condition, better cap; 5, spl, Ramsden's medal for best colour fed Lizard, very good in centre of back, fails on sides to winner; 4, in places well spangled, not as good on shoulders, best cap; vhc, Oliver, a good bird when finished; hc, nice quality and condition; hc, c, Hampshire, a very good hen, bold spangling; c, another nice all-round hen. GOLD BROKEN CAP (7): 1, 4, hc, c, Rukin, very solid, nice size, good underneath, and good back; 2, Dewsnap, not as distinct as the winner, well rowed, all round; 3, Lawton, good stamp, but not as firm in rows; 4, shown in good feather, not as steady, and not as distinct in spangling as the winner; vhc, Lawton, good in centre of back and good size; hc, very good down centre of back, not finished on sides; c, good type with bold work. SILVER CLEAR CAP (9): 1, 3, vhc, Rukin, nice soft colour with good black, the tipping might be more distinct, every line of spangling distinct, rows, and well rowed underneath, nice cap; 2, Hampshire, hardly at his best, but all over a good Lizard, and well worth his place; 3, big bold spangling, not as regular as some; 4, Dewsnap, plenty of size, nice soft colour, and good work, a tendency to open out in middle of back; vhc, shows a few nice rows of spangling; vhc, Lawton, good in cap, and good colour; hc, Fisher, bold spangling, good cap and good under; c, Oliver, spangling well in rows. SILVER BROKEN CAP (9): 1, 3, hc, diploma for best Lizard, Rukin, bold, distinct spangling, in well placed rows, and nicely marked underneath, good level colour; 2, Fisher, clear distinct spangling, in good rows; 3, nice soft colour, good quality, can do some winning; 4, Fisher, hardly at his best, but shows good straight lines of spangling, and has size; vhc, Dewsnap, hardly as distinct and firm, good underneath; vhc, hc, c, Hampshire, very good rows of work on top, not quite finished; hc, likely bird for stock; hc, does not show to the best adantage; c, well spangled hen, with nicely broken cap.

BROKEN CAP SILVER LIZARD.
C. E. Fisher.

BUFF LANC. COPPY.
J. Garner.

LANCASHIRES.
Judge, Mr. S. R. Compston.

YELL. COPPY, CLEAR OR TICKED: 1, bronze medal for second best coppy, hc, c, Green, grand type, stands up well, showing a good pair of thighs, nice mould, neat coppy, a well-balanced bird, all quality, and shown to the best advantage; 2, Vickers, more substance, clears the perch well, good front and good shape; 3, Howarth, good substance, well coppied in front, not as good behind; 4, vhc, Garner, loses by condition at present, vhc, ood, long-sided bird, standing well from the perch; hc, long casted bird, neat looking; c, one of the best in quality and condition. BUFF COPPY CL. OR TICKED (12), 1, diploma for best Lancashire, hc, J. Garner, shown very fit, good quality of feather, nicely whipped up, good coppy, long sided with good substance and good Lancashire shape and position; 2, vhc, Green, a very taking bird, well shown, good pattern all over, beaten in length; 3, Vickers, plenty of substance, good length of body, if shown at his best would go higher; 4, Haslam, nice length and substance, will improve; vhc, good in body and stands up well; hc, good shape, well filled up in neck; hc, Law, in good condition and nice substance; c, West, shows good type and length; c, Nelson, neat coppy, very useful bird. YELL. PLAINHEAD CL. OR TICKED (12); 1, c, Green, rare type for a Yellow Plainhead, good head, neck well-filled up, good round body, with substance and length, and shown in the pink of condition; 2, Green, good length and substance, plenty of quality, with nice head, and stands up clean; 3, G. and W. Adam, excels in head, loses in other points; 4, Oldham, good in shape and type, with good head points; vhc, Haslam, good head, in good feather; vhc, Garner, good position and shape with good head, when in form can get well in the money; vhc, West, good length and will mend; hc, Nelson, nice head, right shape; c, in good feather and shows type. BUFF (15): 1, Law, correct type, nice length, and good substance, good head and neck, and good quality of feather; 2, Howarth, good head and neck, might get better away from the perch; 3, Green, in good trim, good head, and well filled up, with nice substance; 4, Law, good substance, good stand; vhc, spl, for best vhc Lancashire, Green, rare length and substance, good back skull; vhc, Oldham, nice substance, with nice head; hc, Haslam, good mould, in nice trim; c, Garner, excels in head and neck.

CINNAMONS.
Judge, Mr. T. Heath.

Oh, what a falling off was there! Only 24 of the chocolate-coloured beauties in four classes. Why is this? It cannot be because of the judge. Mr. Heath can, and does, handle Cinnamons as well as any man, yet at the event of the year we find an entry which is, to say the least, both disappointing and disheartening. It was not only that the entry was small, but the average quality was not high. In each class there were one or two good birds, but the remainder were certainly not up to Palace form. There were no less than 10 Specials offered, and the show was under the patronage of the Cinnamon Canary Club. Why the result was so deplorable it is difficult to understand. It is a poor return for the work which the Cinnamon Club and its officials have been doing during the past few years. There was no room for fault-finding in the awards, which must have given satisfaction to all.

YELLOW (7): 1, 2, Dormer, first grand, chubby Norwich type, with plenty of size, yet without coarseness, capital head, and not the faintest suspicion of browing, sound, rich, even colour of a good cinnamon hue, coming well down from beak to tail, very tight and silky in feather, and deserved more extended competition, second another very high-class bird of splendid colour, capital shape and size, nice quality of feather, but showing the effect of the hard work which it has done this season; 3, Nelson, very sound and even in colour, not quite so stout in substance of body, nice head, looked as though it had been somewhat spoilt in the laundry; 4, Lawrence,, nice, shapely bird of good size and colour, hardly so tight in feather at thighs; vhc, Hargreaves, beautiful colour and quality of feather, stands well, not so stout in body. BUFF (4): 1, Dormer, not one of the largest ever staged, but a quality bird right through, grand head, well-braced wings and tail, splendid type, as tight and compact in feather as a Java and as shapely as a Bullfinch, very sound and level in colour, and well furnished throughout; 2, Nelson, a larger bird perhaps, but not so sweet in shape, and not quite so neat in head, splendid colour, very hot and even in colour, and carries his feathers in a compact and nicely-finished manner; 3, Hargreaves, plenty of size, nice shape, sound in colour, but not quite so bright, did not seem in quite such good form as the others, and this made it look dull and listless compared with first and second. UNFLI. (7): 1, vhc, Dormer, yellow, of splendid shape, plenty of size without coarseness, rich level colour, grand head, stands well, high quality of feather; vhc, stout, shapely buff, grand head and body, nice style, colour carried well through; 2, Howard and Son, not one of the largest, but for colour and quality was not surpassed by any bird in the show, shown in the pink of condition, with wonderful bloom and finish, given a bit more size it could beat the world; 3, Nelson, very shapely, close-feathered buff, capital quality, sound, even colour, nice carriage, plenty of size, and with care should moult out well next season; 4, Swingler and Blackwell, yellow, full of good Cinnamon properties, a bird that reminds one of what Northampton used to be in the Cinnamon world, it is sound, rich and even in its colouring, it is feathered like silk, its shape is splendid, but—bother these buts—its head is hardly stout enough; hc, Hargreaves, very neat, shapely buff, good in body, feather and colour, only needs a bit more substance all through to make it a topper; c, Lawrence, nice quality, sound-coloured buff of good shape, also on the small side. HENS (6): 1, Nelson, slashing, big yellow, plenty of colour, nice shape and carriage, well finished in feather, a few hens like this in a breeding-room should land anyone right slap-bang at the top; 2, 3, Dormer, second a beautifully-modelled buff, plenty of size, grand type, sound, even colour, nicely finished in feather, and shows well, third grand-coloured yellow, of splendid quality, nice shape and size, stands well, and only needs a little more substance of head to make her a topper; 4, Hargreaves, shapely buff of good size, nicely feathered and sound in colour, except just in centre of back, which seemed broken in its evenness; vhc, Wright and Son, small, shapely yellow, nice colour and feather, but outdone in size; hc, Hart, yellow, of capital colour, shape and size, not quite so smart in wing-carriage as she should be.

YORKSHIRE GREENS.
Judge, Mr. T. Heath.

These favourites of the distant North made a very nice show. The numbers were not so large as at some past fixtures, but amongst the birds shown were some very choice and beautifully-finished examples of these charming members of the Canary family. The writer of these notes has long been an ardent admirer of the Yorkshire Green, and has watched with the greatest interest its evolution from the old Liverpool Green. At Sydenham these birds always look well because of the splendid top light, and we heard many non-fanciers, as well as fanciers, expressing their delight and surprise over these classes. We missed the names of many leading lights in Green circles. How was this? If the Green is to become more popular, the men of the North must send their best and choicest specimens outside of the County of Lancashire. At the Palace men from near and far are gathered together, and more interest is taken in the exhibits than at an ordinary local show. This tells in the advancement of a breed. The self-coloured classes filled well, but those for the broken, or foul coloured birds were very meagrely supported, which is rather strange. We most carefully examined the birds, but we failed to detect few square-feathered birds other than those which Mr. Heath ticketed with the card which is not considered a desirable one. The disqualification of these birds was one of the sensations of the show, and is fully dealt with elsewhere.

SELF YELL. (17): 1, Clayton, long, well-drawn stylish bird, well up on legs, rich, bright, grassy green colour, beautifully-pencilled and free from bronze, neat wings and tail, rare shape, close, silky feather, staged in fine condition; 2, sp, Martin, splendidly even in colour, grandly pencilled, rare head, good, clear run from throat to vent, very shapely in body, but does not possess the smartness of wing and tail carriage seen in the winner; 3, Gill and Pickup, hardly so long perhaps, but grand shape and splendid style, rich, deep colour, grandly feathered, nice wings and tail; 4, Ryno, slashing, big bird, well feathered, stands well, sound and even in colour, but just a shade too dark, and lacks the brightness and finish of the leaders; vhc, Thompson, for shape, colour, feather, style and general all round characteristics, we liked as well as anything in the class, a really high-class green, and hard to find fault with, just a shade too small perhaps, but, what quality and colour! hc, Deacon, very shapely, nice style and feather, not so bright in colour as we like them; c, Mrs. Bacheler, capital colour and shape, not so tight in feather as it might be; No. 439, Deacon, a most shapely little bird of lovely colour and quality, we liked much, and thought it might have got a card of some kind. Disqualified, 443, Stewart.

SELF BUFF (17): 1, 2, Hughes, first a slashing bird of rare length and carriage of body, just a trifle over-done in wings and tail, capital colour, nicely pencilled, well up on leg, nice, silky body feather, second another slashing bird, plenty of length and far better carriage of wings and tail, this is a real, good, big one, plenty of colour which is carried well through, nice quality and fit of feather; 3, Benson, fine head, neck, back, wings and tail, but just a trifle too stout in waist, splendid colour and well pencilled, nice carriage, and good quality of feather; 4, hc, Thompson, splendid, rich, sound colour, capital back, well up on leg, and nicely-drawn body, beautiful quality of feather but loses somewhat in wing carriage, hc rattling good bird for colour, shape, feather and style, but is just a shade hollow in back; vhc, Clayton, splendid colour and feather, nicely pencilled well-shaped and nicely-carried body, good head and back, but is inclined to hold wings badly; c, Ryno, magnificent colour, shape, style and feather, well up on leg, a shade too large perhaps, but a good one; 446, Heginbottom and Riley, splendid shape, rich, brilliant colour, and very fine silky feather, and a Yorkie in every respect; 451, Martin, grand, grassy colour, well feathered, and plenty of style; 461, Walker, not one of the largest, but a gem for colour, style and quality. FOUL YELL. (11): 1, Clayton, grand in wing, very rich and bright in colour, fine, silky, close feather, well up on legs and shows off his well-drawn body to perfection, a bird which handles well; 2, Deacon, broken in body, very shapely and stylish, full of quality, and brimful of colour, well pencilled on back, and free from bronze; 3, Hughes, pied in wing, grandly tapered body carried on a well-set pair of legs, and covered with a close, silky coat of beautiful grass-green hue, this bird we liked as well as anything in the class, and, had it won, few, we think, would have been bold enough to challenge the award; 4, Helliwell, pied in tail, plenty of length, nice shape and carriage of body, beautifully feathered, and brimful of rich, grassy-green colour, a bonny bird in every respect; vhc, Thompson, pied in tail, neat head, grand back, wings and tail, stands well up on leg showing a well-modelled body, beautiful quality of feather, and sound, rich colour; hc, Walker, pied in flights and tail, capital colour and feather, nice shape but not so long in body; c, Benson, pied in wing and tail, very stylish and neat in body, grand colour and feather, rather short in tail; 466, Martin, pied in wing and tail, splendid shape, style and colour, grand quality of feather; 463, Clayton, disqualified. FOUL BUFF (9): 1, Ryno, broken in body, slashing bird, plenty of length and style, good wings and tail, capital quality of feather, sound, rich colour, and nicely finished throughout; 2, vhc, c, Deacon, not quite so long in tail as the leader, beautiful colour and pencilling, very shapely and full of quality, pied in tail, vhc pied in tail and wing, plenty of colour, grand quality, not quite so level in back, c pied in tail, very shapely, stylish, sound-coloured bird, with good wings and tail; 3, Halliwell, rather longer than second, splendid type of what a Yorkshire Green should be, full of quality, and most beautiful colour; 4, Hughes, nice shape and carriage, plenty of colour, not so tight in body feather; hc, Martin, capital shape and style, close, well-fitted, silky feather, bright grassy colour, and well shown, we liked much.

LIMIT CLASSES.
Judges, Messrs. Dobson and Robson.

NOR. COCK, 30s. (28): 1, Pegg, clear buff, unflighted, red hot, nice substance, good shape, well cut away, a cheap bird, claimed; 2, Wilkinson, clear yellow, wonderful size, grand colour and type, good carriage, rare good one for stock purposes, also sold; 3, Patterson, buff, marked right wing and eye, ablaze with colour, very shapely and of nice size, shown in the pink, a bargain; 4, Axe, clear yellow, a bouncer, rare colour and quality, good type, another grand one for stock purposes; vhc, Gibbs, Adnitt and Driver, Wright and Son, Payne and Bennett; hc, Woollard, Bishop, Twine, Wright and Son; c, Gibbs, Gentle, Spinner. HEN, 20s. (9): 1, Battison, clear buff, rich quality and colour, well mealed, round as a ball, well cut up behind; 2, Gilbert, clear yellow, unflighted, all type, full of colour and quality, rather on the small side, yet a sweet damsel; 3, Keech, buff, marked left wing, short and thick set, A1 quality, jaunty carriage, very bonny; 4, Axe, clear buff, wonderful size, rare shape, good quality, a grand one for the breeding cage; vhc, Jenner; hc, Lawrance; c, Howard and Son. CREST, £3 (21): Good class. 1, vhc, Jenkins, with a brace of good ones, winner buff, marked wings, d.c., nice feather, good substance and shape, crest round and of neat droop and centre, a bargain; 2, Gilbert, buff, marked wings, d.c., very similar to first, little divides them, a real cheap specimen; 3, hc, Payne and Bennett, green, pied tail, d.c., A1 quality, good shape, fair size, crest not large, but of nice formation; 4, vhc, Tipping, buff, almost green, d.c., good feather, nice shape, crest of fair droop, centre well placed, not dear at the price; vhc, Woollard, Dobson and Sons; hc, Hart, Radley; c, Pocock, Galloway. CREST B., 30s. (17): 1, Tipping, buff, marked wings and eyes, fine substance and shape, rattling width of skull, well lashed, a bonny exhibit; 2, Neave, green pied tail, lovely feather, wonderful skull properties, fine-shaped body, been a good one, and far from a waster now; 3, Crow, clear buff, rich quality, good Norwich type, nice head and brow, built on smaller lines than above, yet a pleasing exhibit; 4, vhc, Payne and Bennett, green, fine substance and quality, rare skull and lash, shown in rattling trim; vhc, Pooley; hc, Johnson, Radley; c, Lander. YORKIE, 30s. (27): 1, Haigh and Son, buff, grizzled left cheek, rich salmon-tinged colour, well up in position, lengthy and leggy, a beauty; 2, Warr, clear yellow, soft silky texture of feather, wonderful length, straight as a rush, grand back and wing carriage, must have pressed; 3, Wood, clear buff, teeming with quality, grandly drawn and full of style, not overdone with length, still a bird we much admired, good third; 4, Wilkinson, yellow, marked wings and head, straight up, slim and of neat outline, good length and well on leg, lovely back and flights, very bonny; vhc, Gibbs, Spencer, Mason, Parrott; hc, Brayshaw and Jowett, Pattrick, Howarth, Amblers; c, Cooper, Radley, Crisp, Brotherton. A.O.V., 30s. (22): Choice assortment. 1, Oldham, clear buff Lancashire, rattling feather, showing grand substance, very lengthy, lovely head points, fine-shaped body, a real bargain; 2, Rae, buff, Goldie-Can., slashing quality, rare size, and of excellent shape, lovely face and of beautiful colour, good enough to win at majority of shows in dark Mule classes, no douht would find a purchaser; 3, Hay, clear buff Border, as pretty as paint, full of action, magnificent shape and quality, tight as wax, a little gem, and a good third; 4, vhc, Marshall, yellow, dark Goldie-Canary, rich colour, nice shape and substance, put down in capital trim, a sweet specimen; vhc, Hibbert, White, Ross; hc, Phillips, Lawrance, Hingley; c, Pattrick, Mills, Howarth. PAIRS, 35s., (32): Rare class. 1, 2, 4, Midgley, with a trio of well-matched pairs, winners clear yellow cock, well up in substance and of grand colour and quality, and clear buff hen, tight as wax, lovely type, and of rare carriage, second clear buff cock, all type and quality, not over large, yet good, and grizzle-headed yellow hen, fair size, nice colour and quality, well cut up behind, fourth ticked buff cock and clear yellow hen, both of nice quality and size, good shape and carriage, looking capable of producing something worth looking at; 3, Welch, clear yellow cock, large, hot in colour and of good shape, and clear buff hen, all type, not over big, but as tight as a Java, good pair; vhc, Brownlie, Tope, Wright and Son, Matthes, Cooper Bros.; hc, Lawrance, Bexson, Payne and Bennett; c, Howlett, Parrott, Gentle, Wright and Son.

Palace Report continued on page 167.

Mr. W. H. Spicer (Watford) writes that amongst other pleasing experiences at the Palace Show, whilst partaking of tea, several sparrows, eager to secure the crumbs, came and alighted on his tea-table, and even took possession of the adjoining chair. The birds' instinct led them to believe they were for once in good company, and that all men were not their enemies, but they themselves the "friends of man."

Have Canaries Naturally Square Feathers?

Messrs. Heath and Mundell Say "No," Liverpool Says "Yes."

What are Square Feathers?

Square feathers, as they are generally known, are not really square. They are like a small salt spoon, the tips having just a suspicion of roundness at the corners, but as they grow in a bunch across the shoulders of a bird, they give a square appearance, partly on account of their shape, and perhaps more on account of the fact that they grow shorter than the other feathers, and so give a square appearance to the whole group.

Are these Square Feathers Natural?

There can only be one answer, and that an emphatic "Yes," to this question.

Are Square Feathers Confined to any Particular Variety or Breed?

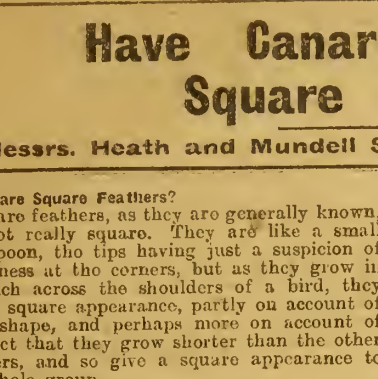
They are not. Specimens of all varieties show this defect, and in the same place. They are mostly noticeable in Greens on account of the fact that green or dark feathers finish with a lighter or brownish shade to the rest of the feather, and when a cluster of these lightly-shaded tips are thrown across the back of a bird, they give a decidedly square appearance, especially when it is noted that these feathers are the top or covering feathers, and that they grow short, giving the back of the bird an appearance of hollowness.

Causes of the Square Feather?

No doubt these square or short feathers are frequently caused by a slow, dragging moult. This has been proved by plucking the feathers and then putting the bird under conditions to grow them again quickly, when the result has been feathers of a normal length. Flight feathers frequently have this defect, and from the same cause. And, again, there is no doubt that these feathers have been grown into certain birds by careless pairing. Take two birds from a strain noted for producing these feathers and pair them together; it stands to reason that this defect will be bred into the birds, and so perpetuate.

Why Have these Square Feathers Led to Disqualification?

The reason is not far to seek. The cluster of short feathers, giving a square appearance, suggests clipping to the superficial observer. To the man who sees the fact that the feathers have a natural termination, would prove conclusively that the feathers had not been tampered with. Neither is the fact that an occasional jagged or broken feather has been found an argument that clipping has been resorted to, quite the reverse. If a man wanted to trim a feather, he would do it neatly, not give himself away by hacking at the feather as if it was a lump of wood. When superficialism and cheap notoriety-mongering is done away with, then may we hope to see a settlement of this vexed question, so far as the show bench is concerned, and the doing away with the dastardly suggestion of fraud which is being made against an honest Fancy run by honest exhibitors.—S. HADWIN.



One of the Alleged Trimmed Feathers.
Breeders of Greens say the square tips are a natural growth; the judges allege they are produced by cutting with scissors, presumably to remove "bronzed" edges.
(From Photo by Russell & Sons, Crystal Palace.)

"In Almost All Green-breeders' Rooms."

The question of square feathers has, I think, been practically settled by the Green Canary Association, their decision being "That square feathers are a natural defect in the Green Canary, and that they should be treated as such by the judges." From my own experience, they are hereditary, and helped on a great deal by a slow moult. They are to be found almost in all Green-breeders' rooms, I wonder whether the judges who have made so much bother over these square feathers have ever bred or studied Green Canaries, and would they disqualify a bird for having a square feather in the flights.—JOHN WM. METCALFE, 12, Drythen Street, Liverpool.

"No Advantage."

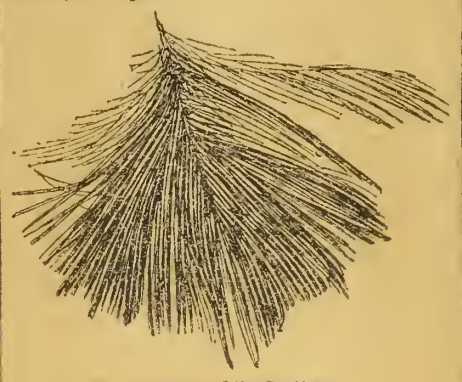
Having been disqualified for cut feathers in my bird, what advantage is it to me if I cut them? None. It would spoil the pencilling. The feathers on my bird are square and ragged, and therefore spoil the pencilling. That is the reason of my disqualification, in my opinion. They have grown naturally, and no instrument of any kind has been used to cut the feathers.—C. STEWART, 27, King Street, Liverpool.

"A Natural Blemish."

I am convinced that square feathers on the backs of Canaries are a natural blemish (which are most apparent in Greens), and should count against the bird the same as any other natural blemish.—JOHN WALKER, 197, Great Homer Street, Liverpool.

"Couldn't Trim if They Tried."

It is my firm belief that the square feathers are a natural growth, and that the gentlemen who are accused of trimming their birds could not do so if they tried. The best plan would be to get a pair of birds with these square feathers and breed them; then you would see the result. I myself have never been troubled with them, and I don't want to.—T. RYNO, 29, Toxteth Street, Liverpool.



Another of the Feathers.

"Through Weakness."

I have bred Greens for the past ten years, and my experience is that the so-called square feathers seen on Green birds are natural (not clipped). I have had them on youngsters four weeks old; some will moult perfect, others will not. If put under a strong glass the end of the feather will be found to be rounded off (not square), the quill comes to a natural point, the webb is very fine and sparse, and cannot be seen with the naked eye. Anyone using a glass on these feathers will see it is impossible to clip them. The defect, I believe, is through weakness.—W. THOMPSON, Liverpool.

"In Other Varieties."

The square feathers are bred in the birds. I find them in the Clear Yorkshires and Norwich as well as the Greens; they are mostly in the Yorkshires.—R. DAVIES.

"We Can't All be Rogues."

Are square feathers in Yorkshire Greens natural? I say *Yes*, and I think in justice to Messrs. Clayton and Stewart, who have been disqualified, that this matter should be properly thrashed out.

The members of the G.C.A. are unanimous that these feathers are natural, and not clipped, and I think all fanciers will agree, we cannot *all* be *rogues*.

Now the C.B.U. badly wants a job, let them appoint a committee to visit the Green Breeders' rooms, and I can assure you they will find plenty of square feathered birds, which have never been on the show-bench, but only used for stock purposes, and not all *young birds either*.—V. H. DEACON, 23, Central Park Avenue, Liscard, Cheshire.

"Caused Through a Slow Moult.'

With reference to Square feathers in Greens, I find from my own experience that this is caused through the birds having a slow moult, or being stuck in moult. I have birds in my own room which prove it. As everybody is aware you get Clears moulted with square flights through bad moults. Why not square feathers?—GEOFF. BENSON, 26, Wentworth Avenue, New Brighton.

"Cannot be Avoided."

I am pleased to give my opinion on the birds that have been disqualified in Green classes at the late shows. I have visited several Fanciers' rooms, and am convinced the so-called square feathers are a natural defect in some birds, and cannot be avoided when once in evidence. If the feathers are taken out, they will still show again. The same will be found in Clear birds if looked for. The subject was thoroughly discussed at our meeting, and I may say, as a member of the G.C.A., was also dealt with there, and I endorse the opinion of the two societies.—F. HANDLEY, Chairman, Liverpool Bird Breeders.

And Another.

"Result of Red-mite."

My opinion is that a bird, when in the moult, perhaps from the result of Red Mite, starts pecking itself, injuring the tips of the young feather, and causing it to be irregular but no signs of being cut.—W. CARRUTHERS, 48, Thorburn Street, Liverpool.

YORK C.B.S.

This enterprising Society held its Annual Members' Show of Canaries, British Birds, and Hybrids at Headquarters, All Saints' Room, North Street, on Wednesday last the 13th inst. The room is a capital one for the purpose, being well-lighted and free from draughts. Entries, though notso numerous as at previous shows, averaged eight per class in the twelve classes provided. Quality was well represented, many open winners being staged in both sections. The winning Linnet was a gem, and has already won 15 first prizes this season. Mr. Burnskell (Darlington) judged. It is intended to have monthly shows during the season with special classes for novices. CLEARS, etc., YELL. NOR. COCK (9): 1, Shorney, yellow tick, short, typical bird of good quality, spl for best Norwich; 2, Boyle and Young, little larger than winner, loose in feather; 3, Boyle and Young, similar bird, too long. BUFF (10): 1, Shorney, nice, big bird; 2, Boyle and Young, better head than winner, loses in body; 3, Wright, heavily marked, grand body; No.3, Boyle and Young, evidently missed, York open winner, and wins to-day. HEN (10): 1, Wright, grand hen, in fine trim; 2, Wright, good hen, fails to first in head; 3, Shorney, unflighted, will make a good one next season. UNFLI, CLEAR, etc., YELL. (6): 1, Pickering, grand bird, trifle long; 2, Wright, another grand bird splendid shape, our choice; 3, Wright, too long in tail, nice bird. This class was a treat for quality and colour. BUFF (9): 1, Shorney, eye and wing marked, grand shape and body, a gem; 2, Pickering, saddle marked, bit long, grand stock bird; 3, Wright, grand type carriage and shape. A.O.V. CAN.(4): 1, Richardson, buff cinnamon, rare size and feather, easy win; 2 ,Alderson, grand unfed. Norwich, rare type, little small; 3, Wright, cinnamon. YORKS., CLEAR, etc., YELL. (6): 1, spl, best Yorkshire, Chittenden, fine length, grand position and style, a good one, wins; 2, Warriner, fine quality and style; 3, Simeson. BUFF (7): 1, Simeson, fine, upstanding bird, nice pipe tail, presses hard for section special; 2, Simeson, nice stock bird; 3, Chittenden, foul wing carriage, other wise good. YORKS., NAT. COLOUR (6): 1, Campling, finely drawn, stylish; 2, Balmforth, not the quality of winner; 3, Alderson, too strong, nice stock bird. LINNET. GOLDFINCH, or BULLFINCH (10): 1, Boyle and Young, well-known Linnet, a picture, winner of 16 first prizes this season, looso in feather, over shown; 2, Simeson, Goldfinch, grand face and chest, weak on back and buttons; 3, Hunter, Bullfinch, nice colour, fails wing bars, bit small. A.O.V. BRIT. (12): 1 spl Best British, 2, 3, Dale, well-known winning Nuthatch; 2, Winning Bramble; 3, Chaffinch. MULE or HYBRID (5): 1, Doile, Yellow Goldfinch Mule; 2, 3, Boyle and Young, Gold-Bullfinch, well-known winner, lacks size; 3, Goldfinch, Siskin, nice bird, blaze not distinct enough.

BURTON-ON-TRENT.

The Annual Show of the Burton-on-Trent Fur and Feather Society was held in the large hall of the Staffordshire Knot, February 9th. Our section (local) was fairly well represented, and some really good specimens were staged, including some that have won a good many prizes for their owners this season in open competitions. J. N. Harrison judged. Messrs. Lithesland and Smith acted as secretaries, and with a good working committee had everything in hand in good time. All prize money has been paid, which, I think, speaks very well for the managers. YELL. NOR. COCK (6): 1, 3, Mason, a pair, clinking good birds, grand colour, smooth as wax and staged in splendid condition; 2, Shaw, his well-known clear needs no comment; 4, Smith, very nice clear, good quality; vhc, Shaw, a green; H. C. Hawkins. BUFF (5): 1, 4, Mason, leader a grand buff, plenty of size, good quality and colour, put down in good form; 4, a very smart, typical clear; 2, Shaw, a grand buff, has done a good bit of winning this season; 3, Hawkins, another rare good buff, very tight in feather, good quality. NOR. HEN (4): 1, Lea, a beautiful clear buff, splendid quality, wins easy; 2, 4, Shaw, leader a large marked buff, very good bird, fourth cinnamon-marked yellow; 3, Dicken, a good quality marked buff. 1906-BRED: 1, Mason, a grand, clear buff, nice colour, beautiful quality; 2, Smith, var. yellow, good colour and quality, minus tail feathers; 3, 4, Lea, two topping birds, nothing to choose between them, grand quality and colour. NAT. COLOUR (5): 1, Smith, a grand, clear buff, staged in splendid trim, takes special for best bird in show; 2, Mason, even marked buff, good quality, too small in head; 3, Bellamy, a nice-marked yellow; 4 and vhc, Hawkins, two fair exhibits. A.V. MULE or HYBRID: 1, 3, 4, Cameron, three fair birds, good colour; 2, Bellamy, a good buff, might have been first. LARK, SMALLER (5): 1, Hawkins, a good Siskin; 2, 3, Hakes, a smart Greenfinch and a nice Bramblefinch; 4, Smith, Bullfinch, a bit rough in feather or might have done better. LARGER (3): 1, 2, Hakes, his noted Hawfinch first, in grand style, second a good Blackbird; 3, Hawkins, a Blackbird, very moderate. SELLING, 10s. (9): 1, Shaw; 2, Lea; 3, Denny; 4, Smith; vhc, Smith and Hartshorne; hc Mason.

DARLINGTON CANARY & B.B.F.A.

The members held a Table Show of matched pairs of birds for breeding purposes at the George Hotel, Feb. 13th. Twenty-one pairs of birds were staged. Judge, T. Wright (York). YORKS.: 1, hc, c, J. Cuthbertson; 2, Black; 3, Wilcock; vhc, Metcalfe. NORWICH: 1, Black; 2, E. Cuthbertson; 3, J. Cuthbertson; vhc, O'Connor. MULE OR HYBRID: 1, vhc, hc, c, Wildsmith and Hawkins. Special for best pair of birds shown, R. S. Black.

NORTH LONDON C.B.A.

Annual Show of Pairs, matched for breeding, at headquarters, Public Library, Stoke Newington, February 13th, when 79 pairs were staged. It was very encouraging to note the great advancement made both in numbers and quality. This was very marked in the champion Yorks. and Novice Norwich Classes, there being 16 entries in the former, and no less than 33 in the latter. The Novice Classes in this Association are a special feature at all their shows, and competition is very keen. Several fine pairs for Mule and Hybrid breeding were staged. There was a good attendance of members and visitors throughout the evening. Mr. John Robson judged, and his awards were received with satisfaction. CHAMP. NOR. (7): 1, 2, 3, r, vhc, hc, c, Hodder. YORKS. (16): 1, r, vhc, Rennie; 2, A. B. Forse; 3, hc, Preeton; c, Sweetman. A.O.V. (3): 1, 2, 3, Mortlock. AMATEUR NOR. (5): 1, vhc, Reynolds; 2, 3, r, Pike. YORKS. (3): 1, 2, 3, Andrews. A.O.V. (3): 1, Pike; 2, 3, Reynolds. NOVICE NOR. (33): 1, Harper; 2, extra 3, r, Marley; extra 2, vhc, Hale; 3, Spiers; hc, Williams; c, Saugridge. YORKS. (5): 1, 3, r, B. Forse; 2, vhc, Penton. A.O.V. (4): 1, 2, Marley; 3, Woodman; r, Penton.

PARTICK AND DIS. C.B.C.

Monthly Show for breeding pairs, February 14th. A large turn out for such a stormy night. Mr. John Young (Ruthergien) judged, and his awards were well received. The following new members were admitted:—Messrs. W. Sanderson, R. Eastman, D. Graham, A. Murdoch, and W. L. Brown. CREST PAIRS (6): 1, 6, Henry; 2, McCormack; 3, spl, Mulholland; 4, 5, spl, Hamilton. PLAINHEAD (16): 1, spl, Simpson; 2, spl, Henry; 3, spl, Miller; 4, McRobbie; 5, Walker; 6, 7, Miller. BORDERS (6): 1, 2, Miller; 3, spl, Walker; 4, 5, Walker. A.O.V. (6): 1, 2, 3, spl, Todd; 4, McRobbie; 5, 6, Brown. Next show for moulting pairs. A hearty vote of thanks to Mr. Young for judging brought the meeting to a close.—ANDREW MULLER, Secretary.

BOURNEMOUTH AND DIS. C.B.A.

This Association held a Members' Pair Show, at their headquarters, the Quadrant Restaurant, Feb. 13th. Six classes provided. Unfortunately a keen north-east wind was blowing, consequently both Crests and Crest breeders were conspicuous by their absence. However, 19 pairs were staged, amongst them being some birds of real merit, the progeny from which, given a favourable season, should be heard of at the first feather show next June. Mr. W. Woods judged, and upon the whole his decisions were well received, and a hearty vote of thanks was accorded to him for his gratuitous services. Messrs. Leech and Jones carried out their secretarial duties in their usual able manner, aided by the Chairman and several of the committee. Miss Craddock handed the prizes to the successful exhibitors at the close of a very pleasant evening. NOR. (7): 1, 2, equal 3, vhc, Goodland; equal 3, hc (2), Brooke and Margrie. YORKS. (2): 1, Brooke and Margrie; vhc, Harris. A.V. FOR MULE BREEDING (5): 1, Crawshaw, Goldfinch-Canary; 2, 3, Witheridge, Linnet-Canary, Goldfinch-Canary; vhc, Gerrey, Bullfinch-Canary; hc, Mrs. Trowbridge, Goldfinch-Canary. A.V. FOR HYBRID BREEDING (5): 1, Miss Craddock, Goldfinch-Bullfinch; 2, hc (2), Gerrey, Siskin-Linnet, Greenfinch-Bullfinch, Goldfinch-Bullfinch; 3, Mrs. Trowbridge, Greenfinch-Bullfinch.—W. O. BROOKE, Chairman.

DULWICH AND PECKHAM C.B.S.

Fourth Annual Members' Show of pairs matched for breeding, February 7th, Herne Tavern, Peckham Rye. Entries totalled 82, this being an excess of 32 over any previous year. J. Robson judged. The Norwich Plainheads were a grand collection, the novices coming up close behind the champions. The Yorkshires showed a distinct advance, both in numbers and quality; some grand birds staged in both sections. Crests were a fine lot. Mr. Horton took special for best pair in show with his winning pair of Crests. The Hybrid section was very interesting. Six new members nominated, making a total of eighteen since the New Year. Specials were won by Mr. Horton, champion classes; Mr. Hodson, novice classes; Mr. Boydon, Hybrid classes; and Dr. Sidgwick, selling.

CHAMPIONS: NOR. PLAIN.: Boydon, 1; Dr. Sidgwick, 2; Brounlie, 2; Woolhouse, 4, vhc, hc; Martin, c. YORKS. (8): Tringhaus, 1, 2, 4, hc, c; Easterling, 3, vhc. CRESTS (6): Horton, 1, 2, 3, 4, vhc, hc. A.O.V. CAN. (4): Brounlie, 1, 3, 4; Martin, 2. NOVICE: NOR. PLAIN. (10): Hodson, 1, 2, 4, vhc; Kates, 3; Richardson, hc, c. YORKS. (19): Wall, 1; Waterman, 2, 3, 4, hc, c; Richardson, vhc. A.O.V. (3): Johnson, 1, 2, 3. MULES: Brounlie, 1, Goldfinch-Canary; Johnson, 2, Linnet-Canary; Boydon, 3; Dr. Sidgwick, 4, Greenfinch-Canary; Richardson, vhc; Rees, hc, c. BRIT. BYB. (4): Lugg, 1, Goldfinch-Siskin; Boydon, 2, Goldfinch-Bullfinch; Richardson, 3, Goldfinch-Bullfinch; Johnson, 4, Bullfinch-Goldfinch. SELL.: Dr. Sidgwick, 1, 2.

The most serviceable, striking, yet tasteful and economical

LIVE BIRD LABELS

are those obtainable from "Cage Birds."

For the convenience of readers we have had printed a quantity of address labels suitable for use when despatching live birds on journeys by rail, etc. These are printed in red ink, on paper gummed at back, and

JUDGES OF CAGE BIRDS.

The attention of Show Secretaries is directed to the following list of gentlemen willing to act as Judges. Terms for insertion on application.

A. AMBLER, 17, Lytton Road, Bradford. Judge of Canaries and Cage Birds. Life experience. 11 years reporter to the Fancy Press.
H. W. AXE, 55, Market Place, Doncaster. Judge of Canaries and other Cage Birds. Practical experience (Norwich and British speciality).
W. O BARLOW, The Aviaries, Malpas, Cheshire. Judge of Canaries, British Birds and Mules. Terms moderate
J. C. BARNES, 149, Duncombe Street, Walkley, Sheffield. Judge of Canaries and Cage Birds. Long practical experience. Terms moderate.
W. P. BARNES, Judge of Canaries and Cage Birds. Life practical experience. Breeder and exhibitor. Reporter for Fancy Press. Commercial Road, Grantham.
GEO. BENNETT, 46, Wenlock Street, Luton, Beds. Judge of Canaries and Cage Birds. Thirty years' experience. Terms moderate.
W. A. COWGILL, 115, Washington Street, Girlington, Bradford. Judge of Canaries and Cage Birds. Over twenty years' experience. Terms moderate.
A. G. DAVIS, Judge of all Classes of Cage Birds. Long practical experience. Terms moderate. 110, Tib Street, Manchester.
T. DIXON, Pioneer Terrace, Bedlington Station Northumberland. Judge of Canaries and Cage Birds. Life experience.
J. DOBSON, 14, East Road, London, N. Judge of Canaries and Cage Birds.
J. W. DRIVER, (Adnitt & Driver), Gladstone Street, South Normanton, Alfreton. Judge of Cage Birds.
GEO. GARDNER, 11, Haverstock Road, London, N.W. Judge of all kinds of Cage Birds.
C. A. HOUSE, 82, Upper Walthamstow Road, Walthamstow Judge of Canaries, Mules, British and Foreign Birds.
W H. LINDLEY, 4, Summer Lane, Wombwell, near Barnsley. Judge of Canaries and Cage Birds only.
F. MARWOOD, 1, Barnard Street, Thornaby-on-Tees, Mules, British and Foreign, a Speciality. 17 years exhibitor. Terms moderate.
W. R. MILES, The Aviaries, Chichester. Judge of Canaries and Cage Birds. Life experience.
W. MUNDELL, 6, Carlisle Place, Bradford. Judge of Canaries and Cage Birds.
J. NORTH, 435, Oxford Road, Reading. Canaries, British and Foreign Birds. Author of "The Common Sense of Canary Rearing."
J. PATTERSON, Chirnside. Judge of Cage Birds. All varieties. Wide practical experience. Specialist Border Fancy Judge.
J. H. PAYNE, 17, Northgate Street, Gloucester. Judge of Canaries, British and Foreign Cage Birds.
PARKER ROBINSON, N.B.B. & M. Club, 1, Back Hartington Street South, Barrow-in-Furness. Cage Birds, all Varieties.
J. H. ROE, 167, Clarence Rd., Derby. Judge of Canaries and Cage Birds. Twenty years' practical experience.
WILLIAM J. ROSS, 19, Haulgh Road, Inverness, N.B. Judge of Pigeons, Canaries and Cage Birds. All varieties. Life experience.
A. E. SILK, The Aviaries, Whitstable. Judge of Canaries and Cage Birds. Practical experience. Terms moderate.
C. E. SILK, The Aviaries, Emsworth, Hants. Judge of Canaries and all Cage Birds. Life experience.
HENRY TAMS, Orchard Place, Longton, Staffs. Judge of Canaries, British and Foreign Birds. Twenty-five years Breeder and Exhibitor.
R. B. TOPE, Hoo Street, Plymouth. Judge of Cage Birds, Rabbits, Cats, and Cavies. Twenty-five years' experience.
J. WILCOCK, 14, Chapel Street, Eccleshill, near Bradford, Yorkshire. Judge of Canaries and Cage Birds. 25 years Breeder and Exhibitor leading shows.
J. C. WILMOT, 17, Sandhurst Road, Bedford. Judge of Canaries & British Birds. Thirty years' experience.
J. H. WINN (of Winn & Hinde), Freehold Aviaries, Lancaster. Judge of Canaries and Cage Birds.
H. WRIGHT (WRIGHT & SON), 84, Heath Road, Norwich. Judge of Cage Birds. Life experience.

SHOW DATES FIXED.

To secure insertion in this column a guarantee that the show will be advertised in "C.B." to the extent of at least 25/- must be sent to our manager.
* Under the Rules of the C.B. Union.

*Oct. 4 and 5.—**Burnley.**
*Oct. 11 and 12, 1907—**Great Harwood.**
*Oct. 17 and 18.—**Dulwich and Peckham** (J.R., G.E.W., W.V.)
*Oct. 18 and 19.—**Rochdale O.C.** (C.A.H. & W.M.)
Oct. 18 and 19.—**Newcastle and District Good Intent.**
Oct. 18 and 19.—**Accrington & District** (J.R.)
*Oct. 25 and 26.—**Manchester and Northern Counties, O.S.**
Oct. 26 and 28.—**Cheltenham C.B.S.**
*Nov 1 and 2, 1907—**Mansfield.**
*Nov. 1 and 2, 1907.—**Blaydon-on-Tyne and District C.B.S.**
*Nov. 1 and 2.—**Blackburn.**
*Nov. 2 and 4.—**Leicester Hand in Hand C.B.S.**
*Nov. 6 and 7.—**Welsh National C.B.S.**
Nov. 6 and 7.—**Portsmouth.**
Nov. 6 and 7.—**Swansea and District C.B.A.**
*Nov. 7 and 8.—**Greenwich and Deptford.**
*Nov. 8 and 9.—**Hinckley** (J.R.)
*Nov. 8 and 9, 1907.—**Sheffield and District C.B.S.**
*Nov. 9, 1907—**Bo'ness.**
*Nov. 9.—**Stockton-on-Tees & District C.B.S.**
*Nov. 12.—**Cambridge and Cambridgeshire C.B.S.** (J.R.)
*Nov. 13.—**Luton** (J.R.)
Nov. 14.—**Merthyr Tydfil.**
*Nov. 15 and 16, 1907.—**Leeds**
*Nov. 16 and 18.—**Nottingham.**
Nov. 20 and 21, 1907.—**Margate** (J.R.)
*Nov. 22 and 23.—**Hull** (J.C.B., C.H.)
Nov. 22 and 23.—**Sunderland.**
Nov. 23.—**City and County of Perth.**
*Nov. 26 and 27.—**Bournemouth and District C.B.S.**
*Nov. 26 and 27.—**Derby.**
*Nov. 27 and 28.—**Cardiff and District C.B.S.** (J.H.P. & J.R.)
Nov. 30, 1907.—**Dundee.**
Dec. 6 and 7.—**L.C.B.A. (Westminster).**

More Results.

Kindly thank all inquirers for Bullfinches and Goldies I advertised last week in your valuable paper, CAGE BIRDS. They are too numerous; I cannot answer them personally, so thank them sincerely through the medium of so valuable a paper as CAGE BIRDS.—H. SLATER (Bedale).

Accrington C.B. Show will be held on October 18th and 19th.—John Robson (London) will judge.

It is useful to note in the report of the Stratford F.S. that the committee consider posters on the G.E.R. stations and improved style of window bills greatly helped the gate.

Rochdale Good Intent are holding their First Feather Show on June 29th. Robert Barrass, judge. Open show, November 2nd. Mr. H. W. Battye will judge.—SAM. M. CLAYTON, hon. sec.

In the report of the York Cage Bird Society meeting you have got my Christian name as William. This is wrong. It should be E. CARDWELL, treasurer, York C.B.S., 70, St. Paul's Terrace, York.

I congratulate you most heartily on your birthday number. It cannot be surpassed, I feel sure, no matter how you try. The effort speaks volumes for your businesslike editorial capacity. With all best wishes for the future success of CAGE BIRDS.—CHARLES BOGG (Horncastle).

The fourth annual balance-sheet of the Birkenhead C.F.A. reaches me, showing a balance on the general account of £3 13s. 2d. A profit of 7s. 11d. on the nest Feather show and a profit of 9s. 6d. on the annual old show have to be recorded. Auditors, Messrs. Moss and Palmer.—Sec., J. T. HARDING, 8, Hinson Street.

The 18th annual report of the Stratford and East London F.S. lies before us, and tells a joyful tale of well-supported shows and renewed interest in Fancy matters. A profit of 8s. 4d. on the monthly show of cage birds was made. Mr. C. H. Cooper won the challenge cup for cage birds. The balance-sheet shows cash in hand £5 1s. 11d., and cup fund £5 1s. 6d.; a total of £10 3s. 5d.

The balance-sheet of the Dunfermline and West of Fife O.S. is an encouraging financial statement, and serves once more to show that an enterprising policy is the soundest. The balance has been increased from £8 12s. 3½d. to £11 14s. 10d., despite a considerable increase of expenditure in catering in a better style for the needs of the fancier; £24 4s. was given in prize money to the cage bird section. their good fortune still continue!

From the secretary of Bradford (East) O.S. a programme of members' shows, to be held at headquarters, Park Chapel Schools, West Bowling, during 1907, comes to hand. Three gold medals and upwards of £4 in money specials will be competed for at these shows. On Saturday, June 1st, a First Feather Show will be held; judge, W. A. Cowgill (Girlington). On Saturday, June 27th, another First Feather show, with judge, Mr. S. Dean (Great Horton). On Saturday, October 12th, will be held a show; judge, Mr. J. Wilson (Allerton); 4 champion classes; 6 novice classes. On Boxing Day, Dec. 26th; judge, Mr. J. Wilman (Great Horton); 4 champion; 4 novice; 6 extra novice classes (for those who have never won a money prize). All entries to be made to the the secretary, H. HILL, 31, St. Stephen's Road, West Bowling.

During the course of our business experience with Mr. Rudd, of Norwich, that enterprising bird specialist, has several times requested us to examine parcels of original testimonials received by him from grateful and enthusiastic clients who have expressed themselves delighted with his businesslike, fair, and even generous treatment of them. It is a superhuman task for any man, and least of all for a bird dealer, to satisfy the desires of all his customers, but Mr. Rudd may safely be said to come as near doing the impossible in that respect as any man now on the market. Such eulogiums as may be found in this latest parcel of tributes received by us this week would serve to convince the most sceptical that the bedrock of Mr. Rudd's extraordinary success as a bird specialist is his consistent honesty and fair dealing. They also serve to show how extensive and far-reaching has this once insignificant business become.

Canary Fancy in Boston, U.S.A.

I think CAGE BIRDS is a very interesting and instructive paper for those who keep Canaries or other birds for a hobby or otherwise. I am sorry to say there is not the interest taken around here for the fancy Canaries as there uesd to be; all the old-time fanciers are about dead and gone, and the only Canaries that take here at the present time is German Rollers, and a great many who kept fancy birds have sold out and gone in for Germans.—ANDREW H. GAMBLE (Charleston, U.S.A.).

Provost Mackie has kindly consented to become a patron of the Leith O.S. for this year.

Sheffield and Dis. C.B.S. have arranged their annual open show for Nov. 8th and 9th.

Kindly notify in your paper my regret that I am quite unable to answer the innumerable letters I have received in response to my advertisements last week.—(Rev.) BERNARD WILTON (Middlesbrough).

Mr. J. Garland (Bordesley), who has been out of the trade for some years but has now returned to it, writes:—I congratulate you on the success of CAGE BIRDS. I received twenty-two letters from one advertisement.

We have resigned the secretaryship of Rotherham C.B.S. through not having time to attend to it properly. All letters should be addressed to Messrs. Hayes and Oakes, 9, Florence Road.—DUCKER and TWIGG (late secretaries).

The Swansea and Dis. C.B.A. wish to inform the Fancy that they have no connection with the newly-inaugurated society in Swansea, and will continue to hold their show as hitherto, Nov. 6th and 7th. Secretaries and exhibitors, please note. ALF. HITCHINGS.

The City of Bradford O.S. annual dinner will be held on Tuesday, February 26th, at the Market Tavern, Godwin Street. Shall be pleased to see any fanciers and friends. Double tickets, 4s. 6d.; single tickets, 2s. 6d. Dinner, 7 p.m. Tickets on application to any of the committee.—P. STANSFIELD, sec., 1, Lonsdale Street.

The balance-sheet for 1907 of the Gateshead and Dis. C.B.S. has been received, a balance being shown in cash of £15 5s. 5d., and in assets £5 12s., a considerable improvement upon last year's figures. The document is signed by the auditors, Messrs. F. F. Hawkins and J. Brown, and by the secretary and treasurer, Mr. T. Taylor.

T. S. Moore (Cambridge), hon. sec. Cambridge and Cambridgeshire C.B.S., writes:—Finding that Luton C.B.S. had decided on November 13th for their Show, and that being the date we had fixed for ours at a meeting called for the purpose, it was felt by the members generally we had no desire to clash with same, so have altered ours to November 12th.

Edward Philpott (Oswaldtwistle), writes:—I beg to differ with D. G. Davis (Cardigan) with regard to his remarks on Durisco. Durisco is made by the Silicate Paint Company, Charlton, London, who are the sole makers. The wash made by Morsco, of Bristol, is calcarium and fresco. Durisco is obtainable from any first-class decorator. I myself keep it. It is by far the best wash on the market, being equal to paint if rightly used.

Guarantee your Show with "C.B."

The hon. sec. of that go-ahead society, the Newcastle and Dis. C.B., writes:—I received your guarantee form, which I have duly filled in signed, which entitles us to have our show in your Show advertisement column. I also hope to spend more than 25s., for I think it the duty of all societies to do so if their finances permit, as without a doubt it is through advertising in CAGE BIRDS that most of the shows are a success.—W. CURRY.

Items From the Palace.

The awarding of the special "for the rarest British bird" (vide schedule) caused considerable comment. Many said that as the winner, a grand Nutcracker, was a practically certain Foreigner—in other words imported to this country—it should have been passed over. But others thought this was simply begging the question, for are not many of the Tree Creepers, Wrens, Chats, Wagtails, Siskins, and Bullfinches which win in British classes imported from the Continent? And this list could be extended. Others said the Nutcracker was not a British bird at all. It appears, however, in the B.O.U. list, and in Howard Saunder's "Manual," so is clearly entitled to rank. The judges were simply told to pick out the "rarest" (taking into consideration, of course, its suitability as a cage bird), and this they endeavoured to do.

We got among a merry party of Scotchmen—time and place had better not be stated. And many funny yarns they told. One "all-round" judge (such are not liked ayont the Tweed), who knew little of Scots Fancies, when he had some classes to officiate upon simply drew the tip of his walking-stick along the cage wires, and gave first to the bird who got into position the quickest after that operation was over! This tale was capped by another concerning a poultry judge who was called upon to place the cards in one or two Yorkshire Canary classes. He went for the shortest and stoutest birds he could find. When someone took him to task afterwards, and pointed out the type of bird he ought to have gone for, he exclaimed: "What! Them long, half-starved de'ils!"

Sunderland Show will be held on November 22nd and 23rd next.

Mr. A. Sheppard has removed from 38, Hichisson Road, Peckham Rye, to 20, New Cross Road, S.E.

Cambridge Ornithological Society's show is fixed for November 27th and 28th. Mr. G. Gardner has been selected as judge.

The North Manchester C.B.S. have elected a new secretary, Mr. John Dewey, whose address is 34, Alfred Street, Harpurley.

Fanciers please note, Messrs. J. and F. Wildsmith and Hawkes have removed from 27, East Raby Street, to 32, Kingston Street, Darlington.

W. Richinson, 36, Cyclops Street, Grimsthorpe, has been appointed secretary of the Attercliffe C.B.S., and all business must be sent direct.

Rochdale Town Hall Show, as it is generally called, will be held on October 18th and 19th. The judges-elect are Messrs. C. A. House and W. Mundell.

I had 118 applications from my advertisement in CAGE BIRDS. Please thank all correspondents, as they are too numerous to answer.—J. SMITH (Horley).

Seeing in CAGE BIRDS results of painting competition that you give credit to a Mrs. E. Meeson, of Grimsby, do you mean Mrs. Emerson? If you do, kindly correct in next issue. —MRS. EMERSON.

The Welsh National Cage Bird Society is in no way connected with any other Cage Bird Society in Swansea.—Hon. sec., S. J. NICHOLAS, 9, Nicholl Street, Swansea.

Will bird dealers and others desirous of taking up an agency for picture postcards kindly write our manager for terms? They will find it remunerative to do so.

In the Y.C.C. of Ireland Club report, page 137, first word on third line should be "Devitt" and not "Dewitt." Second word on last line but one should be "several," not "serious."—W. C. SHOLEDICE.

Mr. F. W. Lockton, of 64, Castle Gate, Grantham, has bought Mr. C. Fuller's entire stock of birds and appliances. They include all his winning Yorks, Norwich, and British which have been got together at great expense.

Please accept my greatest thanks for the portrait of my birds on the front of your valuable paper, CAGE BIRDS. I must congratulate you on the life-like appearance as a true copy, one of the best I have ever seen in my life.—W. JUDD (Leicester).

Lost.

At the Crystal Palace Show, a lady's grey fur muff. The finder, returning same to Mr. H. J. Hawes, 106, Liverpool Road, N., will be compensated.

Scotsmen on Staging.

The staging at the National Show did not quite fit in with the views of a few of the Scottish visitors, who held that it was a little too low to show the birds off to the best advantage. They like the benches to come up to a height which does not call for any stooping in order to examine the birds, and on this point believed that their Northern fixtures were in advance of Southern shows.

Collapsible Staging.

A model of the collapsible staging, invented by Mr. D. Kinlayside, of Edinburgh, was exhibited at the CAGE BIRDS' Stall at the Palace Show, and attracted a lot of notice from show secretaries and officials who were present. The question of reducing the cost is, we understand, being seriously considered by the patentee, and further announcements respecting same may be expected. Mr. Kinlayside travelled up to the show and expressed himself as greatly interested in it.

At the Palace.

The birds were fed during the Show upon seeds supplied by that standard old firm, Messrs. James Carter and Co., of Holborn, and from a close personal inspection of the provender provided by them we can safely declare that not only was it of the finest quality throughout, but it was scrupulously clean and of most wholesome and appetising flavour. The old song of "Would I Were a Bird," instantly occurred to us upon sampling the golden grains. Sound seed is a great boon to a cage bird, and in Carter's Seeds the Exhibition birds had it at their disposal, and relished it greatly.

There was a scare for the moment when it became known that two birds were missing. Everyone stared in puzzled surprise when they heard the lost ones were Green Canaries. Fanciers were immediately seen asking one another in the same breath: Have the disqualified ones skedaddled? Talk about "two minds with but a single thought!" But the hasty surmise was erroneous, for they were of Norwich and not Yorkshire type. The facts are that first thing one morning (Tuesday, we believe) the doors of the cages containing exhibits Nos. 487 and 517 were found open, and the birds were nowhere to be seen. Whether it occurred by accident or not no one had the faintest idea. Maybe the chubby Green ones are still disporting themselves amongst the wilderness of girders in the Palace roof; and maybe they are not. We must sympathise with Messrs. W. Thompson and W. Hales on the loss of their birds, which stood 4th and third prize, and were catalogued at £20 and £10 respectively.

THE CRYSTAL PALACE SHOW 1907.

Mr. G. CRABB,
President of the L. P. and O. S.

The Forty-eighth Great National Show at the Crystal Palace, Sydenham.

AN EXCITING EVENT.

One of the most sensational and fiercely exciting cage bird shows ever held at the Palace came off last Friday, Saturday, Monday, and Tuesday, February 15th to 19th inclusive, in the Forty-eighth Great National Annual Show held by the London and Provincial Ornithological Society. The contests between the various exhibits were of the keenest possible description, and the personal conflicts, if possible, were even keener. Not that any of the disputants came to blows, thank goodness; but if a certain little crowd of Liverpudlian enthusiasts could have interviewed personally the judge of green Canaries, Mr. T. Heath, he would doubtless have had a very warm time of it. But the imperturbable Mr. Heath was busy enjoying himself in another turbulent quarter of the Palace, where "resignations" were fiercely fluttering in the air. But we anticipate. More of this anon.

The entry received, considering the time of year, was in almost every respect a highly gratifying one. Certain sections evidenced a distinct advance upon previous "National" shows, and as the rule about "no extension of entries" was, as usual, very strictly enforced, no whip up cards being sent out, and considering how late the show was this year, the total of 2,163 entries can only be dubbed a surprising one. The "popular" varieties of Canary made a magnificent display, and, taking them on the whole, the liking for birds of a good size was never more noticeable than it was here. How greatly the Canary Fancy has improved in the two respects of size and colour more particularly can only be realised by those "old 'uns" who remember the "weeds" of bygone years. Even the best birds of some ten or twelve years back would fail to approach in either size or colour the productions of the Canary cultivator of the present day.

The exhibits were staged, as last year, in the centre transept, and no more suitable spot in the Crystal Palace could be selected. Extra precautions were taken by the management to secure the exclusion of draughts, the noble drapery extending its massive sweep from the roof of the building in almost uninterrupted folds. There is ample accommodation for even double the entry and the twelve stretches of benching, making in all some thirty-six parallel rows of cages, relieved by the graceful palm and fern at frequent intervals, form as imposing and enchanting an array of feathered treasures as can be imagined.

There had been a very natural hesitation on the part of exhibitors to send their birds to the Palace in the light of recent happenings at other exhibitions of live stock recently held there, but the combined managements of the L. and P.O.S. and the Crystal Palace having put their heads together, any fear that a reasonable, even, and comfortable temperature would not be maintained was immediately dispelled. The L. and P.O.S. executive had voted the liberal amount of £50 towards the efficient heating of the exhibition, and Mr. Ramsden, securing the co-operation of the Palace people, spent no end of time and trouble in arranging for the erection of a large steam pipe right down the centre, and the grateful glow from this rendered the row of chairs on each side a popular resting place for the crowds of visitors.

While the management of this most important show rests for the greater part upon the shoulders of a solitary individual, Mr. J. W. Ramsden, the hearty and ungrudging support of a large army of brother workers is given him, and the cool presence of an ever courteous and diligent co-manager in the person of Mr. Lambert Brown, serves to pacify the unreasonable, irate, or impatient visitor. The committee of the London and Provincial Ornithological Society have had many, many commendations showered upon them in the past for their esprit de corps, and it is difficult for us to allocate to them higher praise this year than they have received on previous occasions. We refer to the names of those whose splendid help contributed so much to the consistently smooth running of the show in another part of this week's paper. Mr. George Crabb, whose portrait figures in our headpiece, is the genial President of the Society, and, despite the fact that he had not completely recovered from the effects of a severe indisposition, attended regularly from "early morn till dewy eve," rigidly supervising every detail of the arrangements. Of that monarch of show managers, Mr. J. W. Ramsden, it has now become almost superfluous to speak. By this time he must have become utterly satiated with laudatory fare, and though we would gladly provide him with criticism if we could he negatives our efforts to do so, and from start to finish makes us envy his passivity, his resource, and his business ability. Congratulations may certainly be showered upon everybody concerned in the arrangements, not even forgetting the humble sales clerk and assistant manager, Mr. Ramsden, Jun.

In our Show Supplement we give portraits of Messrs. Crabb, Ramsden, and Lambert Brown, and we are also privileged to introduce our readers to two ladies whose presence and influence on the mere male element in the show served to smooth off the corners and impart a finish to the executive, viz., Mesdames Ramsden and Lambert Brown.

The judges' luncheon was this year converted into a sort of combined show function and annual dinner of the L. and P.O.S., and the gathering left nothing to be desired as a representative and festive collection of fanciers. Mr. Crabb presided and toasted the judges and the visitors, calling upon Messrs. Hills and Mundell on behalf of the former, and Mr. White (a visitor from Australia) on account of the latter. These gentlemen suitably responded.

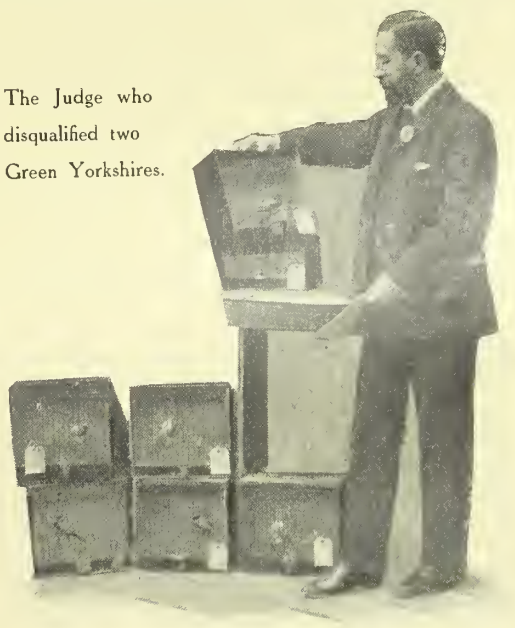
Never do we remember a Crystal Palace Show where the number of visitors was greater. Each day a tremendous crowd put in an appearance, and Saturday afternoon the aisles were so crowded that there was scarcely room to move along them. The contingent of visitors from Scotland and the North were critically examining every department of the exhibition. Fanciers from the Midlands vied for place with those from the West, while the East Coast men were not outnumbered by those from the South.

Recollections of the Palace Show.

Twenty-two years ago I was in Sydenham and saw a poster outside the Crystal Palace announcing that a bird show was being held. I entered, and was immediately seized with a desire to make cage birds my hobby. I purchased a pair of birds (exhibited by Messrs. Mackley, I think) out of the Selling Class, and from that day to this have never been without birds, nor missed a National Show at the Palace. My first experience of a National Show, as regards management, was in 1899, when the Show was under the partnership of Messrs. Crabb, Fryett, Heath, and myself, with Mr. Heath as show manager. We had a capital entry, 2,424. This was the last year that the respected Judge, the late Mr. G. Barnesby, officiated.

In 1900 the Show was run for the first time by the London and Provincial Ornithological Society, with Mr. Heath as show manager, and Messrs. Crabb, Fryett, and myself as a show committee.

The Judge who disqualified two Green Yorkshires.



Mr. T. HEATH.
Formerly Manager of the Show, now a Judge.

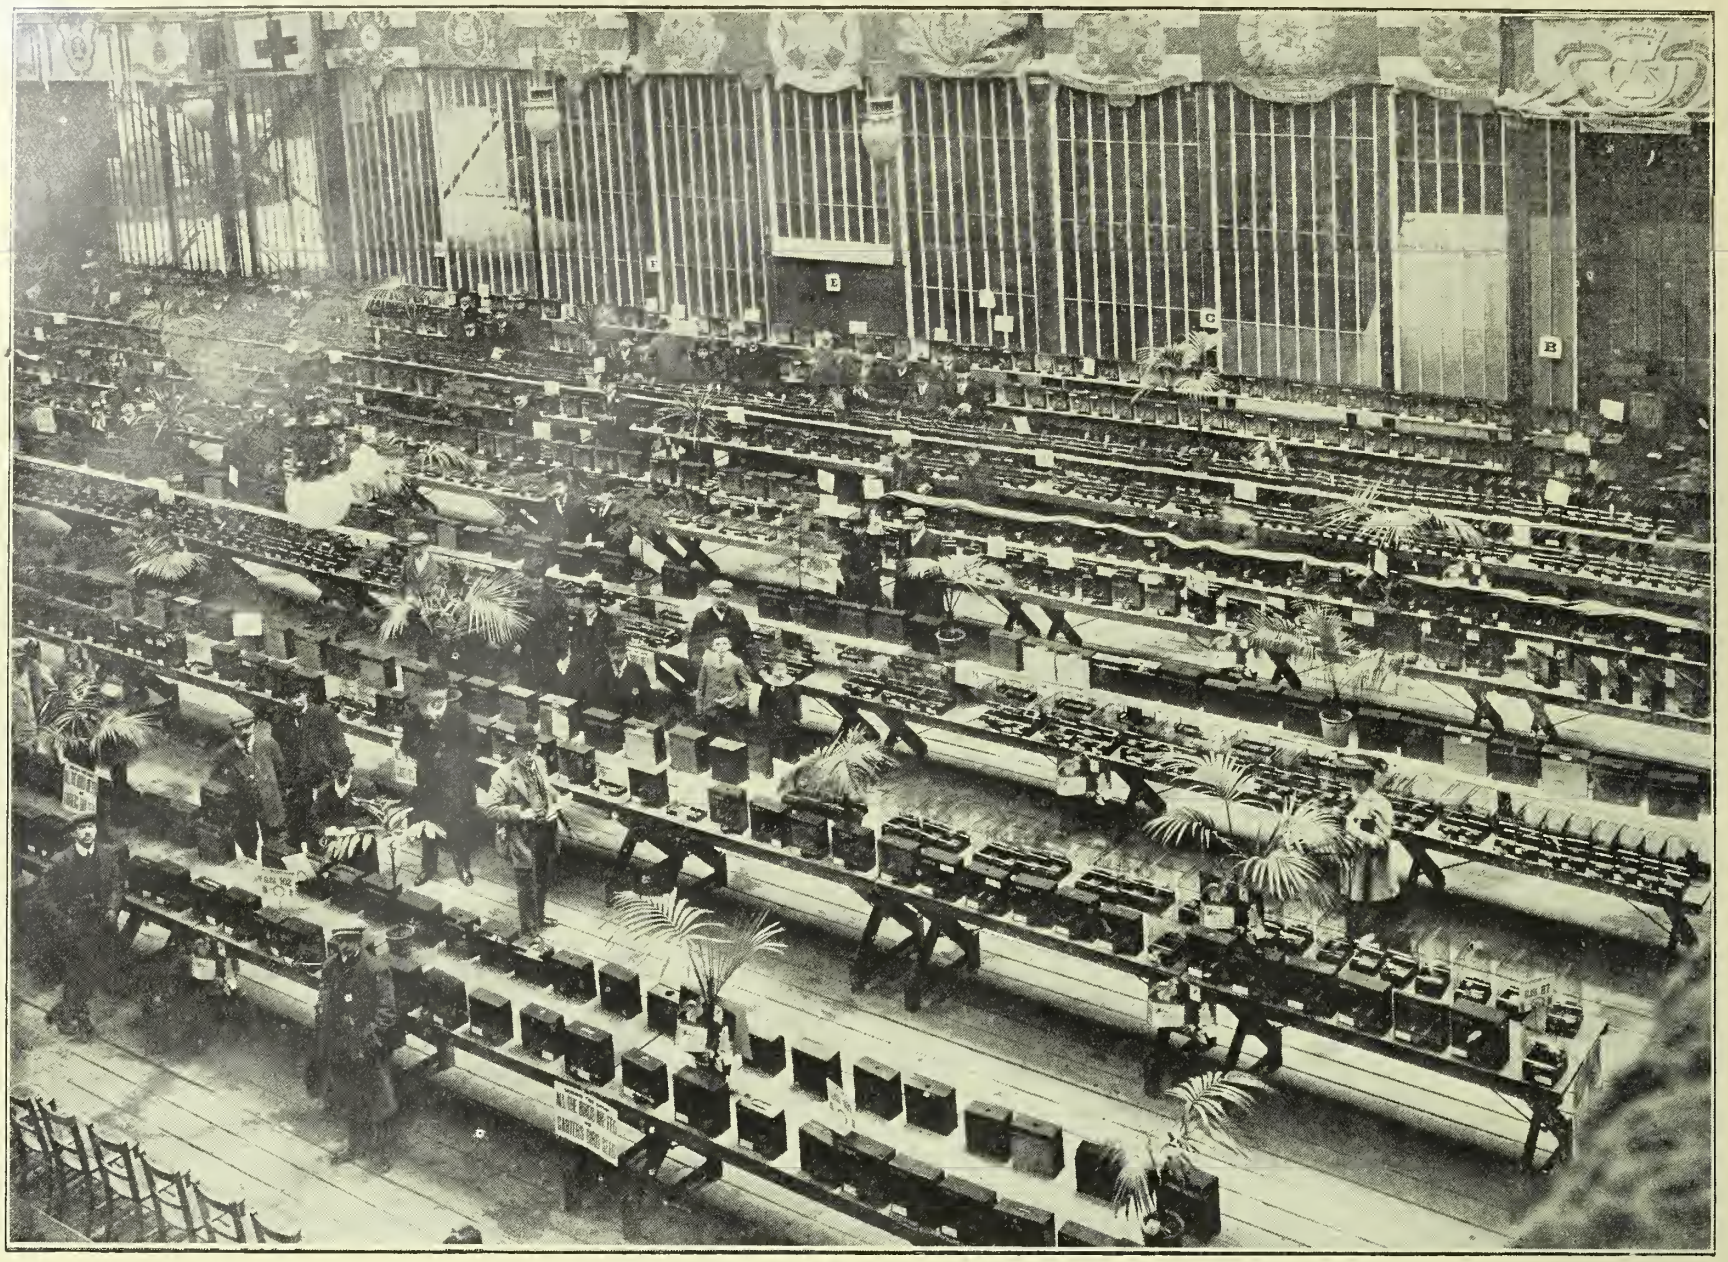


Photo Russell & Sons.

THE CRYSTAL PALACE CAGE BIRD SHOW.

The picture gives some idea of the imposing array of cages, etc., and the extent of the exhibition.

(Continued.)

In 1901 (and up to the present date) the National Shows have been held by the L. and P.U.S., with myself as show manager of the actual Show. In 1901 I had as partner the late Mr. Hardy, whose share in the work was the clerical work. We spared neither time nor expense to make the Show a record, and success was our reward. We had a record entry of 2,633. The Shows of 1902, 1903, and 1904 were managed entirely by myself, with an average entry of 2,100. In 1905, 1906, and 1907, Mr. Lambert Brown, Hon. Sec. L. and P.U.S. joined me in the management, he taking sole management of the clerical work, and I the sole management of the actual Show at the Palace. This arrangement has worked well, and we have had a higher average of entries at our last three Shows. I am proud to say that all the Shows with which I have been connected have been successes financially, though at times the balance has been very small. One of the Shows, with a turnover of some £500 to £600, yielded a profit of £1 5s. 3d. I heartily thank those kind friends throughout the country who have helped me so much to make these Shows so successful. My last Show (1907) has been a glorious success, good entry, record attendance, and, so far as I know, everybody satisfied. A new steam pipe had been laid for this Show, which kept the enclosure at a suitable temperature. One point is worth mentioning. The public are taking a greatly increasing interest in cage birds. My time at the Show was almost entirely occupied in explaining points and answering queries of would-be fanciers. Most of the enquirers became purchasers, and I hope in time will become exhibitors and members of cage bird societies. —J. W. Ramsden.

A COUPLE OF "ANCIENT LIGHTS."

In our illustrated supplement this week we give portraits of two almost historical characters, so far as bird exhibitors are concerned, in the persons of Messrs. Small and Grutchfield. These two men have been attending to the wants of successive exhibits at the Crystal Palace for years. With regard to H. G. Small, this is the 36th Great National Show he has attended. His first manager was F. W. Wilson, the second Mr. Venables, the third T. Heath, the fourth J. W. Ramsden. He has seen the Show gradually grow from 700 entries up to 2,600. In 1876 the entries numbered 1,480, the judges being Messrs. Harrison Weir, Jenner Weir, G. Barnesby, A. Wellmore, and R. L. Wallace. In 1879 the entries had risen to 1,551, in 1886 the entries had risen to 1,856, the chief prize winners being Messrs. Mackley Bros. and W. E. Greeves. In this year 95 classes were provided. In 1888 the entries numbered 2,109, in 1894 the entries numbered 2,214, and rose till they reached the record number in 1901 of 2,633.

In the earlier days deaths among the birds were more numerous than they are now, especially amongst the British. Birds were then sent to the Show in paper wrappers. Of late years a great improvement has taken place both in cages and travelling cases.

Mr. Small was the orignator of the system of attaching numbers to the cages (by the owners). Originally, the Crystal Palace Company used to number the cages after they arrived at the Show, and much confusion took place in so doing.

Mr. Small states that great strides have been made in the staging of birds by the exhibitors, and generally speaking the birds are much healthier and stronger than they were years ago. The Show often closed on the Thursday afternoon at four o'clock, and it was often as late as Saturday afternoon when the last bird was packed. This was before the days of travelling cases, and when all exhibits were sewn up in canvas for the return journey.

It is J. Crutchfield's 41st Great National Show. His first Show was held in the Terrace Dining Room in the year following the great fire at the Crystal Palace, in which the north transept was destroyed. The largest exhibitors in the early days were Messrs. Bemrose and Orme, and the best known Mule breeder and exhibitor was Mr. J. Doel, who afterwards became a judge.

The Judges on their own Classes.

Mr. R. RHODES.

Whilst the Palace Show still maintains its popularity with owners of many other varieties of the Canary family, the battles for supremacy amongst the Crests certainly seem to have to be fought out on other grounds. The reason appears to be reluctance—which increases every year—on the the part of their owners to send their birds away from home for so long a period, and at a time when they need to be in the best possible condition in view of the near approach of the breeding season, when, through any mishap, the use of valuable birds, most difficult to replace, may be lost for that season. So long, therefore, as the National Show is held at the present time of the year, I do not see any prospect of increased competition in the Crest section. From the above, it will be gathered that, in my opinion, the lack of keen competition does not arise because we have not the birds—I consider, in fact, we have more good Crests out to-day than at any period within my recollection. With regard to the exhibits now on view, they cannot fairly be said to adequately represent the Crest Fancy of to-day, though, nevertheless, there are individual specimens of very considerable merit in the classes. Lack of numbers and keen competition, however, tend to diminish the interest even in these really excellent exhibits. I find one gratifying feature, and that is the much stronger entry in the Novice classes, the quality, too, of the birds entered therein being of a distinctly pleasing character. It is important that this section of the Crest Fancy should be encouraged under proper conditions.—R. Rhodes.

Mr. H. T CAMPS, F.Z.S.

I was very pleased with the section of the Foreign birds over which I officiated, it being the best show of Parrots, etc. (in regard to quality) which I have seen for years. I recollect a year when we had Fiji Island Parrakeets and the Red Shining Parrakeet, and when there used to be three or four Great Salmon-crested Cockatoos on view. The display was very fine then, and I think that the present Show is but little, if any, behind. We have a lovely pair of Bourke's Parrakeets to look at, most interesting and rare exhibits—I do not, in fact, recollect at the moment having ever seen this species on the Show bench before. Then we have the Banksian Cockatoo once again, and looking better than ever I have seen it previously—quite a picture, in fact. The second prize bird in the large Parrot class is also a rare exhibit, of whose sex and species I am not sure at the time of giving these notes. The winning Sulphur-crested Cockatoo is a beauty. The Budgerigars I do not think come quite up to the average, though they contain a pair of Yellows which are as good as any I have seen since the days when Miss Howison exhibited these birds. The Blue Bonnet Parrakeets are very fine, and staged in pleasing condition. The favourite Grey Parrots are not strong, though one or two specimens are birds of above average merit. The Red and Blue Macaw is a striking exhibit. Altogether I can only repeat that this section is a strong one, and particularly attractive this year.—H. T. Camps.

For other Judges remarks see ordinary issue.

Mr. J. H. PAYNE.

Tho Norwich Champion Section was a grand one, both in respect to numbers and quality. I do not remember ever seeing so few "wasters," the quality throughout being most level. I thought the buffs generally were in advance of the yellows; still, curiously enough, the marked yellows were the best lot I consider had been seen in the big Glass House for many years. The weakest were the yellow hens, these being below last year's form. Still, the winners were good ones. The winning ticked yellow cock, which secured the special for best Norwich in the Show, was a real beauty, the best I think that has been benched for many years, and it was put down in grand trim. The winning clear buff cock, which was the runner up, is a real gem, having plenty of substance combined with quality. The leading unflighted buff is a topper having wonderful quality and feather for such a big one. The 1st prize unflighted yellow for colour, shape, and quality was also grand, but a wee bit on the small side. The buff hen class was splendid, the winner excelling in colour, shape, and feather, and being of good size. I might say there were several birds that would have been higher up had they been put down in good form; some were indifferently washed, and some were not washed at all. I must have a bird well shown, especially at such a fixture as the Palace. Greens were a nice lot, and I thought they were on the top grade as regards type and closeness of feather, but it struck me that the colour had not advanced so far, taking the birds as a whole. Still, there were several excellent in this respect. The winning broken yellow I thought the best in the section, the colour being very bright and pure. The winning buff self cock was a very typical bird, good in colour, and of grand feather and quality.—J. H. Payne.

Mr. W. MUNDELL.

The Yorkshires this year came up well, and the principal winners of the season all met. The special for the best bird went to Bailey and Swanger's buff tick, which was closely run by the same owner's young unflighted yellow. The hen classes were particularly fine, the yellow being a long drawn hen showing plenty of breed. I was pleased to see that our Welsh cousins were to the fore in buff hens, Messrs. Fellows and Flynn's (Cardiff) buff hen being a gem. In cinnamon marks some noted birds were shown. The buff of Mr. R. L. Crisp (London) I liked well. In the hen section the birds were of good quality, the yellow being a long drawn hen of true Yorkshire type. The buff, though not quite as long, was full of quality, and was one of the best of the season. Compared with previous years the section seemed to me to show a distinct advance, especially in position and quality. And throughout the classes the number of wasters was few.—W. Mundell.

Mr J. H. ROE.

This year's collection of Mules and Hybrids at the great National Show provided, as usual, a most beautiful and interesting collection. The entry was also very satisfactory. Never have I seen better specimens of the various crosses than those facing me on Friday last. The best teams of both the English and Scotch exhibitors were represented. Mr. J. Williams, the Mule king, exhibited a magnificent team. In fact, I never remember seeing our old friend put down a better. Other exhibitors sending forth teams, and sharing some of the honours, were Messrs. Duncan and Logan, E. J. Lamb, E. G. Wright, W. McInroy, Dr. Galloway, Mrs. Coffey, R. W. Jones, W. Mather, A. Shellam, G. Hesketh, D. G. Lewis, J. Taylor, and others. The clear or marked class, though not large, contained some lovely specimens. The winner was the champion clear owned by Mr. Williams, late the property of Mr. R. Colton, the best clear that has been seen out for some time, followed by a very smart wing ticked, not quite so large as winner, but of lovely shape and quality. In the uneven marked Goldfinch and Canary class, Mr. Williams again led the way with a very smart eye and wing marked, very nearly an evenly marked bird of lovely colour and quality, a buff, and a very nice wing marked yellow. Mr. Lamb also staged a very nice marked buff in this class. The eye marked buff put down by Dr. Galloway is a very promising youngster, and should make up well. In the Dark Goldfinch and Canary classes, the winning yellow of Mrs. Coffey's is a bird of grand size and shape, full of colour and quality. In buffs Messrs. Duncan and Logan's winner is of grand size and colour, with a splendid blaze. The Greenfinch and Canary of Mr. Taylor's is of lovely shape and quality of feather, but was hard pressed by a very nice yellow put down by Mr. Wright, though not quite so good in shape. The yellow Linnet of Messrs. Duncan and Logan is a gem, and will want beating. Mr. Hesketh's Twite and Canary, Mr. Lewis's Redpoll, and Mr. Williams Siskin are all birds much above the average. Of the seven Canary-Bullfinches entered only six turned up, four yellows and two buffs. The winner is a very grand yellow, owned by Mr. Williams, late the property of Mrs. Skey, last year's Palace winner, a real gem. The second, also a yellow of grand size and shape, not quite so clear in markings as winner; the third is a very smart buff of medium size, nice colour and feather (owned by Mr. McInroy), which looked like the Scottish National winner. Hard lines to run up against winners! The fourth was another yellow of grand colour, but smaller than leaders, put down by Mr. Ross. This was like an International contest, with honours rather in favour of the English team. The Bullfinch Hybrid class was a splendid one. The winner turned up in Mr. Williams' champion Goldfinch and Bullfinch, which also took special for best in Show. It is a gem of gems, and should be seen by all lovers of a good Hybrid. The second was awarded to a very fine Greenfinch and Bullfinch, staged by Mr. Shellam, and a well-known winner. The third was a good Linnet and Bullfinch, owned by Mr. Williams, followed by another grand Goldfinch and Bullfinch, put down by Mr. Mather. Several grand birds were out of the money, including a very fine Greenfinch and Bullfinch, staged by Mr. Wright, that had got a damaged wing, which kept it out, a grand one otherwise. The class for Small Hybrids between two British birds was a very interesting collection; the winning Goldie-Redpoll and Goldie-Siskin of Mr. Lamb's are two gems. The Siskin and Greenfinch of Mr. Shellam is also a grand specimen, also Mr. Webster's Redpoll-Greenfinch.—J. H. Roe.

G. E. WESTON.

My section was once again distinguished by very keen competition, the merest shade serving to separate many of the birds in the premier positions. A stinging class of Bullfinches opened the proceedings, and gave me many anxious moments ere the cards were finally allotted. There was really very little in it between the leading quartette. The condition in which the majority of the Bullies were shown pleased me very much, and in quality the class was in distinct advance on that of 1906, which was also left well in the rear in point of numbers. The palpably Foreign element was but little in evidence. One bird was very honest, however. I badly wanted to give him a card, but he would persist in piping right under my nose, a bar or two of some tune learnt, doubtless, out in Germany! How many of his brothers discreetly held their peace and got a card, I wonder? Every bird in the honour-list I thought a beautiful Bullfinch, and many real good specimens had to stand out in the cold. The Goldfinches were somewhat down in number this year, but were, all round, a high-class lot. The leading couple stood away from the others, perhaps, but third and fourth were grand ones, too, and a dozen birds followed which, to use a hackneyed phrase, were "fit to win anywhere" and took some sorting over. The winner upheld the prestige of Wales as a hot-bed for British Goldfinches. The runner-up held the same position, I believe, last year, and is a bird distinguished by remarkable wealth of chestnut "tanning." He found many admirers. The winning Linnet was also "in the money" last year, but has made distinct strides since then; for richness of colour, he stood well ahead, and he now carries the "bloom" esential to success. The first four, however, had a tough fight for their respective positions. The second is a type of Linnet—a mass of small, yet distinct pencilling—which appeals to me immensely. It is only fair to state, however, that the third found plenty of admirers. The "tail end" seemed more in evidence in this class than in the others, many birds being unsteady and lacking in polish. The Chaffinches were a warm lot, it being a "toss-up" almost between first and second, while third and fourth were equally close together. Several exhibits had extraordinary wings, so far as "whites" were concerned, and the chances of these birds were the reverse of improved thereby. The leading Foreign Bullfinch was in lovely trim, and stood well ahead of its class, several graud Goldies therein having apparently had quite enough of it for the present season, their condition telling against them. Taking the classes all round, I think they were well up to the mark for quality and interest.—G. E. Weston.

L.C.B.A. DINNER.

Successful Social Function at the Holborn Restaurant.

With the Crystal Palace Show and the wind up of the show season, comes the 18th Annual Dinner of the London Cage Bird Association, which took place on Monday evening last at the Holborn Restaurant, when close upon a hundred members and visitors assembled and partook of an excellent repast. The gathering was the largest of its kind that the Society has ever had, some 90 covers being laid; and the genial President, Mr. R. L. Crisp, who makes an ideal chairman, must have felt highly pleased at finding himself surrounded by such an enthusiastic number of fanciers and their wives. The tables were tastefully decorated, and the event was one to be long remembered, for it showed that, independently of the members of the Association, there were many visitors who were in sympathy with its objects.

There were many old and tried members and fanciers present, including Mr. J. Dewhurst, accompanied by his daughter, Miss Kate Dewhurst; Mr. and Mrs. J. S. Clarke, and little Miss Dorothy Clarke; Mr., Mrs. and Miss Dawson; Mr. and Mrs. Trower, Mr. and Mrs. Mendel, Mr. and Mrs. Bayeut, Mr. and Mrs. Davey, Mr. and Mrs. Daintry, Mr. and Mrs. Maybank, Mr. and Mrs. Lazarus, Mr. and Miss P. Mariani, Mr. and Mrs. Cocks, Mr. and Mrs. Knight and Mr. P. Knight, Mr. and Mrs. Franz, Miss Double, Miss L. C. Hoar, Mr. and Mrs. Baker, Mr. and Mrs. H. Smith, Mr. and Mrs. Winn, Mr. and Mrs. Savage, Mr. and Mrs. Bennett, Mr. and Mrs. Turner, W. H. and J. J. Mugford, Mrs. Robson and Miss Robson, Mr. and Mrs. Ward, C. T. Maxwell, Messrs. Pooley, Hazel, Wallington, Easterling, S. A. Sandy, Allen, Silver, Brown, Frank Green, Armour, Boxall, Stevenson, Wade (the new Secretary of the Association), Oake, Howard, King, Slade, Scaife, F. Boxall, Hazell, Godby, G. W. Smith, A. W. Bacon, Shepherd, Minvalla, Rush, Sargent, Webb, W. A. Green, Allwright, Pullinger, Honeysett, Miller, and a few others not known to us by name.

The programme commenced with the toast of "The King," the company singing the National Anthem, led by Miss Joan Astley. A little later the President, Mr. Crisp, in proposing the toast of "The L.C.B.A.," expressed the great pleasure it gave him to preside at such a gathering. The past year had, he said, been a very successful one for the Association. Both the Young Bird Show and the Annual Show held at the Horticultural Hall far excelled their previous records. The latter was a big undertaking, and he thanked the Committee for the excellent services they had rendered on those occasions, and particularly mentioned Messrs. Dewhurst and Daintry and their Secretary, Mr. Wade, who fairly revels in work. They had a number of "live" vice-Presidents, who were ever willing to lend a helping hand when required. Their balance had been augmented as a result of the Show. During the season they had had interesting lectures, including one by Mr. North on "The Evolution of the Green Canary," which proved most instructive and entertaining. They had also taken an important step in becoming associated with the Cage Bird Union, although doubtless there were many fanciers who did not approve altogether of that Union. He thought the governing body must be men of integrity and above suspicion in every way. The objects of the Union were, on the whole, commendable, but he was strongly opposed to anything which interfered with the liberty of the subject, and he was, therefore, opposed to Rule 17. He thought it was likely this rule would in time be deleted. He then asked the company to charge their glasses and drink to the prosperity of the Association. In responding, Mr. John Tyson, the Hon. Treasurer, said it was most gratifying to him to annually meet many of the same old friends, although some of them were not members of the Association, yet they found pleasure in attending their annual festivity, and he trusted that this occasion would at least equal, if not excel, any previous gatherings. He did not intend to inflict upon them a lot of statistics, which would not interest those who were not members. During the past year the Association had made 36 new members, which brought their total up to 117. The membership at present was not smaller than last year, yet it did not move forward at the rate he would like to see. The L.C.B.A. were noted for originality, and their movements were closely watched by societies throughout the country. The great venture of the past year was the show held at the Horticultural Hall, Westminster. When they first proposed holding their show there, the ruin of the Society was predicted; but fanciers rallied round them, and they were able to add a substantial sum to their balance, besides handing the Lord Mayor of London a donation of £10 towards his fund for crippled children. Some of the sections at that show did not come up to their expectations—notably the British and Foreign—but probably that was due to the early date on which the show was held. He was pleased to announce that they intended holding their next Annual Show on December 5th and 6th, at the same place. He thanked those present for the enthusiastic manner in which they had received the toast.

Mr. Wade, the Secretary of the Association, referred to Mr. Tyson's remark that all eyes were upon the L.C.B.A. at their last show. He thanked the President for his kind remarks as to his ability to undertake the duties of Secretary of such an Association, and he could only say that his success would be largely due to the hard-working staff, and his reason for saying that was that one could not help but notice the way in which the members worked hand-in-hand.

Another pleasing item on the programme was the presentation of the silver cups and challenge bowl to the successful winners, and in presenting a handsome silver loving cup, offered by Mr. Trower for the most points gained by six nominated birds in the British section, the President said he had much pleasure in presenting the cup, and was very sorry that Mr. Maxwell had since had the misfortune to lose the splendid collection of birds that had won it for him. One thing they must be grateful for was that it was the birds, and not their owner, that had perished. Mr. Maxwell thanked the donor for the valuable special he had been fortunate enough to win, and also the Chairman for his kind expression of sympathy with him in his recent loss.

By the way, we hear Mr. Maxwell has "laid the foundation stone" for a new aviary, and hope it will eventually contain as fine a collection as the one that he has lost.

Mr. Crisp received a beautiful silver challenge bowl, which he had now won for the third time for the best young Yorkshire Canary exhibited but not necessarily bred by a member. He had, however, bred the winner at all the three shows. The bowl now becomes the absolute property of Mr. Crisp, who, in returning thanks, said he did not wish the Association to be the loser by his win, and he presented them with a handsome cup for competition in place of the bowl, his gift being received with acclamation. Other winners were Mr. Lethbridge, who won the Amateurs' Cup; Mr. Lazarus, the cup presented by Mr. Grant; Mr. Shepherd won the silver watch given by Mr. Lazarus for the best Crest or Crestbred in 1906. The Chairman said this was an ominous win, as Mr. Shepherd had not been long in the Fancy, and he hoped it would enable him to keep time at the meetings.

Mr. J. S. Clarke, in proposing the toast of "The Fancy," said it gave him the greatest pleasure to see what was probably the most brilliant gathering in cage-bird history. To the true fancier, the Fancy was his first thought. There were, however, "fanciers" and "fanciers," and he was sorry there were not more like Mr. Tyson and Mr. Crisp, who were ever ready to give their time and money to advance the Association. Mr. Clarke referred to the Fancy Press and to those who called themselves fanciers, but who were not. There was the Cage Bird Union, a new combination, who had, he said, stolen the ideas of the L.C.B.A., but they at least could not steal the brains of its members. The C.B.U. was, he said, like a ship without a rudder—without a policy of any description. In proposing the toast, he coupled the names of Mr. Robson and Mr. S. A. Sandy, who was possibly not so well known as Mr. Robson, but was, for all that, much respected. Mr. Sandy, in replying, thanked Mr. Clarke for his kind remarks anent himself, and said it was no light task that the Press had to perform, as there were times when it was very difficult to hold an even balance where the interests of the different societies were conflicting; but it had, he felt sure, always been the policy of Mr. Carl, who he had the honour to represent that evening, to endeavour to give fair play to all, and he felt quite safe in saying that Mr. Carl would pursue that line in the future as in the past. He thanked them most heartily for the manner they had received the toast. Mr. Robson also responded, and said he was much obliged to Mr. Clarke for the kindly way in which he had given the toast. He thought the best way fanciers could further the interests of the Fancy was to assist each other as much as possible. When he first came to London from the North, he was three or four years before he knew a brother fancier, but when they came to look to-day there were societies in almost every district, which showed the marvellous progress that had been made. The Fancy Press was the great stay of the Fancy, and was a combination that could not be severed. In years gone by societies used to dread holding open shows, now a society would spring up and hold an open show all in a few weeks. He concluded his remarks by wishing the L.C.B.A. every success.

Mr. Dawson proposed the health of "The Ladies and Visitors," and said he was proud to see so many ladies present. If a fancier had a good wife or daughter who took an interest in his birds, he was almost sure to succeed. We ought to encourage more ladies to become fanciers, and he should like to see them rally round and join the L.C.B.A. Mr. Ward responded to the toast in a few well-chosen words, and said a more hospitable evening he had never spent. It had been a pleasure and a privilege to him to be present.

The President proposed a hearty vote of thanks to the artists and to Mr. Will Bentley, who had taken charge of the musical arrangements. The rendering of "Love's Coronation" by Miss Joan Astley was much appreciated, as also were Mr. Fred Wilden's Living Marionettes, who kept the company convulsed with laughter—"The Hielanders" being particularly amusing. We should also like to mention Mr. Will Bentley's "Jemmy Law" and "The Cook," and think that his fee (fixed by himself) of "Stewpanter" very moderate. A very enjoyable evening was brought to a close just before the bewitching hour of midnight with the singing of "Auld Lang Syne."—S. A. SANDY.

Our Coloured Plate.

A JUDGING COMPETITION.

A Guinea and a Half Offered to Readers of "CAGE BIRDS" who correctly place the Birds depicted.

The gorgeous yet æsthetic plate of Hotly-fed Norwich Canaries which Mr. Norman has placed in front of us for this week will be pronounced one of the happiest of the many felicitous productions in colour he has yet favoured us with. The birds have been portrayed in most realistic fashion, certain minor blemishes as well as their better qualities being reproduced with great fidelity. Our colour printers have acquired a splendid reputation in connection with three colour process work, and the excellent artists they have employed upon CAGE BIRDS coloured plates have taken special pains to bring before our readers an absolute facsimile of the original painting. No expense or trouble, in fact, has been spared by either publisher, printer, or artist to secure the best results, and we await the verdict of the Fancy upon "A Blaze of Colour" without any trepidation or hesitancy.

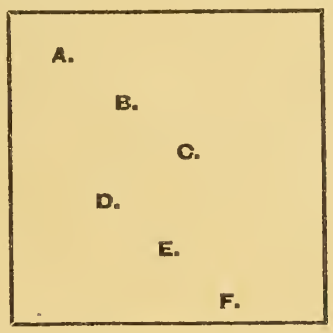
The thought occurred to us whilst contemplating the comparative beauties of each Canary represented that perhaps a judging competition arranged in connection with them would be appreciated. Accordingly we requested one of our most esteemed judges of a Norwich Canary to place the birds shown in the same position of merit as he would were he adjudicating upon them in the flesh. Of course, this plan has its natural drawbacks, but, viewing the birds as shown, readers of CAGE BIRDS must form their own conclusions about each specimen, giving their special reasons for each award, and to the reader who correctly places the birds in accordance with the decision of the judge, and states his reasons therefore in the most explicit language, we offer **a prize of One Guinea.**

To the reader who correctly solves the positions of the birds as awarded by our judge we offer, independently of reasons for such awards, **a prize of Ten Shillings and Sixpence.** The sender of the first correct letter opened by a blindfolded impartial person, will receive the prize.

Entries Close March 12th Next.

Full name and address to be attached to each entry in the Competition.

For convenience sake the birds are numbered asfollows :—



The bird in left-hand bottom corner not to be included.

First .....V.H.C.

Second.....H.C.

Third.....C.

Full reasons for awards to be written on a separate sheet of paper.

The Editor of "Cage Birds,"
154, Fleet Street, London.

We have fixed our show dates, July 20th, Nest Feather Show; November 9th, Old Show.—J. T. HARDING, secretary, Birkenhead C.F.A.

Metropolitan Association of Canary, Mule, and Hybrid Breeders.—Feb. 28th, at "Crown Hotel," Lavender Hill, 8.15 p.m. Nominations and elections; washing and staging exhibition; awarding medals. Fanciers note.—Eleven were nominated for membership at our last meeting; see club report.—A. J. Head, sec., 52, Broughton-st., Lavender Hill.

Morpeth and Dis. O.S.—Sat., Feb. 23rd, at King's Head, 7 p.m. General business after social and supper; all fanciers invited.—A. Dippies, sec.

National British Bird and Mule Club.—Thurs, Feb. 28th, at 25, High Holborn, 8 o'clock. To elect officers for the ensuing year.—Plumbridge and Carr, secs.

Northern Yorkshire Canary Club.—Wed., Feb. 27th, at Lockhart's Cafe, 65, Grainger Street, Newcastle, 8 p.m. Election of officers and other business; full attendance requested.—Thos. C. Crawhall, sec.

North Manchester C.B.S.—Feb. 26th, at new Headquarters, Christ Church School, Harpurhey, 8 p.m. New secretary, John Davey, 34, Alfred Street, Harpurhey.

Pelton and Dis. C.B.S.—March 2nd, at Fleece Inn, 5.30 p.m. Annual supper; members who are intending coming to supper must send their names no later than Sat., March 23rd; supper on table 6.30 prompt.—Lance Hall, sec, Gilbert's Corner, Newfield, near Chester-le-Street.

Pendleton and Salford O.S.—Feb. 28th, at Derby Arms, Oldfield Road, 8 p.m. Paper on Canary breeding, by Mr. Turner; all fanciers invited.—S. Skelton, sec.

Porth and Dis. C.B.F.S.—March 2nd, at Danix Temperance Bar, Hannah Street, Porth, 7.30 p.m. Lecture by Mr. Bishop, of Ton-y-strad, on his six years as a Yorkshire breeder.—John Challenger, sec.

Potteries and Dis. C.B.A.—March 2nd, at Red Lion Hotel, Stoke-on-Trent, 8 p.m. To discuss shows for 1907 and fix dates.—J. Simcock, sec.

Rotherham C.B.S.—Feb. 23rd, at College Inn, 8 p.m.—Ducker and Twigg, late secs.

Scottish British Bird and Mule Club.—Sat., March 2nd, at 142, High Street, Edinburgh, 3.45. Balance-sheet; presentation of medals, etc.; new members invited.—R. Farmer, sec.

Seaham Harbour and Dis. C.B.B.A.—Sat., Feb. 23rd, at Station Hotel, 7 o'clock. To fix Open and Members' Show dates; all members are earnestly requested to attend.—J. M. Nicholson, sec.

Shields and Dis. C.B.S.—Show will be held on Oct. 25th and 26th.—Wm. Duke, sec.

Stocton-on-Tees and Dis. C.B.—Feb. 26th, at Leeds Hotel, 7.30. Smoker; friends from Darlington, Hartlepool, Middlesbro', and district cordially invited.—J. W. Lowes, sec.

Swansea and Dis. C.B.A.—Thurs., Feb. 28th, at Oxford Coffee Tavern, 7.30. Matched Pairs Show for breeding Yorkshires, Norwich, Borders, Canary Mules, or Hybrids between two British birds.—Alf. Hitchings, sec., 17, Trcharne Road, Landore, Swansea.

Tamworth and Dis. C.B.S.—March 2nd, at College Lane School, 7.30 p.m. Members please attend; very important business.—J. E. Brown, sec.

Wallsend and Mid-Tyne C.B.S.—Thurs, Feb. 28th, at Station Hotel, Wallsend, 7.30 p.m. Annual meeting; election of officers; all members urged to attend.—John R. Evans, sec.

Weston-super-Mare C.B.A.—March 5th, at Star Coffee House, Meadow Street, 8 p.m. Fixing date of show and general business.—Geo. W. Read, sec.

Windhill, Shipley, and Dis. O.S.—Feb. 23rd, at Blue Bell Hotel, 8 o'clock. Lecture by John Broadley on pairing and breeding the Yorkshire Canary; all friends are welcome.—E. Broadley, sec.

QUESTIONS & ANSWERS

DOUBTS AND DIFFICULTIES SOLVED BY SPECIALISTS.

Queries will be answered under the following conditions:—

(1)—*All questions must be clearly written in ink (or typewritten) on one side only of paper, and must conclude with either the correct name of querist, or a pseudonym, or initials.*

(2)—*The proper name and address in full of querist must always be written on a separate sheet of paper and enclosed with the query. In no case must the address appear on the query.*

(3)—*Queries intended for different specialists must not be written on the same sheet of paper.*

(4)—**Queries must not include** *or be included in orders for books, instructions re advertisements, or any other matter for publication.*

(5)—*The department to which the queries refer must be stated in bold letters on the left-hand corner of the query.*

(6)—*If an answer in the same week's issue is desired, queries must be posted to reach us by* **Monday's first post** *at latest. Queries will be dealt with in the order in which they are received, and only as space permits. The earlier queries are received the better attention they are likely to have.*

(7)—*Queries relating to illnesses of birds, except enquiries as to cause of death (for which see Post Mortems) will be answered by return of post on receipt of a postal order for sixpence and an addressed stamped envelope. Queries of an ordinary nature will be answered by post, if desired, on receipt of a postal order for one shilling and a stamped addressed envelope.*

(8)—*All who require letters of complaint written to advertisers must state grounds for doing so clearly and fully, and enclose a fee of sixpence to pay postage expenses, &c., otherwise their letters will not receive attention.*

(9)—*All queries must be addressed* **the Editor, "Cage Birds,"** *154, Fleet Street, London, E.C. Only queries so sent will be answered. Postcards are not admissible.*

NOTE.—Readers are requested to carefully study past numbers and current issue before submitting questions. By doing so they may save trouble and unnecessary repetition.

THE following gentlemen represent CAGE BIRDS staff of **ADVISORY EXPERTS.** Queries must in no case be addressed to any of them individually, but to the Editor.

Norwich Plainheads.—**J. H. Payne.** Yorkshires.—**H. W. Battye.** Crests & Crestbreds—**W. E. Greeves.** Cinnamons & Miscellaneous Canary Queries—**J. North.** Border Fancies—**J. Patterson.** Scotch Fancies—**R. Wright.** Lizards—**Barker Clegg.** Lancashires—**S. R. Compston.** Greens—**S. Hadwin.** Belgians—**W. B. Cobb.** Rollers—**F. A. Lester.** British Birds, Mules & Hybrids—**G. E. Weston.** Foreign Birds—**Wesley T. Page,** F.Z.S., M.B.N.H.S., &c. Park and Lake Aviculture—**Frank Finn,** B.A., F.Z.S., M.B.O.U. &c. Wild Bird Life—**H. Norman.**

CANARIES.

NORWICH PLAINHEADS.

Answered by J. H. PAYNE.

Pairing (New Beginner).—As your Norwich cock last season broke the eggs as soon as you set the hen, then I should advise you to take him away this season, as he will in all probability do the same thing again. You need have no fear about the hen spoiling the eggs by coming off to feed, and she will if she is a good mother bring up her brood quite well. Some hens will feed better when left to themselves than with the cock. Give the hen you mention as being out of sorts a little egg food, to which add 5 drops of Parrish's chemical food. Let her have a half-teaspoonful three times a week, and put a piece of apple between the bars of the cage for her to peck at. Cock birds that are healthy should now be in full song. If you have any that are thoroughly healthy and they are not on song, you may reasonably expect them to be hens. No, I should not advise you to colour feed from the nest, but commence giving it them when they are about six weeks old. Do not rely on last season's colour food, but obtain a fresh supply of this season's. You will see some advertised in this paper a little later on.

Cross Moult (G.P.M.).—As you say your hen is so far advanced in the cross moult that she has only her head and neck to finish, I think you may quite reasonably hope to have her ready for Mule breeding. Do not remove her until she has finished moulting and the weather has opened, or the probability is that she will drop into moult again. Feed as you have been doing, as it is quite correct.

Long Claws (Bonny Hen).—I should advise you to cut the nails of your bird's claws. Do this with a sharp pair of scissors. If you hold the claws up before a light you will see a vein of blood extending so far down. Do not cut above this or you will make them bleed, and the bird will go lame. Use perches of good size, and you will then find that this will wear them down. Long toe nails in a bird generally denote that they have seen more than one summer, but not always. Your bird may be as described by the person you purchased it from.

Not Sung Since Moulting (T.R.R.E.).—Give your bird in its drinking water every other day for a fortnight ten drops of ipecacuanha wine and ten drops of glycerine well mixed. Let him have twice a week a little egg food, to which add five drops of Parrish's chemical food. Feed him and treat him as you have been doing. I should say you will have him fit for breeding by the time you want him. Let him have a few young dandelion leaves as soon as you can procure them.

Not Well Yet (Lump).—Give your Norwich cock ten drops of Gregorie with the glycerine instead of the syrup of tolu, every other day for a fortnight. You may then dissolve a little best honey in a little warm water, and let him have this to drink for a few days. (2) I expect what you describe as a lump on the chest of your bird is simply fat, as you say it has got smaller since you have ceased feeding him on mixed seed and substituted plain canary. Twice a week you may put in his drinking water just sufficient Glauber salts to make it taste slightly. Do this for two weeks. Do not give him anything but plain canary seed, and stop the bread and milk.

Nine Pairs (J. Barnes).—If your hens are excessively fat, it will, if not got down, most probably interfere with their breeding. Many hens are condemned as barren solely through this proneness to put on an abnormal amount of fat. Let your hens have a diet of canary seed, millet, and a little German rape. Keep them in as light a place as possible, and put a piece of sulphate of soda, about the size of a horse bean, to two tablespoonfuls of water, and let them have this to drink twice a week. Continue this for three weeks. Let them have a piece of apple between the bars of the cage for them to peck at, and also give a few sprigs of watercress twice or three times a week. No; the wild bird will not harm the hens you have with the Linnet. I presume you have some canary seed amongst it.

YORKSHIRES.

Answered by H. W. BATTYE.

Never Moulted (A. R.).—You say your two Yorkshire cocks have never moulted, and that you bought them in August, colour-fed. If they were early bred birds, and, as you say, colour-fed, they would very probably have practically finished their moult when you bought them. This I should imagine to have been the case. No. 1 you say starts chirping when you run him into the show cage and then falls over. Keep him as near the light as you can, and read reply to F. P. in this week's paper. You say you think he has the soft moult, and then you say both birds are in good condition and singing well. If this is the case, you need not be afraid of them being in the soft moult, and you may confidently expect to breed with them all right. Your 12-compartment cage that shows cracks at the back has very likely been made from wood that was not properly dried before being used. If the cracks are not above an eighth of an inch, fill them up with tallow; this will answer as a preventative of red-mite.

A Large Cage (A. C. E.).—To breed in the large two-holed cage you have, with two pairs, I should certainly advise you to cover the division so that the birds cannot see each other, but should prefer something more substantial than brown paper, as, if any of the birds are of a mischievous disposition, this would very soon be destroyed. Try and fit up a thin wood partition. (2) Yes, two Canaries that are brother and sister, that were bred last year, will breed this coming season. (3) Yes, it is too early to commence breeding; wait at least three weeks yet.

Too Forward (P. A. S.).—Probably owing to your birds being kept in a warm room and being fed on mixed seed, they are getting a little too forward in condition. This pulling and pecking at their tails is a common practice with young hens when they are coming proud. You do not say whether they are cocks or hens. Put them on plain white canary seed, and put just enough Epsom salts in their drinking water to make it taste, every other day, and make a strong solution of quassia by scalding a few quassia chips, and when cool hold the birds' tails in it for a minute or two; this will make the feathers taste bitter, and may break them of the habit.

Starting Breeding (Learned to All).—Keep your cock and hen separate at least one month from date, and give the cock a little egg-food on alternate days, and on the day you do not give egg-food give him half a teaspoonful of mixed seed, (½ lb. summer rape, and ½ lb. maw seed), and drop ten drops of Parrish's Chemical Food in his drinking water fresh every morning, and do not put him with the hen till he is in full song. Keep the hen on same food as you are doing at present till the cock is on full song, when you may put them together, about last week in March, having in the meantime prepared them a perfectly clean cage in which you have suspended a nest in such a position that the rim will be about 1in. above the perch. Give them some building material. Continue to feed as above for a week, and then substitute treacle in the drinking water for the Chemical Food. To prepare egg-food, get a small sheet of perforated zinc, coarse enough to let a knitting needle pass through; fix it on to a square wood frame, turn it over, and press the hard-boiled egg through, and then rub a slice of home-made bread an inch thick through; an ordinary loaf. Rub the bread and egg together and then pass both through the sieve again. Add a little moist sugar, and give to birds. When you see the hen carrying building material about and hear the cock in full song you will know they are going on all right.

Out of Sorts (Anxious).—Give your bird a little boiled milk-sop, just what you think it will eat up during one day, and mix with it six drops of syrup of buckthorn and a little moist sugar, and then sprinkle over the lot a pinch of maw seed, giving fresh every morning. Take away the bird's drinking water every night and give fresh each morning before you give the milk-sop, mixing well with the water four drops of the following mixture:—½ oz. oil of eucalyptus, ½ oz. oil of eajapat. You will get this of any good chemist for a few coppers. Treat as above for a fortnight, when I think you will see an improvement.

What Results?—The pairing of clear yellow cock (no Cinnamon blood in) with hen (green-marked), bred from Cinnamon-marked hen and clear, non Cinnamou cock. The cock I am about to pair is '05 bird. The hen is '06 one. Can I expect any clear young? If so, will they be cocks or hens?—F. M.

If you breed with the pair you describe in your query you will probably get both clear and marked birds, and if your marked hen is not very heavily marked or bred from heavily marked stock a majority of your youngsters should be clear or ticked or lightly-marked, and about equal in the number of cocks and hens.

Red-mite (T. C.).—Cover your bird up at night, and for six days treat as follows:—Take away its seed and give no egg-food, but give it fresh, daily, a little milk-sop to which mix eight drops of syrup of buckthorn; also sprinkle a little moist sugar and a pinch of maw seed over the lot; take its water away each night and give fresh each morning, well mixing ten drops of whisky in its drinking water. At the end of six days return the seed and substitute eight drops of Parrish's Chemical Food for the syrup of buckthorn on its milk-sop, and six drops of tincture of steel in its drinking water in place of the Scotch whisky for another week, when I think your bird will be all right, and, if so, go back to plain white canary seed and pure water as a staple diet, and give a little egg-food and a little maw seed twice a week.

They Agree to Differ.—I purchased a pair of above last February and placed them in an ordinary breeding cage. Can you tell me why they would not become friendly and have always fought over any tit-bit given them? They were given egg-food and bread and milk during the spring and summer, as I have seen advised by you. The cage stands on a table near the window of our sitting room, and I have another cock bird, aged seven years, hanging in the window. Both cocks are in good song. The pair have never been separated.—HOVA.

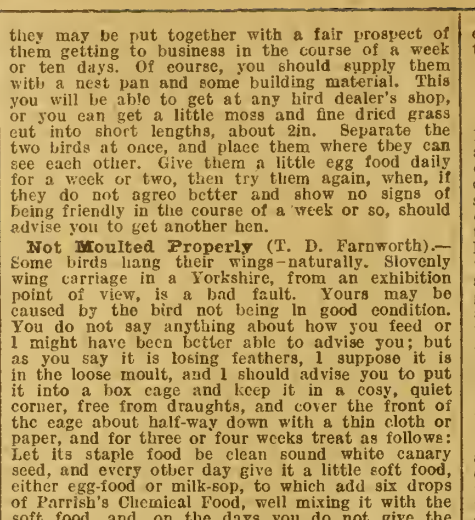
Perhaps both your birds are cocks, or the hen may be what is known as a barren one; or it might be that the birds may have been put together when one or both of them were not in breeding condition, and this would cause them to fight and be very disagreeable with each other. Cocks and hens kept for breeding purposes should be kept separate till the latter end of March or early in April, when if the cock is in full song and the hen jumping lively from perch to perch and flapping her wings, they may be put together with a fair prospect of them getting to business in the course of a week or ten days. Of course, you should supply them with a nest pan and some building material. This you will be able to get at any bird dealer's shop, or you can get a little moss and fine dried grass cut into short lengths, about 2in. Separate the two birds at once, and place them where they can see each other. Give them a little egg food daily for a week or two, then try them again, when, if they do not agree better and show no signs of being friendly in the course of a week or so, should advise you to get another hen.

Not Moulted Properly (T. D. Farnworth).—Some birds hang their wings naturally. Slovenly wing carriage in a Yorkshire, from an exhibition point of view, is a bad fault. Yours may be caused by the bird not being in good condition. You do not say anything about how you feed or I might have been better able to advise you; but as you say it is losing feathers, I suppose it is in the loose moult, and I should advise you to put it into a box cage and keep it in a cosy, quiet corner, free from draughts, and cover the front of the cage about half-way down with a thin cloth or paper, and for three or four weeks treat as follows: Let its staple food be clean sound white canary seed, and every other day give it a little soft food, either egg-food or milk-sop, to which add six drops of Parrish's Chemical Food, well mixing it with the soft food, and, on the days you do not give the soft food, give half a teaspoonful of maw seed. Are you sure whether your bird is a cock or a hen? You might get some experienced local fancier to examine it and give you his opinion on the matter.

Has It Fits? (F. P.).—Your bird is evidently of a very nervous temperament, and should advise you to get a Yorkshire show cage and hang it in front of the door of the cage you keep the bird in, and let him run in and out for a few days, and then get a thin stick or cane and gently drive him in and out a few times, and he will soon learn to go in when you want him; thus, when his cage requires cleaning you can run him into the show cage, and keep him in till you have finished cleaning it, and thus avoid disturbing him so much; also keep him where he has a good light, as near a window as you can, but not in a draught and where someone is frequently moving about him. This will be a means of helping him to get over his nervousness, and he may get all right again. As a weakness of the heart seems to be his failing, groundsel should not be given only in warm weather and when ripe, and watercress should be well cleansed under the water-tap and shaken as dry as possible again before being given to the bird; your feeding seems all right otherwise.

Wheezing, etc. (Anxious).—I have answered all queries that have come to hand to the best of my knowledge. Perhaps you have been overlooked, or your query get misplaced. However, as you seem to have done nearly all you could to relieve your bird, and still no improvement, it must be an obstinate case. Perhaps the following may be of service:—Six drops of tincture of aconite and four drops of tincture of lobelia in its drinking water fresh daily, and let its staple food be white canary seed with a little maw seed daily; stop egg-food and all other food for a week.

What Results?—Kindly tell me what result I may expect from the following pair of Yorkshires. I may say that I am putting them "up" for experiment.—J. D. (Liverpool).



Father. Pink-eyed, clear Buff.
Mother. Pink-eyed Cinnamon mkd. Yellow.
Father. Clear Yellow, deep colour.
Mother. Clear Buff Cinnamon, bred from Greens.
Father. Pink-eyed Clear Yellow.
Mother. Cinnamon marked Buff.
Father. Foul Buff Green.
Mother. Self Yellow Green. (Both these Birds are bred from Greens for some generations.)
Cock. Pink-eyed, heavily variegated Buff Cinnamon, showing a depth of Green.
Hen. Clear Yellow.

From the pair you send pedigree of I should expect to breed mostly variegated green cocks and variegated Cinnamon hens, with possibly a well-marked bird or two of either colour, and maybe an occasional clear. As you say your breeding with this pair is only in the way of an experiment, of course you have a right to please yourself. Personally, I would not care to breed with this pair, unless one or both were extra good in regard to type and I wanted to get some youngsters from them to improve the type of some of my stock, by using what was suitable for crossing purposes; as, for instance, the clear or lightly-marked hens for crossing with Cinnamon marks and the heavily-variegated birds, say, with the Greens; though, if I found it necessary to cross Cinnamon blood with green, say, for the sake of type, I should certainly prefer the hen for that purpose, as I am of opinion the hen has a greater tendency to influence type than the cock, and am equally strong in my opinion that the cock has a greater teudency to influence colour than the hen has; and thus, by using the hen, improve the type and at same time running least risk of weakening or injuring the colour from the cock's side of the pair.

Can't Understand It (B. H.).—(1) No, do not clean your cages every week during breeding time. After you have set the hen do not clean out the cage only to occasionally just lift out any little heap of droppings that you may happen to see at times when you are feeding, and do not disturb the hen more than you are bound to do until the young ones have left the nest. (2) Give the bath as often as you like, until your hens begin to sit, and while sitting give it at the end of the first week and three times during the last week, and give it the day before the hen is due to hatch. (3) A convenient size for single birds is 16in. by 16in. and 8 or 9in. from back to front. I much prefer single cages to having them made in groups or stacks. (4) Your hen that has laid four eggs has been much too forward, and has probably been fed on far too generous a diet. Put her into as large a flight cage as you have, and keep her on plain canary seed for two or three weeks before putting the cock with her. It is too early to breed yet.

CRESTS AND CRESTBREDS.

Answered by W. E. GREEVES.

Crested Cock Losing Feathers (A.E.G.).—Birds losing their feathers after moulting, in patches about the head and neck, unfortunately is of frequent occurrence, and is due to a variety of causes. In your case it would appear to be constitutional. I have known birds so affected to be equally as good breeders as others. I don't think treatment of any kind will be of much use. I have never found it any permanent good. The only thing to do is to rub the places over with a little sulphur ointment. Feed with plain canary seed, giving a little German rape every other day, and a pinch of hemp once a week; also give apple and watercress. Well damp the water out of the latter, and be particularly careful that it is not frosted. When you discontinue the sulphur ointment, give a tepid bath daily; if he won't bathe himself dip him in the water. Do this during the morning, and not after midday.

Crested Cock with Lump over Beak (D. Parsons).—Bathe the lump with warm water, using a small piece of sponge for doing it with for three or four days. Then take a sharp knife, and cut through the skin, if it is a hard lump under the skin it can be easily removed. If otherwise, it will disperse. Again bathe it well, putting a few drops of Condy's fluid in the water. If your bird is otherwise healthy, as he appears to be by being in full song, I see no reason why he should not be used for breeding.

BORDERS.

Answered by J. PATTERSON.

Both Hens? (T. Williams).—I am rather afraid that your marked wing birds, yellow and buff, will turn out to be both hens, if, as you say, they are doing well, which I take to mean in perfect health. If one of them had been a cock he would have been whistling more or less by this time. Perhaps you may not have them up to concert pitch yet. Feed as follows:—Canary seed as staple diet, with a third rape added every other day; give this twice a week, boiled. Put the required quantity on in a small pan and bring slowly to boil; let it boil about three minutes, then strain, and while still hot rub it in a linen cloth till dry; let it cool and mix with it one crushed Osborne biscuit, and give half a teaspoonful per bird, and twice a week the same quantity of egg-food, with a pinch of maw seed and three drops of chemical food mixed with it. (2) Should either the yellow or buff turn out a cock if paired together, I expect you will get both clears, ticks, and marks; but it greatly depends on how they have been bred. I think they must be both from a marked strain, seeing they are both ticked on wing. (3) The other bird you mention I take to be a green, and would advise you to procure a good mate of the opposite colour. From this pair I would think you would breed almost all solid greens, but could not definitely tell you without knowing the full pedigree of their predecessors. Regarding the fourth query, three eggs per nest all through the season is a fair average, although some have four, five, six, and even seven in a nest. I rather prefer a nest of three or four.

Ambitious (R. H. R.).—Your ambition is a very laudable one for to try and place on the show bench some exhibition Borders. I trust you will be able to do so, and also find an amount of pleasure. You have made one unfortunate mistake in not mentioning the colour of one of your variegated hens; if she is a buff also, I would say to pair the yellow cock to her; but should she be a yellow, then pair No. 2 cock to her, and No. 1 cock to No. 2 hen. (2) Regarding feeding, please look over answer to "T. Williams." (3) I do not believe in giving any forcing food to make them breed quickly; what we want to do is to keep them in good health and spirits during the winter months by rational treatment. A little egg-food twice a week works wonders. Let the two hens run together. Give a little inga with the egg until the time of pairing, about the beginning of April. (4) I think there must have been something wrong with your treatment, or perhaps your hens might be a little flighty, being young. I have no doubt but that they will be better this year. Please repeat query as to how you treated last year, and I shall be pleased to further advise you. Delighted to hear you think so highly of CAGE BIRDS.

Both Hens (Beginner).—The birds you mention, which are whistling very low and are in perfect health, I have no hesitation in saying they are both hens. I have seen many cases like this before. I would advise you to procure two robust mates, either in their place or for them, if you mean to have any young birds this year.

Not Much Wrong (Barrow).—You are a little meagre in your remarks re your Border cock. I do not think there is very much wrong with him, from what you say; if you had mentioned the nature and colour of the excreta, I would have had more to guide me. Although he eats to excess, as you seem to think, birds are like ourselves, very differently constituted; one bird may eat as much in a day, if in vigorous form, as another might eat in three. Therefore, no hard or fast rules can be laid down how much each should be allowed each day. Many cock birds before the breeding season commences have a nasty habit of just cracking their seed and leaving the kerne., which may often be attributed to pure mischief. I have found it a good plan to only let them have their seed thrice a day, taking it away each time after they have had a good feed; but you must be sure to be regular in your attendance if you adopt this method. If you neglect, the cure is worse than the disease. (2) Feed as advised "T. Williams" in this issue, and give the mixed seed in the bottom of cage among the grit, by way of a change, to take the bird's attention away from the seed; give a piece of bread soaked in scalded milk, with a pinch of maw seed sprinkled over it. Should your bird show any symptoms of disease, please give me fuller particulars in another query, and I shall be happy to further advise you.

LIZARDS.

Answered by BARKER CLEGG.

Cross Breeding for Size, etc (F. Smith).—(1) Certainly, by the introduction of Cinnamon or Norwich blood (hens) you would get size and quality of feather, with probably a fair representative of the Lizard, even on the first cross. (2) I do not doubt for a moment but that it is possible to regenerate the variety, following a specially designed plan of procedure and adhering strictly to it, though I must confess that my experiences in these matters have been very disappointing; and, moreover, I cannot tell you of any breeder who has ventured to claim success from the introduction of foreign blood. (3) I much prefer to advise you to follow the line breeding; this will combine pedigree, in-breeding, and selection. You would find it more reliable and far more interesting than ex-

permeuting. Of course, if you are particularly anxious aud well prepared to go in for the latter thoroughly and ou an extensive scale, I should be pleased to confer with you further on the subject.

LANCASHIRES.

Answered by S. R. COMPSTON.

Lancashire Hen with Bowel Trouble (G. M.).—If the weather has not affected your bird, possibly a remedy may be found in a change of diet. Some birds cannot do witb egg food, others will thrive o ɜ. Leave off the hemp seed for a time and try a small quantity of millet instead. In place of egg food try what a small piece of stale bread dipped in boiled milk will do. Be careful to remove any that is left after being in the cage a few hours.

GREENS.

Answered by S. HADWIN.

Green Cock Going Bald (Black).—You do not give very full particulars as to the state of the bird's head or style of feeding. In the absence of these particulars, it is difficult to deal with the matter. If the head has a whitish, scrofulous appearance, it is probably a touch of scurvy, brought on by overfeeding, and should be treated as follows:—Paint the head with equal parts paraffin and olive oil, and feed on half canary and half German rape seed; also add to one ounce drinking water 12 drops of liquid magnesia every other day for a week. Whether you see any scrofulous growth or not, try the above plan for a fortnight, aud if no improvement then write me again, giving full particulars as to feeding, etc.

Norwich Green or Greenfinch Mule (J.T.).—Your question is in the nature of a conundrum; but from your description of the bird's song I should vote for your bird being a Norwich green. You say the bird seemed to be in breeding condition three weeks ago, and that you lent it to a friend for breeding purposes. Now, in this fact seems to lie all the trouble. The bird, when you lent it to your friend was in very high condition, and the changing it from one house to the other when in this high condition, and probably the different temperatures of the two houses, have thrown the bird into a soft moult. See that the bird is kept free from draughts in a fairly roomy cage, and feed generously on a good mixture of seeds, say equal parts of all kinds of seeds used for Canaries, with a double proportion of canary seed. Give a teaspoonful of egg food twice a week, to which has been added 12 drops of Parrish's chemical food. As there are quite six weeks to elapse before you need trouble yourself about breeding, you may get the bird all right again by then.

ROLLERS.

Answered by F. A. LESTER.

Ringing Young Rollers (J.N.C.).—Your object in ringing the young Rollers would only be half accomplished if you did not join the B.R.C.C By joining the club you are enabled to compete for their valuable challenge cup and fine silver and bronze medals. The secretary's name and address are:—Mr. J. W. Norris, 31, Scylla-rd., Peckham Rye, London, S.E. Ring your birds about seven days old, and try and catch the hen off the nest.

Treatment for Wheezing Roller Not Successful (A.R.W.).—I am not surprised, as these cases are very difficult to deal with. Will you now try a piece of raw onion between the wires of the cage; renew about twice a week, and keep this up for a few weeks. I have known people buy many shillingsworth of remedies for this complaint, aud then not cure. It is nearly always an imported bird that is the sufferer. Keep in a cool temperature, say about 50 degrees to 60 degrees, as that appears to afford them most aid.

Cocks Not Moulting and Various Other Questions (Guidance).—If you find this room so very unsuitable for your birds you will have to risk the change. Try and change over during a spell of mild weather, such as existed during the beginning of this week. Your feeding is very good. The song of most home-bred Rollers would be deeper than the ordinary roller that you buy, and more mellow, but not so many changes. Your price (15/-) will purchase a fair bird for breeding. The Roller-Norwich cross would not equal the pure Roller, even if trained under a good bird. Keep your birds pure is my advice.

German Hartz Roller Suddenly Ceasing to Sing (German).—Your bird has doubtless been kept in a different temperature and fed differently. Write to the dealer you bought it of, and ask him the seed and temperature he kept the bird in. If he does not give you the information, I would alter the mixture to 2 parts rape, 1 part canary, and drop the egg food, as I do not suppose he has had much of that. It may not affect his breeding.

Roller with Dirty Feet (Siva).—Your bird will keep his feet clean if you give him some silver sand in his cage bottom; be liberal with it; and is his food and water inside or outside? If inside, that may be the reason, as he may get his feet damp, and the excreta then sticks to them. Some birds err in that respect very much, and nothing appears to cure them. If the water had the chill off, I should think we would bath now.

Roller Canary Hen with Bare Head (Roller).—I consider your feeding the cause of this unpleasant experience. You should feed the hen very plainly on 2 parts rape seed, 1 part canary, and ½ teaspoonful of egg food once a week until she has young. Drop all the other extras at once, and take the bird in your left hand with her head protruding between your thumb and forefinger, and gently rub a very small quantity of pure vaseline on twice a week, very sparingly. Yes, quite fit for breeding.

MISCELLANEOUS CANARY QUERIES.

Answered by J. NORTH.

Sand and Inflammation.—(1) If I get sand from a wharf, would that suit my bird? (2) Have a bird that sits very mopy. It looks very red under the stomach. Have given it milk sop with a little seed on it?—J.N.Y.

(1) By getting sand from a wharf I imagine you mean from the beach, and, as a rule, this makes a very serviceable "grit" for the sand trays. I think you would do well to have it washed in running water, and if there appears to be any impurities in it add a few grains of permanganate of potash, which will cleanse it. (2) Your bird would seem to have taken an inflammation of some kind, but whether it is of the bowels, lungs, or liver; I cannot say without seeing it. Anyway, I think a gentle aperient would do good, and should advise you to get a drachm of sulphate of soda from a chemist. Dissolve it in four ounces of water, and serve it to the bird in place of plain drinking water.

Rest Seed.—Which is the best seed to feed a Canary on all the year round?—S. GARDNER.

Canary seed may be looked upon as "the staff of life," and should be in constant supply. Rape seed, hemp, niger, and linseed may be given in addition, and as a change. Some sort of salad, vegetable, or fruit addition is advisable for the purpose of keeping birds in good health, aud there is nothing better for the purpose than sweet apple, banana, boiled carrot, groundsel, chickweed, watercress, or seedling rape or mustard and cress.

Brass Wire Cages.—I put a singing Canary into a new brass cage. The bird sang most splendidly for many weeks, but spent much time picking at the wires, and it has gradually left off singing. I can see nothing amiss with it, only it's a little mopy, and casts a feather now and again.—B.W.C.

If you tell me that you are using a brass wire cage I must accept your statement, although I know that as a matter of fact nearly all the cages that look like brass are made of iron wire and iron plates lacquered and coloured to look like brass. Again, I do not think that it is so much the material of the cage as its construction, which has upset your bird. In all probability you hang it in the window, aud the cold draught passes right through it and the bird as well. Perhaps before you had it it was kept in a close cage and in a hot room. It is a bad sign when a singing bird goes off song in the spring and casts feathers. Move your bird into a box cage, keep it in a warm room, feed it on milk sop and soaked seed, and cover cage over at night with a dark cloth.

Gone Off Song.—Have Canary which was in full song this time last year, but since moulting it has scarcely sung. Can you tell me what to do with it, and whether I can use it for breeding purposes?—OISEAU.

It is difficult to form an opinion of the nature of your bird's ailment without further particulars. It might be infested with red-mite, or perhaps its cage is too open to draughts. Examine the bird by candlelight for red-mite, and if found scald out the cage and pepper the bird with insect powder. Run the Canary into a snug box cage, and keep it in a warm room, give it a teaspoonful of egg food every day, on which you have let fall three drops of Parrish's chemical food. Give also salad or slice of sweet apple. As to your bird being suitable for breeding purposes, I do not consider him to be so at present, as his loss of voice and shedding of feathers shows him to be out of condition, while it is quite certain that none but the most healthy and strong should be expected to be successful in the breeding cage; but if you give him the teaspoonful of soft food with three drops of Parrish's chemical food every day he will soon improve.

Canaries, etc., in Greenhouse.—Would a greenhouse, 2 yds. wide, 2½ yds. long, and 2 yds. high at back, be a suitable place to keep my birds in for breeding this summer? I purpose wiring off one-third and putting in, to fly loose, one Goldfinch, one Bullfinch, and two Canaries, and to run two pairs more in cages. Should I cover the top to keep out some of the heat?—IGNORANT.

I do not consider a greenhouse, built chiefly of glass, at all the most suitable place in which to keep Canaries for breeding purposes, because the variation of temperature between midday and midnight is so great that it would be unreasonable to suppose birds could prosper in it. There is also nearly always a collection of moisture on the glass which is apt to drip and make the cages damp. If you house is a "lean-to," which I infer it is, you might cover the roof with wood or felt or thatch during the summer, but I don't consider that even then it would make good winter quarters. Your Bullfinch should be a hen; she might mate with the Goldfinch and rear a Hybrid, whereas if a cock Bullfinch were put in he would do nothing but quarrel with the Goldfinch and Canaries.

Long Claws.—Two hens with long claws, fear they will catch in nest and break eggs. Would you advise me to shorten them, and which is the best way? With scissors or nippers, and after cutting would it be advisable to take off the roughness with a small file, or allow it to wear off?—H. G. RHONDDA.

When speaking of claws one generally understands the fleshy toes to be meant, but in this case I take it that the toenails are indicated. These should at all times be kept from growing too long, thin, or pointed, and should occasionally be trimmed with either a pair of nail scissors or nippers, whichever the owner is accustomed to use. The nail scissors are generally provided with a file at the side, which you may find useful; but, as a rule, the blades can do all there is to do. Some fanciers are very clever at breaking off the excessive growth with their own finger nails, but I should not advise you to try this plan. If you hold the toenails up to a good light you will see how far the blood circulates in them, so be careful not to cut this, or the toes will bleed and soil the cage and bird.

Preparing for Breeding.—(1) Six pairs Canaries, cocks in one flight cage, and hens in another. How soon could I pair up, as if I begin late in March I fear it would be rather a trouble when I have my holidays, as I have no one who would understand them? (2) What would be the best food to bring them forward, as one cock has just got over "soft moult," and is not in song. The hens are all very fit, barring one, which gets puffy?—READER.

We are all in a transitory state, and the time may come when you may have someone to give a helping hand, but we cannot have everything we want, and it sometimes happens that holidays do not come to disarrange one's bird-breeding plans. Anyway, unless special facilities exist for warming a bird room, we must admit, as a result of experience, that as a rule no good is done by pairing up before the end of March. (2) Having very properly kept the sexes in two groups during the winter, it would be well now to run the cocks into separate cages, or they will be pulling each other about. You could then the more easily ascertain which were in song and breeding condition, and those that were not might have a little soft food, soaked seed, sweet apple, or boiled carrot. The one that has soft moult should be allowed three drops of Parrish's chemical food daily on his soft food.

Pairing and Rearing Queries.—(1) I have the following birds:—(i.) Clear buff Plainhead cock, good size and feather; (ii.) wing-marked dark Crested cock, large bird, but rough in feather; (iii.) good Roller, clear; (iv.) clear buff hen, mother of first-named; (v.) clear yellow Crested hen. Can you tell me how to pair for best results? (2) Is it too late now to purchase birds? (3) What is the way to feed from now until the young are separated? Do the birds feed through the wire division in centre of cage? (4) Is it best to cover cages over all day with white tissue paper when breeding?—VERY DOUBTFUL.

(1) If your No. 1 bird is a Crestbred Plainhead, he should make a suitable mate for No. 5 hen. No. 2 cock and No. 4 hen would do equally well together. No. 3 is odd; you do not even say whether it is a cock or hen. Anyway, you will require a German mate for it. (2) No; it is not too late to purchase stock birds, as a reference to our prepaid columns will show you a full selection at prices to suit everybody. Deposit the purchase money with Editor, insist on having young, healthy birds, and examine them before deciding to buy. (3) Egg food, salad and seed for the old ones when breeding, but no salad for young ones. When the latter are from two or three weeks old they may leave the nest and get fed through the wires. (4) This is quite unnecessary.

BRITISH BIRDS, MULES AND HYBRIDS.

Answered by G. E. WESTON.

Owing to unavoidable circumstances, Mr. Weston has had to leave many Queries unanswered this week, but hopes to attend to them all in our next issue.

What Bird is It? (E. W. O.).—It really is not possible for me to tell without seeing it what Hybrid the bird may be, which you say was bred "promiscuously" in your aviary last season. If it shows anything of the Bullfinch, then there can be no doubt about it having had a Bullie for one parent; the family imprint is quite unmistakeable. Should this be so, the value of the bird will be a few sovereigns, undoubtedly, but the exact number of "golden boys" no one could specify without setting eyes on it. Everything depends on its sex, size, shape, colour, etc.; in other words, whether it is fit for exhibition or not. The Canary-Bullfinch differs in shade of colour from the Greenfinch-Bullfinch, while the latter has a quite plain (unmarked) back, whereas the former has distinct pencillings (markings) in that region. This is well shown in the coloured frontispiece to No. 2 (January issue) of the "Bird World Magazine."

A Variety (Young Novice).—I should certainly think the large, very white-looking Goldfinch you bought in New York is a foreigner—using the term, that is, to show that it is not what is known as a "British" Goldfinch. I explained how to feed and treat these birds only the other week, and no doubt you noticed and read my remarks. If a cock bird (you say it has a large, square blaze, so this seems assured), I know of no reason why it should not breed with a hen Canary this coming spring. Blackcaps are very easily sexed by their caps alone. The cocks have very distinct, glossy, jet-black caps; the hens indistinct (comparatively) rusty or rusty-brown caps. For staple food, see reply to "A. F." this week. Blackcaps, however, must always have some ripe fruit, both minced in amongst their soft food and placed in the cage. Young cock Mules are very precocious, and commence to "record" their song almost as soon as they are really able to feed themselves. They seldom sing out stoutly, however, until the moult is over, and they have got over its effects.

Linnet Moulting (Novice).—One cannot always tell what it is that starts birds into cross moults. The more general cause is the shifting of them from heated into unheated rooms, or vice versa. Sudden severe changes of temperature, however, sometimes serve to send Canaries into cross moult, though British birds are not usually prone to be affected by such; exposure to draught is also dangerous from the same reason. Your Linnet will by now be deep in cross moult, and you can do nothing to stop it; indeed, it would not be advisable to try. Simply keep the bird in an equable atmosphere, and feed it well on the lines recommended "Contrary" the other week. You could with benefit add half a teaspoonful of Parrish's Chemical Food to every two tablespoonfuls of drinking water until the bird recovers, giving it fresh daily.

Show Points, White Legs, and a Non-Moulter (Novice).—Really, you ask far too many questions for one attempt. I should have to devote a whole column to you to answer them fully. Both space and my own time are limited, and I have very many querists who need attention. Briefly, the show points of a Greenfinch are size, shape, and depth of rich grass-green colour, with plenty of gold (yellow) in the wings and tail. A broad back, deep, well-rounded chest, and wide, bold head are essential. The Lesser Redpoll must be a shapely, well-proportioned bird (size is not so very necessary a point, though valuable), rich deep brown in colour, well pencilled on head, back, and flanks, and carrying a dense black bib (throat mark) about as large as a smallish pea. The wings should be cleanly and nicely marked. A white-legged (house moulted) cock Linnet ought to be worth from 4/6 to 7/6, if anything of a bird. If really a proved mule he would be cheap at 7/6, and far from dear at 10/6. Show specimens, of course, are worth a good deal more. For wild seeds for the above birds, read the reply to "Contrary" the other week. It is not unusual for a British bird to miss a moult, and you will be ill-advised if you try to force your Redpoll to cast its feathers at this late period of the year. We can send you post free for postal order value 1/2, a little booklet which deals with the better-known British Finches in a very helpful way.

Greenhouse for Bird-keeping (V. Williams).—I cannot imagine worse conditions for keeping birds under than those you describe in your letter, and I cannot with honesty recommend you to make the attempt. A hot greenhouse facing south, with roof covered with a vine, and flowering plants kept in it which require copiously watering, and even to stand in water, resulting in heavy moisture falling when the sun strikes the place, can hardly be said to be suitable for housing either Canaries or British birds; whether any Foreign birds would thrive in such an atmosphere I cannot say. In my opinion the conditions would prove much too enervating; the birds would always be more or less "soft," and without sufficient energy to rear young, while bronchial troubles would probably sooner or later put in an appearance. Make the experiment if you like, but take out the birds at once if they shows signs of going wrong. If they prosper, then write and tell me so, and put me to confusion. I can assure you of this, I know several bird lovers who have tried and failed.

Wild Seeds (G. Heaton).—The sample of seeds from the thresher which you send is a very good one, and quite fit to give to British Finches for them to pick over. I could not pretend to name the different kinds of seeds of which it is composed; a seed expert would jib at such a large order. The majority are of the genus Brassica, and go by the general name of "bird rape," being practically undifferentiable away from the plant itself.

Thrush Off Song (G. A. Brighton).—You should feed your Thrush as recommended "C. A. L." the other week. If you feel sure he has a touch of cold, you cannot do better than try the following bronchial syrup:—1 oz. each of glycerine, ipecacuanha wine, and oxymel of squills. Put half a teaspoonful in every two tablespoonfuls of drinking water. Let me know in a fortnight's time should a course of treatment over this period have no effect for good. The bird should be given six or seven mealworms every day.

A Muling Question (Hopeful).—The food for a Greenfinch was given in reply to another querist last week; kindly refer thereto. A little prepared packet egg-food, if made by a good firm, is quite suitable for use with any caged birds which show a liking for it. During the breeding season I personally always use egg and biscuit or egg and bread prepared fresh every day. You must please yourself what course you will pursue. The food for Linnets was gone into at length in the reply to "Contrary" the other week; it is impossible for me to keep repeating the same information, for I have too many querists needing replies. The Canary hen of "good length, with plenty of leg, and racy," I should say is a Yorkshire, or, at least, of Yorkshire type. She will do quite well to pair with your Linnet, especially if she is a yellow. Young bred from hens of Yorks. type, however, generally come somewhat slimmer in build to young bred from hens of Norwich type. If good singing Mules only are wanted, however, one kind of hen is quite as good as the other. To get the Linnet into high breeding condition, give it on different days in the week pinches of hemp, niger, maw, and dandelion seeds. You must look out for early tender dandelion leaves and the flowering and seeding heads, and give the bird a free supply, seeing they are never in a frosted condition when offered. Dandelion is invaluable as a "conditioner" for breeding birds. For early supplies, look on sheltered banks (railway embankments for instance) which face south. Also let the bird have sprigs of seeding shepherd's purse, and chickweed and flowering groundsel tops, looking out for the earliest possible supplies. The hen Canary does not want forcing, or she will go to nest before the Linnet is fit, and the result will be disappointment, in the shape of clear eggs. Let her have good, sound canary seed only, with a little summer rape every second day, and a "nip" of hemp and niger twice a week. A small feed of egg-food once a week will do her no harm; plenty of time to give it oftener when the month of March is drawing to a close. In these matters, however, all fanciers must use their judgment according to the breeding condition or otherwise of their birds.

Hybrid Breeding (Hybrid).—A cage 30 by 14 by 12 is a nice size for a Hybrid couple, though another 6 inches on the length would be a decided improvement. Feed your Bullfinch as advised another inquirer this week. Some hen Bullies will sit on their own eggs and hatch them; and a few successfully rear their young. Most fanciers, however, prefer to transfer the eggs to good feeding hen Canaries. If you let the hen Bullie undertake the job, be prepared to step in at any moment and finish it for her by hand-feeding the youngsters, as may be needed. I could not say whether your pink-eyed Norwich, which is like a large Lancashire (what a curious description!), is Sib-bred or not Sib-bred. Only its breeder really knows that. At any rate, she should be a useful muler.

FOREIGN BIRDS.

Answered by WESLEY T. PAGE, F.Z.S., M.B.N.H.S.

Oryx Weaver (Plœcus).—There is a great deal of variation of demeanour with this species, some individuals being quite harmless in an aviary such as yours, and others very spiteful during the breeding season, even though this species seldom attempts to do more than weave a nest. However, judging from the behaviour of such individuals as I have kept, and others at the Zoo, I should have no hesitation in keeping them with the birds you name; however, you must keep a watch on them at first, but I have mostly found that it is their own kind that their spitefulness is directed against. I do not suppose they will do more than occasionally chase the other birds about; but they usually ignore the smaller fry.

What Bird?—Can you tell me what kind of bird the enclosed sketch represents? It was bought at Malta for a Siskin.—FOREIGN BIRD.

It is impossible for me to give an absolutely definite reply, your sketch being so very rough. It might possibly be one of the Singing Finches, which strongly resemble Siskins in form and plumage, but usually have more and brighter yellows about same. At the same time, I believe your sketch represents a European specimen of the common Siskin.

Birds for Aviary.—My aviary, 18 by 4 by 6½ ft. high (photo enclosed), contains two pairs of Cockatiels and a number of Budgerigars. What others could I keep for variety, and how many, without overcrowding? No address on query.—P.R.E.

I was much interested in the photo of your aviary, which appears to be a well arranged construction. Providing you keep your flock of Budgerigars to proper limits (say 20 to 25), you could keep a pair each of Red and Mealy Rosellas, and White-eared Conures with your birds, but if you have all three I should advise you to reduce your Cockatiels to one pair. The above would all thrive on the same food as you are now giving, and would make a grand display of colour in comparison with your other birds. For these you would find nest boxes with concave bottoms, say about 8 in. square, or 8 by 10.

Another Feather Puller.—My bird is almost bare; it is washed weekly. I used to give meat, but have stopped same; it has toast every morning, table food, and Parrot mixture. How can I remedy this?—THOMAS FORSHAW.

Cease your present diet, and do not at any time give Parrot food, slops, fats, or any kind of animal food whatever—no table scraps, please. Prepare your own mixture, equal parts canary, wheat, dari, rice in the husk, oats, hemp, and sunflower seeds; also give, to vary the diet, ripe fruit, green food, nuts, boiled potato, plain biscuit, and continuous supplies of grit, cuttlefish, and water. As the bird is accustomed to it, you can give a little dry toast, but no buttered foods, tea or coffee, etc. Give your bird a dose of Tinneford's magnesia as necessary to keep its bowels moving freely, *but not loose*. Put it on a course of Parrish's chemical food (see other replies in this and recent issues). Soak the bare parts with quassia solution every other day. You must persevere with this treatment; cure, or even improvement, is never rapid in such cases.

What Parrakeet?—Length about 7 in., of which tail measures 3 in., face, throat, and breast dove-grey, rest of underparts yellow, upper parts bright green, bill, horn, feet, light flesh.—SOUTH-WEST.

You are the fortunate possessor of a pair of Senegal Parrots (*Pœocephalus senegalus*), very beautiful and uncommon, though well-known birds. For some reason they are not often on the market. They are really desirable, and at the present time valuable birds. Diet: Canary and millet, with a few oats, wheat, dari, and hemp, as a change occasionally; green food, grit, cuttlefish, and a little ripe fruit should be regularly given. Keep a supply of water for drinking in its cage. If you have been dieting differently, do not make a sudden change, let the transfer to above diet be a gradual one. Hope you will have luck with them.

Aviary Queries.—Sketch of aviary herewith; floor is boarded. (1) Will bricks grouted in with cement or boards be best for the flight? What birds would you suggest, to include Green and Yellow Budgerigars, that would breed?—R. L. F. S. BENTLEY.

(1) The brick floor well grouted in with cement will be best for the whole aviary; it is far better than wood, and is a great protection against rodents. The floor should have a gentle slope to drain off any moisture that gets in after gusty rain; a piece of perforated zinc at the lowest point will let same drain to the outside. There should be a good thickness of gritty sand over the brick floor, and the

flight and shed well furnished with branches as perches for roosting, etc. See other replies re Budgerigars. If you have these, I recommend you to keep to Parrakeets, and not mix them with Finches, etc. A nice selection, which would give a beautiful variety of colour, is as follows:—Green, 6/-, and Yellow Budgerigars, 12/-, Cockatiels, 10/- to 12/6, Red Rosellas, 30/-, Mealy Rosellas, 60/-, and White-cared Conures, 20/-, one pair each; the prices given are approximate, and per pair. Husks for the Budgerigars, and concave bottomed nest boxes for the Parrakeets of suitable size. If you elect to take the risk of mixing Budgerigars and Finches, write again for list, but carefully note this week's replies to other correspondents.

Cutthroats with Skin Disease.—One of my birds has some kind of yellowish beads, just under the skin, round its neck; it seems to irritate the bird much. I now notice another developing the same complaint. How can I treat?—DOROTHY WHITE.

If you have a clean cage, put the healthy ones in that at once. At any rate, they must be separated from their infected companions at once. If the birds were mine I should destroy the infected ones, and thoroughly disinfect and clean their cage. Possibly you will not care to do this. It is a step one is loth to take. Twice a week, or say every third day, put one teaspoonful of Dinneford's magnesia in their drinking water, and in addition to their seed, let them have a little of some good soft food mixture daily. If possible, bathe the infected parts with warm water, wipe or lightly dab dry with a soft cloth, and then anoint the parts with spermaceti ointment. The cage should be cleansed daily, and while out of draught, yet where the birds can get fresh air. A little green food daily, fresh tender lettuce is best at this season. A couple of mealworms per bird daily would be helpful at the present juncture. Your cage, or aviary cage in which they have been kept ought not to be used for healthy stock till it has been well scalded out and thoroughly cleansed. It would be a help to put 4 drops of Parrish's chemical food in their soft food daily, grit and cuttlefish, and a bath should be given daily.

Birds for Cages.—I have two aviary cages, 48 in. by 18 in. by 30 in. high. What others can I keep with those I already have (list enclosed) and breed? I have two cock Cutthroats, and intend getting two hens. Will they breed?—NEW BEGINNER.

(1) If you get a hen to mate with your Madagascar cock, this will be sufficient for breeding purposes in your cage; though two or three pairs of Budgerigars usually settle down to breeding quicker than a single pair do; yours will settle down and breed in due course. For breeding purposes, I consider the pair each of Budgerigars and Lovebirds will fully occupy your cage. It is not safe to keep other types with them, and though there is a risk, I think the Pekin Robins would be safe with them, and as they are not likely to even attempt to nest, you could keep them with the others. However, note there is a risk, and you must take that if you keep them together. Two pairs of Cutthroats might agree in a large aviary, but in a cage they certainly will not during the breeding season. Part with one of your cocks, get a hen and pair of Zebra and Green Singing Finches, put up four or five nest boxes, and they are all possible breeders. If you put the Pekin Robins in with the Finches, they will most probably eat the eggs of the other birds as fast as laid. Re soft food: Game meal, fine crissel, crushed Osborne biscuits, ants' eggs (eoeoons), and dried flies in equal parts, mix the game meal and crissel together, and keep in a separate tin from the others, calling them 1 and 2 respectively; take a portion of No. 1 (game meal and crissel) and pour over it as much boiling water as it will absorb, let it stand to swell, then knead in sufficient of No. 2 to leave it crumbly moist. "Favourite Foreign Birds" (Greene), 2/9, post free from "C.B." office.

Budgerigars Dying.—I bought two of these birds a week ago, and was surprised this morning to find them both dead. What could have been the cause? They were kept in the kitchen in a large box cage, and fed on millet and oats. There is a gas stove in the kitchen.—BAD LUCK.

It is "hard luck" losing your birds so soon. At the same time I can give you no definite reply as to cause from the details you supply. Can only surmise that they were diseased, but that this was not apparent at time of purchase, and that it developed during the few days they were in your possession. On the other hand, their supply of food may have given out. I have had many bodies sent to me whose empty crops testified eloquently to the cause of death. The internal economy of most small birds is such that a very few hours without food is fatal. When you get others, diet them on canary and white millet in equal parts, give a few oats once a week, also give green food, grit, cuttlefish, and water. As a precaution, you had better scald out your cage with boiling water before using same for other birds. If the cage was hung up close against the ceiling, the fumes and heat from the gas stove would certainly conduce to, if it did not exactly cause, their early decease.

Indoor Aviary.—In a recess in my garret I have an aviary 7 ft. by 3½ ft. by 7 ft. high; it is well lighted. Would the following agree and breed? Budgerigars, Zebrafinch, and Grey Java Sparrows? What is their diet, and could you name a few more, cheap ones and free breeders?—CONSTANT READER.

Budgerigars and Zebrafinches are free breeders, but Grey Java Sparrows are not, i.e., the imported wild caught birds, but aviary bred specimens breed almost as readily as Canaries. It is risky keeping Budgerigars with Finches, etc., though many do so with a fair amount of success. At the same time it is risky. In a large garden aviary I have had several annoying losses which I know were due to this cause, though sometimes you get through several years without mishap. You must decide yourself as to the Budgerigars. Re others, get pairs of Zebra and Cutthroat Finches, Bengalee, Silverbills, and a cock Grey Java Sparrow, and a white hen. These are all probable breeders, and cheap, as also are Avadavats and Green ditto, Zebra, Grey, and Orange-cheek Waxbills; this latter group would not, I think, breed, but they are very beautiful, small, would agree with and make a pleasing variety with the other birds. Diet: Canary, white, and spray millet, rice in the husk, green food, grit, cuttlefish, and water for drinking and bathing. When breeding they would require a little of some soft food mixture (see advertisement columns).

Lemon Crested Cockatoo.—My bird pulls out its feathers, as you will see by photo enclosed. It is fed on mixed Parrot food, occasionally a bone to pick, boiled potato, and about a teaspoonful of porridge every morning. What is the remedy?—J. HOGAN.

I should omit the bone, also the porridge if it is made with milk. Prepare your own mixture, equal parts of maize, wheat, oats, dari, hemp, and sunflower seeds. Give in addition plain biscuit, little boiled potato, raw carrot, green food, grit, cuttlefish, and water ad lib. Just colour its drinking water with Parrish's chemical food for the next month, and give a little Dinneford's magnesia as often as necessary to keep its bowels moving freely, *but not loose*. Get some quassia solution, and once or twice a week well soak the parts he is in the habit of picking with same; you must persevere with this treatment, it may take some months to break it of the habit and get its plumage into condition again. Note: Though a robust and hardy species, it must be carefully kept out of draught while its plumage is wet.

What Others?—In an aviary 4½ ft. square I have one pair each Green and Yellow Budgerigars. What others could I keep with them that will breed?—J.P.

It is a little difficult answering your query, as you do not give me any particulars as to whether aviary is in or out; if outside, I am assuming you have proper night shelter for them. You could put a pair of Cockatiels with your Budgerigars, and they would ultimately breed, but they do not always do the first season. They would thrive on the same treatment as the Budgerigars. Of course, with this addition, you would have to get rid of the young, as they were able to fend for themselves. You would have to make a nest box for the Cockatiels, 8 in. square, with concave bottom.

Outdoor Aviary.—Many thanks for your reply. The idea of attaching flight to revolving summer-house was that, in this bleak county, it could be turned to avoid either extremes of heat and cold. I have enclosed builder's sketch. Do you think it will answer for the purpose?—"QUAIT."

Your suggested sketch makes a very handsome aviary, and if you can, arrange the floor of loft inside summer-house so that it will give a height of 12 inches in its lowest part, lining it all round with twiggy branches (pea or bean sticks answer admirably); it must be the whole width of summer-house and be made 3 ft. wide; this will give you a floor space of 8 ft. by 3 ft., 12 inches high at eaves, and about 3 ft. at ridge. In lieu of zinc trays, I advise a narrow flap, to open in three sections the whole width of loft, and that peat moss litter be used (2 inches) on floor of same. Once a fortnight would be often enough for scraping out. The loft must be lighted by a good sized square of glass, in the end of loft inside summer-house. Instead of having one large opening from the flight to loft, have three smaller ones with a small ledge or shelf in front of each. As your situation is bleak, I incline to the opinion that it would be best to have only the front of flight covered with wire netting (½ inch mesh), the ends to be of wood and glass. All glass must be covered with wire netting on the inside. The floor of flight to be of one-inch boards, and covered with, say, two inches of loam, and gritty sand on top of this. If you can carry out the above arrangements you can utilise your summer-house, and the aviary and its inmates should supply you with much pleasure and interest. Do not, however, keep Budgerigars with your Finches, etc., or sooner or later you will have to deplore the loss of one or another of your pets.

Grey Parrot Ill.—My bird frequently falls from its perch, but does not appear any the worse for it; he immediately climbs up again. Also for some time past he has been much addicted to feather plucking. What can I do to remedy this?—J. FINLAY.

Most cases such as yours arise from an improper diet. You give me no particulars as to how you are dieting and treating it, and I can give you no satisfactory reply till you furnish same. In the meantime diet your bird as advised in this column, and do not give tea, milk, or coffee slops, fats, or animal food of any kind whatever. Give for one day only six drops of tasteless castor oil on a piece of sponge cake, plain biscuit, or any other absorbent food that the bird will eat. For the next month well colour its drinking water with Parrish's chemical food. Give a liberal supply of cuttlefish, and keep the bird warm, quiet, and out of draught. Soak the bare parts of its skin with quassia solution. You must persevere with this; it is a work of time remedying this annoying and depraved habit of feather plucking. Also try the collar and chain which has been described in this column several times recently. While your bird continues to fall from its perch, take the grating out of its cage, and fill tray with peat moss litter; you must, of course, supply grit in a hopper, or mix a little with its seed while doing this.

Red-faced Lovebirds.—(1) Thanks to your reply, my bird is quite well again; the cough and panting have quite disappeared. One of them is losing its head feathers. Is it moulting? (2) Though tame, they appear frightened when the door is opened and food is offered by hand. How can I overcome this?—A.B.

(1) Am glad to note your bird has recovered. I should imagine the bird is in the moult; this is always very erratic as to period during their first year or so in this country. Keep them warm and out of draught, a piece of clean cuttlefish always in the cage, a leaf of fresh and tender lettuce every other day. For a month or longer, colour their drinking water with Parrish's chemical food every other day. Treated thus, and with the diet you are now giving, they should do well, and in due time be in fine feather again. (2) Your method is not gradual enough. Get them used to taking food from your fingers through the wires first. When they do this readily, then try them with the open door, but do not force them at all, and if fear is exhibited close the door again, and then try again the next day. Only patience and kindness, combined with quietness of manner when attending to them, will accomplish your desires in this respect.

Nest Birds?—Green bodies, with darker green wings, dark stripe across tail, beaks and ceres are light grey; the head of one is lighter green than the other. Can you tell me name and sex?—"FOREIGN BIRDS."

Your birds are either female Madagascar Lovebirds or Passerine Parrakeets, commonly known as Blue-wing Lovebirds. It is impossible for me to say which from your description. Madagascar Lovebird: The male has the head lavender or French grey, the females are plain green, with darker wings, beaks, and ceres, greyish cream. Blue-wing Lovebirds: The male has the lower back or rump ultramarine blue, other parts various shades of green; female mostly all green and lacks the blue areas of the male, with her head and neck slightly greyish.

Golden Crowned Conure.—(1) What is its habitat? (2) How must I feed it, and what are its attractive qualities? (3) How can I tell age and sex? (4) What is the approximate value? (5) Can it be taught to talk?—C. MACABREY.

(1) Also known as the Half-moon Parrakeet; it ranges over Brazil, Bolivia, Guiana, Paraguay, and the Amazon Valley. (2) This is the simplest. Canary, millet, oats, and sunflower seeds; fruit, green food, grit, and water for drinking and bathing; dry biscuits will do no harm, and are appreciated by this and several species. This is a very teachable and confiding species when once properly tamed. The late Dr. Russ says of this bird: "It became tame without trouble on my part, and would fly upon my shoulder or climb upon my finger whenever I entered its aviary. It may, I think, take precedence of all its confreres for teachableness and gentleness." (3) I do not think this species has yet bred in captivity, and I am not acquainted with the plumage of the young. The sexes are outwardly alike, but the male is slightly larger than the female, and the upper mandible of the female had a longer point than the male in such specimens as I have seen. (4) This is variable—10/-, 15/-, or 20/- each, according to number or market. (5) The Conures are not talking Parrots, but nevertheless many of the species do speak a few words; and this species would be as likely to do so as any of this large and interesting genus.

Pekin Robins.—Are they good songsters, and what kind of song have they? Are they better kept singly or in pairs for singing purposes? What is their food? Is it possible to breed from a pair?—H.C.

The Pekin Robin is a very variable bird in the matter of song. Some undoubted males that I have had have scarcely had any song at all, or, which is much the same thing, made no use of it; others have equalled our "Robin Redbreast," and some few the Blackcap. I have only kept them in the aviary, but should say a couple of males, kept in the same room where they could not see one another, would yet soon become aware of one another's presence by muttered notes, and sing one against the other. I have this so with many species of birds. Diet: Some good soft food mixture (see advertisement columns), ripe fruit, insects (three or four mealworms per bird daily if you cannot get spiders, beetles, etc.), and about a teaspoonful of white millet twice a week. These birds are very fond of bathing, and should have an opportunity of doing so daily unless weather be very inclement. I only know of one record of their having done so in this country, and this pair were flying loose in a greenhouse. I do not consider there is any prospect of their doing so in a cage.

Birds for Aviary.—In my aviary, 4 ft. by 6 ft. by 7 ft. high, S.E., I have a pair of Zebra Finches. I want another pair, free breeders, that will live out of doors all the year round. What kind do you recommend?—"ELLIOTT."

I do not know of any bird that are as free breeders as Zebra Finches and Cut-throats; but Silverbills, Spice Birds, and Bengalee would all be possible breeders in your aviary, as would also Java Sparrows, grey cock and white hen. Why not try all four kinds? You have ample room, and they all would thrive on the same treatment as the Zebra Finches, and add interest and variety to your aviary. If you elect to have only one pair, try the Silverbills; they have a sweet and pleasing little song.

Grey Parrot Ill.—My Grey, which I have only had three weeks, has two lumps over the left eye the size of a pea. It also gapes. What is the remedy? It will not eat the small seed; can I give sunflower only?—ELLIS.

It is really a case for a vet.; it is difficult to advise in such cases without seeing the bird. I can only suggest fomenting the swelling with a hot decoction of camomile flowers, to give it for one day only six drops of tasteless castor oil on a piece of household bread, biscuit, or sponge cake, and to repeat this as may be necessary to keep its bowels moving freely, not loose; also to put in its drinking water sufficient Parrish's chemical food to make it the colour of pale port. Do not give sops, slops, or any kind of animal food. As yours is a newly imported and possibly young bird, you might give, say, a good tablespoonful of boiled maize daily for about a couple of months, and then gradually wean it from same. No; sunflower seed will not do for a staple diet. Try the following in equal parts:—Canary, hemp, oats, sunflower, and small Indian corn. Keep the bird warm, as warm as possible, but not in too dry a heat, quiet, and out of reach of draught. Put a screen round its cage, leaving only about one-third of its circumference, or one square side open, but do not cover the top. It appears to me your bird is tainted with Septicæmia, the results of conditions during voyage to this country. Boiled maize only keeps fresh one day.

Nutmeg Finches.—One of my birds has lost its feathers round its beak, and it scratches the part a good deal. How can I remedy this? Is my diet correct, and do hen Avadavats sing?—E.W.H.

Anoint the sore part with spermaccti ointment, not, however, using sufficient to make the surrounding plumage greasy. For one day only make its drinking water just saline with Epsom salts. Diet: Canary, white and spray millet, green food, grit, cuttlefish, and water for drinking and bathing. Some hen Avadavats sing more than others, but their song is seldom anything like so sustained as that of the male, mostly only consisting of the call note very rapidly and almost incessantly repeated. Diet: As above. When you can get them, sprays of rose and fruit trees, and vegetable growths covered with green or black fly will be a valuable addition to their diet; also a small spider or two; these last being a valuable "pick-me-up" if a bird is a little out of condition.

Amazon with Cold.—How can I cure my bird of sneezing, which has been going on for four or five weeks? I feed as you direct.—"ACHEE."

Till you have got rid of the cold, keep a cover two-thirds of the way round its cage, but not over the top, so as to exclude draught. Spray its nostrils twice daily with diluted glyco-thymoline, also with a small camel-hair brush wipe them with the same solution, a fresh portion of which should be used on each occasion. Get from your chemists the following mixture:—Ipecacuanha wine, oxymel of squills, and glycerine in equal parts. Put one teaspoonful of this into the bird's drinking water, say two tablespoonfuls of water to one teaspoonful of the mixture. Do not leave water in cage, but let it satisfy its thirst three times daily. If it appears at all weak, put half a dozen drops of Parrish's chemical food on a piece of biscuit daily, till it is in condition again.

What Birds?—(1) In my outdoor aviary I have a pair of Zebra Finches, and I want another pair of sure breeders to go with them. What do you suggest? (2) Would Saffrons or Bronze-wings answer the purpose? (3) Which would be the best to pair with a St. Helena Seedeater, a green or yellow hen Canary?—F.E.H.

Your query was answered last week, but expect with others it was unavoidably crowded out of that issue. (1) There are very few sure breeders, in the same sense as we apply that term to Canary breeding. The most likely are Cut-throats, White Java Sparrows, and Bengalese. (2) Saffron Finches would also be likely breeders, and Grey Singing Finches are fairly ready to reproduce their kind in captivity, and are also very sweet singers. Bronze-wings would also do well, but only occasional broods of these birds are reared in captivity. (3) It is really a matter of choice, and I should say that a large and bright yellow Norwich would throw the more handsome Hybrids; but, while not wishing to discourage you, Hybrid breeding is accompanied with many disappointments and needs much patience. However, seeing that your bird has already paired with a Canary, you should have reasonable prospects of success.

Java Sparrows, etc.—(1) My white Java appears to have a lump of dirt on its foot. Will it eventually go? It will be difficult to catch in the aviary. (2) Am about painting the outside of my aviary white; will the fumes injure the birds? (3) Will White Javas nest in a husk?—E.H.P.

(1) It would be better if you could catch it, and soak its feet in warm water, and seek to clear the dirt away, but do not use sufficient force to cause a wound. Unless the bird is very lame, and it is some malignant growth, it should come right with the warmer weather. The more frequent bathing should get rid of the trouble, unless there is a wound of any kind; if so, you must cleanse it, and then anoint with spermaccetti ointment. (2) The fumes will do no harm if the greenhouse is properly ventilated. What you will have to watch, if you are using white lead paint, is that no paint dribbles down and hangs through netting in small beads. (3) Java Sparrows mostly choose a husk for nesting purposes, but I have known individuals make use of boxes only; you had better supply both.

Cockatoo with Broken Beak.—(1) Will this grow again? (2) Its feathers are getting very dirty; is there any way of cleaning him?—J.B.

(1) It depends on the extent of the injury; if the bird can eat freely, you need be under no anxiety, it will be gradually replaced, though this will be a fairly lengthy proceeding. (2) It depends to what extent the bird will permit you to handle it, if it is quite tame, simply wash it and keep it out of draught near the fire till dry. If it will not permit you to handle it, then spray it twice weekly, unless weather is very severe, and adopt same precautions as to draught. If the bird's beak should be so badly damaged that it cannot eat properly, then you must give it boiled maize (only keeps fresh one day) till it is able to take the seed mixture again.

POST MORTEMS.

Mr. J. North, 455, Oxford Road, Reading, will examine cage birds for a fee of 1s. 6d. each bird; for a reply direct 2s. 6d.; analysis, 21s. Subjects for post-mortem examination must be sent packed in a box direct to J. North, with fee. Any sent to the office of this paper will be thrown away, and if a fee is enclosed the loss will be the sender's.

Nutmeg Finch and Waxbill (E. and G. W.).—No atom of food could be found in either bird. Both showed congestion of liver and lungs, commonly called "a chill." The first-named was a cock and the latter a hen.

Canary (Temple).—Your bird's liver was in an enlarged and softened condition, giving rise to feverishness and congestion of the lungs. The bird's body and internal organs showed signs of over-stimulation by food and heat.

Yellow Green Canary (W. Rivett).—This bird died of inflammation of the lungs, which I think was caused by feverishness, consequent on softened condition of liver. The scurfiness of the skin is also attributable to same cause.

GENERAL.

Answered by the EDITOR.

Looking Forward (Lancashire Coppy).—Sorry cannot oblige this time.

Congratulations (C. P. Smith).—Glad you liked the appearance of our stall.

Postcards (Nature).—Seventeen in all; ten Canaries, two British, the rest Hybrids; price, 1d. each.

Egg Bread (R. E. Parry).—Congratulate you on your success. Cannot report on same this week.

Awards at Palace (P. Clayton, Jesse Pegg, and several others).—Don't mention it; always ready to oblige.

Article and Sketch (A. H. C. L.).—Yes, both safely received, and now in our artist's hands for purpose of illustration.

Report (H. Dales).—Much obliged for report, which will appear at first opportunity. Sorry we missed you at the Palace.

Drawings of Yorkshires (J. Ferguson).—They are resting in the Editorial drawer waiting a suitable occasion for their reproduction.

Illustrations Required (R. S. H.).—As soon as there is a little less pressure on our space we will have the pictures you ask for prepared.

Llanelly Club Notice (W. Lewis).—Received too late for insertion last week. Kindly note, Tuesday first post is latest time for receiving club notices.

Report (H. S. D.).—Many thanks, sir, for sending us this report. We generally rely upon the courtesy of either secretaries or readers for reports of members' shows.

"A Big Lie" (J. B., junr.).—It is considered by many people to be justifiable to tell untruths for trade purposes. The circular you refer to does not interest us, though we are obliged to you for your comments upon it.

Glasgow and West of Scotland Norwich Club (R. A. Brown and several others).—We cannot, under the law of libel, publish such letters as yours. If the facts are as you allege, we regret we cannot give them publicity; but we are not disposed to fight a costly legal action on such an account.

Suggestion (W. B. Horncastle).—Unfortunately, your idea, though desirable, cannot be carried into effect. The number of query pages is continually varying, and the time of receiving queries from different experts cannot be regulated to permit of such an arrangement as you suggest. We would gladly fall in with your views if it were possible.

Report of Members' Show (J. C. Birch).—Do you think it fair to us, sir, to ask us to write out a prize list of your show during such a week as the Palace Show week? At any time it is unreasonable to expect us to compile a prize list of a show confined to members. How much more so at a time when we are simply inundated with work. We forgive you on this occasion, but please send in future reports written out in the same style as they ordinarily appear.

Dispute Over a Special (J. S. Walker).—According to your statement, you held a show at which seven open classes were provided, and a special was offered "for the exhibitor who makes the most entries in the open classes." One exhibitor (Mr. S.) makes ten entries, another (Mr. F.) makes eight; but owing to cancellation of three of the classes, Mr. S. can only stage seven of his entries, while Mr. F. stages eight. You want to know which wins the special. In my opinion the special must go to Mr. S., because of the wording in the schedule. Mr. S. "made the most entries," and the fact that some were afterwards returned to him by the committee does not affect him in his claim to this special. We feel complimented at the confidence reposed in our judgment by both disputants.

(Palace Report, continued from page 166.)

MULES AND HYBRIDS.
Judge, Mr. J. H. Roe.

CLEAR, ETC. (5): 1, spl, 2, J. Williams, leader apparently the noted Clear, late Colton and Jackson and Bond, a clinking good Mule, having both size, quality and colour, big shapely body, grand head and warm blaze, waxlike in plumage, put down in good trim, and wins comfortably, second has a slight tick on the left wing, otherwise clear, not quite so big or so good in colour as its companion, yet a splendid specimen, full of quality and bloom, both buffs, and of the Goldfinch-Canary persuasion, and showing the parentage distinctly; 3, Hamblyn, sweet 6-pointed yellow Goldie-Canary, lengthy, somewhat slim, yet of fine shape, good head, rare good colour, teems with quality, very well marked, real nice Mule; 4, Andrews, ticked both eyes, buff, on the small side, but good in shape, chubby and neat, little weak in colour, still, being only a youngster, he should make great improvements; w.c., Messrs. Clark, Staples and Hodge, presumably entered as a six-pointer, and we believe it was thrown out because the dark feathers on each side of the tail were uneven in number. VARIEG., ETC., GOLDIE-CAN. (17): 1, 2, Williams, almost six-pointed buff leading, good one for size and shape; excels in quality, very nice colour, fine head and chest, second red-hot yell, mixed wings and eye, beautiful quality of feather, close and waxlike, and brimming over with colour, fine blaze, two taking exhibits staged in good style; 3, Lamb, almost six-pointed yell, very nice size and shape, good head and blaze, well rounded chest, stylish, and shows the cross splendidly; 4, Galloway, mixed eyes and rump, grand feather properties very good shape and style, has promise of a fine blaze, real good youngster, which should make up into a grand exhibit; vhc, Lander, almost six-pointed yellow, good one for size and shape, very tight in feather, lovely colour and quality, nice flush on face, looked a wee bit soiled, and needing a tub; hc, Lewis, big, shapely, lightly variegated, excellent blaze, good body, teeming with quality; c, Weedall, lightly variegated yellow, of nice size and shape, and real good quality and colour; No. 1254, Jeffereys is a promising young Mule, should improve with a moult, and a little color-feed. LINNET OR GREENFINCH, AND CAN. (5): 1, 2, Williams, two well-known warriors leading, the noted head and saddle-mkd. Linnet being assigned premier position, he was looking in grand form, even more waxlike than ever, for size, shape, and style, this bird wants some beating, second came the noted lightly variegated Greenfinch Mule, a wonder for colour and quality, of good size and style, a bold and pleasing bird, two grand specimens, nothing in the class to seriously challenge their supremacy; 3, Buchanan, Junr., nice head and wing mkd. Linnet Mule, fairly good size, splendid quality and shape, free of style, staged in excellent manner; 4, Dr. Galloway, heavily variegated Greenie, taking bird of quality and colour, somewhat thin as yet, still only a baby, so should thicken out at the next moult; w.c., Roe, and rightly so too, we thought, for the bird is simply a lightly-marked Canary, looking not unlike a Crestbred, the exhibitor possibly has had some "mixed eggs" during the season. D.C. YELL. GOLDIE-CAN. (11): 1, Mrs. A. Coffey, an exhibit with both length, substance, and shape, well-rounded, deep chest, bold, shapely head, good, rich expansive blaze, beautifully marked wings, rare good quality and condition, dense colour throughout, heads a hot class; 2, R. W. Jones, handly the same size or substance, yet very good in these points, exceptionally rich in colour, and simply shimmers with bloom from head to tail, finely marked all over, in fact shows the cross even better than the winner; 3, Ridley, another Mule with a coat which shines like satin, fine big, shapely body, good square head, carrying a rich blaze, nice depth and tone of colour throughout; 4, Duncan and Logan, a regular red-hot costumer, beautifully marked, finely polished, slimmer got up than leaders, yet a really nice-shaped bird, must have been close up; vhc, E. G. Wright, romping big one, rare good chest, splendidly marked, and a grand bird of colour, beaten in tightness of feather, being a shade out at neck and thighs; hc, McQuiston, beautiful hot-coloured, well-polished bird, just behind in size; c, Marshall, well beaten for colour, yet a bird of fine size and shape, with a grand chest and head. BUFF DITTO (12): 1, Duncan and Logan, the well-known winner, a real topper, and will be very difficult to beat anywhere, this bird has an exceptionally large body, with a rare good chest and head, beautiful shape all over, deep, fiery blaze, perfect wings, and finished off with a bloom which could hardly be excelled, takes the leading position with something to spare; 2, Dale, very shapely specimen, of fine size and lovely quality, rare silky feather, broad head, carrying a good blaze, paler in colour than leader, and has a distinct white break below the under mandibles; 3, Wright, grand size, substance and shape, bold, well-rounded chest, wide head, with an expansive, rich-coloured face, excellent colour all through, except for a light shading which shows round the neck, and seemed a trifle out in neck feather, which may have kept it back, otherwise we preferred it to the second; 4, Hingley, well behind in colour, yet a clinking good one in other respects, grand head and blaze, very shapely body of excellent size, taking quality of feather, in good form; vhc, hc, Best, two well-known Metropolitan winners, beaten in this company, yet certainly not disgraced, both of very nice size and shape, well proportioned, sleek and fit, lack the hot colour of the leading trio; c, Taylor, good bold bird, excellent chest and head, well polished, nice face; No. 1281, McQuiston, struck us as a smart Mule. DK. GREENFINCH AND CAN. (15): 1, Taylor, bird of splendid size and shape, deep, round chest, bold, well-proportioned head, very soft, silky texture of feather, nice clean tone of colour throughout, though of a somewhat light shade, a good bird, yet hotly pressed by, 2, Wright, trifle slimmer in build, but excelling in richness of colour, of a beautiful tone, deep and pure all over, good wings and tail, nice head, sleek and shapely bird; 3, Todd and Son, great depth of colour, almost too dark in fact, full of bloom, very good size, rare good shape, bold, neat head, good in wing and tail, well worth its place; 4, Stark, red-hot one, but dull in plumage, needs sheen, otherwise a grand Mule, good in size and shape, very closely feathered, and a rare deep tone of colour; vhc, Smith, a bird we liked, though looking a trifle horned, maybe in remembrance of the wash, very good size and substance, nice shade of colour, rich and clean throughout; hc, Dr. Galloway, very decent cinnamon-feathered specimen, beautiful pure colour, fair size, very well proportioned, apparently only a baby; c, R. W. Jones, good bird of shape, hardly so big as those above, very sound in colour and well polished. DK. LINNET AND CAN. (14): 1, Duncan and Logan, a stormer, and no mistake, immense size, and rare good substance with it, too, splendid chest and head, plenty of white on wings and tail, lovely polish, deep, rich colour, as sound as a bell all over, excellent markings, a remarkably stylish bird, showing the parentage to perfection, we thought the best dark Mule in the show, excepting, of course, the Canary-Bullie; 2, Parker Robinson, another grand specimen, extra good in size, very prominent chest, shapely and full of style, beautiful deep colour, shining like satin, a wee bit short of markings, yet a bird which needs a deal of beating; 3, R. W. Jones, red-hot yellow, really marvellous colour and polish, fairly shimmers with bloom, well up in size, perfect shape, staged with not a feather out of place, very good in markings, an exhibit to be proud of; 4, Mrs. Coffey, rare good one for size and shape, neat, bold head, good wings, well marked, nice quality, very stylish, but well beaten for colour; vhc, Williams, whopper, rare size and shape, big, bold head and chest, very nice, sound colour, well marked, must have pressed, though looking a trifle out in neck feather; hc, Wright, deep, sound-coloured Mule, very decently marked, good wings, full of style, excellent bloom and quality; c, Hingley, smart bird for style, shape and quality, somewhat dark in colour, excels in polish. SISKIN ETC., AND CAN. (20): 1, Hesketh, quite one of the nicest Twite Mules we have seen for a considerable time, a bird of grand size and sweet shape, exceptionally rich and sound in colour, beautifully pencilled all over, not a feather out of place, and carrying a bloom like a peach, rightly heads a fine class; 2, Lewis, splendid Siskin-Canary, gem for right beautiful tone, hot and pure, grandly marked wings and flanks, one of the best-defined caps we have seen, big, cobby body, clothed with silky, well-polished feather, earns its position; 3, Williams, another rattling good Twite-Canary, not quite so sound and deep in colour as winner, but equal in most other respects, splendid frame, well modelled body, neatly clothed, nice pencilling, good head and wings, in excellent condition; 4, Stone, another Siskin-Canary, great size, fine round chest and broad head, sound, even rich colour, good wings, very stylish bird, neat to a fault, beaten in density of markings by second; vhc, Maxwell, very pure coloured non-fed Siskin, excellent shape and style, should make up into a good one, being apparently only very young as yet; vhc, Marlin, we unfortunately overlooked, by some means or other; hc, Lamb, fine Twite for size, nice shape, excellently pencilled, trifle duller in plumage than leaders; hc, Wright, about the biggest Siskin in class, rare size and shape, good colour, but has not the exquisite finish and bloom of leaders; c, Mrs. Coffey, rare big Twite, excellent shape and colour, was looking rough when we saw him; No. 1328, Brown and Arrighi, nice light (heavily variegated) Twite Mule, somewhat of a rarity, and worth a mention; No. 1335, Massey, a good Redpoll-Canary, if not over-large, smart colour and condition, could have stood in somewhere. A.O.V. CAN HYB. 7; All Canary-Bullies, and a truly grand lot; 1, 2, vhc, Williams, the noted jonque, bred at Plymouth by Mrs. Skey, looking as well as ever, marvellous size and shape, great depth of colour, rich and lustrous, very dense cap, well defined markings all over, a real gem, second and special, the old yellow, beaten for size and density of markings, yet a topping specimen in all other respects, in rare bloom, vhc the well-known buff, the winner and hc being "Plymouth Brethren," a romping big one, has not the colour of leaders, yet a massive, bold, taking bird; 3, McInroy, another beautiful example, very close on second's heels, fine size, splendid shape, very dense, rich colour, polished to perfection; 4, Ross, shade smaller, yet a gem for colour, very hot, deep and level, beautiful head and back, carries a rare bloom, a taking bird; hc, Lamb, very large and massive, nice tone of colour, unfortunately is hardly tight and sleek enough in plumage; absent, Whiteford. A.O.V. BULLIE HYB. (14): 1, 3, vhc, Williams, a wonderful trio, that "star of stars," the champion Goldie-Bullie leading, he has been described at many shows during the season, and we can add little to what has already been said concerning him, he captivated all onlookers, being in most fascinating condition, for size, colour and shape he is streets ahead of all competitors, third came the well-known Linnet-Bullie, a grand example of the cross, extra good in size, and of beautiful shape, if it had a trifle more breast colour would be a gem of the first water, vhc the noted Greenfinch-Bullfinch, a splendid specimen, but meeting his match to-day in, 2, Shellam, one of the grandest Greenie-Bullies seen for years, and only a baby, so its future should be a bright one, it is of lovely size and shape, and possesses magnificent colour and markings, rich tone all over and shining like glass; 4, Mather, another Goldie-Bullie, out-classed by winner, yet a clinking example of the cross, real good size, beautiful shape and style, fine rich face, deep and well-contrasted in colour throughout, beaten, but far from disgraced; hc, Maxwell, yet another very nice Goldie-Bullie, has size and substance, and is full of quality and colour, very taking style; c, Lamb, really excellent Greenie-Bullie, as also was the same owner's Linnet-Bullie "crowded out"; No. 1352, Wright, a well-known Scottish winning Greenfinch-Bullfinch, and undoubtedly a grand bird, left cardless by the judge, on account, we believe, of an alleged hipped wing, which is somewhat cocked up over the bird's back; No. 1354, Carter, is a sweet Goldie-Bullie. A.O.V.HYB. (13): 1, 2, Lamb, two well-known Metropolitan winners here set the seal of their season's work, and thoroughly deserve their honours, the noted Redpoll-Goldie leads, a gem of shape and style, polished like silk, grand expanse of blaze, of pure, rich colour, second the small well-known Siskin-Goldfinch, shows the cross to perfection, good size and shape, neat to a fault, grand face, well polished, both staged in rare style; 3, Shellam, extra good Greenfinch-Siskin, large and shapely, beautiful colour and markings, shows both parents distinctly, very fine silky feather, deserves its place; 4, Webster, clinking Redpoll-Greenie, close on the third's heels, for size and colour is a beauty, well marked, very shapely, steady and stylish; vhc, spl, Mrs. Coffey, hot-coloured Goldie-Greenie, shade small, splendid bloom and colour, very shapely, very nice face; hc, Dr. Galloway, very smart Goldie-Redpoll, good shape and colour, nice size; c, Boyle and Young, Goldie-Siskin, fails in colour to leader yet by no means a bad one, being good in size and shape; w.c., Williams, said to be a Bramble-Chaffinch Hybrid, but we believe the judge passed it as being a hen Chaffinch.

MR. HESKETH'S TWITE CANARY MULE.
First in a Class of 20 at the Palace.

BRITISH BIRDS.
Mr. G. E. Weston's Classes.

BULLFINCH (43): a wonderful fine class, not a bad bird in the tickets, and must have taken some sorting out; 1, 3, vhc, R. J. Howe, a splendid trio, the leader we heard is the bird who has secured for its owner so many winning brackets this season up and down the country, and he rightly headed the class to-day, we understand he was moulted in an aviary, and he certainly came through in lovely condition, for lightness of feather and peach-like bloom he is perfection, while his breast is a very rich bright even colour all over, magnificent jet-black glossy cap, lovely tone of back colour, well-defined wing-bars, just above medium size, he has a bold, wide head, a cobby, thick-set, well-cut body, and shows to perfection. His two stable-companions have been runners-up on many previous occasions at other shows, and, while grand Bullies, are not quite his equal for size, type and colour. The third is a black-legged specimen, a shade smaller, and with hardly the width of cap, yet a charming bird, teeming with quality and bloom, rare hot colour, very typical in shape, and in grand trim, steady as a rock, the vhc is just on the small size, yet a most pleasing Bullie, deep, rich lustrous colour throughout, nicely rounded chest and head, though the latter is not so bold as leaders, fine back and wings, a little uneven in tail feather, also an aviary moulted bird, three much admired exhibits; 2, Lovell, said to be the "Western King," and we do not doubt it, in fact he came near to being the "Weston King" as well for we believe the judge found it difficult to place him behind the winner, the greater depth of breast colour possessed by the latter just deciding the issue against him. This bird has one of the finest caps we ever saw on a Bullfinch, wide, well-cut, beautifully rounded, and shining like polished ebony, broad blue back, splendid bars and wings, cobby, shapely body, lovely quality of feather, carried with war-like closeness, altogether a charming bird, beaten, but by no means disgraced; 4, hc, Parker Robinson, another clinker, perfect shape of body, stylish, neat to a fault, lovely round glossy cap, rich back and bars, deep, lustrous breast, beaten only by the merest shade in substance and width of head, completes a grand quartette, the hc bird is a good typical Bullie, built on the right lines, and well set on his legs, has not quite sufficient polish to get higher up; vhc, S. E. Jones, "Bath Gem," might well be termed the "Beauty of Bath," for he will always be among the first flight, and if he were only a little more thick-set in shape, would want some pegging back, very fine colour and sheen all over, rare head; vhc, White, not over big, but a gem for type, grand wide chest, deep even breast colour, fine head, just a little dull in plumage in comparison to winners; vhc, Dickie and Smith, rattling good one for shape and style, very neat in plumage and shines like glass, is just a little flat on the head, which keeps him back; vhc, Jeffreys, another beauty for type, thick-set, well across perch, fine bold, rounded head, nice colour all over, except for running a trifle pale round the beak and throat; vhc, Mrs. Coffey, bold, shapely, stylish exhibit, excels in quality and neatness of feather, just a shade "bricky" in colour, the trouble of so many house-moulted Bullies; hc, Crockatt, good stamp, wide, well-rounded chest and head, a little loose underneath, full of colour; hc, McQuiston, on the small side, and none too well polished, yet a sweet one for shape and style, well proportioned all over, deep, sound colour; hc, Mrs. Frostick, we were inclined to question its nationality, the bird behaving like a hand-reared German, got the benefit of the doubt, however, and anyhow, it is a smart, shapely little bird, very tight in feather, and of good colour; hc, Carter, a red-hot black-legged Bullie, just a wee bit unsteady, but a fine all round specimen; c, Jupe, also black-legged, grand wide glossy cap, rich, hot breast, thick-set, smart and shapely, a little "chipped" over beak; c, Henderson, "Little Billee," a wee gem, not a big one by any means, yet good in shape and lustrous in plumage, nice bars and colour of breast and back; c, Watson, lovely shaped body, very fine cap, pleasing tone of colour, a little "gone" in neck feather; c, Andrews, good size, nice shape and colour, grand wide head, which is just a little flat. The majority of these birds were put down in excellent style. GOLDFINCH (44): 1, spl best Hardbill, D G. Lewis, a noted West-country winner, of just about medium size, this bird

takes a splendid position on the perch, as though he knew he had beauty beyond the ordinary to show the onlookers, and a little gem he is too, every colour rich, clean, pure, and beautifully contrasted, grand chestnut, plenty of gold in the wing bars, buttons and moons of the best, nice chest, good cheeks, dense, well-cut hood, and, above all, one of the most expansive, squarest-cut, and purest coloured blazes ever seen on a British Goldie, lovely bloom on the feather, which supplies the finishing touch to a little picture; 2, Hurst, larger Finch, more upstanding in type, very stylish and shows for all he is worth (and that is a good deal), wonderfully wide expanse of blaze, which is very correctly cut, very deep and lustrous in colour, yet not so pure as in the leader, fine wings and grandly marked all over, for extent and richness of tanning, we never saw its equal, and herein lies the bird's chief fault, for one can have too much of a good thing, and the chestnut tanning spreads everywhere, spoiling the colour contrasts, and lending the "Pride of Liverpool" a somewhat dirty look, he will, however, always find plenty of admirers, being a right down good Goldie; 3, Carter, possibly the best bodied Goldie of the trio, very stylish, stands well across the perch, and has a grand, wide, well-rounded and tanned chest, just a wee bit smaller in blaze, yet nicely cut, deep in colour, pure and well polished, splendid wings for bars and buttons, a smart, taking Finch, just a trifle weak in neck, which may be due to the many shows he has seen, for we took him to be the well-known winner, late Andrews, in new hands, beaten here, but not disgraced, as the old saying has it; 4, A. Howe, another notable performer during the season, the worst fault we have to find with him is a slight lack of polish, which his travels may account for, yet he is a lovely Goldie, with a grand style, and cobby, shapely body, excelling in quality of feather, very neat and well marked all over, not particularly square-cut in under blaze, but with a very wide, expansive, rich-coloured face, a beautiful bird; vhc, Porteus, has everything which goes to make a clinking good Goldie, but is a little soft and lacking condition to-day, claimed at catalogue price, £2 12. 6d., and should do his new owner good after a moult; vhc, he, c, Richards, a trio of Welshmen hard to shake off at any show, leader has a wonderfully good under-blaze, and is very correct in colour, but unfortunately his head is very flat at top, which detracts from his otherwise fine appearance; the he is a size smaller in face, but a grand one for colour and condition; the c bird has the same fault, especially on the crown, but is also in lovely condition, and teeming with colour; vhc, Clark. Stapler and Hodge, grand width of blaze, deep colour, beautiful polish, a little short on top, yet a lovely 4round Finch; vhc, Kershaw, another bird distinguished by boauty of condition, rare good colour and sheen throughout, fine blaze, grand amount on top, lacks a little in width under; vhc, Vincent, really fine Goldie, big and shapely, good tanning, well contrasted in colour all over, large, pure blaze, could do with being screwed up a little in tightness of feather, the perches, too, are somewhat short for a bird to show properly on; he, Mays, has a very fine under blaze, nice and clean in colour, good, shapely body, grand stamp of bird, little duller in plumage compared with leaders; he, Elkerton, another clinking good Goldie, just beaten for polish and depth of blaze colour, rare good body, wide, well-cut face; he, Greenway, in fine condition, nice body and blaze, the latter, however, a wee bit too dark; c, Simpson, stylish, polished, and shapely, large grand cut blaze, but has just a trifle too much black in it; c, Lewis, some way behind same owners winner, all there, however, for colour and style; c, Elwell and Booth, a bird of nice colour and bloom throughout, good, wide blaze, a little untidy in feature at times; No. 1457, Howard and Son, bird with a remarkable blaze, round, and with a break underneath, yet extra expan-size, not in condition; No. 1443, Bull, looked decidedly "queer" when judged, but pulled round towards the close of the show, and looked as though he could have secured a ticket. LINNET (32): 1, Lovell, "Joe," winner, according to the catalogue, of 40 firsts. This is not his first appearance at the Palace, but hitherto the laurels of victor have not fallen to his share, lack of condition having been his stumbling-block. This season, however, Joseph has got some colour into his coat, and finished it off with starch-glaze, with the result that he scores somewhat easily. For richness of colour and sheen the bird stands well ahead. Sound as a bell all over, well marked on head, back and breast, good in size, perfect in whites, beautifully coned in shape, steady and stylish, "Joe" is all out a grand Linnet; 2, Bull, the Norwich type this time, medium size, well across perch, wonderful width of chest, well proportioned, bold head, nice back, very neatly-fitting wings, carries plenty of white in the flights and tail, rightly-named "Browney," for the bird is a grand, level, nutty colour throughout, and one mass of fine pencilling from head to tail, particularly fascinating in style and wealth of breast marking, and as sleek and shiny as any "topper," we took to be the Cardiff, etc., winner; 3, R. J. Howe, another beautiful Linnet, large, shapely, well-coned body, nice wings and tail, bold, neat head, rich, sound colour throughout, very well pencilled all over, might be a trifle more distinct on breast, a very fine specimen, however, carrying a lovely bloom, in the pink of condition; 4, Henderson, a wopper, "Big Ben," rare chested bird of the Norwich type, stands well across the perch, and moves with style, very sound colour of a nice shade, good whites in wings and tail, very bold, well-rounded head, staged in good form, with plenty of quality, loses to winners in quantity and distinctiveness of pencilling; vhc, Misses Hunt and Ride, sweet bird, sound nutty colour, fairly-well marked, good size and shape; vhc, Prior, on the small side, but equal to any for finish, style and markings, a taking exhibit; vhc, McInroy, we thought him the best-shaped bird in the class, bouncing Norwich type, rare head and chest, massive right through, yet as sprightly as possible, beautiful tone of colour on feather of the silkiest quality, if only this bird were well pencilled, what a stormer he would be! vhc, Boyle and Young, rare good Linnet for size and condition, moulded on the right lines, not at all badly marked, runs a trifle pale under the throat; he (2), Parker, Robinson, both grand ones for type and colour, but beaten for bloom by those above, evidently the show season has tried them badly; he, Jeffreys, should be a good one with another moult, has size, shape and style to recommend it, and is beautifully pencilled, but lacks depth of colour and bloom; c, Porteous, bouncing big bird, splendid chest and head, somewhat short of pencilling and polish; c, Ramsay, lovely shape, colour very rich and nutty, fair pencilling, good whites, unfortunately has a bad break in feather on the throat; c, Hurst, fine exhibit for shape, colour and bloom, a little too dark for our liking, pencilling all bidden.

CHAFFINCH (28): 1, R. J. Howe, a charming bird, such size, shape and colour are rarely seen in combination, while we have never met with a more stylish Chaffie., he moves with confidence and grace, and shows off his points to the best possible advantage, beautiful shape, prominent, well-rounded, extremely rich-coloured chest, big, broad head, lovely wings for whites and markings, plumage covered with a peach-like bloom, if one may be so particular as to look for a fault, we should say it lays in a slight lack of colour contrasts, and a not too well-defined blue cap, this being due, doubtless, to the extremely rich ground colour he carries, a very well-known winner, on this occasion he was hard pressed by, 2, Withers Bros., a bird excelling in colour contrasts, and the correct shade of colour, too, besides being of beautiful shape and good size, great width of chest, wide, bold head, distinct blue cap and black bar over beak, really grand wings, clean as a new pin—and shines like one, too—a bird we were very sweet on, but he has an irritating habit of backing up against the cage back, instead of taking the perches gracefully and letting you see his beauty, whether from shyness or through being too tame we cannot say, but he should certainly be broken of this failing; 3, Hurst, another wonderfully fine exhibit, extra good in size and shape, grand chest and head, nice blue cap, deep, rich, lustrous plumage, very stylish mover, all over a gem of a Chaffinch, yet had apparently been marred in the washing, the feathers round the neck, especially at the back, looking coarse (as though matted with soap), and this naturally handicapped him in the race for premier position, the Manchester winner, we understand; 4, Clarke, Staples and Hodge, just a size smaller than leaders, otherwise a bird bad to beat for quality and bloom, very fine, shapely body, rich and well contrasted in colouring, good cap, nice wings, takes the perches in free style, and carries a pleasing polish on its plumage; vhc, Swinger and Blackwell, very nice size and shape, well contrasted colours, if improved in polish should make a good one; vhc, Francis, very big and bold, good shape and colour, a little coarse in feather; vhc, Dale, nice bird, excellent chest and head, good sheen on the feather, a wee bit on the small side; he, Mayes, grand style and quality, good bold chest and head, a litle bit too reaching in neck, nice colour; he, McNay, lovely chested bird, finely polished, if it had a bolder head, especially on the crown, which runs narrow, it would want a deal of beating; he, Weedall, likewise a shade fine on skull, very nice exhibit in other points; c, Withers Bros., grand wings, good throughout, in fact, but badly needs steadying; c, Paul, we liked very much, for size, shape, colour and markings a very nice bird, but for broken tail would have stood higher, needs quieting down a trifle. We noticed one or two birds in this class which looked suspiciously as though their owners had stepped beyond legitimate bounds when "preparing" them for the show bench.

FOREIGN GOLDFINCH OR BULLFINCH (11): 1, 3, c, Brown and Arrighi, a really magnificent Bullfinch leading, we were told was the Scottish National winner, romps home here, for size and substance a revelation, hottest of hot breasts, grand back and bars, bold, wide cap, in the pink of condition, was claimed by some fair admirer to take home as a pet; third is another grand Bullie, house-moulted this time, lacks the astonishing colour of winner, but a real clinker in other respects; c, a nice Goldie, fine colour, good face, all three staged in masterly manner; 2, Cairns, we were told is the Scottish National third, a rattling good Goldie, extremely chubby in body and wide in chest, expansive blaze of great width, very cleanly cut and pure in colour, nice wings and buttons; 4, Craig, also a very smart Goldie, fine, big, good-coloured blaze, well tanned body, excellent wings, not quite the timber of second; vhc, Goodfellow, the Scottish National winner, a bird with a really wonderful blaze, especially underneath, but slim in body, and palpably out of condition to-day, struck us as having been over-washed; he, Andrews, fine Siberian hen, great size, dense colour, good cap, nice bird. Though there were a few grand specimens in this class, it was certainly not at all what it might have been in numbers, and several good birds had "gone off" which did well earlier in the season.

ORDER YOUR 1907 ANNUAL AT ONCE.

Mr. S. COOK'S Classes.

LESSER REDPOLL OR TWITE (22): 1, Mrs. Coffey, very fine Twite leads, a most stylish specimen of this graceful bird, in ground colour it will be hard to beat, being of a rich, clean tone, while it is splendidly pencilled on the head and back, also on the breast, though hereabouts we have seen them marked with greater distinctness, very tight in feather, and polished like a mahogany table top, a really sweet bird, takes the special for best lady's exhibit in the section; 2, Osborne, whacking big Redpoll, what a head and chest, stands well across perch, full of life and go, very neatly marked and carried wings, perhaps not over rich in ground colour, nor too dense in bib, but put down in winning form, and very suitably staged; 3, Simpson, another grand Twite, a size smaller than leader, yet chock full of pencilling all over, rare good breast, fine wings, steady and stylish, nice colour and polish, staged in faultless condition; 4, c, Prior, another exceedingly pretty Twite, very rich in brown, grand whites, one mass of marking, put down in proper style, if a trifle larger would be a topper; vhc, Rouse, really fine Redpoll, fails a shade in bib, but is extra good in other points, grand size, colour and condition; vhc, Livingstone and Sinclair, a well-known Scotch face, rattling good Twite for size and shape, steady and shows very nicely, good pencilling and whites, beaten, for a wonder, in richness of colour; he, Pretty, good, shapely Redpoll, deep, sound colour, has a very nice bib; he, Weedale, lovely Twite for quality, rich shade of colour, nicely marked, a nice bib, thin in neck; c, Ross, typical, well-marked Redpoll, in field plumage; No. 1542, Penrice, was a bird we liked as also was 1535, Robinson, a grand Twite, but a little gone in neck feather. SISKIN (38): 1, Kilner, a beauty, has plenty of size, is of rare good shape, possesses a deep, bold chest and wide, well-rounded head, very rich in colour, having been well and judiciously fed, clean and nicely defined in markings, glossy, well-laced cap, plenty of lacing on flanks, really good bib, a grand Siskin, undoubtedly, we thought, however, he had knocked away (or had them pecked away) some feathers on the upper breast, near the butt of left wing, as a more or less bare place seemed visible; 2, Dickie and Smith, a grand non-fed one, large, chubby, and wonderfully sleek, fair bib, well-defined, dense cap, beautiful wings, excellently carried, very tight in feather all over, has been got into fine form, and is put down in a manner which shows him off to the fullest advantage; 3, Mason, slashing big, well-built bird, particularly good in chest and head, fed a red-hot colour, beautifully polished and sleek in plumage, well laced and marked, except that it has no bib worth mentioning, shown in pleasing manner; 4, Mays, clinking non-fed Siskin, rare good size and shape, about the best laced cap in the class, grand wings, nice bib, a beauty, soon claimed, and cheap at catalogue price (£1), we fancy must have run second and third a hard race; vhc, Lyle, sweet non-fed, real good bib and lacing, splendid polish, a little short of size; vhc, Bowker and Cliff, hot coloured, shapely and well polished, fails in bib, otherwise very nicely marked; vhc, Carter, large rare-headed bird, teeming with quality, well-marked all round, not far behind leaders; he, Irons, nice non-fed, good lacing and quality, trifle fine on head; he, Elkerton, good-headed little chap, smart shape, clean colour, lacks bib; c, Moffat, a wee one, but grand for colour and polish; c, Birchley, fine stamp of bird, good colour and markings, a shade too "necky." No. 1548, S. E. Jones, we thought a very taking Siskin, likewise No. 1546, Marlin, catalogued as the Scottish National Show Winner, a big, well-built, rich-coloured bird, with well-contrasted markings, very steady and sleek, worst fault a solid black cap. BRAMBLEFINCH. (20): 1, Bailey Bros., "Pride of West," and well earns the winning bracket here, for richness and wealth of colour we have seldom seen a more fascinating Bramble, and it possesses plenty of size and a lovely shape, with a grandly spangled head and back, dense and glossy blue-black in ground colour, fine wings and lacing, the bloom on the plumage a treat to see, while the bird moves with confidence and grace; 2, Prior, another beauty, a trifle smaller than winner, yet equally fascinating in colour and spangling, splendid dense well-cut hood, moves in typical Bramblefinch fashion, and is as steady as could be; 3, Mrs. Coffey, grand one for quality and colour, very big and well-proportioned, finely spangled and laced, good style, nice head, put down in excellent form; 4, Massey, shade smaller, yet another grandly coloured Bramble, beautiful spangle and markings; vhc Brown, nice bold bird, hot colour and quality, runs a little in back markings; vhc, Sharp, rare good bird all round, a shade duller in plumage; vhc, Hurst, red-hot one, splendid colour and shape, close on leaders; vhc, R. J. Howe, grand, big, shapely specimen, well marked all over, worst failing a trifling lack of polish; he, Longden, big, fine bird, beaten in distinctness of spangle; he, Francis, very taking bird for style and markings, little broken in breast colour; he, Ellis, paler tone of colour, big and typical; c, Overend, shapely, greyer shade of ground colour; c, Mrs. White, rare big bird, very nice colour and markings; c, Birchley, grand stamp, needs warmth of colour; c, Mason, beautiful colour, a wee bit small. GREENFINCH (37): 1, R. J. Howe, the well-known champion, stands well ahead, a topper for size and shape, grand chest, bold head, lovely wings and tail, in colour a charming even shade of green, very silky feather, steady and tight as wax, a much admired bird, not spoilt by colour-feeding; 2, 3, Taylor, two clinking good ones, remarkably tame, lovely tone of colour throughout, silky quality of feather, very tight and neat, plenty of yellow in wings and tail, both were singing away like Canaries, and evidently enjoying themselves, really good in size and shape, and also not overdone with artificial colour; 4, Pennells, hot-fed specimen, grand tone of colour, though rather deep, full of bloom, very shapely bird of excellent size; vhc, Leavers, non-fed, even, nice tone, good shape and style; vhc, Treharne, fine substance and shape, little smoky in colour; vhc, Misses Hunt and Ride, darker colour, full of polish, stylish and good in shape; vhc, he, Francis, hot-fed, good stamp of bird, trifle cloudy in colour on top; he, Gunnell, slightly fed, a wee bit small, good in other points; he, Howard, grand silky feather; c, Halliday, small one, lovely grass-green colour; c, Ellwood and Walker, rare big one, good shape, hardly clean enough in colour; No. 1635, Goodfellow, a grand one; Nos. 1626 and 1627, A. Howe, two real clinkers all round, well-known winners, hard to understand why they were left out; No. 1628, fed out of all resemblance to a Greenfinch, "Red" finch would be better. NIGHTINGALE, etc. (9): 1, 3, R. J. Howe, two very nice Nightingales, good in size and shape, leader the better in this respect, and also excelling in colour, trifle damaged in feather over beak, third good Nightingale, sweet singer and soon claimed, both in lovely condition; 2, Frostick, beautiful Blackcap, great size, very rich and pure in colour, dense, glossy cap, staged in beautiful condition; 4, Mylic, another very neat Blackcap, staged in an elaborately velvet-decorated cage, sang sweetly as we took our notes, a really excellent specimen; vhc, Ford, very pretty Nightingale; he, Hathaway, good Blackcap for colour and condition, shade small. c, Lean & Son, Nightingale, nice size and shape; also soon claimed. LARK, etc. (20), a splendid class: 1, Potts, big, upstanding Skylark, very wide chest and head, good colour, profusely pencilled all over, yet a trifle indistinctly on the breast, beautifully staged, a massive, grand feathered bird; 2, Withers Bros., very dainty Tree Pipit, beauty for bloom and quality, steady as a rock, lovely markings, well shown; 3, Birchley, really grand Shorelark, good size and shape, very tame, beautiful colour and markings, and shows the "horns" on the head very nicely, in exceedingly fine condition; 4, Shirley, another charming Tree Pipit, very little behind second either in colour, size or markings, full of bloom; vhc, McVay, a grand Skylark, has size and shape, grandly marked; he, P. Walsh, grand upstanding Lark, very distinctly pencilled, we liked well; c, King, another bold Lark, very big, stylish and taking. A.O.V. RESIDENT (23): 1, 3, spl, including cup for best British bird, Mays, with undoubtedly one of the finest Tree Creepers ever staged, a gem for feather, rich, well-mottled back, charming silvery-white breast, in wonderful condition, and staged in grand style; 2, Lowne, Bearded Tit, no question about its nationality, very deep and rich in colour throughout, dense, well-defined moustachial streaks, in perfect plumage, and exhibited in one of the Yarmouth enthusiast's specially decorated cages, certainly very artistic; 3, Galloway, one of the nicest Gold-crested Wrens seen for a long time, a gem for condition and colour, very prominent and rich-coloured crown, excellently staged; 4, Senior, very fine Crossbill, well behaved, sleek and tight in feather, and a lovely even ruddy tone of colour all over, it is not often one is seen like it in this respect; vhc, Mrs. Matcham, very pretty Grey Wagtail, nice size and shape, beautiful condition, shade pale in colour; he, Ford, another very nice Tree Creeper; c, Lyle, Blue Tit, what a handsome exhibit it made, too; vhc, Patterson, Nuthatch, which persisted in losing itself in the tunnel of bark within its cage; vhc, Brown and Arrighi, a real champion Missel Thrush, we preferred it for fourth position; he, Hingley, also a pretty Tree Creeper; c, Shirley, Longtailed Tit, looking a wee bit dull. We had a Bearded Tit in this class (1785), shown in much too large a cage, and a Longtailed Tit (1787), who looked decidedly queer. A.O.S. MIGRATORY (15): 1, Birchley, Great Grey Shrike, a beautiful exhibit, it is seldom one sees a specimen so steady and perfect in plumage, for they are bad to get used to captivity, lovely colour, very dense and well-defined markings, must have pressed for the best bird cup; 2, R. J. Howe, a very handsome Wryneck, grand size and shape, excels in conditiou and colour, staged in good style, well worthy of its place; 3, Francis, the well-known Wheatear, charming example for depth of colour and condition, beautifully marked, a gem of a bird, pity he should have a trifling defect in one leg; 4, Bailey Bros., handsome Waxwing, exhibits the remarkable beauty of the species to perfection, lovely colour and condition, perfect wings and tail, a strikingly attractive bird; vhc, R. J. Howe, Blue-headed Wagtail, fair size, beautiful condition, very nice colour; he, Burrows, clinking good Ring Ousel, exceptionally well-marked wings, good crescent, fine colour and bloom; c, Crockett, another charming Waxwing; No. 1,813, a Crossbill in the wrong class; No. 1,811, Cook, a magnificent Nutcracker, with whose appearance readers of our recent Birthday Issue will be familiar, takes the special for the rarest British bird; 1,822, Shirley, a fine Willow Wren, but off in condition, unfortunately. FINCH SELL. A.N., 20s. (22): 1, Mrs. Frostick, grand Russian Bullie; 2, Hunt and Ride, really fine Russian Goldie; 3, Mays, British Goldie, splendid value for the money; 4, Rouse; vhc, Wootton, Staines, (2); he, Withers Bros., White, Hedges; c, Francis, Howe Greenaway.

Mr. J. F. Hill's Classes.

HAWFINCH (14): 1, Hakes, a wonder for colour, takes Ramsden pepper special for hottest British bird, excellent size and shape, wide, well-cut bib, undoubtedly a fine bird; 2, Levett, big, bold, cobby fellow, shade small in bib, very nice condition; 3, vhc, Francis, very hot colour, beautiful polish, latter, real, fine bird, too, grand bib; 4, A. Howe, the noted "Bobby," a champion all over, paler in colour than winner, but hard luck to be down so low; he, Forster, very bold and stylish, paler over back; c, Young. BUNTING (23): 1, Mather, tip-top Yellowhammer for size and colour, rich and well-polished, grand chestnut, nicely-marked on head and cheeks, well-known winner and a genuine bird; 2, Stone, Corn Bunting, a wonder for size, colour and pencilling, well staged, steady as a rock; 3, Boardman, attractive Snow Bunting, shade lacking in purity of colour, yet for shape, size, steadiness and condition very hard to beat; 4, Raine, the noted Cirl Bunting, very steady, grand condition.

IMPORTANT NOTE.

Two or more Advertisements coming from the same advertiser, even if sent in different names, are reckoned together and counted as one Advertisement.

excellent colour and markings; vhc, Cooper, very tame and taking Yellowhammer; vhc, Henderson and Kilner, two real, good Meadow Buntings; hc, Hunt and Ride, McVittie, McVay, two really good Yellowhammers and a Lapland Bunting; c, Martin, Tonks, a couple more fine "Hammers." BLACKBIRD (10): 1, 3, vhc, R. J. Howe, trio of grand Blackbirds, leader an out-and-out champion, lovely bill and ceres, dense, glossy body, exceptionally good size and shape, third also a beauty, hardly so bold in skull, all in perfect condition; 2, c, Penrice, a magnificent specimen leading, for size and shape hard to beat, fed so heavily as to show a distinct brownish sheen, which tells against it, very nice bill and ceres; 4, Lowne, again of good size and shape, glosy jet black colour, clear, but somewhat paler bill and ecres; vhc, Lean and Son, very good dense coloured exhibit, beaten a shade in bill and ceres. SONG THRUSH (11): 1, 4, hc, R. J. Howe, fine trio of "speckled beauties," the champion hen leading, almost an ideal bird, excels in size, shape, and colour, fourth a good one, hot colour, little frayed at tail and flights; 2, Pearce and Son, exceptionally well spotted down flanks, fine size and shape, nice colour; 3, Elias, bold, well-rounded bird, fine colour and polish, little broken in mooning; vhc, Cullington, raro big, fine-chested bird; c, Axe, last year's winner, and unaccountably low down to-day; No. 1,698 Birchley, and 1,699, Penrice, were two Thrushes we also liked well. STARLING (14): 1, 2, R. J. Howe, cock and hen of the heavily-spotted variety, beauties for size, shape, and coudition, lovely metallic sheen on plumage; 3, Crockatt, smaller ticking, a fine bird, grand size, shape and polish; 4, Lean and Son, smaller, but a very taking example; vhc, Hunter, grand condition and size; hc, Birchley, we liked immensely, medium, well-defined ticking, very big and shapely; c, Axe, another grand one, which took our faucy. MAGPIE, etc. (10): 1, Bond Bros., the noted Eureka, a great winner, exceptional size, grand shape, very tight plumage which, however, is hardly blue-black enough for our liking, medium rich back and legs; 2, Bussey, a grand Jay, rare good body colour, fine wings and head, very distinct moustachial streaks; 3, Maxwell, very fine Magpie, one of the survivors of the disastrous fire, a grand bird for colour, very distinct whites; 4, Crockatt, Chough, an old friend, well-named "Veteran," lovely colour and sheen, exceptionally rich legs and bill; vhc Stone, another nice Jay; hc, Miss Walker; c, Maxwell. ALBINO (11): 1, Gill, very charming white Bullfinch, showing a crimson flush on the breast and, curiously enough, crown of the head, wins easily; 2, Welch, the well-known white Blackbird, and a gem of its kind, very pure in colour; 3, Lamb, sweet little cinnamon Redpoll, lovely tone of colour; 4, Wright, good example of the cinnamon Greenfinch, in fine condition; vhc, Andrews, partially white Goldfinch, taking bird; hc, Raper, fino black Bullie, made a delightful contrast with winner; c, Hakes. HENS (22): 1, Eyes, very cobby and shapely hen, Bullie, deep colour, good cap; 2, vhc, Misses Hunt and Ride, Bramblefinch, leading, which we thought a cock, if a hen, then it is a gem; vhc, a sweet hen Goldie; 3, Richardson, very smart Hawfinch, good bib; 4, Ellis, splendid Siskin, grandly marked and sleek; vhc, Hawes, hen Greenie, good size and shape, very fair colour; hc, Mather, very large hen Bullie, almost too good to be true; hc, Miles; c Howe.

FOREIGN BIRDS.

Judges, Messrs. Camps and Swaysland.

BUDGERIGARS AND A.S. OF LOVEBIRDS, ETC. (6): 1, Underwood, Yellow Budgerigars, very fine, good size, colour, and very tight; 2, Wright, Lovebird, very nice specimen, rich colour; 3, Leach, Green Budgerigars, very fine, tight, good size, absolutely perfect; 4, F. Howe, Yellow Budgerigars, nice and tight; vhc, Mrs. Cooper, Lovebirds; hc, Thorne, Budgerigars; C. Gardner, Lovebird. This class does not call for special comment, the species exhibited being all well-known birds; however, they were mostly in noticeably fine condition, good size, and rich and pure in colour. A.S. OF PARRAKEETS, LORIES, ETC. (13): 1, Pier, very fine pair of Bourke's Parrakeets, well marked, tight, and rich in colour, a rare and grand exhibit; 2, H. Cooper, another fine exhibit, pair Red-vented Blue Bonnet Parrakeets, in perfect condition; 3, Miss Conway Gordon, Crimson-wing Parrakeet, colours very rich and pure, tight and sleek plumage; eq. 3, Mrs. Cooper, Varied Lorrikeet, very richly coloured, and in fine and sleek condition; 4, Frostick, Lineolated Parrakeets, good condition, and very tight; eq. 4, Mrs. Cooper, well-known and beautiful Barnard Parrakeets, in faultless condition; vhc, F. Howe, King Parrakeet; hc, Hawkins, Red-vented Blue Bonnet Parrakeet; c, Nesbit, Crimson-wing Parrakeet. A very hot class, and must have given the judge some trouble, but one fails to understand such an absolutely rare and unique exhibit as Mr. Pier's Blue-banded Parrakeet not catching his eye. Also exhibited in this class a nice specimen of the Black-headed Caique, which rightly received a we card. Mr. Hawkins also exhibited a fine pair of the lovely Tin (Tinincat) Parrakeets, which a season or so ago would have certainly been in the money. A.S. PARROTS, COCKATOOS, ETC. (14): 1, Mrs. Anningson, well-known Banksian Cockatoo, in very fine condition (an adult female); 2, Sir C. Lawes Wittenwrange, Bart., pair Banksian Cockatooes, an interesting and unique exhibit; 3 Burrows, very handsome and loquacious Red and Blue Macaw; 4, Merrington, Grey Parrot, very tight, and finely marked plumage; eq. 4, Mrs. Cooper, Senegal Parrakeet, very tight, richer in colour than when last shown; vhc, Barrow, Red and Blue Macaw; c, Mrs. Cooper, very fine, Blue-fronted Amazon, in faultless condition; hc, Mrs. Snoddon, very fine and well-coloured Red-sided Eclectus. Handsome Port Lincolns and an immature Blassom-headed Parrakeet were exhibited in this class, and rightly awarded we cards.. Another very strong class, and the judge must have found the allocation of awards a very difficult one, the uniquo exhibits being the Banksian Cockatoos, said to be a pair; these birds caused much speculation as to sex, and also species of one of them. I am of the strong opinion that the bird without marking was an adult male, and the other either a female or immature male. However, previous to writing this, I have been unable to verify same, by comparison with plates, etc., but believe them to bo as above; the well-known specimen of several show seasons, which is an adult female, and a fine and well-developed specimen, added one more first to its many laurels. Mrs. Cooper's Senegal and Amazon Parrots were noticeable for their fine condition, the first-named being also quite uncommon, though well-known. WAXBILLS, FINCHES, WEAVERS, ETC. (18): 1, Mrs. Warren Vernon, Golden-breasted Waxbills, quite a picturesque exhibit with shell nest, very richly coloured, and faultless condition; 2, Mrs. Cooper, White Java Sparrow, good size, very tight, and pure in colour; 3 and 4, F. Howe, Diamond Sparrow, one of the finest specimens I have ever seen on show bench; St. Helena Waxbills, perfect, very tight, and sleek in feather; vhc, Miss Bromwich, Java Sparrows, Beaty, Parson Finches, Hawkins Diamond Finches; hc, Thorne, Orange-cheek Waxbills, Frostick, St. Helena Waxbils; c, Mrs. Cooper, Diamond Finches. Good specimens of Avadavats, Tri-colour Mannikins, Bib Finch, and Mrs. Cooper's abnormal Yellow-rumped Diamond Sparrow, were exhibited, all of which weer mostly noticeable for richness of colour, tight and sleek plumage. GRASSFINCHES, WEAVERS, ETC. (16): 1, 2, and 4, Hawkins, Violet-eared Waxbill, one of the best I have seen, faultless; Vinaceous Fire Finches, exquisitely beautiful, and without a flaw; Red-faced Finches, good, but showing signs of age, a grand team; 3, Beaty, Black-headed Gouldian, perfect, very tight and sleek; vhc, Townsend, very rare Rufous-backed Mannikins, in spotless condition, in my opinion should have been third, and I believe this to be its first appearance on the show bench; hc, Mrs. Warren Vernon, Red-collared Whydah, rather rough and imperfect in plumage; c, Watts, lovely pair of Lavender Finches. Also exhibited, Grey Waxbills, Cordon Bleus, Ruficandas, Tri-coloured Parrot Finches, Pin-tail Nonpareils, and Golden Sparrow. The judging here, after the allocation of 1st and 2nd, appears to me to be very faulty, the placing of a Gouldian Finch, however perfect, in front of the rare Rufous-backed Mannikins (first time exhibited), and in spotless condition, appears quite incomprehensible, as does also the passing of Tri-coloured Parrot Finches without a card, even though slightly rough. A.S. GROSBEAKS, BUNTINGS, CARDINALS, ETC. (8): 1 and 3, Hawkins, Cuba Finches, spotless condition, Quail Finches, nice exhibit but wee bit rough; 2, Townsend, very rare Rock Bunting, an interesting exhibit, which has been exhibited this season for the first time, in my opinion should have been first; 4, Mrs. Cooper, Black-headed Siskin, an uncommon but well-known exhibit, wee bit rough; vhc, Lawson, good Virginian Grosbeak; hc, Miss Bromwich, and c Barron, Red-crested Cardinals. Also exhibited a pair of Black-head Siskins under the name of South American anary; as a pair this is quite a unique exhibit, the hen being very rare; tho male was not as bright as some specimens I have seen, but should have received a card. A.S. TANAGERS SUGAR BIRDS, ETC. (9): 1 and 2, Townsend, Yellow-winged Sugar Bird, a beautiful exhibit, but not yet in full plumage, and the now well-known Black-backed Tanager, in my opinion these positions should have been reversed, a grand couple; 3, Dewhurst, rare Banana or Cuban Tanager, rather loose in feather, and poor in colour; 4 and vhc, Harrison, an absolutely perfect Magpie Tanager, should have been higher, Blue and Archbishop Tanagers, both uncommon exhibits, and nice and tight in feather, a fine trio; c, Dewhurst, good Superb Tanager. A gorgeous and beautiful array of exhibits, though not so much variety as we remember to have seen in the past. A.S. NOT COMPRISED IN ABOVE (16): 1, vhc, Harrison, Silver-eared Mesias, a grand pair of these beautiful and much-admired birds, very sleek and tight, White-throated Ground Thrush, a beautiful and uncommon exhibit, in finest condition; 2, 3, Burrows, Touraco and Toucan, both interesting and beautiful exhibits, but not so rich in colour as some we have seen; 4, Townsend, Glossy Starling, very sleek and tight; vhc, Dewhurst, South African Coley, an uncommon but wild exhibit; hc, Frostick, Japanese Tits, a rare and interesting exhibit, well shown, and in good condition; hc and c, Mrs. Foss, Siamese Hill and Ceylon Mynahs. A strong class of fine and interesting birds, including among those which failed to catch the judge's eye, both uncommon and fine exhibits of Gold-crowned Tronpial (ought to have had a card), Ruddy-shouldered Cowbird, and a nice couple of melanistic Pekin Robins. A.S. FOREIGN MULE OR HYBRID (7): 1, vhc, Hawkins, lovely Red-mantled Parrakeet, faultless condition, and nico tight specimen of Bicheno-Zebra Finch, parentage of both species well and equally brought out in both of above; 2, hc, Seth Smith, Song Sparrow Hybrids, much resembling hen Bramblings, very tight, but rather wild, and Long-tailed-Masked Grassfinch, very tight and sleek, plumage about equally indicates both parents, a handsome Hybrid; 3, 4, Mrs. Cooper, Red-rump-Rosella, wee bit rough, clearly shows both parents, and Alario-Canary (?), nice and tight specimen, but if parentago is correctly given, it should have been wrong classed. Also shown, Zebra Finch-Indian Silverbill (?) which appears to be simply a Combasson. A disappointing entry as to numbers, but all are interesting exhibits, the 1st prize winner being ono of the most beautiful birds in tho Show.

CAGES AND APPLIANCES.

Judge, W. Swaysland.

SHOW OR STOCK CAGE (price not to exceed 6s. 6d.) 15: 1, 2, vhc, c, T. F. Reece, an excellent lot of show cages all well conceived and made in first-rate style; a fine Norwich blue pattern cage leads the way, priced at 1s. 6d.; Yorks cage with detachable wire top and flat bars, price 1s. 8d., second, another with wrapped bars, price 1s. 4d., vhc, and a travelling Finch cage, with sliding-shutter to cover the wire front, price 3s. 6d., stood c; 3, vhc (2), hc., J. Walsh, a wonderfully light Thrush show cage leading, price 3s. 9d., well suited to its purpose, vhcs good small Foreign bird, and Norwich Club pattern cage, price 2s. 7d. and 1s. 6d. respectively, latter neat and useful stock cage for Canaries, fitted seed hopper, egg drawer, and tin sand-tray, very cheap at 2s. 7½d.; vhc, hc, c, Newley, former show cage for Gouldians, or similar foreign Finches, with seed trough inside, hc a Plainhead show-cage, termed the Southern Norwich pattern, enamelled an electric-green shade, c another show-cage for Foreigners, with inside swing-in food and water vessels of glass, price 5s. 6d.; all are exceedingly well-made; hc, Hogg, another Norwich cage, of the accepted pattern, a good one, too, price 1s. 9d.; hc, Burnet, a Yorks show cage, with an ingenious showcard-holder, price 2s. 3d.; No. 2,117, Moore, a Linnet show-cage, fitted with a safety-door, we thought a good idea. BREEDER (13): 1, 2, 3, Newley, trio of excellent cages in every way, thoroughly practical, made in high-class style and well-fitted, single breeders for Yorks, Nor. and Crests, price 3s. 9d., 5s., and 6s. 6d. respectively; vhc (2), hc, Linsey, the "Cambridge" breeders, also made in splendid style, and fitted with every requisite, single-breeder, with nesting-board and nursery under, price 5s. 6d., a fine double cage, price 10s. 6d., designed for Crests, and a double for Plainheads, price 2s. 6d.; c, Walsh, very light and well got up, single breeder, price 4s. 6d. A.O.V. CAGE (14): 1, 2, vhc, hc, Stelling and Son, splendid exhibits, the best Parrot cage we remember seeing stood first, complete, up-to-date in every detail, price 20s., and cheap, too, close mesh, 26ins. waggon-cage was second, very suitable for a drawing-room collection of small Foreigners, price 30s., a 14 ins. waggon-cage, and a gorgeous brass Parrot followed; 3, hc, c, Newley, show cage for Cardinals or birds of similar size, beautifully finished, price 8s. 6d., hc a stock cage for a Nightingale, price 10s. 6d., and one for Thrush or Blackbird at the same price, all three distinguished by good workmanship and knowledge of the requirements of tho birds; vhc, Roehl, very nice metal drawing-room aviary for small birds, price 12s. 6d.; Mr. Hathaway had three excellent stock cages for British and Foreign birds on view, while Mr. E. J. Clark exhibited his "grips" for holding nesting material, etc., a very ingenious little device.

PALACE NOTES.

A certain Cockatoo proved distinctly ungallant, putting a fair lady to blush, and being the reverse of complimentary to himself. A quite charming member of the fair sex leant over towards his cage, and said: "Pretty boy, you are a beauty." In painfully distinct tones, Cocky replied, "Liar, liar, liar!" (N.B.—It may be well to add that the above is truth unadorned).

Sometimes at the Palace on the Saturday one might have imagined themselves at a Yorkshire bird show, so great was the congregation of our friends from the county of the White Rose. Jimmy Bailey, of course, was there, and rejoicing more than ever in the possession of his crack young yellow. Early in the season Jimmy sent this bird on approval to a south country Yorkshire fancier, the price being £4. The bird was returned; he was not good enough for southern shows—not big enough was possibly meant. Jimmy, however, thought he would give him a run at Sandy Lane Show. Since then he has gone out nine times and brought home the coveted first prize card, and, moreover, by his great wind-up of the season, has proved himself to be the best youngster of 1906-7.

The great sensation of the Show was the disqualification of two Yorkshire Green Canaries, by Mr. T. Heath, for alleged trimming, the said trimming being the cutting off of the tips of certain feathers on the backs of the birds. The two Greens concerned were Nos. 443, Mr. C. Stewart (Liverpool), and 463, Mr. P. Clayton (Halifax). Seeing the interest aroused over this question of "square-feathered" Greens (breeders of the variety say such feathers are natural to this bird) through the correspondence proceeding in our columns, we reproduce in this issuo the drawings taken from photographs of the feathers alleged to be trimmed, the said photographs being taken direct from tho birds.

We were pleased to once again see and shake hands with Monsieur Ruhl, of Ensival, Belgium. He has been far from well of late, and it was doubtful until the last moment whether the long journey to the Palace could be undertaken. What a rare lover of a good British bird he is, to say nothing of Siberian Goldfinches, of which he has twenty-four fine house-moulted examples. Last year, it will be remembered, M. Ruhl won well with these birds at Sydenham. A love of birds is evidently a family trait, for an excursion after egg-cabinets, and specimen nests and eggs, was on the tapis on behalf of a son.

Last year we had occasion to comment on the superlative condition of the Yorkshires put down by Messrs. Bailey and Swanger. This year "Jimmy" was noticed once again receiving congratulations on the same score, and we overheard him saying that the winning clear yellow had visited fifteen shows with success, and had been hand-washed no fewer than thirteen times. How's that, ye who hold that much "tubbing" ruins show birds? Or is it the *way* in which they are washed?

Several Foreign birds found themselves "wrong classed," and evidently there are not a few exhibitors who fail to understand the class headings as now given in show schedules. Mr. Camps told us he was very sorry to have to throw out the Black-headed Caique, which was a really fine bird.

We spent a pleasant half-hour in company with Mr. J. Exton, of Leicester, years ago a force to be reckoned with in Cinnamon Canary circles, and we learned that there is every prospect of him taking up with his old love again shortly. Let us hope he may find the time; there is room and to spare in the Cinnamon Fancy to-day.

The colour feeders and the anti-colour feeders among British bird men got to grips again over this question. The former had distinctly the better of the argument on this occasion, for the winning Linnet, Chaffinch, Twite, Siskin, Hawfinch, Yellowhammer, Song Thrush, and Blackbird had of a certainty tasted of the pepper that is sweet; probably the leading Greenfinch and Bramblefinch had also made its acquaintance.

Another curious, and somewhat more appropriate, printer's "bloomer" found a place among the British, where Mr. Howe's Blue-headed Wagtail figured as a Blue-headed Long-tail. Quite an accurate error, this! In the Foreign section the Tui Parrakeets found themselves christened Tin Parrakeets; but, then, the Foreigners have always provided pitfalls for the poor printers.

The Norwich fanciers at the Show seemed to think the type is being neglected in favour of colour and size. At Manchester there was also much talk on similar lines. Cannot the Norwich Plainhead Club take some action in the matter? they asked. We heard Mr. White, of Melbourne (whose impressions of the Show will be found in this issue), utter some very scathing remarks about the type of the Norwich birds to be seen at the Crystal Palace.

Tick, or no tick, which? Mr. Collings sent the Norwich Canary, which was "wrong-classed" at Hayle Show, to the Palace. It was again examined by Mr. House, who officiated at Hayle, and the tick was found. But it is not easily seen. It is in the neck, and very faint indeed. On the slight ticking of the feather being pointed out, Mr. House at once agreed the bird was ticked, and that his decision at Hayle was a wrong one.

Little Jimmy Thornton was in hot dispute with a well-known southern judge about the relative value of the birds of the North and the South. This particular judge does a bit of platform work, and the grievance was that he had told an audience that they had just as good birds in the South as there are in the North. Jimmy said it was not right, but Mr. Judge maintained it was, and said that if some of the South Country birds could go North to be put through the "laundry" by some of the experts in the Bradford district that they would beat the Northerners easily. But, though Jimmy is small, he holds strong opinions.

On Saturday morning one of the policemen on point duty at Ludgate Circus held up the traffic, and with a smile beckoned to the President of the Cage Bird Union, little Tom, of blanket fame, and two Southern pressmen, as they stood on the kerb, and said: "This way to the Crystal Palace." Now, how did that policeman know the quartet were bound for the C.P.?

Can yellows be produced from double buffs, and buffs from double yellows? This was a question we overheard Mr. Brotherton and a Southern fancier (whose face is known to us, but whom we cannot name) debating in front of the Crests on Saturday morning. He of Northern fame answered both in the negative, and the Southerner in the affirmative. As umpire, a well-known judge was called in, and he agreed with the man of the South, but qualified it with: "It seldom happens either way." What have readers of CAGE BIRDS to say on the subject? It would be interesting if one could arrive at what the odds are against such phenomena.

Is Cinnamon blood of any value in Crest breeding? We overheard Mr. Heath and Mr. King discussing this momentous question with another gentleman, and both agreed that in the production of feather properties in Crests the Cinnamon blood was most useful. Thomas, of Eaton Place, and Thomas, of Cheltenham, should both know something about the subject, and there must be something in their view.

The judge of Foreign birds—or, rather, one of them—Mr. Russell Humphreys, was prevented by business pressure from attending, and his place was filled by the versatile and able Walter Swaysland.

The Mule judge, Mr. Roe, would have none of Mr. J. William's Chaffinch-Bramblefinch Hybrid, said to be a well-known winner, but "wrong classed" it as a hen Chaffinch pure and simple.

A curious controversy arose over the hen British bird class, Mr. Hills putting a Bramblefinch second which most of the cognoscenti present considered was in reality a cock. This incident illustrated once again the difficulty of accurately judging a class such as this.

THE PALACE SHOW SEEN THROUGH AUSTRALIAN EYES.

By F. WHITE,
Victorian Canary Society, Melbourne.

When I landed on the shores of the Mother Country in the closing days of 1906 one of the sights which I had determined to see was the great Bird Carnival at the Crystal Palace. Each year since CAGE BIRDS made its bow to the public have I read the reports which you have given your readers, Mr. Editor, and also gazed admiringly upon the splendid pictures which your artist, Mr. Norman, has given us of some of the great winners, and as I have studied these portraits and read the description of the birds they represented, I have often thought how I should like to be present at the world's greatest show of Cage Birds. My visit to the Old Country has given me the opportunity at last, and now you ask me to give your readers my opinion on the show. Fully sensible as I am of the honour done me by your request, I yet hardly know how I am to convey to the many thousands of cage bird lovers in this country the impressions which the show made upon me.

First of all I will ask you to bear in mind that all I can offer you is my honest opinion, given for as much or as little as it may be worth, but formed after going carefully through the show on the two first days in the light of my own Australian predelictions and preferences. My ideas may, perhaps, not coincide with those of English breeders, and may appear, perhaps, somewhat crude and unjustified to those who have the advantage of seeing such shows in frequent succession. If my criticisms are thought by anyone to err upon the side of severity (a fault I sincerely hope to avoid) I will remind your English readers that unless these impressions of mine are faithfully recorded they will not possess the value which every honest fancier will desire they shall. Further, may I say at this juncture that though I have seen several points that seem to me open to criticism, I have also seen a great deal to commend and praise, and in these notes my approbation of such will be as freely expressed as my condemnation of that which does not strike me as being worthy of praise?

Dealing with the birds first, I must at the outset, if I tell the truth, confess myself disappointed with the Norwich. But, in a measure I was prepared for this, because my friend, Mr. Cooper, of Melbourne, who has often visited your great show, told me how it would be, and yet I could not believe it. Had I not read the graphic descriptions of the great English winners, and gazed upon their outlines in the pages of CAGE BIRDS? Although somewhat in doubt as to which to place reliance upon, I leant more to CAGE BIRDS and its pen and pencil descriptions than I did to the oracular testimony of my friend. Hence the greater has been my disillusionment. It is not my wish to hurt the feelings of my brother fanciers in England, but in all sincerity I must say that the Norwich birds at the Crystal Palace were not, taking them as a whole, and viewed, mind, according to our lights and standards of excellence, as good, I believe, can be seen upon the benches of one of our shows in Victoria. To my Colonial eye these English champions fail in shape. Type is the first thing we look for in our Norwich down under. Our birds are shorter and more cobby in body, deeper and broader in the chest, and much shorter in flights and tail. Many birds at the Crystal Palace failed in their breadth of chest; they were narrow sided. Colour and size there was in abundance, but not type. With us type is forty-five points out of the hundred, and type is our chief anchor. We like size, but we want it in fullness and shortness, not in length. In head many of your birds seem to me to have an inclination to be narrow and flat, not round and chubby as we wish them. They are not cut away clean enough underneath to suit the Victorian ideal, whilst the carriage of flights leaves much to be desired. Smartness is a point of the greatest value, and the clean cut away underneath, with short, well braced wings and tail, give that great desideratum. Another point, I thought many of the birds were too short in leg; we like more leg than your birds show, because the leg has much to do with the correct pose of the body, and shows the shape off to advantage. A Norwich should not be too close to the perch. Then the feather of your birds is not equal to that seen on our Victorian cracks. It is coarser in texture, and does not fit so well. We consider it a great fault when birds drop their clothes about their thighs.

This is hard criticism, but I honestly think in Norwich that could a battle be arranged between Old England's best, and those of Australia, that it would be another case of "the ashes" leaving your shores. I say this with great respect, but from a sincere belief in my opinion. My remarks are, of course, general, and refer to the birds as a whole. There were birds at the Palace quite equal to our Australian birds, if not superior, but the general average of merit was below our standard. One bird I would especially like to mention, and that is Mr. Baker's first prize unevenly-marked Yellow. That bird I should like to take back with me when I leave for home.

Crests, like the Norwich, were not up to my expectations. They were not so broad or long in feather as our birds, neither do they approach us in type and substance. I was told that the best Crests are not now seen at the Palace, and that had I been able to see the birds staged at Nottingham, Newcastle, Bristol, or Cheltenham earlier in the season I should have been in a better position to estimate the state of the English Crest Fancy. During my visit I have seen one of your most famous breeder's stock, so that I know there are better birds in England than those shown at the Crystal Palace. I may say, in passing, that Barnett blood is known and valued in Australia.

The Yorkshires: How can I express myself concerning them? They were a revelation to me; a surprise in every way. Such numbers, and such quality! Type, style, feather, and colour, they had them all. Long did I linger over them, charmed by their matchless beauty, and not a bad one did I see in the whole lot. Such uniformity says much for the careful manner in which they are not only bred, but also judged. I envy no man the task of judging such a collection as I saw at the Crystal Palace. The happy moments spent amongst these Yorkshires will live with me in memory for years to come.

Cinnamons: I expected something much more choice. Truer to Norwich type, and with finer quality of feather are the Cinnamons in Australia. I happened on a lean year, the leanest, I am informed, ever known at the Palace. I can only speak of those things I have seen, and the Cinnamons did not impress me favourably.

Lancashires: These interested me greatly. We have, I think, Plainheads equal to those at Sydenham, but the Coppies we have fail to the English birds in spread and formation of coppy.

The Lizards also attracted me, and much as I admired their colour and spangling, I thought them hardly up to our birds in size.

A new variety to me I found in the Borders. Like the Yorkshires, they pleased me greatly, but they were hardly so uniform as the Yorkshires; whilst some were very slim and smart, others were stouter, evidence of there being two types. The beauty and wax-like character of their feather afforded me intense pleasure.

Scotch Fancy Canaries are almost unknown to us, and I must confess the birds at the Palace were superior to anything I have ever seen.

The British Birds were a splendid collection. We have some very fine Blackbirds, Thrushes, and Goldfinches in Australia, but your birds are larger than ours. The greatest revelation to me were the Foreigners. Never have I seen such wonderful and charming birds as those staged in the Insectivorous classes. Marvellous indeed was the manner in which they were shown, their beauty being only equalled by their wonderful condition. Of what love for the Fancy does this speak!

The show as a whole to me was wonderful; a surprise and a delight. The few disappointments were tempered with pleasure unknown and unthought of. When I go back again to the Land of the Southern Cross I shall think not only of the grand display of birds, but of the splendid arrangements governing the show, of the many kindly words of greeting given by the number of good fanciers whom I met, of our discussions on the different points, of the generous reception given to my views, and the hearty reciprocity shown by those I met, in giving me the lines upon which the English fanciers are working. Your artist, Mr. Norman, has, from my instructions, sketched a bird approximating to the standard which prevails in Australia. It is, I venture to suggest, truer to the Norwich type than many at the Crystal Palace. But there, after all, is not type an elastic quantity in every variety, and under any judge, and who shall constitute himself the final court of appeal? Surely not a "darned outsider from Kangaroo Land."

My task is finished, and to you, Mr. Editor, I tender my thanks for allowing me to say something about our Australian Canaries to English fanciers, and I will in all seriousness ask friends in England to turn their attention to the type of the Norwich bird. There seems to me to be room for improvement. And you know the old saying about the looker-on. I should feel flattered could I but think these notes tended to some improvement being effected. When I return to Australia I shall carry away with me many pleasing recollections of the Crystal Palace Show, and of the many good and true fanciers whom I met thereat. To them, and the British Fancy generally, I wish success.

ROLLERS AT THE PALACE.

Judge, A. Rettich.

The Palace Show has come and gone, with all its hopes, expectations and disappointments. The Roller section was well to the front again, and with 59 entries in the three classes, compares well with any other variety in the show. The judge had a most difficult task before him to find the winning birds, where nearly all were stars. The Open Class, 30 entries, revealed some of the best birds in the kingdom. The Young Bird Class, with 8 entries, was a disappointment, but we think it arose by a misunderstanding that the birds must be bred by the exhibitor. The Limit Class came up to its usual strength, and among the birds exhibited were some that we thought cheap. Open Class (30), 1st and 3rd specials and silver medal, J. W. Norris. This bird well-merited his win, and delivered his hollow roll, 8; hall bell, 4; schockel, 4; gluck, 4; flute notes, 2; delivery and purity, 4; total, 26 points—with a very pleasing effect; 2nd, special and bronze medal, Lyons, in this award we could not agree with the judge, and his bird's total of 22 points, not coming up to the fourth, which we fancied in that place; 3rd, Merrick, another fine songster, with a total of 20 points; 4, Wilsdon, this bird gave a fine display of the hollow roll and schockel, his rising and falling and depth of tours giving him an easy second position; extra 4th, Randall; vhc, A. Percival; vhc, J. W. Norris; vhc, Steigart; hc, Lyons, hc, Randall; c, Merrick; c, A. Percival. Young Bird Class (8): 1st and silver medal, Walton, a nice youngster of good depth and tone; 2nd and bronze medal, Steigart, another good bird; 3rd, Hughes; 4th, Haywood. We believe the best birds in this class, No. 1,201, Oldroyd, and No. 1,206, Wilsdon, did not sing before the judge, or the awards would have been different. Limit Class. £2 (21): 1st, Roehl, a very nice bird, and quickly claimed on its 24 points; 2nd, W. Evans, rather loud, but a very free singer; 3rd, Walter Bros.; 4th, Lester; vhc, Walter Bros.; hc, Steigart; c, Steigart.—F. A. LESTER.

THE BRITISH ROLLER CANARY CLUB.

A Presentation to Mr. Norris.

The attendance in the Roller Canary room at the Palace was tremendous, and it was quite uncomfortable trying to listen to the birds during the greater part of the show. There can be no question but that this variety is becoming more popular every year.

During the evening of Saturday the British Roller Canary Club held a meeting in a room of the Palace, with Mr. F. A. Lester in the chair, supported by the Secretary, Mr. J. W. Norris, Mr. Lowes (of Wortley, Leeds), Mr. Wilsdon (of Oxford), and other London and country members. The first subject that came up for discussion was an improvement on the present uniform show cage. After many suggestions and much discussion, it was submitted to the meeting that it be left to the committee to deal with. The next matter debated was the issuing of closed rings to non-members of the B.R.C.C.. It was unanimously agreed that the B.R.C.C closed rings should be issued to members of other Roller societies through their secretaries, thus preventing the issuing of two or more rings of the same number. There was also an argument as to the advisability of having a team contest in the near future, but owing to the close approach of the breeding season it was thought to be practicable next show season. But the chief object of the meeting was to take advantage of the presence of the country members, and make it the occasion of presenting the secretary, Mr. J. W. Norris, with a very handsome testimonial in the form of an English lever watch and gold chain and an illuminated address, as a practical appreciation of the magnificent work he has done for the B.R.C.C. and the Roller Fancy in general. Mr. F. A. Lester, in the absence of the President (H. R. B. Tweed, Esq.) in presenting the testimonial, referred to the worthiness of Mr. Norris, and the energy he has displayed in the interests of the Roller Fancy. Mr. Lester also referred to the great pleasure it gave him to be able to present Mr. Norris with such a token of respect in the name of some 30 or 40 members of the B.R.C.C. Mr. Lowes (of Wortley), Mr. A. Foulds (of Manchester), Mr. Wilsdon (of Oxford), Sergt. Latter (late Kings' Royal Rifles), and others also spoke very highly of the courteous treatment they had always received at his hands, and one and all thanked him for the splendid manner he had conducted the business of the club. Mr. Norris, in replying, said he had only tried to do his best, and he was extremely pleased that the members showed such marked appreciation of his past efforts, and he said such a token of their esteem would spur him on to do all he could in the future to further the interests of the Roller Fancy. The officers of the Society were unanimously re-elected, and three fresh members enrolled. The meeting was then brought to a close with a hearty vote of thanks, moved by Mr. A. Foulds (of Manchester) to Mr. F. A. Lester for kindly taking the chair.—F. A. LESTER.

LEICESTER C.B.S.

Annual Show of Norwich pairs, matched for breeding, at headquarters, Feb. 15th, some very good birds being staged. The judge, Mr. G. Lander, after a hard task in placing the winners, gave general satisfaction. OPEN CLASS (23): 1, E. B. Hunt; 2, S. c, G. Edwards; extra 3, vhc, H. Marriott; hc, T. West. NOVICE CLASS (5): 1, A. Lowe, 2, G. Harrison; 3, vhc, hc, J. Adams. It has been decided to hold a members' show on Saturday, March 2nd, of pairs matched for breeding, of Canaries, Mules, and Hybrids (10 classes); judges, Messrs. W. Stevens and T. Ride.

CRESTED CANARY CLUB.

The voting for Committee resulted as follows:—Mr. F. W. Barnett, 44 votes; Mr. W. Glasscock, 42; Mr. T. Heath, 39; Mr. R. Rhodes, 37; Mr. J. Robson, 35; Mr. W. E. Greeves, 32; Dr. Galloway, 31; Mr. R. L. Crisp, 31; Mr. J. Tyson, 30; Mr. G. Crabb, 29; Mr. G. Colledge, 29; Rev. Joyce, 29; Mr. J. S. Clarke, 27; Mr. T. J. King, 27; Mr J. H. Scothern, 27; Mr. E. Godley, 22; Mr. H. Mills, 22; Mr. J. Dobson, 19; Mr. E. Jones (Jones and Crest), 19; Mr. R. B. Tope, 19; Mr. C. Roberts, 19; Mr. T. R. Ind, 21. Voting papers counted, 52; unsigned, six; arrived too late, two; voted for too many, one; total received, 61. The following is the result of the election of judges:—Messrs. T. Heath, 45; W. E. Greeves, 42; J. Robson, 42; F. W. Barnett, 40; R. Rhodes, 38; J. H. Scothern, 38; J. Tyson, 35; W. Glasscock, 34; Rev. G. W. Joyce, 31; T. J. King, 26; D. R. Thomas, 19; R. B. Tope, 19. Auditors, Messrs. Heath (30) and Clarke (29). Hon. Sec. and Treasurer, J. Tyson, practically unanimous.—Signed, T. HEATH. J. S. CLARKE.

Election of President.

The following is the result of the voting for President of this club, viz., Mr. R. L. Crisp, 11; Mr. G. Crabb, 3; Mr. T. Heath, 3 (one of these is unsigned); Mr. R. Rhodes, 2; and Mr. J. Robson, 1. Mr. Crisp is, therefore, the elected President for 1907.—JOHN TYSON.

CITY OF BRADFORD O.S.

A smoking concert was held at the headquarters of the above Society, Saturday evening, February 16th, to give one of our members, Mr W. Helliwell, a hearty send-off, as he is about to leave for Canada. During the evening a presentation was made to Mr. Helliwell by our worthy president, Mr. T. Fortnam; he also spoke of the good work he had done for the Society. Songs were rendered by Mr Walton, Mr. Clarkson, Mr. Roe, and Mr. Helliwell. Mr. Billington kindly brought his gramophone, and a very pleasant evening was spent. We all wished our departing friend good luck and success, and we hoped he would do as well for Toronto society as he had done for Bradford. F. RHODES (Assist. Sec.).

CINNAMON CANARY CLUB.

The Annual General Meeting was held Feb. 16th. Present: The President (Mr. W. A. Bladon), Messrs. A. Bentley J. Dobson, G. Dunford, R. Howarth, L. Roberts, J. H. Roe, J. Walsh, J. Wilson, J. Wones and R. J. Pretty. The minutes of the last meeting being read and passed applications for the Club Show were considered from Barrow, Accrington, and Manchester. After some discussion, Manchester was decided upon. Means were then discussed to produce a better entry at the various shows, and Mr. Wones suggested that four good prizes be given as points, specials for the most gained during the season, one for the most, one for the second, and so on for the fourth most points. Mr. Bentley moved that Mr. Wones's suggestion be adopted, Mr. Roberts seconding; it was carried. Mr. Dobson's resolution on the status of a novice was left over to see what the Cage Bird Union decided. The meeting closed with a vote of thanks to the President, and the same to the Hon Sec.

PENDLETON AND SALFORD O.S.

This Society held their Annual Washing Competition on the 14th. There was a very good attendance of members and friends. The birds were soon put through the washing process, and Mr. Skelton won the medal with a nicely-washed yellow Yorkshire. February 28th Mr. Turner will give a paper on "Canary Breeding." March 14th, our annual smoking concert will be held. Nest Feather Show, June 29th; Mr. S. Cook will judge. It was decided to send out circulars to all members, asking if they were in favour of an open show this year.—S. SKELTON.

BRIGHTON F. & F.A.

Second monthly show, Unicorn Hotel, Brighton, Feb. 16th; 21 classes realised 94 entries. A.V. CAN. OR MULE: 1, 2, Gravett; 3, Roast. BRIT. BIRD: 1, Bishop; 2, Goldsmith; 3, Gibb. Next monthly business meeting, February 18th, 7.30.—W. GREGORY.

WALLASEY AND DIS. C.B.S.

Annual Pair Show of Canaries in St. Mary's Schools, Liscard, on February 7th. Mr. W. Hales was the judge. This show being the final show of the season for the competition of the Wilkinson Challenge Cup. Mr. A. Coffey was again the winner, with 139 points; Mr. W. Young, the runner-up, with 109 points. YORK. YELL. COCK, BUFF HEN: 1, 2, vhc, A. Coffey; 3, W. C. Carswell; hc, C. Stewart; c, A. Alston. BUFF COCK, YELL. HEN; 1, 2, A. Coffey; 3, S. S. Holford; vhc, C. Stewart; hc, W. Young. CINN. MARKED: 1, 2, A. Coffey; 3, vhc, W. Young. GREENS, A.V.: 1, c, W. C. Carswell; 2, A. Coffey; 3, S. S. Holford; vhc, hc, C. Stewart. NOR. YELL. COCK, BUFF HEN: 1, A. Coffey; 2, W. Hodgkins. BUFF COCK, YELL HEN: 1, A. Coffey; 2, W. C. Carswell. BORDER FANCY, A.V.: 1, 2, W. Young; 3, T. G. Woodman.

GREAT HORTON O.S.

First monthly show of the season, February 9th. In the absence of Mr. A. Jowett, from illness, Mr. A. W. Hartley officiated as judge. OPEN CLASSES, CL. YELL. YORKS.: 1, W. Cruise; 2, S. Dean; 3, W. Blakey; 4, J. Waterworth. CL. BUFF YORKS.: 1, F. Self; 2, W. Blakey; 3, J. Waterworth; 4, A. Sykes. YELL. YORKS HEN: 1, W. Blakey; 2, F. Self; 3, A. Lister; 4, A. Sykes. BUFF YORKS HEN: 1, W. Blakey; 2, 3, S. Dean; 4, J. Waterworth. NOVICE CLASSES, CL. YELL. YORKS.: 1, 2, J. Kay; 3, R. Hainsworth; 4, F. Richardson. CL. BUFF YORKS.: 1, 4, F. Gelder; 2, W. Gudgeon; 3, M. Barraclough. YELL. YORKS HEN: 1, R. Hainsworth; 2, W. Oliver; 3, F. Richardson; 4, W. Gudgeon. BUFF YORKS HEN: 1, R. Kitchen; 2, F. Richardson; 3, W. Oliver; 4, W. Gudgeon. —S. DEAN, Sec.

(Many Reports crowded out.)

C.B.U. DELEGATES MEET.

Is Rule 17 to Stand?

All Affiliated Societies to Vote on the Point.

The First Annual Meeting of the delegates to the Cage Bird Union, appointed by the various districts, was held at the Crystal Palace, on Saturday, February 16th.

Before the meeting of the delegates, a meeting of the Executive Committee was held, at which Mr. Bladon, Chairman of the Union, presided.

The minutes of the last Council meeting, held at Nottingham, having been read and confirmed,

The HON. SEC. (Mr. Lythgoe) reported as to the suspension of a member of the No. 1 District for staining a bird. He said he had written to know if the exhibitor had been notified of his suspension, and the reply was that he had been personally notified. The offender had not appealed, so the suspension held good. He (the Secretary) asked that the suspension should be advertised in the usual way.

Mr. HADWIN (Liverpool) inquired of the Secretary if it was his opinion that he required the consent of the Council before he advertised the suspension, seeing there had been no appeal.

The SECRETARY replied that he did for his own safeguarding. The suspension would hold good as far as the District Committee was concerned, but he did not want to advertise that a man had been suspended without the sanction of the Executive Committee.

Mr. HADWIN moved that in future the Secretary be given power to advertise suspensions made by the District Committees or the Show Committees where there was no appeal.

THE CHAIRMAN: Do you intend that resolution to apply to all cases that may arise?

Mr. HADWIN: Yes.

Mr. COBB (Leeds) said that similar cases were so seldom that he thought it would be safe to have them confirmed in the usual manner.

Mr. HADWIN thought that the cases need not come before the Council. The rules empowered the Show Committees to deal with such matters and if the offender was satisfied, then the Committee itself should advertise the suspension. If he was not satisfied he could appeal to the District Committee, who could deal with it unless an appeal was made to the Executive Council, who would then deal with it. He believed the present case took place in November last, and it was only now brought up. If it was to have been of any good, it should have been dealt with there and then. He took it that the President and Secretary were, in the interim of Council meetings, their Committee, and he thought that if the President and Secretary consulted when such a case arose, they could decide to advertise if necessary. Personally, he considered such matters should be dealt with by the particular Committees concerned; they should not come before the Council unless there was an appeal.

Mr. RAMSDEN (L.P.O.S.) thought the Secretary should have the power to advertise suspensions, but he thought that before doing so he should be satisfied that the person should have had proper and legal notice of the suspension. Otherwise that person could take action against the Council and against Mr. Lythgoe personally.

The SECRETARY said that was why he wished the Council to authorise him to advertise. If he advertised on his own responsibility he would be getting into hot water.

Mr. HADWIN suggested that the Secretary might notify a man that his suspension had taken place, and ask him if he was going to appeal. He might give the man three or four days in which to reply, and then, if he did not do so, the Secretary could advertise.

Mr. RAMSDEN said that that would be all right if the letter was registered and a copy kept.

The Council agreed to the suggestion.

The SECRETARY reported that a letter had been received from Mr. Riseborough, of Sunderland, asking for the re-instatement of Mr. Whipp, of Oldham, who had been suspended for staining Lizards at Manchester. The writer explained that, in his opinion, Mr. Whipp was not dealt with in a proper manner, and he also asked that in future no member should be disqualified without a fair trial, and that the member should be allowed to be present when the matter was heard.

The SECRETARY said that the part of letter dealing with the attendance of a member at the hearing of his case had been dealt with at the Nottingham meeting, and the only question before them was that of re-instatement.

Mr. HADWIN said that as the suspension was only until the next Manchester meeting, that it had better stand. It would be no hardship.

Mr. RAMSDEN asked, if the offender was guilty, why should he be re-instated? He had not appealed, and he had said nothing. He proposed that the matter should stand as it was. The member had every opportunity of coming before the Council and submitting any statement, but he had never moved in the matter.

The motion was seconded and agreed to.

The SECRETARY next mentioned a recommendation from the Wales district that the Llanelly Club should be suspended for two years. The Secretary explained that it was alleged that the Llanelly Club held their show and that, in letters which were written, the Secretary intimated that it was to be held under Cage Bird Union rules, although they did not apply for a licence. Under that statement, several Union members exhibited, although they were not strictly entitled to do so. It was, therefore, recommended that the Llanelly Show should not be allowed a licence for two years. Mr. Lythgoe added that he had written to the secretary of the show, who denied that the show was to be held under the Union, and, as far as he (Mr. Lythgoe) could make out, that was true. It seemed to him that the Secretary of the show had not said that it was to be held under the Union, but that exhibitors had taken it for granted that it would be so. He thought the exhibitors were more to blame than the secretary. The delegate for Wales had drawn particular attention to the schedule which said on the back: "Yes, we belong to the C.B.U." When the secretary of the show was questioned as to that, he said he was not responsible for it, and that some one else must have done it.

Mr. HADWIN said he did not think they had sufficient evidence on which to convict the show in any way.

The CHAIRMAN: There does not seem to be anything definite.

Mr. HADWIN moved that no action be taken. —Mr. RAMSDEN, in seconding, said that if anybody did say what the secretary of the show was attributed to have said, it made no difference. A case had been fought and carried to the Court of Appeal, where it was laid down that a show was held under its advertised rules alone.

Mr. FREESTONE (Norwich) agreed, and the resolution was carried.

The SECRETARY said that, arising out of the matter just discussed, they wanted a little addition to the rules so that exhibitors should not take it for granted that a show was being held under the Union rules unless it was so advertised in the newspapers or the schedule. Perhaps the matter need not be mentioned in the rules, but it should be mentioned in the Press or in the schedule. He moved accordingly.—Mr. RAMSDEN thought that if the matter was mentioned in the Press it would do.

Mr. HADWIN suggested that an advertisement should be inserted in the Fancy papers just before the commencement of the show season—say at the end of September.—The Chairman and the other members of the Council agreed that that should be done.

The question of the holding out of special inducements to Specialist and Yorkshire Clubs to join the Union was next discussed. The SECRETARY read a letter from Mr. Wilson, of Leeds, on the subject, and he added that Specialist Clubs were holding aloof from the Union. At the meeting at Nottingham it was stated that those clubs were hard hit in joining the Union because they were almost all members of other clubs.

Mr. HADWIN thought it was "hard lines" that Specialist Clubs should not be considered in some way. It was practically impossible for local committees to deal with such clubs, and it was only the patronage they gave to shows that enabled special classes to be held. There was hardly a show, except Manchester and a few other big ones, which could give classification for "Greens" and the like, if it was not for the patronage of Specialist Clubs. It was the first duty of a Specialist Club to advance the class in which it specialised, and speaking for the "Green" Club he could say that they would have joined the Union last year if special terms had been given. That was, if they had been allowed to give their patronage to outside shows. He thought they ought to come to some working arrangement with the Yorkshire Union by which each Union would recognise the other's suspensions. All Specialist Clubs would join the C.B.U. if their own particular work was not interfered with. At present their rules prohibited them advancing their own classes. He moved that Specialist Clubs be not liable to suspension by showing at a purely patronage show, and only in those classes in which the Specialist Club was working. He was quite sure that the 'Green" Club would join this year if they were given this privilege.

The CHAIRMAN inquired if there would not be an element of danger in opening the classes to members who were not members of the Green Association

Mr. HADWIN replied that not twenty Greens in the whole of the patronage shows held last year were shown by members outside the Green C.A.

The CHAIRMAN remarked that at Nottingham it was said that a number of the Specialist Clubs did not belong to any other club.

Mr. HADWIN, replied that as far as the "Green" C.A. and the E. and W. Border Clubs were concerned, with a membership probably of 200, he did not think there were four who were not members of some local society.

No seconder was found for Mr. Hadwin's motion, and the matter dropped.

A long letter was received from a federation of clubs in Oldham, Ashton and other towns. —The SECRETARY said that as far as he could understand the matter, it was a federation of clubs who had a cup, which they competed for amongst themselves, and it was kept exclusively amongst the clubs in the federation. Three or four of the clubs were in the Union, and some were not. The latter were mostly very small clubs which did not care about taking out a licence. Strictly speaking, the affiliated clubs could not show at the unaffiliated shows where the cup was competed for, and he gathered they wanted special treatment in the matter. He thought the matter might be left over, and he would see the secretary of the federation, and hold a personal conversation with him, and see what they really wanted.

Mr. HADWIN thought that it was just a little fun amongst the clubs themselves, and he also thought that they might be told that they would not be interfered with.

The SECRETARY said he understood that the shows which were not affiliated did not have open classes.

Mr. HADWIN thereupon moved that the clubs should be allowed to have their little bit of fun amongst themselves.

The CHAIRMAN agreed. The matter was trivial, and seemed to be like a family affair. The idea of the affiliated clubs in writing was to place themselves in a proper position.

Mr. COBB seconded Mr. Hadwin's motion, and it was agreed to.

THE GENERAL MEETING.

Mr. BLADON presided at the general meeting of delegates which followed the meeting of the Executive Council.

The HON. SEC. (Mr. Lythgoe) read the annual report which was as follows:—

The Council beg to submit their first report of the Cage Bird Union. It will be remembered that the Union was inaugurated on April 21st, 1906, at a meeting called by the Manchester and M.C.O. Society, at which meeting a provisional committee was formed to continue the formation of the Union. Rules were drawn up and adopted at a meeting of the Provisional Committee, held at Manchester on June 16th, 1906. These rules were published in the Fancy papers, and copies, supplied gratis by the respective editors, were sent to all affiliated societies for their approval, as well as to a number of other societies that have since joined. A set of show rules also were drawn up, and published in the papers. Both these sets of rules were generally approved, very little comment being made against them. In accordance with the rules, the affiliated societies were divided into districts, the delegates forming the district committees. Voting took place for the election of the Executive Council, one member being elected for each district committee, and a president and secretary also were elected. The number of societies that have affiliated is 118; one has since withdrawn, and one other has not paid its subscription; and 57 more societies have been granted licences, making a total of 175 societies under the control of the Union. Two or three more societies have intimated their intention of joining at the commencement of the New Year. These societies have contributed £40 15s. 4d. in subscriptions; licence fees amount to £14 5s.; other receipts making a total of £56 3s. 11d. The expenses amount to £28 10s. 4d., leaving a balance of cash in hand of £27 13s. 7d. This does not include the show rules, which it has been arranged shall pay for themselves; 127,000 copies of these rules have been printed, at a cost of £12 6s. 2d., postage on same being £2 19s. 4d.; £12 11s. has been received for rules sold, leaving a balance on the debit side of £2 14s. 6d. Against this 19s. 4d. is still due for rules supplied, and there are 19,000 copies in hand, so that there will be a small profit on these rules. All shows held under the Union's rules have been advertised in the papers, and representatives of the Union have attended most of the shows and generally reported on same. Shows held under the Union's rules have been better supported, and it may be accepted as satisfactory proof of the approval of the Union that so many societies have affiliated, and others are willing to join. The Union may claim to have been a success; it has brought all the best societies into line, to hold their shows under one set of rules, and many awkward points have been settled by the district committees without reference to the Council. Two suspensions have, however, been made for faking, and no doubt the Union has acted as a deterrent to other dishonest exhibitors.

Mr. HADWIN thought the report was very satisfactory, and he moved its adoption.

Mr. BOYLE (York C.B.S.) seconded, and the resolution was carried.

The SECRETARY next presented the balance-sheet, which he explained was up to date. The year did not expire until February 20th. The items on the credit side of the general account were as follows:—To subscriptions, £40 15s. 4d.; one Associate, 2s. 6d.; Licence fees, £14 5s.; balance from rules, 18s.; bank interest, 3s. 1d.; total, £56 3s. 11d. On the debit side:—postages and stationery, £10 5s.; cheque book, 2s. 6d.; council and delegates' railway fares, £12 8s. 10d.; advertising shows, £4 13s.; fee for settling show rules, £1 1s.; balance and cash in hand, £27 13s. 7d.; total, £56 3s. 11d.

SHOW RULES ACCOUNT.

	£ s. d.		£ s. d.
Sale of Rules ..	12 11 0	Percy Bros. for Printing ..	12 6 2
Balance	2 14 6	Posting Rules ..	2 19 4
	15 5 6		15 5 6

The SECRETARY added that £24 19s. 1d. was the net sum in the bank after deducting the loss on the show rules.

It was agreed to publish the complete balance-sheet at the end of the year, and in the course of a discussion which followed, it was suggested that if a copy was sent to each delegate, it could be put up in the clubs which he represented. Another delegate thought it would be enough to publish the balance-sheet in the "Fancy" papers.

The CHAIRMAN said he was rather in favour of the first suggestion and in order to settle the matter, he would ask for a resolution that they should send the report and balance-sheet to the various delegates, and then they could put the copy up in the club-rooms.

Mr. DEWHURST (West London) proposed that every affiliated society should have a balance-sheet and report.

Mr. TURTON (Bury) seconded, and it was agreed to.

The CHAIRMAN, having called for the nomination of two gentlemen to act as auditors, Mr. HADWIN proposed the delegates representing Bury and the Norwich Plainhead Clubs. Mr. DEWHURST suggested that a public auditor should be appointed, but the chairman and other members thought the cost would be too great.

Mr. SPOWAGE (West London) expressed dissatisfaction with two representatives from the North being appointed, and thereupon Mr. HADWIN proposed Mr. Brown, of Newcastle and Mr. Hodgson, of Dulwich, but the latter gentleman declined to act.

On the suggestion of Mr. SPOWAGE, Mr. George Crabb (Southern Norwich), and Mr. Brown (Newcastle), were appointed.

The SECRETARY announced that nominations and voting cards had been sent to each delegate for the election of a president and a secretary. Mr. Carl and Mr. Robson had acted as scrutineers.

Mr. CARL announced the result of the voting to be as follows:—

FOR PRESIDENT.

Mr. Bladon	52
,, Crabb	7
The Rev. W. Rickaby	7
Mr. Tyson	8

FOR SECRETARY.

Mr. Lythgoe	63
,, Brown	6
,, Tyson	5

Mr. A. BROWN (Gateshead) said the secretary had done much hard work, and he thought they ought to remunerate him for his services. He thought that if the Union went on, and turned out in the way they expected, and as they supposed it would, some recognition of the Secretary's service ought to be made. He proposed that he be paid a yearly salary of five guineas.

Mr. HADWIN said he was glad Mr. Brown had moved in the matter, for it had been his intention to have done so. He did not think they should ask any Secretary to work for nothing for them. The sum mentioned was not anything like the payment for the work Mr. Lythgoe had done, but it was some slight acknowledgment that they did appreciate his services. He seconded the granting of an honorarium. It was not at all paying, but merely a recognition and for out-of-pocket expenses.

The motion was agreed to.

Mr. LYTHGOE, in reply, said he must say that the work had been very hard; harder than he had anticipated. Really, the Union Secretaryship had been put on to him from his having been Secretary of the Manchester Society, which brought up the subject, and they naturally appointed him Secretary of the Union. He, however, would be very pleased to continue in the post, but he would like to say that the work was very hard, and if there was going to be any humbug, and fighting and calling names, he should retire. Life was too short to put up with all those little worries. He wanted fair criticism, and so did the Council and the Delegates, but if there was any backbiting he should retire immediately.

Mr. HADWIN: You refer to outsiders I presume; I take it you have had nothing but courtesy from the Delegates?

The SECRETARY: That is so.

Mr. E. PRETTY (London and Counties) asked if the five guineas was intended as a donation. He would suggest that the Secretary should have 25 per cent. of the yearly subscriptions.

Mr. BROWN said his resolution was that the Secretary should receive the sum yearly, and the meeting concurred.

The CHAIRMAN having called for suggestions from the delegates, the question of the definition of a novice was introduced, a resolution upon the subject being upon the agenda.

Mr. CURTIS (City and Suburban), thought that the question should first have been discussed by various clubs. It was not right to spring it upon members. It was a wide question, and would influence thousands of fanciers, and he thought they ought to have an opportunity of placing the matter before the various Societies.

Mr. BRADSHAW (Sheffield and District), said that as far as his Society was concerned, they accounted every person a novice who had not won two prizes in members' shows, or one first in open shows. They did not include British birds, but they included Mules and Canaries.

MICE

IN THE BIRD ROOM.

Rats, Mice, Field Mice, &c.,

EXTERMINATED BY DANYSZ VIRUS

Discovered and Prepared by
Dr. DANYSZ of the Pasteur Institute, Paris.

When affected with the Virus the Vermin leave their usual haunts and die in the open. The remedy is harmless to other animals and human beings and may be used everywhere with absolute safety.

For MICE only, 1/- per tube.

Mr. HADWIN said the question was to define a novice for open shows, not for local societies. What was to govern the status of a novice in open competition? The meaning of a novice at a members' show was governed by their own local conditions, and nearly all societies had a rule that a novice should be one who had not won a first prize in open competition or at a members' own show. That naturally governed them in their own show. He would suggest that a novice should be one who had never won a first prize at an open show. He thought that quite clearly defined a novice; or they could make it either a first or second, and they could make an amateur one who had never won two firsts.

Mr. CURTIS thought that any rule they might make should govern the whole of the affiliated societies, whether at members' shows or not. They would never make any headway with the novice question until they made it universal. The same rule which governed members' shows should govern open shows.

Mr. BRADSHAW (Sheffield) said he would make the proposition that a novice should be a novice until he had bred a first prize winner (Laughter.)

Mr. RAMSDEN: Will you want an affidavit with it? (Laughter.)

The CHAIRMAN: Do I understand that you let your people be novices as long as they showed in the novice classes only?

Mr. BRADSHAW replied that they could win first in the novice section for two years. They would then go to the amateur section and pass from there to the champion section. A novice might breed one good bird and might enter it at a show not knowing its value and wishing to win a prize. It might be catalogued at 30s., and somebody might claim it at the price. That bird might be the only good one the novice possessed. They wanted to give sufficient time for a man to be able to judge a bird. They must not try to draw hard and fast lines or they would cripple the Fancy.

Mr. CURTIS expressed the opinion that the question should not interfere with the members' shows. They should be left to do their own business in the way they liked. It should only affect open shows. If a member showed in open shows and won a first prize, then he should cease to be a novice, or want to be one (Hear, hear).

Mr. RAMSDEN: Take the case of a big show where a number of specialist clubs give their patronage, their definitions of a novice being various. What was to become of it? He maintained with Mr. Curtis, that the definition should apply to the whole Fancy. In the catalogue that day at the Crystal Palace show they had about five definitions of a novice (Hear, hear). He had had considerable trouble in the past over the latter, and he maintained that one definition should govern the whole Fancy.

Mr. BRADSHAW asked what was a novice under the Cage Bird Union? The rules said that in case of dispute the Union definition should come first. He had made a proposition that had been ridiculed, but he still maintained that if a man showed a bird in the novice class, he should have bred that bird and not bought it.

Mr. HADWIN moved that a novice should be one who had never won a first or second in open classes, or three firsts in novice classes.

Mr. BROWN seconded.

Mr. DEWHURST: Do you mean open shows?

Mr. HADWIN: Certainly; we cannot deal with members' shows.

Mr. WILKINSON (Crewe) moved an amendment that a novice in a local show should remain a novice after he has won a first prize in open competition. Mr. SPOWAGE seconded.

Mr. FREESTONE (Norwich) said that in his part of the country they termed a novice one who had not won a prize at any show.

Mr. RAMSDEN thought a man might have a little better run than that. He thought Mr. Hadwin's motion was the better of the two. Mr. CURTIS thought that the question should apply to birds that members had bred themselves, and not to wild birds at all.

Mr. SARGENT (Northampton) thought the question ought to be left open to be well discussed in all the societies.

Mr. RAMSDEN thereupon proposed that the Secretary should take the definitions of a novice of two or three of the best known societies in the kingdom, and send them to the affiliated societies, and ask them to vote upon them. Then take the definitions the societies selected.

Mr. CURTIS, who seconded, thought it was an easy way out of the difficulty.

Mr. HADWIN did not see why they should keep on postponing this question. It was not a new thing, but had been discussed time after time, and he thought it should be settled once for all that day. It was no new point they were raising, and it was simply shelving the question. Let them settle it now.

Mr. SARGENT said it was the first time the matter had been discussed by the Cage Bird Union, because it was their first meeting. The thought the matter should be talked over and put on the agenda for the next meeting.

Mr. ROSLYN (Mansfield) entirely agreed with Mr. Ramsden's motion.

The CHAIRMAN ruled that Mr. Ramsden's motion was the only one which had been properly seconded, and it was agreed to by the meeting.

THAT "HATED" RULE 17.

The next motion on the agenda was to alter Rule 17, so that affiliated or licensed societies should not accept entries from exhibitors not members of the Union.

Mr. HADWIN asked for a ruling on the matter. Would not the amendment carry them back to the original Rule 10?

The SECRETARY said the suggestion had been made by four or five societies, including Leeds, Pendleton, and Salford.

Mr. SPOWAGE: If we get 100 entries from people not members of the C.B.A., are we not to accept them?

The SECRETARY: Apparently not (Laughter).

Mr. RAMSDEN: Laugh it out of the room, Mr. Chairman.

Mr. BROWN: Supposing a society joins the Union under protest against Rule 17, does the C.B.U. hold that society to the strict letter of the law?

The CHAIRMAN: I suppose that is the proposition?

The SECRETARY: If they join, they join.

Mr. BROWN: But if they join protesting against Rule 17, do you take notice of the protest? The SECRETARY: I don't think we should.

Mr. BRADSHAW (Sheffield) said he had been sent to the meeting to move that the werds after "Judges" in Rule 17 should be deleted, and he moved accordingly. In doing so he did not think it right that many members who had birds should be compelled to send to one set of shows because they happened to belong to the Union. He also did not think it right that non-unionists could come into their shows and take prizes and prize money, and they could not go into theirs and take their prizes and prize money. If his society had received the present rules a fortnight sooner than they did, they would never have been members of the C.B.U. They read them hurriedly, and a few enthusiastic people got them to join. The rule at present was a great stumbling block (Hear, hear).

The SECRETARY said he was taking the rule up because he was on the first committee to draw it up. The proposed amendment was to do away with inconsistencies. They had practically all the societies in the kingdom in the Union, and they would be no hardships at all if they passed the rule that affiliated societies should not accept entries for non-union exhibitors and vice versa.

Mr. DEWHURST inquired how many societies there were outside the Union. If rule 17 stood, they would not get half the societies. He asked that each affiliated society should have a voto on the Rule to see if it agreed with it or not. Three parts of the members in each affiliated society were against Rule 17.

Mr. RAMSDEN: We have 140 exhibitors showing here to-day, most of them residing within a short distance of the Palace, and mostly people who only keep one bird. Unless those people become associates or members of the C.B.U. were their entries not to be accepted?

The SECRETARY: That is so.

Mr. RAMSDEN: I say this, that it is impossible to run a National show unless you get the Crystal Palace to agree with you, for the conditions under which a National show is to be held, is that it is open to all; and as long as I have anything to do with it will be open to all (Hear, hear).

Mr. HADWIN seconded that the words after "Judges" should be deleted. The same thing applied largely to every other show that was held in a large town. They might strike out all Rule 17. The Secretary said it would not do to strike out the whole rule, because the first section of it said that affiliated societies should not accept entries from suspended individuals.

Mr. HADWIN: I mean after those words.

Mr. DEWHURST: It will be the only salvation for the Union in the London district.

Mr. ROSLYN said that in his district a large number were in favour of the rule.

Mr. BROWN said, that speaking for two of the oldest and largest societies in the North of England he did not think there was one member who was in favour of Rule 17. He agreed with Mr. Dewhurst's proposal, that each affiliated society should vote on the subject.

Mr. SPOWAGE then seconded Mr. Dewhurst's proposition.

Mr. BRADSHAW said, that if they followed the suggestions they need not have meetings of delegates, but simply send them voting papers. Before he came away he had got to know what the members wanted him to do, and if other delegates had not done the very same thing, it was their own fault. He had come to vote on the particular question before them, and he had come pledged on behalf of the Sheffield and District Cage Bird Society.

The CHAIRMAN: Your proposition is to leave out all the words after "Judges"?

Mr. BRADSHAW: Yes, Sir.

Mr. RAMSDEN emphatically protested against it. They were not eligible to do what they were doing. Every delegate should have had proper notice of the matter, and he did not think they were in order.

On voting being taken, Mr. Bradshaw's motion was carried, and it was further agreed to submit the altered Rule 17 to the various affiliated clubs for their opinion upon it.

This concluded the meeting.

BRADFORD (EAST) O.S.

An interesting Washing Exhibition was given by Mr. W. Cruise, Vice-President, at the headquarters of the above Society, on Feb. 5, 1907. There was a good muster of members and their friends, and the process of tubbing the birds was watched with keen interest throughout. Four birds were put through by Mr. Cruise in the short time of twenty minutes, and he explained several of the different methods of washing, "so varied that we never hardly see two alike," in a very clear and instructive manner. Three different dishes of water were used for the process; in the first he made a good lather and the other two were for rinsing purposes. Having put a pinch of borax into all three waters he proceeded to wash the bird, using a good sized badger hair brush for the first water and sponges for the other two. After putting it through all three waters, he took a nice soft cloth and partly dried the bird in his hand, afterwards rolling it into another cloth and laying it before the fire to dry for about ten minutes. The birds came out looking first-class and none the worse for the process, the speedy and efficient manner in which they were put through their facings winning admiration from all the company present. Mr. C. Cowgill afterwards put three birds through in somewhat the same manner, varying this method by wiping the lather off the bird before putting it through the second water; he also used three brushes instead of the sponges, and believes that less accidents are likely to happen by putting the birds straight into the drying cage, than by rolling in cloths and laying before the fire. A hearty vote of thanks was afterwards proposed by Mr. Greenwood and seconded by Mr. White to the two gentlemen who had provided the evening's enjoyment, and was carried with enthusiasm. After making two new members the meeting was brought to a close, everyone having thoroughly enjoyed themselves.—H. HILL, Hon. Secretary.

HAVE YOU SEEN OUR Picture Post Cards of Canaries?

PAISLEY & DIS. O.A.

General meeting, held at Mrs. Adam Kelly's, St. James Street, Feb. 1st, Mr. Wm. Urquhart presiding. The chief item was the report from Secretary anent subscription from members to clear off deficit of late show. This was very satisfactory, and it was agreed that next year's show should be held October 5th. The office-bearers and committee were elected. A proposal was submitted to the meeting to introduce Norwich and Border Fancy into the show. After discussion, it was allowed to stand over for further consideration. Next meeting April 5th.—JOHN KELLY, Sec.

MANNINGHAM C.B.A.

The members held their annual supper at headquarters, the Mowbray Arms Hotel, on February 16th, when an excellent repast was served. A large company of members, their wives and friends assembled. The after-proceedings took the form of a smoking concert. The chair was taken by the President (Mr. G. Wellock), whilst Mr. G. Kay proved himself an able musical director. A splendid programme was rendered, each contributor being heartily applauded. Among the singers were Messrs. G. Wellock, G. Kay, F. Western, J. W. Dennison and M. Robinson. A cornet solo, by Mr Wood, was much appreciated. During an interval in the never dull proceedings, the Chairman presentd Mr. A. Grange with the silver cup and gold medal for most points throughout the members' shows, 1906-7; Mr. G. Wellock, silver medal, for second most points; and Mr. W. Normington, silver medal, for third most points. The usual vote of thanks to the artistes and host and hostess brought a most pleasant and social evening to a close.—E. KEMP (Secretary).

YORKSHIRE UNION O.S.

The final meeting of the Yorkshire Union delegates was held on Saturday, February 16th, 5 p.m., at the Oddfellows' Hall, Thornton Road, Bradford. There was a good attendance of delegates, although there was the great counter attraction at the Crystal Palace. Mr. M. Broadley, president, in the chair.

Business:

1. The minutes of previous meeting passed as a correct record.

2. That Mr. J. Butler (Pudsley and Stamingly) be appointed auditor vice Mr. Watmough, absent at the Palace.

3. That the four societies not having replied re New Rules and Regulations, be asked to do so on or before Tuesday, February 26th, or they will be void.

4. That the action of Sub-Committee in awarding contract for novice gold medals to Mr. A. Uttley as per previous resolution was approved.

5. The balance sheet having been read by treasuror was approved and adopted.

6. It was unanimously voted that the balance, together with other small donations, be presented to Mr. J. Thackray, a famous old fancier, who is unfortunately in reduced circumstances.

(Signed) F. ARMSTRONG, Secretary.

NEWCASTLE C.B.S.

A meeting was held 65, Grainger Street 7th inst.; Mr. J. Shepherd presided. Seven new members were elected. It was decided to hold our annual show on the 18th and 19th October, 1907. Mr. Shepherd gave a few practical hints on cage-making. He had the necessary tools with him, viz., shooting board, cutting gauge, smoothing plane, tenon saw, which, he said, were practically all the tools that an amateur cage-maker required. It seemed to afford Mr. Shepherd a great deal of pleasure to see all present so deeply interested watching him in his work. I am sure he would simplify to a good many present, myself included, what had on many occasions been found difficult. He also described the various kinds of wood that could be used for cage-making; he himself preferred yellow pine, as it was a very clean wood to work, although now that canary wood was easy to procure ready dressed and of any width, it was perhaps, better adapted for the amateur's purpose. Mr. Shepherd preferred the three-ply wood for the backs, it does not twist like canary wood, and it can be got any size and is also very cheap. Mr. Shepherd said that well-made cages have a great tendency to keep down the red mite pest. A hearty vote of thanks was accorded to Mr. Shepherd for the able way in which he had imparted such useful information.

J. G. HUTCHINSON, Sec.

[The above notice was overlooked last week.—Ed. "C.B."]

A Few Reminiscences of the Crystal Palace Show.

By T. Heath,

One of our most experienced Fanciers and the Pioneer of London Societies.

In response to your wish to let you have a few of my reminiscences of the Crystal Palace Cage Bird Show, I must only give you a few or I should occupy far too much of your space. On my return home from the Palace after seeing you, I thought I would look up a few of my birdie papers to refresh my memory, and to my utter astonishment I find in newspaper cuttings they commence in 1874, or 33 years ago, and some of these are very interesting indeed; but for age and interest in Cage Birds in the early days I have a book published in 1718, and they had many varieties of Canaries even in those days; but all this has nothing to do with the Palace.

Well, the first that I can recollect at the Palace was some 40 years ago, when it was held in the Sub-tropical Department, at the north end of the nave, and a most perfect place it was for a bird show, filled as it was with palms and sub-tropical plants, it made a very pretty show indeed. I had almost forgotten to mention the Parrots and Cockatoos they had standing about chained to stands, and several aviaries full of Canaries and Foreign Finches. The drawback was that the temperature was rather high. At this time my visit to the show was always on Sundays, shareholders only being admitted on that day, so we used to have very few people in the show. I also very well recollect that Victoria Station in those days used to be on the Surrey side of the water, where the Battersea goods station of the L.B. and S.C. Railway now is. There has been a very great improvement in all items as regards show matters, and the birds in them since those days. Then the majority of classes only had two prizes, viz., first prize, £1; second prize, 10s.; Norwich Plainheads had four classes, Crested Norwich three classes, Belgians five classes, London Fancy two classes, Lizards two classes, Cinnamons two classes, Mules four classes, British Birds twelve classes, Birds of Passage and Migratory Birds eight classes, Foreign Birds thirty-two classes. The last three lots, viz., the British, Migratory, and Foreign Birds only had one prize of 10s. in each class then.

The Plainhead Norwich classes, especially in the clears, were very strong, over 50 in a class and competition very keen; also in the two classes for Clear Yellow and Buff Belgians they had 38 entries, and 51 entries in the two classes for Jonque and Buff Cinnamons. As you will notice there is not a single class provided for Yorkshires, but there were two or three in the show in the Any Other Variety Class and Selling Class; neither do we see any mention made of the Border Fancy, Scotch Fancy, or Lancashire, but I rather fancy some of these latter birds were shown in the Any Other Variety Class and called Crested Yorkshires. The birds in those days had to arrive at the Palace on the Thursday. All day Friday was taken up with the judging, and the show opened on Saturday morning at 12 o'clock, when there used to be fine sprint races to the sales office to buy birds from the catalogue unseen. The first day (Saturday) admittance to the Palace was 2s. 6d.. The show was continued up to the Friday afternoon following; even if all the birds were picked up and handed to the railway company by the Saturday some of them would not be in their owners' hands before the Sunday. I wonder what exhibitors would say now to their birds being away for 10 or 11 days for one show. The repacking in those days used to take a great deal longer, as travelling cases were practically unknown, the cages arriving either stitched up in canvas wraps, or tied up in brown paper, an endless job to repack in a large show. The entries in those days numbered about 800.

The show was held in the Sub-tropical Department for a good many years after 1867; certainly until after this portion was destroyed by fire. The show was then—as a rule—held in the nave at the north end, under a tent, with the roof of same rather too low down, which made the light for judging very indifferent, and the Palace Company had numerous complaints, but without much effect. The judging was also far from satisfactory and badly managed. They usually had four or five judges, and instead of giving them the varieties they had made a special study of, the judges would take the classes in rotation—for instance, suppose the judges to be A, B, C, and D, A would take Class 1, B Class 2, C Class 3, D Class 4, and then A Class 5, and the exhibitors did not know either before the show or afterwards which of the four judges judged their section or class.

I think I have said enough about the early shows. We will now drop back and try and recall a few exciting incidents in later years. First, in the latter part of the '70's, when Mr. Bemrose brought out—what at that time was considered stained birds—those K.N.-fed Norwich, and after having a protest lodged against them at the Norwich Show of that season, they simply walked through all the shows and swept the decks, and many, many fanciers would not even then believe it possible that the birds were genuine, after the secret was known by a good many, and the following season there were a large number of K.N.-fed Canaries on the show bench.

The next exciting incident occurred at the show of 1885 or 1886. It arose over some of the Yorkshire Classes, and the judging. The argument, or dispute was between the late Mr. W. A. Blakston and Mr. Wilman, at that time the leading exhibitor in Yorkshires—showing as Messrs. Wilman and Dawson. The argument was as to what a Yorkshire should be. W. A. B. was an ardent admirer of this variety, and, in fact, was the leading light in bringing those birds into prominence, and saying what they should be judged for. He was a splendid fellow to argue, and a most charming writer, and was a very great loss to the Fancy. He rated poor Wilman terribly, but the dispute—which commenced in the centre of the show—waxed so hot and exciting, and gathered such a crowd round us, that they had to call in the police and remove us out of the show into the nave of the Palace, where it continued for some time, when the police finally broke the crowd up and dispersed us.

The other exciting incident, which took place about 16 or 17 years ago, and which many fanciers will recollect, was the Crest Conference held in the Concert Hall at the south end of the Palace. The late Dr. Bradburn was the chairman. The meeting was called by certain fanciers with the notion of forming Crests into two sections or type, one to be called the Norwich Crest and the other the Crested Lancashire. It was without exception the most stormy meeting I have attended, birdie or otherwise, and I have attended a few. A certain leading fancier in those days had brought a very strong contingent up from his part of the country to back him in his propositions to have two varieties for Crests. This was the largest meeting of fanciers that I ever saw brought together at one time, and I am quite sure I am not overstepping the mark when I say there were quite 300 there, if not more. But the fanciers would have none of it. The chairman was anything but neutral in the matter, and strongly favoured the two type section; but it did not matter, the other side would be heard, and the climax was arrived at when Winskill jumped right up on the table and said he would be heard, chairman or no chairman. Poor old Bradburn! He did have a lively time of it. He had a big stick with him. This he used as a hammer, and thumped the table for all he was worth, and the more he thumped the more Winskill and his partisans and opponents yelled at one another. Finally the meeting became lost in a regular uproar, some of them nearly coming to blows; but wiser cousels prevailed and no damage was done, and no result or conclusion arrived at. I said no damage was done. In this I am wrong, for poor old Bradburn, in his excitement and endeavours to keep order, had thumped the table so hard with his big mallet that he injured the surface, and was mulcted into paying for the damage to the tune of 10s. 6d. From this day we have not heard any more about the small type and large type of body for the Crested. With this I will close my few reminiscences.

CITY OF BIRMINGHAM C.B.S.

General meeting February 6th. Balance-sheet presented for 1906 showed a cash balance of £11 7s. 5d., an increase of £2 12s. 6d. Lectures, etc., have been arranged as follows:—March meeting: Members' pair show, special prizes for each variety. April meeting: Lecture by Mr. Paddock on the breeding and exhibition of Yorkshires. May meeting: Leeture by Mr. J. A. Eekersley on the breeding and exhibition of Norwich. June meeting: Lecture by Mr. Jones, of Dudley; subject, "British Birds, Mules and Hybrids." July meeting: Lecture by Mr. G. E. Russell on "Crest and Crestbred Canaries." The above meetings will be held at the club-room, Crown Hotel, Station Street, first Wednesday in each month, at 8 p.m. Fanciers and friends cordially invited. Officers elected for 1907:—President, Mr. J. Griggs; vice-Presidents, Messrs. Bexson, Butler, Russell, Sharp and Webb; Chairman, Mr. Broadhurst; vice-Chairman, Mr. Dawes; Treasurer, Mr. Harvey; Auditors, Messrs. Eekersley and J. H. De Maillet; Committee, Messrs. Wells, Cowley, Burke, Smith, Richardson, Shaw, Silvers and Clements; Secretary, H. C. Wilkins, 7, St. Martin's Lane.

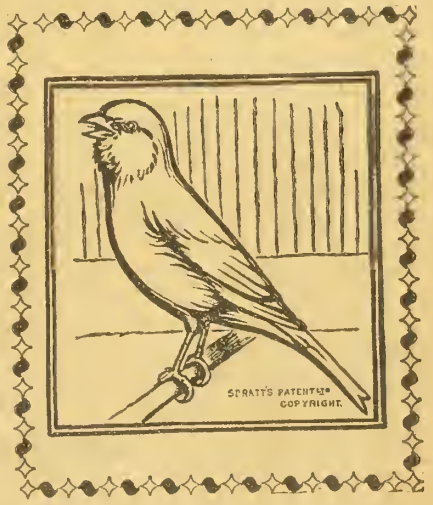
Use SPRATT'S

Cod Liver Oil Cage Bird Food.

Sold in 3d. and 6d. Tins; also in 2/6 Bags.



SPRATT'S MEDICINES FOR CAGE BIRDS, &c.

"Canaradyne," for Asthma and Wheezing, per bottle 6d., 1/- and 2/6; post paid 7d., 1/1 and 2/8.
Red Mite Killer, per bottle 6d., 1/- and 2/6; post paid 8d., 1/3 and 3/-.
"Quinella" (Registered), for Inflammation of Stomach, per box 3d. 6d., and 1/-; post paid 4d., 7d. and 1/1.
Chemical Food, per bottle 6d., 1/- and 2/-; post paid 9d., 1/4 and 2/5.
Parrot Tonic, per bottle 6d.; post paid 7½d.
"Pennakura" (for destroying external parasites and preventing feather eating, in Cage Birds), per bottle 3d.; post paid 4d.

SOLD EVERYWHERE. YOUR TRADESMAN WILL SUPPLY YOU.

Send postcard for Samples of Cage Bird Foods, also post free Booklet on the Rearing of Canaries and other Cage Birds.

SPRATT'S PATENT, Ltd., 24 & 25, FENCHURCH ST., LONDON, E.C.

SOME REMINISCENCES.

SIR,—I have a distinct recollection of my first pet bird, although I was only then about six or seven years old. It was only a common Sparrow, which I had caught in the garden. I took it to my father and asked to be allowed to keep it; he simply laughed, and said it was not worth its keep. However, I had my way, and it turned out to be a very great pet, not only with me, but also all the members of my family, and all the school children—my father then being a village schoolmaster. It was exceedingly tame, and had its liberty very frequently in the day time, but I had only to call out "Jim," and it would come at once and settle either on my head or shoulder, when, of course, it was rewarded with a tit-bit. It lived for some time, and died one bitter cold Xmas Eve, for I remember the first thing I heard when I came down on Xmas morning was Jim was dead, and I fancied I detected a tear in my father's eye as he told me the sad news. He was, indeed, a great pet, and I was very sorry to lose him.

The next pet I have a vivid recollection of was a Starling, as cunning and clever a fellow as I have ever seen. His powers of mimicry were remarkable; he would chatter away, ring the bells, whistle "Cheer, boys, cheer," and was well known in the village for his cleverness. An amusing incident occurred one day when Bobby was hung out on the front of the house. A pedlar had come down the garden walk, with a view, of course, of offering his goods for sale; just, however, as he was passing Bobby (who was going through his morning's performance) he was simply amazed as the bird rattled on "Pretty Bobby, pretty dear, kiss, kiss." "Well, you are a pretty dear, and no mistake," said the pedlar. "Is this bird for sale?" he asked. "I'm not a rich man, but I don't mind giving a good price for him; I never heard its equal." Still the bird rattled away, whistling and talking, and the poor old man quite forgot to ask my mother if she required any of his goods. I need scarcely say the pedlar's offer to purchase was politely refused. It was the custom then, as indeed it is to-day in many country places, to feed soft-billed birds on crushed hemp seed and bread. This was Bobby's chief food, supplemented, however, with tit-bits from the table; and he lived to a good old age, being sadly missed when he was gone.

I remember about this time trying my hand at raising a young Cuckoo and a nest of Kingfishers, both of which, however, turned out failures. I next came into possession of a young hand-reared Bullfinch, which I taught to pipe "Not for Joe." He was of a very sociable and affectionate disposition, as indeed I have found most Bullfinches are, and as a "ladies' pet" I do not know any bird to equal them in this respect; in fact, they have been known to pine away and die when their owners have been from home some time—say, for their holidays—so great is their attachment to them.

I once possessed a very fine Nightingale, which I bought in London (they tell me that the best of everything goes to the big city). It was a very handsome bird, and won me several prizes, but its premier merit was its magnificent song. About ten o'clock every morning, and occasionally in the afternoon, it would pour forth its delightful melody, when numbers of ladies and gentlemen who had never heard a 'Gale before would come and listen with amazement and delight at its wonderful powers of vocalisation. I have listened to many in their native haunts, but never heard one to beat mine. About this time I put up a large aviary in my kitchen; in this aviary I put among other birds a very fine cock Blackbird, which had also won me several prizes. Having at this time a nest of young Starlings, which I was bringing up by hand, these I also put into the aviary, when to my very great surprise the Blackbird, after eyeing them very carefully, commenced to feed them, and it was simply side-splitting to see those Starlings chasing him all round the aviary with their mouths wide open, when occasionally he would jump right over them in order to get out of their way. However, he made a splendid foster parent, and continued to feed them until able to do for themselves.—J. C. WILMOT.

Nests of Birds, Poultry, etc., should be regularly sprinkled with KEATING'S POWDER, especially when hens are sitting. Don't forget to do this just previous to the eggs hatching, to destroy the Red Mite. It kills all insects, harmless to everything else. Sold in tins, 3d., 6d., and 1s each.

CAGE BIRD SOCIETY FOR LEYTON.

SIR,—A meeting was held at No. 8, Grange Park Road, Leyton, on February 15th, to form an Association for the district. It was decided to call it, "The Leyton and District Cage Bird Association." A radius of ten miles was fixed, Leyton being the centre. Entry fee 1s., and 2s. 6d. subscription. Rules were passed, and officers elected as follows:—Chairman, F. Williamson; vice-chairman, S. B. Leclair; treasurer, H. Ovenden; auditors, T. Hamilton, F. T. Smith; hon. assistant secretary, H. Burbidge; committee, C. H. Cooper, A. J. Marley, C. R. Carr, J. A. Bartlett, T. A. Griffen, A. Morris, E. Morris, F. R. Handscombe. All fanciers desirous of joining the above association, please communicate with B. F. FORSE, hon. sec., 31, Thornhill Road, Leyton.

BORDERS v. COLOUR.

SIR,—As an admirer of the Border for a long time back now, I have been grievously disappointed this last show season or two in noticing from reports in your excellent paper, the very poor support, as regards entries, this section as a rule now gets. This is not confined to this district (Cumberland) alone, but is apparently spread all over wherever Borders are scheduled. I remember the time well when the classes could command large entries. This was the rule, not the exception, as now. Whether it would help the Border to again open out the question of colour feeding, is open to doubt. Personally, I don't think so. I think the committees of some shows are partly to blame in the matter in selecting judges. You cannot expect to get an entry in Borders, or any other section either, unless you have a very strong local following of exhibitors, where your judge has officiated at three or five shows previous to yours. A few of the winners may be there; the others, knowing it is no use, stay away. A little more variety is wanted in the judge, for one thing. There are plenty of good local men everywhere. Give them a chance. Like some of the medicines recommended, if it did no good it most certainly would not make them worse.—JOS. B. MOORE, Whitehaven.

CAGE MAKING: THE ART OF SOLDERING.

SIR,—As I make all my own cages I am always interested in reading anything appertaining thereto, and I read the "Remarks delivered before the Oldham F.A.," on "Cage Making and Painting," with my usual lookout for wrinkles, many of which I have gained through the perusal of your paper. Now I should like to call attention to soldering. Allow me to say that soldering was for years my bete noir. I read, and read, "Get some spirits of salts," which I did, time after time, but always with the same result. Bear in mind I put the spirits of salts on with a brush in the same state as I procured it, and the time, temper, and material I lost was enormous. I was continually putting away my soldering-tools in utter disgust, only to start again with similar results. When anyone says, "Get some spirits of salts," and does not go into particulars, it gives me the "hump" when I think of my experience. If anyone will follow these particulars, then soldering will be a pleasure to them, and they will be able to make fronts and doors as firm as if made of cast iron. To use the old, familiar words, "Get some spirits of salts," put in an open-mouthed bottle, and drop into it sufficient small strips of zinc until it stops effervescing; let it stand overnight, then add a little water, and let it stand again; then add some sal ammoniac (this is a powder), and let it stand again overnight, when it is ready for use. Get about a pennyworth of the spirits, and a pennyworth of sal ammoniac, and add as much water as you now have of the mixture. Keep the cork off the bottle while mixing, and your mouth away from the fumes arising when you put in the zinc; keep the bottle afterwards well corked and out of harm's way, as, of course, it is a poison. When using, heat your soldering-iron, which must be already tinned. (I can tell you how to do that, but I am afraid my remarks are already too long). Hold the tool upright slanting (a bit Irish, but expressive), and press your thin stick of solder near the bottom of the iron, which, we will say, is resting on the wires, and near the punched bar; as soon as the solder commences to run draw your iron backwards and forwards, and your joints are made. I am getting on too fast; you must first get a bit of stick, and wherever you wish to make a joint you must wet it with some of the diluted spirits of salts.—THOS. SOAR.

SCOTCH FANCY MATTERS.

SIR,—I have been looking over all the Fanciers' papers for a long time; could any of your readers kindly inform me what has come over three of our Scotch Fancy leading lights, namely, "Anxious to Learn," "Constant Reader," and "The Irishman"? I hope they are not stuck in moult.—ANXIOUS TO KNOW.

EARLY MULES.

SIR,—Having read Mr. Gillivray's letter re "Early Mules," I thought it might interest your readers to know that I paired a Linnet and Norwich hen the end of September, and she reared two after having hatched all the four eggs. She nested again and brought out four young, but being from home at Christmas they all died from inattention (sorry to say). She has again nested, and hatched all four eggs on January 27th. One of the young ones died after it was a week old; the other three are doing well, being now three weeks old. I give this information in reply to the question asked by the writer in the letter referred to.—J. A. GIBSON.

BEAUTY, CONDITION, RARITY, WHICH?

SIR,—Referring to the above question, put by a correspondent in your last week's issue, having visited many shows for some years, I consider the judging of British birds, etc., is far from satisfactory. We have standards laid down which I am sorry to say are not followed by the greater portion of our present-day judges. Colour feeding has now reached such a high standard that in many cases other good qualities are often overlooked, and a bird of good type and condition, but with not quite so much colour, has to take a back seat, although perhaps the best specimen in the class if he had been compelled to eat more colour feed. The tasteless colour feed I consider is good in a limited quantity, but the hot feed is a liver burner, and it is absolutely cruel to compel them to eat it. Observe the short reign of many noted birds. The extent to which they have been fed on hot feed without doubt, in most cases has shortened their days. I shall be pleased to hear what others have to say on this most important point.—CHAS. WARD.

THE FANCY IN AUCKLAND, NEW ZEALAND.

SIR,—CAGE BIRDS is getting popular here. Our breeding season is well in, but it has not been a very good one for most of the fanciers, one man, who has 13 pairs up, has had about 40 clear eggs and only reared about seven young. Some average about one per pair, a few are doing splendidly. One young fancier last season averaged 3½ for every nest, and lost nearly all a few months later. This year he started well, with about eight pairs up. then, I think it must have been the fever in his room, 18 young ones and about 12 old ones died. That is very discouraging, but, he says, "I'll try again," and has already ordered some stock for next season. I had intended sending you a short account of our shows here, but thought perhaps someone else would. We had record entries both at Auckland and Newton (suburb). A novice (breeding for 12 months) won the North Island Championship, with a bird he had bred a season before the show, for Yorkshires, beating several birds imported from England; this coveted honour carrying a cash value of £3 3s., but I believe it has to be won twice to get the cash. The fanciers here are spending money in good stock, and the quality of birds here now is a credit to them.—BEN LEE.

A COUPLE OF PETS.

A lady reader and her feathered friends.

SIR,—I have taken the liberty of enclosing a sketch I have made of my song Thrush, which has taken several first and special prizes at recent shows. I showed him the sketch, and he greatly complimented me by assuming a fighting attitude, ruffling up his feathers, and spreading his tail, and, when he got a chance, pecking at the supposed enemy fiercely, singing, at the same time, in a subdued fashion. He is very fond of me (and my meal-worm tin), and when he has his bath, which is taken out of his cage in a large basin, he flies to my hand for a meal-worm. Directly he has bathed, he always goes into his cage of his own accord. He sings beautifully, like a wild bird, though I hand-reared him. I have had him 3½ years, and during this time he has always been in fine health and plumage owing to the advice given in your splendid paper. I once had a very tame Greenfinch. It was my custom to let her out of her cage every morning in the bedroom while the children were dressing, and she would amuse herself by running on the floor after the children's bare feet, and doing her best to drown herself in the wash-hand basin. Her favourite place was on my head, where she delighted in pulling my hair as hard as she could; she eventually gained her liberty by opening her cage door, when hanging outside one day, and to our great grief was never seen again.—(MISS) M. PALMER.

THE SILVERBILLS.

Cheap and easily kept finches

SIR,—Although very common species of foreign birds are generally to be procured at a very modest price, the two varieties of Silverbill possess a great amount of interest for the aviarist. It is not only as cage or aviary birds wherein their interest lies, but they may well form the basis of many interesting experiments in breeding, either amongst themselves, to produce various hybrids, or even to experiment with a view to establishing new varieties. It is well known among naturalists that the late Mr. Abrahams was strongly of opinion that that domesticated type of mannikin known as the Bengalee was a manufactured variety, in the making of which the Indian Silverbill played a prominent part by being crossed with the Striated Finch—this union of a Grass Finch and a Mannikin resulting in a fertile hybrid if such it can be termed—and forming a connecting link between these genera. Aviculturists have before now tried to establish the truth of this theory by producing over again a fresh race of Bengalees by inter-breeding the two species mentioned, and, assuming the theory to be correct, it certainly offers an interesting field for many amateur aviarists to experiment in, and, perhaps, secure the honour of substantiating the theory with reliable evidence.

But I was going to describe the Silverbill for the benefit of the beginner who may not yet be sufficiently conversant with the subject to know these comparatively common birds on sight. As it is the Indian Silverbill which has just been referred to, as a probable progenitor of the Bengalee, I will give it first place. In size it is one of the minute types of foreign Finches—perhaps a trifle larger than the domesticated Bengalee. The upper surface is a light ruddy brown, rather darker, and showing a slight moulting on the head; the lower part of the back white barred with brown, and the upper tail covert white, with the outer edges of the feathers black; the tail itself is black with brownish margins. The under surface, including the face and throat, is whitish, tinged with buff and with darker bars on the sides; the larger flights are black, and the secondaries brown with whitish edgings. The beak is grey, and the feet light flesh colour. The female bears a general resemblance to her mate, but is a little smaller, and whiter on the under parts. It is a native of India and Ceylon, where it is said to breed nearly all the year round, and frequently occupies the deserted nest of a Weaver for this purpose, sometimes two pairs of birds occupying a common nest when as many as twelve or fifteen eggs may be laid. The usual number, however, for a single pair is from four to six or eight. It is much less commonly imported than the next species, and is, consequently, dearer to buy. It is also rather more delicate, and decidedly more susceptible to cold or changes of temperature, but in other respects it agrees very well with its near relative, the African specie.

The African Silverbill is widely distributed over Africa, occurring in North Eastern Africa, Western Africa, and as far south as Zanzibar, and in the south of Arabia. It is much more freely imported than the Indian species, and is also hardier and longer-lived. In colour the upper surface is a hoary, or greyish, brown, which deepens in hue on the head, where it becomes suffused with a golden tint, the plumage generally having a little paler margins to the feathers; the under surface is of a whitish brown, with yellowish tinge, and here the feathers have a whitish outer margin and grow paler until it becomes white on the belly and under tail coverts. The wings and tail are blackish, and the latter is a little pointed in shape, and the bird has a curious habit of jerking it from side to side.

The beak and legs are grey. The males possess a pleasant little twittering song, which Dr. Russ likened to the rippling of a little running brook. This species is also said to utilise the deserted nests of Weavers in a wild state as nesting receptacles, and to lay four or five eggs, which are white in colour. In captivity it shows a decided preference for the box type of nest, and breed very freely but not always successfully, as the hens are very prone to suffer from egg-binding. Both these species have, however, been successfully bred in confinement, and are said to rear the young entirely on partly-digested seeds, so that only the usual seed diet is absolutely necessary whilst breeding is going on. Still no harm could be done by supplying the parents with a good variety of seeds, and giving them the choice of plenty of seedy green stuff, and a saucer of crushed biscuit or sponge cake as an extra inducement to feed the young well.—G. L.

THE C.C.C. AND THE CAGE BIRD UNION.

SIR,—At a badly attended meeting of the C.C.C., held at the Crystal Palace on the 16th inst., it was decided by 10 members out of a total of 130, to affiliate to what is known as the Cage Bird Union, eight members (including myself) voting against the inept proposal. That a specialist club so well organised and officered as the C.C.C., should become the thrall of the discredited and incompetent Cage Bird Union simply transcends belief, and I trust the members will at once convene an extraordinary general meeting and rescind the unfortunate resolution that degrades the C.C.C. from the proud position it has held in recent years under the able guidance of its popular and hardworking hon. sec., Mr. John Tyson. Unless this is done I fear the club will be badly shattered. For the benefit of C.C.C. members I would point out that the subject came under discussion through a letter written by a gentleman who, I have reason to believe, does not now keep Crested Canaries, and his interest in the C.C.C. will be appreciated at its true value when it is known that he could not attend the C.C.C. meeting because there was a meeting of the Roller Canary Club held at the same time. I invite members of the C.C.C. to consider for one moment the performances of Messrs. Ramsden, Lythgoe and Co., during the past year, and then ask themselves what possible benefit can accrue to the C.C.C. by affiliating to what is euphemistically called the Cage Bird Union. Having done that, let them consider what it means to lose R. W. Crisp, Esq., as president, Mr. John Tyson as hon. sec., and in addition a large percentage of members. Then ask yourselves the question: Is the game worth the candle? At the annual general meeting the president was unable to elicit either reason or agreement from anyone of the 10 that were in favour of affiliating. In conclusion, I beg to thank the members of the C.C.C. most sincerely for having elected me for many years as auditor and committeeman. It is an honour I have greatly prized, and I have endeavoured at all times to the best of my ability to assist in maintaining the dignity and pushing forward the work of the C.C.C. As a protest against the action of the 10 gentlemen in lowering the C.C.C. from the proud position it has hitherto held, I have placed my resignation as auditor and committeeman and member in the hands of the hon. secretary. I decline to share in the smallest degree the degradation that I consider attaches to the C.C.C. through the ill-advised action of 10 of its 130 paid-up members.—J. S. CLARKE.

SIR,—The members of the Crested Canary Club have carried it at their annual meeting that they become affiliated to the Cage Bird Union. Why? The only apparent reason being to assist the Union. In my opinion, some of those members so anxious to assist another or governing body, might well expend time and consideration in bringing the Crested Canary Club more into prominence and begin by charitably furthering its immediate interests. As the Crested Canary Club during the past five or six years has increased both numerically, financially, and influentially without any governing body other than its own endeavours, so I maintain it can continue. Beyond which a very large majority of members are already affiliated through some society or other. I am very sorry to admit it, but I ventured to comment on it in my report that the apathy of the members is so apparent and is now practically exposed. Matters of the utmost importance do not receive equivalent consideration.

No one has any right to complain. The agenda was submitted to all members, and a request for communications on any of the subjects invited, and which I promised to lay before the meeting, and out of those not attending only two complied with the request, and to crown all only eighteen votes were recorded out of a membership of 130, or just under 14 per cent., ten voting for affiliation and eight against it. Personally, I contend that all specialist clubs are outside the pale of the C.B.U., and it is in the interest of exhibitors and societies holding open shows only that it can benefit.

The Crested Canary Club has its own rules dealing with any fraudulent practice committed by any of its members, and whether or not there has ever been occasion for them being exercised, I am not prepared to say, but I can certainly say not since I took over the office of secretary. Would the C.B.U. financially assist any fallen society or specialist club? If the C.C.C. had by some mismanagement or other unfortunate circumstance had an adverse balance, would the executive council or the elected delegates have advanced a similar argument in its favour, namely, of assisting it? As an affiliated member, I will do all in my power to further the interests of the C.B.U., and use my utmost endeavours to see that it is conducted impartially, a qualification at present foreign to its conduct. Partiality seems to be its motto, and if not shaken will eventually spell its ruin. Another movement which appears to me a greater hardship is this voting of from £5 to £6 from the funds, accumulated under trying circumstances and effected by the strictest economy to shield a mean and miserly section from subscribing a small amount towards the deficit still required before the two ten-guinea bowls can be purchased. The amount being originally intended should be obtained by donation. Even in larger and more important assemblies the same process applies. Vast sums of money are inconsiderately voted from funds in hand, whereas greater consideration would be given if they had expended only a little time, trouble, and thought towards its accumulation. But what need they care about such things? The money is there, and might as well be squandered. I would, however, venture to predict a sorry time from these very people if an officer dared to spend a coin without being able to account for it. As the C.C.C. have decided to adopt in their wisdom two such drastic, and to me objectionable measures, I have determined absolutely to sever my connection with the club so long as it is affiliated to the C.B.U. It has been my desire for some time to find a favourable way of escape from the office, and I gladly avail myself of the present opportunity. The president also tendered his resignation, but, according to rumour, his objection has been removed by the deletion of a portion of Rule 17, and what influence that may have upon him I am not prepared to say; but even the removing of objectionable portions of rules does not appeal to me. I object to specialist clubs becoming subordinate to any other governing body, believing they are—if not they ought to be—quite capable of dealing with their own affairs. Considerable arguments were advanced at the meeting respecting differences of opinion existing between two London societies. It is to my mind questionable whether such arguments were permissible. The meeting was composed of members of the Crested Canary Club, and as such should have been conducted without the introduction of matter with which it was not directly concerned, and although I am inclined to the belief that the origin of the report respecting differences of opinion (it might have been better to have referred to it as a difference of opinion of some members of the respective societies) emanate from the same source, and are used merely as a lever to obtain sympathy. Even the secretary of the C.B.U., in my opinion, was, to say the least, lacking in discretion when he alluded to the same thing a few weeks ago in the Fancy Press, and consider any such allusion ill becomes one endeavouring to create a union, scarcely consistent with the title, and inclined, on the other hand, to accentuate rather than diminish any differences. Would such puritans mean to infer that no differences exist in other places than London? Surely he forgot himself when stating that rivalry and cliquism was so rampant in London, and yet he associates himself so intimately with the major portion. Possibly we Southerners are not so inquisitive, or so well informed about such matters in Manchester or other places, or quite so readily gulled by every little pettifogging story which comes our way, especially if perchance it is against someone from whom our opinions differ. May we not consider it is well there should be a channel by which to expose cliquism, a privilege possibly not enjoyed by many kindred societies; and as for rivalry, what better or more healthy sign can be advanced to obtain an improvement? Some years ago when it was rumoured there should be an amalgamation of the two societies, Mr. Ramsden hoped such a thing would never be accomplished (and I am inclined to the belief that it never will happen) as he considered the rivalry that existed then (and it is quite as true to-day) augured for nothing but good and advancement. So long as I am connected with one of the societies concerned so long will I endeavour to use every legitimate means in my power to obtain superiority over any other, and I take it the same feeling exists in the minds of everyone connected with all others interested in any particular society.

We cannot all hold the envied position, and if the L.C.B.A. is deprived that honour we will content ourselves to hold whatever position our merits deserve, but still strive for the coveted goal.—JOHN TYSON, 169, Sloane Street, London, S.W.

THE CAGE BIRD UNION.

SIR,—Allow me to thank Mr. Tyson for his confirmation of my suspicion vented the week before last that it was not quite a fact that 36 members of the London Cage Bird Association had resigned solely upon account of its affiliation with the C.B. Union. His letter is a sufficient answer to that of Mr. Neal, who falls over himself in a vain endeavour to support Mr. William Reid and lick your boots, Mr. Editor, in one and the same act. Reporters are not gramaphones, and without wishing to discredit your journal or its representative, it is surely open to me to doubt such a sweeping assertion as first appeared in print, and which is now qualified by Mr. Tyson to the extent of confining the resignations through the C.B.U. to a large majority. What I want to know is of how many exactly does this large majority consist? And why is not the exact number stated? Such an important question calls for exactitude, not generalities. And if other reasons were given for resigning, what were they? For expressing my doubts and uttering my protest against the ravings of this blackleg namesake of mine, I am called "bully" and "crank." The last word is simply an echo, so I can let that pass. Mr. Neal may take the opening sentences of W. Reid's letter to heart. I mean the one where he talks high about the "natural aptitude" some people have for abusing others, and then promptly exemplifies it by himself abusing me for all he's worth for disagreeing with him. Isn't it laughable? Let me ask W. Reid this: If he had a sickly child, but one that perhaps only wanted plenty of good food and fresh air to blossom out into a bonny specimen, would he advocate strangling it in its infancy? That seems to be the method he wants fanciers to adopt with the C.B. Union. I said in my last letter this Union is not perfect. It is far from it. But give it a chance, William Reid. Be fair, man, and don't howl it down first round. Get the delegate of your local society to be your mouthpiece to get altered anything you don't approve of. Don't cry when you can't get your own way, and bleat out, "I shan't play," and for heaven's sake stop "ratting on" week after week about a Union with which over a hundred and fifty societies, I believe, have associated their names. There are some working men who don't believe in trade unionism, but they are in the minority and have to lie low.—JAMES REID.

[The tone of this correspondent's letter is not an edifying one, and if he wishes a further extension of the courtesy of these columns he will have to exercise greater restraint in his language. With his arguments, as arguments, we have nothing to do; but his mode of expressing them (though lacking nothing in vigour) leaves much to be desired from the standpoint of ordinary courtesy.—Ed. C.B.]

A CONUNDRUM OF THE CRYSTAL PALACE SHOW.

SIR,—I trust you, and also my fellow-readers, will not think me premature in any criticism on the judging of any section of this last Palace Show. But there is one class in particular on which I should like some enlightening, and that is Class 107, Lesser Redpoll or Twite. Although the bird I shall refer to is my property, I had the pleasure of having a rather complimentary remark passed by a well-known judge on the comparative merits of a typical Redpoll right out of the cards, and the Redpoll in the money. Here is a conundrum, "When is a British bird not a British bird?" Working on the Palace schedule, the birds stand for prizes for purity of breed, beauty of plumage, quality, and high condition. Yet a bird, chock full of artificial colour, stands before a bird naturally as near an ideal bird as I contend a British bird should be, as near a specimen in a cage as it should be in the green fields, and as that is shown colour-fed. Knowing you would always give both sides of an argument. I should thank both sides of an argument, I should thank you to insert this letter in the next issue of CAGE BIRDS, in the hope of provoking friendly controversy among my brother fanciers on the merits of colour or non-colour feeding British birds. I claim that the field-moulted specimen should have been in front of the second, and a long way in front of a Twite, for why on earth a Redpoll should be amalgamated to compete against a Redpoll puzzles me just as much as the query, "Why not let a common sparrow compete against a typical Yorkshire?"—QUERIST.

NEW NORWICH SOCIETY FOR GLASGOW AND THE WESTERN COUNTIES.

SIR,—Seeing Mr. J. H. Adam is secretary of the above society, will he please inform your readers if he is the same Mr. J. H. Adam who was secretary and treasurer of the Glasgow and West of Scotland Club, who had to take legal proceedings against him to recover their books less than a month ago?—YOUNG FANCIER.

Use our Picture Postcards.

A CAGE BIRD SOCIETY FOR JARROW-ON-TYNE.

SIR,—At a meeting of fanciers, held at Lockhart's Cocoa Rooms, Ormonde Street, Jarrow, on February 13th, it was decided to form a society to be known as "The Jarrow and District Cage Bird Fanciers' Society." A good number of members were enrolled, and a committee elected. It was agreed that the annual subscription be 3s. 6d. per member. The next meeting will be held in the same place at 7.30 p.m., on Wednesday, March 6th, when anyone wishing to join will be welcome. —HY. BINNS, secretary (pro tem.)

THE SONG THRUSH.

SIR,—Now that the season is coming on for the singing of birds one is apt to be continually on the look out for their beautiful nests—some built like a mansion, even past the work of man's hand, some very rough and common, but nevertheless they all go to make houses for some of our prettiest British birds. What is more interesting than to find a nest being built, and follow it till the young are just about ready to fly? One can hardly conceive how so small a nest is able to hold such a brood comfortably. Take our much-loved friend, the Song Thrush. What a filled nest! When they are ready for life's journey, say five in one nest, and as full as an egg, and all looking pretty and on the alert; also the old hen very savage looking. I once came upon one nest with six young ones in it; it was really a grand sight to watch them all, and it was with difficulty that we got near it to take one of the young ones out, for the old bird came flying round our ears, and by the noise she was making this is almost likely what she said to us, the fussy old girl: "I am sure a great fellow like you ought to be ashamed of yourself for frightening a poor little creature like that; lay it down and not hurt it." And when we left how pleased she seemed. Now, who does not know a Mavis nest, that trim and neatly plastered nest with a warm coating of dried grass-roots, etc.? They build from February, and as late as September, amongst thick bushes, clustering ivy, holly, bank-sides, hedge-roots, and undergrowth; they lay five blue eggs, with spots of black and sometimes brown, and feed on worms, snails, slugs, insects and berries, and it is difficult to describe its song, its variety is simply charming. What does the old song say about it? Well, this:—

"The sweet mellow Mavis,
That hail the nicht far,
It minds me o' Nannie,
Ma Nannie's awa'."

—ROBERT NISBET.

NARROW AVIARIES.

Sir,—The expression "your aviary is too narrow" is used as applying to outdoor aviaries only; though I have found narrow aviaries in my birdroom, while successful for a limited number of birds, not by any means so when the aviary had its full complement of birds commensurate with its capacity. My first outdoor aviary was a sheltered one, 7 ft. long, 1½ ft. wide, and 5½ ft. high, with a small shed at either end. This was very successful, and in it I bred Cutthroats, grey Java Sparrows, Zebra Finches, Bullfinches, and Canaries. But in spite of its sheltered situation, in wet weather the floor and back wall for half its height were in a shocking condition, and often took a couplo of days at least to dry after a thorough day's rain; and after the birds had been hopping about in it a little it was simply a sea of slush for the time being, though I had made good provision as to drainage. Again, in such a narrow aviary, in spite of double netting, the birds get badly scared by cats. I may say that the said aviary was fitted with flaps and doors, so that everything could be attended to without going inside. To those unable to spare more space I certainly advise folding doors (half-glass), with top ventilating holes, to close up the front at night, both winter and summer. In spite of the success and pleasure I got from above, I still say, if at all possible, give 6 ft. as the minimum width for an outdoor aviary. If you cannot do this, mitigate the evil by adopting some such devices as those hinted at above, according to the circumstances of each individual case. I was much interested in "Pennyworth's" experience, but I may say that nearly the whole of the birds in my garden aviary (30 ft. by 10 ft. by 7 ft. high) are practically finger tame, and take but little notice of my presence in their midst.—Wesley T. Page.

BELATED AND SHORT PRIZE MONEY AT BONTNEWYDD SHOW.

Sir,—I entered a bird at Bontnewydd, N. Wales, on September 22nd, 1906. It won first prize, 5s., and I waited about six weeks for the money, so wrote to the secretary three times. To my surprise I received 2s. on Monday, February 18th, 1907, as my first prize. The following is the report of tho above show in "C.-B." on September 22nd, 1906: "Bontnewydd Show was held on the above date and proved one of the best shows seen in N. Wales for a long time. There was a record entry." Has any other brother fancier been treated in such a manner? I think, Mr. Editor, it is very unfair for any fancier to be treated in such manner.—T. Evans, Millom, Cumberland.

ALBINOS IN THE CARLISLE DISTRICT.

Sir,—I often read in the popular Cage Birds remarks on albinism, so thought it might interest you to know that my friend Robert Hogg, the Carlisle taxidermist, has had the following specimens in hand this season, all of which have been obtained in the locality:—Creamy white Starlings, House Sparrow, with white body and ordinary coloured wings; pied Blackbird, a perfect, even-marked specimen; also a pied Starling, the most beautiful specimen I ever saw, which was bought for the Tullie House collection. Sparrows and Blackbirds, the latter especially, seem very liable to variation in colour. In our locality I have seen many specimens; in fact, I seldom go out for a ramble but I come across some specimen. One Blackbird I often saw had many white feathers on back and wings, which gave me the impression that they were snowflakes. Another one had perfect white cheeks, which made it look headless in the distance. A white Sparrow was also seen near the village; but, after many attempts to capture it, the chase had to be given up, so where this white specimen of Passer Domesticus got to I don't know.—"Corbie."

CANARY AND MULE BREEDERS OF THE ISLE OF MAN.

A Year's Retrospect.

Sir,—The progress and standing of the Manx Canary and Mule breeders affords both disappointment and complacency. The past show season has been one of disorder, its record is one of the more or less successful efforts of the societies on the Island to get in touch with each other (the keynote being expansion). These societies ought to do better with their splendidly-equipped committees, but still the old cry of "Failure" is heard, and the poor exhibitors have to suffer. There is also a note of sadness in the history of the past year, for "Old Pete," a veteran fancier, has passed away. A very well known Manxman was he, and many an exhibitor owes his success to him. Wonderful was the command he had over the wild birds, and many a happy hour we spent together on a Sunday with our favourites. He was always highly delighted to read to you out of that ever green paper, Cage Birds.

I have been paying a flying visit to the Shows of this season, and was pleased to see an improvement, especially in the Norwich section, one or two toppers putting in an appearance. Being of good type and quality they took premier honours. I overheard a whisper at one show, that some of the cracks were on the hire system; if so I must say they did execution. Although there were some very good home-bred birds which might have got up a notch or two, I think these Norwich fanciers have taken the hint that I gave last year in Cage Birds. The Yorkies were a very nice lot, especially the winners; true to type and splendidly staged. I was glad to see so few hinge tails and slip-heels in this section. I fancy one would have to put his hand down pretty deep for one in hopes of winning. The Cinnamons were only a moderate lot all through. Take a dip in the Norwich during the coming season, friends. For shape and colour this Fancy seems to be dying out a bit. The Cinnamon Club should offer a cup as an inducement here for competition. There was nothing startling in Mule or Hybrids, only a few old faces turning up, a bit worn out. I really did expect to see an eye-opener or two after the advice given in Cage Birds. I have no doubt that the Mule breeders have made a brave effort to solve that vexed question: how to breed the clear mule. I hope the solution will be found out during the coming season. My advice to the fancier who has served his apprenticeship in the Canary room is that the habits he would acquire would not be much use for Mule breeding. The Goldfinches made a nice display, British and Foreign, moulted and non-moulted, fighting for honours. I would like to see them with a more square cut blaze and better tan for a show bird. Still, with a good moult some of them ought to turn out a Manx pride. The Linnet seems to take the lead here among the working class; one or two exceptionally good birds standing out with something in hand. I would strongly advise British bird fanciers here to go in for better birds and not so much for wood, paint, and gold. Have a uniform cage. The variety British were very poor throughout. Surely you ought to have made a better display with so many varieties at hand flying at large. Where are the Northern exhibiters—once the backbone of the British—gone? I hope to see them yet again on the warpath.—Pat McCluskey.

INHUMAN BIRD CATCHING IN CORNWALL.

Sir,—St. Ives, like Falmouth, is one of those idyllic Cornish health resorts, where thousands of invalids and visitors flock during the year for pure air, cooling breezes, clear skies, frolic of the waves, and stimulating influences. And what is more refreshing to them than to hear the harmonious note of the Thrush and other songsters, which is sent for the delight of man, and not for such barbarous treatment as described by your correspondent, Mr. Pease. It is excusable for those Wild Westerners. The fact is the lower classes in that part of the county are simply steeped in religious bigotry and ignorance; and had it not been for John Wesley introducing Methodism in this county they would be just as wild as the savages of Central Africa. I consider it would be far more to the credit of the ministers in that neighbourhood to instil common-sense and humanity into the minds of their congregations, than permit them to commit these barbarous depredations.—Thos. Burton (Falmouth).

Sir,—If your correspondent, Mr. Wm. Pease, knows where these alleged cruel acts take place he should inform a police-constable, who would take the offenders in custody, and charge them, under the Prevention of Cruelty to Animals (including birds) Act. A severe penalty will be enforced by the magistrates in such a barbarous case.—Geo. Cooper.

Sir,—In answer to the letter written by Mr. William Pease re the capture of the thousands of Thrushes and Blackbirds in the neighbourhood of St. Ives, Cornwall, I am more surprised to think that a man who takes an interest in British birds should be an onlooker to such cruel brutality, and should not inform the police of the shameful treatment the birds have received. There is what is called the open season, but the law has the power to protect any brutality in any form of this kind whatever. I should think from experience these birds would not be all Thrushes and Blackbirds, but that most of them would be Redwings and Fieldfares, which come to the British Isles during the winter months from Norway and Sweden in large flocks.—J. Stockman.

Sir,—I notice a letter in your valuable paper, Cage Birds, from Mr. William Pease, for which I thank him, and I heartily agree with him that something should be done to protect them. If the law does not, then we must appeal to the conscience of any persons who use them as a table delicacy, and must vehemently protest against such a practice. The birds mentioned by him, as well as the Skylark and Starling, are caught in thousands annually, and sold to be consumed by man, who ought to be their protector, consequently they are robbing the countryside of some of its sweetest joys, and depriving us of the pleasure of hearing them sing their charming, delighting, and soul-inspiring song. After hearing their music how can any thoughtful person eat and enjoy them? It makes one wonder where the manly courage ends and the animal-passion, thirsting for blood, enters into us. Our national bard, Burns, says that "man's inhumanity to man makes countless thousands mourn," and we of to-day may add useful and contented birds, which, indeed, may be counted among man's constant and instructive friends. When we are a little low-spirited and out of sorts, perhaps by some mean action of our fellow man, how soon we forget such cares when out in the fields and haunts of the birds.

"Their song can melt the human heart,
And charm the soul by speechless love;
How true and noble is their part
'Twixt man below and God above."

I hope many more may take the subject up, and try to protect our songsters. I am sure that if it was not for table purposes they would not be so largely or inhumanly caught.—J. Patterson.

Sir,—I have read Mr. Pease's letter re the above, and have sent the cutting of it to the Royal Society for Protection of Birds, Hanover Square, London; but if Mr. Pease wishes to put a stop to this rascally snaring of birds he simply has to see Mr. W. H. Hudson, of St. Ives, Cornwall. No doubt that gentleman, who is a leader of the above society, will do his best to prevent the alleged cruelty. If I had been in the place of Mr. Pease, I would have taken the matter into my own hands, and destroyed the material belonging to those gentlemen of the bird-catching tribe (excuse me if I call them gentlemen), or else ambushed myself behind a bush with a powerful air gun, and by mistake shot the wrong animals. No doubt this will bring against me a loud cry; but in my humble opinion such vermin don't deserve to live, and they ought to be wiped out.—P. A. Vaucher, Birmingham.

WILD HYBRIDS.

Sir,—I was recently shown a fresh-caught bird that the owner considered to be a cross between the Blackbird and Thrush. The plumage was dark and somewhat mottled, and at first glance that bird closely resembled a hen blackbird, but upon closer examination it was seen to have marked characteristics of the Song Thrush. The fact of the bird being a songster was proof that it was not a hen Blackbird; the song (so I was told) closely resembled that of the Thrush. In size he was less than the average Blackbird, the head was flattish and broad, with a good bold eye, the legs and beak rather dark, the tail about the same length as that of the Thrush, which, as we all know, is shorter than the Blackbird's. After careful examination one could only come to the conclusion that the bird was simply a cock Thrush, very dark in colour (possibly possessing in its blood slight traces of melanism).

From time to time these wild-caught hybrids occasionally crop up, and one hardly feels inclined to say positively that such crosses do not exist. We have had reports of the nesting and rearing of these birds, but, unfortunately, in nearly every case the evidence to hand has not been strong enough to prove the case up to the hilt; in fact, the only real evidence has been the freshly-caught offspring, but then they do not prove anything any more than the shooting of a Tanager, which I heard of last summer, was evidence of this beautiful bird having been bred in this country. Hybrids are bred in captivity, and no doubt occasionally escape as we know other cage and aviary birds do. Curiously coloured eggs from both the Blackbird and Thrush are occasionally found during the nesting season, and have been put forward as the product of the union of these two birds; but bird lovers who, season after season, follow the delightful pastime of nesting and not destroying, know that abnormal eggs of both species are frequently found. Quite blue eggs are not uncommon in the Thrush's nest, and eggs not typical of the Blackbird are occasionally seen. When one considers the number of nests of these two birds that are constantly destroyed in the season, it is not at all unreasonable to expect the hen bird will sometimes drop an egg in any nest that may be handy.—Carshalton.

ESTABLISHED 102 YEARS.

HINDHAUGH'S

"SPANISH" SEED.

Absolutely the finest the World produces—Boldest & Cleanest.

MONEY CAN NOT BUY FINER.

SPECIAL OFFER:—

56lbs. for 13/- CARRIAGE PAID IN U.K. Cloth bag included gross. (excepting Ireland).

This very special offer is made to introduce this "GRANDEST OF ALL SPANISH CANARY SEED" to all bird fanciers and includes delivery to any station in England, Wales and Scotland having through communication with the North Eastern Railway from Newcastle, by passenger train. It must be noted, however, that, our stock of this Extra Quality, Fine Large Seed having been entirely cleared out by the enormous response to our advertisement in the "Cage Birds," it will be a few days before our next parcel arrives, and even then, it will again have to go through our special cleaning machinery to make it as perfect as possible. So all orders will be dealt with as received, and despatched as soon as possible. Please get your orders in as quickly as possible to ensure early delivery.

Apart from the above Special Offer for 56lbs. Carriage Paid. We quote as follows:

DISTANCE NO OBJECT.

"Sample A" Finest obtainable Re-cleaned Spanish Canary Seed	10/- per 56 lbs.,	2,9 per 14 lbs.
"Sample B" Very Fine Bold Re-cleaned Spanish Canary Seed	9/- " "	2/6 " "
"Sample C" Really Good Bold Re-cleaned Spanish Seed	7/- " "	2/- " "
Best Re-cleaned "Turkish" Canary Seed	6/- " "	1/9 " "
Really Good Fine Canary Seed, clean but small grain	5/6 " "	1/6 " "

Packed in paper parcels up to 28lbs., free. Over 28lbs. should have 3d. extra remitted for cost of cloth bag to ensure safe delivery. These prices are free on rail.

Carriage by passenger train (payable by buyer) is only :—(in England, Wales and Scotland)

Above 50 miles and not exceeding 100 miles :—7d. for 14lbs.	11d. for 28lbs.	1/9 for 56lbs.
100 " " 200 " 10d. "	1/2 "	2/4 "
Over 200 any distance .. .. 11d. "	1/6 "	2 11 "

KINDLY SHOW THIS COPY OF C.B. TO ALL YOUR FRIENDS

Some Observations on Hard-Billed British Birds.

By S. W. Birchley.

A Lecture delivered February 20th before Swindon C.B.A.

Brother Fanciers,—It gives me the greatest of pleasure to meet you all here this evening, and before I proceed to read the paper I have endeavoured to get together to read to you to-night, I wish to thank you one and all for the honour you have done me this day.

I sincerely hope that the awards I have made in the Classes put before me have given you satisfaction, and that you can follow me in the placing of the cards.

I would also like to say a few words with regard to our society, just started here. As to the society itself I firmly believe that it has filled a long-felt want in this great centre of industry, and what I should so much like to see is a few hundred of those hardworking mechanics from yonder workshops come to these meetings and catch the delightful fever we have all fallen victims to.

I am very much afraid that there are many young men in those "works" who spend their spare cash in useless pursuits that have no idea that such a pleasing, inexpensive, and healthy hobby as ours exists, and I should greatly like to see some effort made on every-one of your parts to make the Swindon Cage Bird Society one of the strongest, if not the strongest, Cage Bird society, in the Kingdom; I am willing to do everything in my power to help you, and I fail to see why, instead of some fifty members as we have to-day, we cannot have at least two hundred and fifty before next fall.

We have most excellent papers, that are within the reach of all, published every Friday, not forgetting one moment that grand little magazine, the "Bird World." In the mediums now catering for us we get all the information one could wish for relating to every branch of our hobby, so that really although no one can justly say that the work of exhibiting cage Birds to-day is not an art, and a great one, too; still when one has that great feeling towards their little prisoners that everyone does have, half the battle is won, and a man who may not know a Chaffinch to-day if he saw one, in a very short space of time, providing a certain amount of his energy was put in this direction, may hold an impregnable position on the show bench next season.

But in my opinion there is a great deal of precaution to be taken by the novice in answering advertisements which appear in various papers offering certain birds for sale, and describing them to be "the best specimen living," "sure Palace winner," etc., at 1s. 6d. each; this is the kind of thing, my friends, to guard against, as I can assure you, you will be absolutely disgusted when you come to learn from one who knows that the merits of the bird are not sufficient to qualify him for a "commended" card in a small show, let alone a higher award. In my own mind, when I read them all call them a swindle, and think it is a pity the novice should be gulled by such advertisements.

If you take my advice you will have your birds from a reliable source, or, in other words, from one who knows what constitutes an exhibition specimen, pay a fair price for the same, and the result is not far to seek.

I do not wish to occupy the whole of the evening on such items as these, but I think it is wise to mention them as a guide to young beginners.

While I am dealing with this matter I will just give you an illustration of some attempted smart practice tried on me by this artful sort of gentleman in my younger days of the Fancy. The man in question advertised certain birds after the form I speak of, only not at that figure, and I replied to the advertisements, and, as the result, he sent me some two or three lots of birds on approval, but they were useless to me, and I wrote and told him not to send me any more as they were only putting himself and me to needless expense of carriage. I heard no more until about a week before Christmas, when I suppose our "learned" friend, like a good many more of us at this time of the year, required a little more "wind," so he sent me two fresh-caught blackbirds, with one of the slickest notes you could possibly read, requesting 7s. for them, following with a postscript that if they didn't suit to return them carriage paid. According to his version they had been caged "weeks," and I am sure they had never been caught one week. I, however, wrote and told him that unless the carriage which I had had to pay, together with 6d. for keep, was sent me within three days I should liberate them at once; the total of these two amounts was only 1s., and he valued the birds at 7s. Believe me, I never heard from him from that day to this. The one bird I liberated, and the other died the day after arrival, it not having taken kindly to cage life.

This is just an example of the humbug I allude to in these swindling advertisements. I want you to understand I am condemning no one individually, but this one man. I only mention this as a few words of caution, as there are undoubtedly good and bad dealers in the bird traffic as in every other line of business.

Well, gentlemen, time is going on, and I must get to work on my paper relating to Hardbilled British Birds, and I trust that those members who are old hands at the rearing and managing of these species will not be bored by my remarks, as no doubt many of the facts I am going to place before you may be well known at least to some of you.

As far as time will allow I will deal with the various species, giving my opinion of what constitutes a show specimen and the feeding of the same, but before entering directly on the birds themselves, a few words on the caging and management would, I think, not be amiss.

With regard to the matter of cages, I am afraid many fanciers lose a great many birds each year through these not being of sufficient dimensions, as when wild the whole of our feathered friends are continually hopping and flying from one place to another, which, of course, it cannot do when behind the bars of your cage, and the consequence is that unless the cage is of reasonable size a great many of the organs and muscles of the body lie absolutely dormant, which is greatly detrimental to the health of the bird. With regard to the stock cages for these birds, they should never be less than 18 in. long—24 in. is far better—and deep enough to allow him to expand his wings fully when he so desires to do, the cage having punch-bar front, with door, and also a door in the side of the cage; the latter will be found most useful in running the bird from the stock to the show case and vice versa.

The bottoms of the cages should be lined with sharp sand, and cleaned out at least twice a week.

The matter of steadying a bird is one of importance, and I strongly advise everyone not to use a small cage for this purpose, as it is one of the cruellest acts you can do for the poor thing, for in its efforts to get away from your presence it will very often beat itself nigh past recogniton; use a full-sized cage and don't worry your bird, but when near the cage offer him some tit-bit such as a meal-worm; at first, of course, he will be shy, but you will find later he will almost look for your coming—say nothing of taking a meal-worm from your fingers.

A particularly good place, in my opinion, is in a living room or kitchen, when the housewife is following her domestic duties, as the continual movement of anyone in sight of the cage is the greatest advocate in steadying a bird.

I advise you to cover your capture up at night for the first week or so, and then gradually remove the covering from the bottom of the cage, a little each night until ultimately he is quite used to the artificial light.

GOLDFINCH.

In popularity, there is no doubt that the Goldfinch heads the list; therefore, I will endeavour to deal with him first.

It is caught in large numbers in the autumn and winter months in the unprotected areas, and in some of the latter by our most daring catchers, and I consider it a thousand pities that the law does not protect them further into the autumn than it does, as very few of the young that fall an easy prey to the catcher survive, unless they are in well experienced hands. If they were protected till the first of October it would be far better for everyone concerned.

It is a very good plan to crush the whole of the seeds that are given to these delicate youngsters, as their bill is not strong enough to manipulate the hard shells.

I am sure it is a most pitiful sight to go into the bird dealers' shops in some of the large cities and see these poor little mites absolutely crammed into the small cages, only to linger there and die, or await a purchaser. I have myself seen as many as four dozen in a box not more than 30 in. long, 14 in. deep, and 6 in. high, in a dealer's shop in London, and how the Society for the Prevention of Cruelty can ignore cases of this sort I really cannot think.

I have found the Greypate thrive on the crushed mixed seed, and a very small quantity of egg flake, not forgetting, of course, well dried groundsell and other wild seeds, such as plantain, thistle, and burdock.

Coming to the adult birds of this variety I don't think we can speak too highly of our house-moulted friend, for, take him all the way round he excels anything in the way of hardbilled Britishers. A good show specimen is very hard to obtain, and a good price has to be paid for one if you are to have a "flyer."

The principal points in an exhibition cock Goldie are a good square cut blaze of the richest crimson, extending well down under the throat and behind the eyes as far as possible. The skull should be broad with a jet black clean cut cap; white cheeks very slightly tinged with brown. The wing covers and shoulders should be a rich brown. Butts of wings jet black. Secondary and primary flights yellow chrome and black, the chrome portion forming a bar; each of these feathers should be tipped with white, which are commonly called buttons. The breast should be pure in colour, and richly tanned with the richest chestnut brown. Tail, black and white. But, after all, condition and steadiness are two of the most important items in a show Goldfinch. The bird when in good show form is as smart and as tidy as a Guardsman at Whitehall.

He is particularly fond of good sound teazle seed, also sunflower (white preferred); the latter should be slightly cracked with a flat iron as it greatly helps him to reach his quarry—the kernel.

On no account forget the bath, at least twice a week, and feed him on a good stock mixture which consists of only a small quantity of hemp seed.

The Goldfinch is a first-class mule, and will also breed with other varieties of wild birds; some of his good work we can see at almost all our shows to-day in Hybrids and Mules, showing the most distinct parentage.

Hybrid Breeding: Preparations for the Coming Season.

By T. H. KINCH.

(Continued.)

SECOND ROUND: CANARY AND BULLIE.

The Canary and Bullie pair in the second round showed great promise, for the Bullie built a beautiful nest in the neat box and lined it well. The birds were pairing continually, although they were so close to me (not a yard away), the Bullie being so tame that it used frequently to come out of the cage and have a fly round and go back of its own accord, and then go straight to the perch and call, which led me to believe that pairing had taken place, and he very anxious for her time to come to lay. My patience was rewarded by four eggs, which she laid in four days in her nest, and then began to sit close.

The Canary never attempted to feed her, but would go repeatedly to the nest and look at her. I got her all the blighted pieces of plum shoots, and other tender shoots with green fly on, that I could, and as soon as I put them into the cage she would come off the nest at once and feed, and then go straight back again. No Canary could go on the same as she did with good results. I had no feeders of any kind to transfer the eggs to, but that, in my opinion, was not necessary at that time, unless for safety's sake; but, perhaps, had I had them I should have been rewarded for all my years of trying this cross. On and off for over twenty years I tried setting full eggs on several occasions, though not one single egg hatched out, whereas others, quite novices, at the first attempt have produced this handsome cross. Such is the glorious uncertainty of Mule Hybrid breeding. Well, I do not begrudge them their success, on the contrary, I give them every credit, and most heartily congratulate them on their luck.

My patience at the end of ten days was quite exhausted. I required no Rontgen Rays to tell me that two eggs were full and two clear. Thought I, I shall yet arrive at this Mecca of muling, my patience will be rewarded at last; but I was doomed to disappointment. I gave the hen full grace to sit her time out, and then looked to see the result. Alas! they had died during the spell. I showed them to several friends, and at last preserved them in spirits as evidence of the truth of my statements.

MY BAD LUCK.

Speaking from memory I believe this is the fourth time I have had fertile eggs during twenty years, but none to hatch. I sometimes think that had I placed them under Canaries the results would have been different, but no one could have wished for a better sitter than my Bullie. In years gone by I did transfer the eggs to Canaries, when the results were the same, so I suppose I must conclude it was only my bad luck. Still, I shall not be satisfied until I can produce the object of my ambition, i.e., a Canary and Bullie Mule (or Hybrid, which?) This cross I believe is the most feasible, for I cannot yet believe in the Bullfinch and Canary. I have never yet known the Cock Bullfinch to breed in confinement, but I may be mistaken, both as regards the Canary as one parent, and other Finches. Although I have so far failed I hope my ill-success will not deter others from trying. How many Mule and Hybrid exhibitors of the past years have bred their own exhibits? Well, I won't judge lest I should be judged.

My second pair was of the same cross, and in the first round had no eggs. Now, singular to relate, this Canary did feed his mate, the Bullie; the other pair did not, nor showed any signs of feeding. Both these Bullie Hens were caught this year, and had they been cage-moulted I should not have been surprised at their feeding; but from long experience in Muling, and Hybrid breeding, I find they do not feed so freely as one would think, and are, in fact, quite different in this respect from Canaries. The Canary, as a rule, will feed, but the Hens frequently refuse the food thus offered to them, probably through the thought—if they do think—they are not Nature's mates. This is a problem to think well out, with a view to assisting Nature; for, although we cannot improve upon Nature, we can assist her in many ways.

At last my hen laid two eggs, which I quite ignored, for I had seen no pairing take place. Still, she sat her full time, with a little grace, i.e., sixteen days, but without any result. I was not surprised. The two eggs were of the perfect Bullfinch type and colour, not at all like the eggs of the first pair, which were of such a pale colour as not to be recognisable by collectors as Bullfinches. Now, how is one to account for this varying colouration of eggs under similar treatment? The food was the same, the birds confined in the same way, and, in fact, all the circumstances corresponded. The cock cannot influence the colour of the eggs, when no pairing has taken place, in my opinion, nor does it then with Mules or Hybrids. But this question I must leave for the present; but anyone who has had eggs from the Bullfinch will find in most instances that they are not like those of the wild Bullie. I had built a nest for my hen in the box on several occasions, but this she refused, and pulled to pieces. She did build in her own way in the cocoanut shell, but always ended by pulling it to pieces, and at last laid on the felt lining which I had provided in case of accident. The next nest I will speak of later on, the way she built it, and the hope I had of her for the final round.

GREENFINCH AND BULLIE.

Now for the Greenfinch and Bullie Hen. This round I had great hopes of, for the pair had been on the most friendly terms towards one another. The other pairs were friendly enough and got on well when put together—in fact, I saw less quarreling with them than I ever did with Canaries. The hen made no good nest this round, nor even attempted to do so, but the Greenfinch carried the material about, and in his way tried to make one, but it was all soon pulled out again. This was repeated daily, and did not move the hen in the least, or cause her to show any signs of nesting or mating. Her favourite green food was dandelion flowers, pieces of which she would carry about in her mouth, but she did not take any to the nest. Lettuce leaves and groundsel she was also fond of, but she did not care for young shoots of plum, or rose, with green fly upon them like the other Bullies. The third round (of which I will speak later) she started in earnest to build.

THE CHAFFINCH AND BULLIE.

The second round ended in their continually quarrelling with one another, though in the first they got on so well together. Now, this Chaffinch cross I have tried for over twenty years in various ways, and I have not as yet done with it, and shall not be done until I am fully convinced that they will not breed in confinement. I have been laughed at frequently for my pains (say patience), but I do not at all mind that.

This Cock Chaffinch was, as I explained in the first round, caught in a butterfly net. Of the first nest I had hopes, but no eggs came. The second was made in the box, but only to be pulled to pieces by one or the other, but which one was to blame I could not say. The same process was repeated for several days. Why these two were always quarrelling I could not at first understand, as they were so friendly during the first nest, but I soon found out the cause.

(To be continued.)

The Evolution of the Yorkshire Canary. What it may come to.

The Yorkshire Canary.

By JAMES HOPKINS.

A Paper read before the Bolton & District Progressive C.B.S.

Mr. Chairman and Gentlemen,—Having been asked by your Vice-President, Mr. Leach, to say a few words to you on the Yorkshire Canary, a bird which is a great favourite of mine, and which I have exhibited with success for some years past, I have much pleasure in being with you to-night and giving you my experience, which I hope will be received favourably by both champions and amateurs, and may be of some use to all. If at the close of this paper you desire to ask any questions I shall be happy to answer them to the best of my ability.

SELECTION OF STOCK, Etc.

In the first place the purchaso of stock birds is a very important matter. What you want to do (in my opinion) is to buy birds from someone who breeds his own winners and not from someone who breeds Yorkshires but always breeds stock birds and never bred a winner, as it is no use making a practice of breeding all stock birds. Some people seem to breed stock birds to the end of time, and never have a show bird unless they buy one. You will also find that you will get on a great deal better if you will get all your birds from one strain, and not buy one here and another there. You may get on in time with that practice, but you will first of all have to mix the different blood, which will take you some years, whereas if you get all your birds from one strain you are on the job immediately. I should particularly like to warn novices to be careful about picking up birds at shows, as, firstly, there are many Yorkshires shown which are carefully trimmed about the breast, thighs, etc., and which are no use whatever to the novice who cannot get them up; and, secondly, the Yorkshire show bird is very often an indifferent stock bird; that is, not very likely to throw out another winner. I have seen many a bird that could never win a prize at a show which was invaluable for breeding purposes. In short, the Yorkshire show bird is not always a stock bird. The great point in breeding Yorkshires I find is knowing your stock thoroughly, and how each individual bird is bred. I will now give you my idea of what sort of stock birds I think you require to turn out a first-class show bird.

The cock, in my opinion, should be a good long bird, with plenty of Belgian blood in him (I have no objection to one which shows it), thin, leggy, neat head, good long wings and tail, well filled in back, and good quality of feather.

The hen should be what I consider a good show bird in all points, except size. I want her to be extraordinarily straight, well filled in everywhere, and as good in position, feather, and type as she can be, as shape and style comes from the hen. I do not care how small she is scarcely, but want her teeming with quality. Of course, I should prefer a medium-sized hen to a small hen if good in other points, but should not discard a hen because she was on the small side. The small hens I find as a rule are the best breeders, and I have bred some of the best birds from small hens. In fact, a well-known Yorkshire breeder once told me when I was asking him for a hen for stock purposes, that the larger the hen was the cheaper it would be. If you breed with a pair like those I have described I should think you would get what I consider a good Yorkshire show bird, that is:—

A bird about 6¾ in. long (I have no objection personally to a bit more length if it carries itself well and is good in all other points), slim, with a nice round chest, and body tapering away gradually to the root of the tail, nice round narrow head without the least suspicion of eyebrow, small beak, good bold eye, neck good length, and well filled in from shoulders, which should be narrow, back nicely rounded, and long wings closely packed, and good long pipe tail. From head to end of tail to be carried perfectly straight without the least shade of bulkiness at waist, to stand on fairly long legs, with feet well set back, and not like some you see at shows with the ball of the foot on the front edge of the perch. I also prefer one which shows what is called "breed," that is, one which can work himself into a position and is not sluggish like a Lancashire. Of course you want him to stand like an officer, and to be as free from frill as possible, and to have feather of the best possible quality.

Now that I have given you what I consider the good points, I will give you a few of the bad ones, and which should be avoided as much as possible. A bird with a broad, coarse head, or a long flat head, hollow neck, or one that appears to be broken off at the shoulders, a pointed chest, broad shoulders, hollow back, badly carried, or crossed wings, or one which drops its tail, or carries it open and, above all, a coarse feathered bird which is rough at the thighs, etc. Of course, when you go to buy birds you will have something to do to find them without any of these faults. Birds without them we are all wanting.

DOUBLE YELLOWING AND DOUBLE BUFFING.

I have tried breeding with two Yellows and two Buffs many times for experiment, but I have never bred anything worth mentioning from two Buffs. The young ones have turned out too strong and too chesty. I have, however, bred several very nice birds from two Yellows, having at the present time a Buff hen bred that way, which I consider one of the best I have, and which will take some beating for quality of feather. I have also bred several Yellows the same way, which, although not much to look at, being inclined to be scanty feathered and not over good in carriage, have in turn bred some grand quality birds when paired up again in the usual way (that is Yellow with Buff); but the Buffs bred from two Yellows are generally the best birds.

INBREEDING.

I have never produced anything for the show bench from close inbreeding. The youngsters always seemed inclined to be bent, and don't possess the style and nerve necessary for an exhibition Yorkshire. I think cousins plenty close enough to pair together, and I would advise you to use only the strongest and healthiest birds, as Yorkshires generally are not as hardy as some of the other varieties.

POSITION.

You will all know, of course, that in Yorkshires more than in any other variety, position is essential, so that I think it would be as well to say a few words on the training of the Yorkshire. We will suppose that you have got some young birds about a month or six weeks old. Now is the time to train them. Now is the time when they will take to it better than any other time, and if properly trained at this stage they will never forget it. Hang the show cage on to the front of the breeding or flight cage and get them to run into it; then play with them and let them have confidence in you. Do not handle them more than is absolutely necessary, as I think it spoils them. The best and simplest way I think to get them to stand straight and show themselves off to the best advantage is to place a piece of paper round the show cage up to, say, the top bar. The majority will then stand on the top perch and stretch themselves to look over it, especially if you will scratch the bottom of the cage gently with the finger. This done several times the birds will get into the habit of standing up immediately they are run into a show cage. Some people, however, seem to think that if a bird is left in a show cage for a time it will train itself, but I find that it is not the length of time it is in the cage which does the trick but the constant handing and humouring. If a Yorkshire, however good it may be in all other respects, does not stand it does not show itself off, and, consequently, has not half the chance it would have if it had good position.

MOULTING AND TAILING.

I should also like to say a few words with reference to moulting. I pick out the likely looking birds and put them up in pairs, and of course get as much colour in them as I can in the usual way. There is just one point I should like to mention, and that is, "tailing young birds." This should be done when they are deep in the moult, about four feathers at a time, and it will hurt them very little, if any, as at this period the feathers are loose. Of course there are some which do not require it, or which I think would not carry a second tail correctly, so these I do not tail. With regard to flighting, this I do not agree with, as there is many a good bird ruined through it, and it is quite unnecessary, as a great number of shows now provide unflighted classes.

In conclusion, whilst advising you to wash your birds about five days before a show, and syringe them well each day afterwards up to two days before, running them for this purpose in a show cage, and thanking you one and all, gentlemen, for your kind attention, and also for the opportunity you have given me of expressing my opinion on what I consider the King of the Fancy, let me assure you that I shall always be glad to help you in any way that I may be able to, both for your own interests and for the interests of the Yorkshire Fancy generally.

A Feather 57½ inches long.

The head and tail feathers of an extraordinary cock Pheasant were found during the farmers' shoot at Earnsfield Wood last week, the longest feather measuring no less than 57½ inches from end to end. It is supposed that the bird had been wounded, and that a fox had eaten the body, leaving the head, which was white, and its extraordinary tail.—"North Herts Mail."

A Note on the Snipe.

We have only one Snipe that nests in these Islands—this is, the common Snipe. The Jack Snipe, a smaller bird, comes here in large numbers, so that, as a matter of fact, it is at times much the commoner of the species. It is only of recent years that anything has been known about the nesting of this bird; like its congeners it breeds on the marshes. The first nest was found as far North as Lapland, since when others have been noted in Siberia.

The Migration of Birds.

Fascinating in the extreme was the lucid lecture delivered by the Rev. F. L. Blathwayt on "The Migration of Birds," in the Lecture Hall of the Church House, Lincoln. There was a good attendance. The lecture was in aid of the Royal Society for the Protection of Birds. Beautiful and realistic lantern slides, lent by the society, illustrated the lecture in splendid style, and the manipulator of the lantern was Mr. C. W. Martyn. The lecturer gave the definition of birds, and referred to the different varieties, stating that in the British Isles there were 15 different orders of birds and 400 different species. Regarding the migration of birds, the lecturer said this was no new discovery, as it was known to the Ancients, but they did not know what happened to birds when they went away. He believed nearly all the birds in England migrated, and the question arose why did they migrate? The theory was put forward that in past ages the country had been much warmer than it was at the present time, and then came a great glacial period, and the birds were driven in a southerly direction by a great ice sheet. This was followed by the ice going back, and the birds endeavoured to get back to their ancestral homes. The lecturer next dealt with the marvellous speeds of migratory birds, and how they found their way. He thought they were helped by wind, and had good memories for land marks. They also had extraordinarily good sight, and could see long distances ahead.

My Aviary and its Construction.

By W. Roslyn.

A Few Reminiscences of Forty Years in the Fancy by the President of the Mansfield C.B.C.

The request of the Editor that I should give a short account of my aviary fills me with diffidence. To write about one's-self seems to require more courage than to write about any other subject, but when the request is couched in such courteous terms it would be unmannerly to refuse.

Before building my present residence, my birds were housed in a conservatory 25 ft. long by 11 ft. wide and 9 ft. high, and although the light was very fine for the birds, particularly in the dark days of winter, the hot days of summer left much to be desired in the place as an ideal aviary, and I made up my mind that when building a house I would build an aviary at the same time which should possess all the advantages of sunlight and air, with as few as possible of the disadvantages of my then existing aviary.

I therefore instructed the builder to put up a good, substantial brick building 24 ft. long by 8 ft. wide by 19 ft. high at the top of the lean-to, and 7 ft. high at the low side of roof, and to put in a brick partition wall 8 ft. from one end, to give an ante-room 8 ft. square. This gives me a place to keep seeds, etc., and it prevents the birds escaping, as it serves as a porch for entrance and exit.

This ante-room is fitted with door and window in the side, and water is laid on to a sink, and shelves are fitted in to place sundry odds and ends on. In the brick partition wall is a half-glass door leading into the aviary proper, and at the right of the door, let in flush with the wall, is a "horse-shoe" boiler to supply a double row of 4-inch hot water pipes running from end to end of the aviary near the back wall. This boiler is seldom used except for driving out the damp, as I do not believe in coddling my birds with a warm atmosphere, but damp is such an enemy to the well-being of birds that I prefer to place the enemy outside.

The roof is just an ordinary slate one, lined with matched boarding.

This inside aviary is not shown in the photo except just a corner of the slate roof, but it will be easy to understand its position when I say that it runs at right angles to the outside flight.

Entering from the ante-room, on the right is a narrow bench running from end to end, on which are placed the cages containing the exhibition stock, consisting of Thrushes, Blackbirds, Starlings (British and Foreign), Cow-birds, Mynahs, Hawfinches, Larks, Nuthatches, etc. I have adopted this method because the birds are then in a position almost identically the same as when at a show, and so get accustomed to people passing before their cages.

On the left are three small aviaries, 3 ft. square, reaching from floor to ceiling, and one 3 ft. by 7 ft., which serves as inside shelter for those birds flying in the outside flight, which is entered by a door leading out of their inside shelter.

This leaves a fairly wide passage between the birds in cages and the small aviaries, and the whole is well lighted by two large top-lights, which also open for ventilation, leaving the outside walls unbroken.

The builder had done the outside work very well, but as he knew nothing about the requirements of birds—and cared less—I took the matter in my own hands, and being fairly well used to handling simple joiner's tools, I constructed the internal fittings and the outside flight myself.

This is really simple in design, and not so difficult to construct as might appear from the picture.

It will be observed that it is composed of a series of arches from front to back, and to form these arches the requisite bow was cut from a solid 1-inch board and morticed into the turned upright posts, which were in turn morticed into the wall plates. These wall plates are, one on the top of the boundary wall at the back and the other on the front stand on four courses of bricks, both being firmly bedded in mortar.

This gave me the skeleton of the structure, and all that remained to be done was to make the frames to stretch the ½-inch mesh wire on and to cover the roof from arch to arch with wire of the same mesh. The frames were made and screwed to the inside of the turned posts, and so made to solidify the whole.

The floors, both inside and out, are of cement concrete, to keep out rats, which are not unknown in this vicinity. This floor-laying was beyond my powers, but a builder fancier—from whom I have received much kind assistance—came to my aid, and laid the floor for me, and made an excellent arrangement for a bath by fixing in the floor an ordinary stone kitchen sink. This bath is connected with a drain, and is one of the best things I have seen for this purpose.

The bushes are of the ordinary common gorse, which grows close to me in great profusion, and when it gets soiled it is taken out and burned, and a fresh supply fetched in.

In the picture the maid is holding a long wooden tray full of shepherd's purse, seeding grass, etc. This tray plays an important part in the general management. Having the care and supervision of large works, my time is valuable, and must be economised as much as possible, and when at home I am in my office at about 6.20 every morning. Before I go, I take the tray and put into it all the food and water pots, and I may say *en passant* that I do not use tins, as I believe that food and water keep better in pots or glass vessels. I then carry the tray into the kitchen. I am at home again for breakfast at 7.30 sharp, and whilst making my morning meal the maid washes all the pots and refills them, and they are then ready for me to carry in and place in their respective positions. I imagine I hear some fancier saying, "Lucky man to have such a maid!" I acknowledge this, and I do not forget it when the birds win. Probably no fancier ever had a better maid in this particular respect, and her attention to this matter ensures perfect cleanliness.

The outside flight, it will be seen, has five of the wire frames, and as these are made each 3 ft. wide to save waste of wire and trouble of cutting, they make the flight 15 ft. long and 5 ft. wide by 7 ft. high.

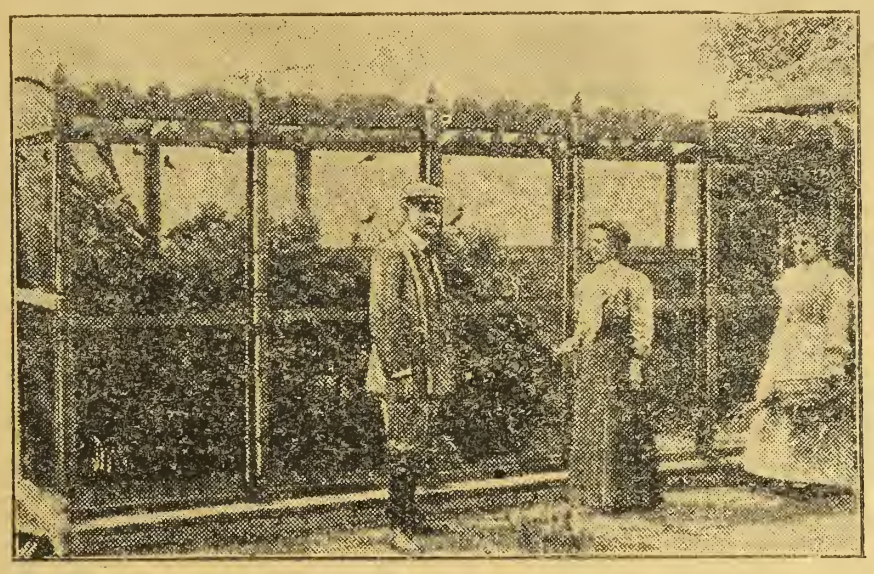
Coming as this flight does within a few yards of the drawing-room window, it is most interesting to watch the doings of the birds, and as I write this some Canaries are trying to break the ice in the bath to get a wash. The cost of the whole, including heating apparatus, has been about £35.

Before leaving this part of my subject, I should like to advise all fanciers who are thinking of making an aviary, either indoors or out, to make it large enough, if possible, to get in and walk about amongst the birds.

Under these conditions the birds will become very tame after a time, and will take mealworms or other dainties from their owner's fingers.

My British Starling, which has been very successful this season, will follow me all over the place for a mealworm. When one is thrown to him he will catch it like a dog. He can thus be left at liberty until the time arrives for dispatch to a show, and he is quite steady in his show cage. This means that he can have the free use of the bath, which, as a conditioner, has no equal.

Flying in the outside flight are Cockatiels, Bullfinches, Goldfinches, Greenfinches, Siskins, Linnets, Zebra-finches, Nuns, Cardinals, Nutmeg-finches, etc., and although some of them are now old, they keep in good hard feather and condition.



Mr. Roslyn's Outside Aviary, 18 feet long. Inside Aviary, a well-built brick structure 16 feet by 8 feet by 13 feet high, lighted by two skylights. Floors in both cases of cement to exclude rats.

NOW READY!

AN ENTIRELY NEW SERIES OF

COLOURED POSTCARDS OF HYBRIDS.

On this Series the following are . . . . beautifully portrayed by Mr. H. Norman :—

(1) **Jonque Four-pointed Goldfinch-Canary.**
(2) **Goldfinch-Bullfinch.**
(3) **Goldfinch-Redpoll.**
(4) **Greenfinch-Bullfinch.**
(5) **Linnet-Bullfinch.**

Price 1d. each.

On Order from any Newsagent, or from

"Cage Birds," 154, FLEET STREET, LONDON, E.C.

The Protection of Wild Birds.

The West Riding County Council propose to make application to the Home Secretary for an order as follows:—

To add the under-mentioned birds to the Wild Birds Protection Act, 1880:—

Hedgesparrow, Raven, Tree Sparrow, Twite, Marsh Harrier, Hen Harrier, Montagu's Harrier, Rough-legged Buzzard, Sea Eagle, Gadwall, Pintail Duck, Tufted Duck, Scoter Duck, Goosander, Turtle Dove, Pallas' Sandgrouse, Quail, Landrail or Cornerake, Spotted Crake, Waterrail, Golden Plover, Kentish Plover, Terns—Black, Sandwich, Roseate, Arctic, Common, and Little Tern.

That the following may be added to the list of birds protected from the 12th day of August to the 1st day of March, thus extending the protection to the whole year:—

Hedgesparrow, Raven, Tree Sparrow, Twite, Marsh Harrier, Hen Harrier, Montagu's Harrier, Rough-legged Buzzard, Sea Eagle, Turtle Dove, Pallas' Sandgrouse, Spotted Crake, Waterrail, Terns (as above), Bee Eater, Stone Curlew or Thick-knee, Dotterel, Black-headed Gull, and Kittiwake.

That the shooting of any wild bird on Sundays be prohibited (thus putting wild birds on the same footing as game birds).

That the eggs of all wild birds included in the schedule to the Wild Birds Protection Act, 1880 (as extended by the Home Secretary's Order), be protected.

That the close time for Plovers' eggs be as from the 15th April, instead of as from the 1st April, for a period of five years.

THE SCOTCH FANCY CANARY.

By Sr. Bride.

The Scotch Fancy Canary for the past half a century has been looked upon as the "king of cage birds." In Scotland, in days gone by, breeders had a special delight in cultivating the neck and humph, but of late the interest has abated. Thirty years ago the Palace Cage Bird Show of Scotland could command an entry of over a thousand Scotch Fancy Canaries, as against about a fourth of that number in 1906—a sad state of affairs; but the statement can be verified by figures. Various reasons have been assigned, no doubt many of them imaginary, but some of them real. The multiplicity of club shows has had a prejudicial effect upon breeders without doubt. Many of them content themselves with an annual show, which their forefathers would have been ashamed to have patronised. I regard this as anything but a healthy sign. Scotsmen are losing their Scotch Fancy breeders. I fear they have lost the ambition they once possessed for the Scotch Fancy Canary.

High Prices.

The ridiculously high prices at which this class of bird is exchanged is the greatest drawback of all; specimens which are considered quality have got into the hands of a few breeders, and they carefully study to keep the best for their own purposes, and by that means keep far ahead of others, for a time. Happily no one can have a monopoly of quality. Your readers know, as well as I can tell them, that quality disappears where it has reigned supreme, and reappears elsewhere, frequently in unexpected quarters.

Winners can never be guaranteed to produce winners; and this fact has probably kept the Fancy alive. Still the truth is that, at this moment, the Scotch Fancy languishes in comparison with the great activity displayed in other sections of the Canary Fancy.

The rough feathered type has had too much encouragement on the show bench, and that is responsible for a great deal of the widespread dissatisfaction with breeders. We have only to look at the question to realise the injustice which these shaggy monsters inflict upon birds, which by their smoothness in feather display the qualities they possess. A rough or shaggy feathered Scotch Fancy may be anything in point of quality. The long, rough, loose feather hides the contour and shape of the exhibit, and leaves the judge to imagine that it possesses properties which do not exist, and once such gets a footing on the show bench, it goes on unchallenged. The writer recollects a rough feathered Scotch Fancy which won many first prizes, and which in point of fact had little to commend it. It may be argued that if rough feathered specimens are to be put aside it will encourage plucking or trimming, and that it is preferable to recognise the roughness to plucking with all its attendant evils. The reply to that is that rules are in operation for dealing with these irregularities, and that they ought to be put into operation. By all means give us a bird in its natural condition, but it should comply with what is commonly recognised as the type or standard. There are various types, but they are all smooth in feather.

Rough Feather.

It is well known that a young bird, bred from rough Scotch Fancy Canaries, at a given stage in the moult, scores against all comers at the early shows, but as the season advances the winning powers diminish; but the opening successes have a bad effect upon the ordinary exhibitors.

Many of the best and most successful breeders have abandoned the Scotch Fancy Canary, and have gone over to the Norwich or Border, or given up the Fancy entirely, for reasons best known to themselves. The exhibiting of Canaries does not pay so well as it did a quarter of a century ago. The prize money has become so reduced that it is scarcely worth while entering upon competition; further, the activity on the part of railway companies in exacting the carriage of boxes in charge of the owner or a friend has had a bad effect upon the entries. Fanciers compete to win. Few have the inclination to gain a first prize for the simple honour of dropping shillings on the transaction; that idea is fast dying out. If the Scotch Fancy Canary is to recover its lost position there must be compensation for the trouble of exhibiting; how that is to be brought about is for managers and members of associations to determine, but the monetary aspect cannot be lost sight of.

Edinburgh to the Fore.

Edinburgh has taken a very prominent part in fostering the Scotch Fancy Canary. Breeders in that city were at one time famed for producing solid stock, and supplying fanciers in all quarters with Scotch Fancy Canaries at reasonable prices, but that is changed. High figures are demanded and obtained to day

ILLUSTRATED IDEAS

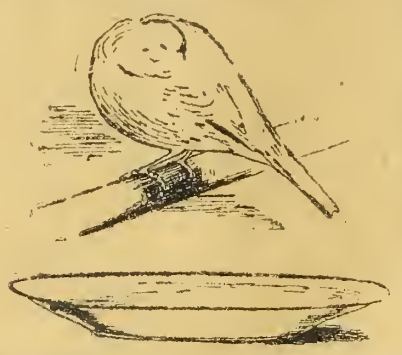
Under this heading we shall illustrate weekly some idea useful to the bird-keeper. Readers are invited to send us particulars of any novel and practical appliance of use in our hobby, either in cage, birdroom or aviary, with a rough sketch of same where possible. Every "Illustrated Idea" used in this column will entitle the sender thereof to a postal order for two shillings and sixpence.

No. 77.

RED MITE CATCHER.

Sent by F. DODD, Victoria Street, Braintree.

Mr. Dodd writes:—I enclose an illustrated idea, called Red Mite Catcher, as used by me every season with great success. Although stopping up cracks and using turpentine, etc., decrease their numbers, yet I generally get a fair amount. If the following is carried out I will guarantee that it will keep them down. At night time place a vessel of water directly under the perch of bird or birds; the bird will be in this position all night. As soon as the Red Mite attacks the bird the bird shakes



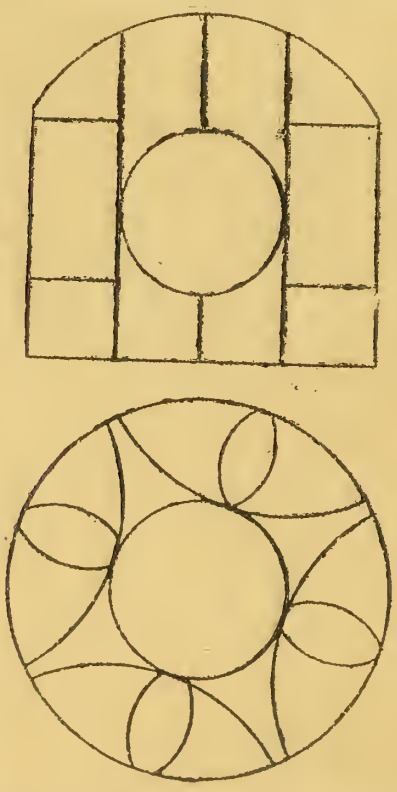
its feathers, and of course the mites fall into the water, where they are helpless and cannot get out. First thing in the morning remove the vessel and throw away the contents, cleaning the same. This is very simple, costs nothing, and if carried out as these instructions are given, red mite will be caught in hundreds. This is a fatal trap. I have taken vessels out covered with them. The idea is my own, which I always adopt, and, especially now the breeding season is approaching, would be of some use to some fanciers. This is the first time I have sent anything (besides advts.) to your valuable paper, though wishing it great success. I never miss my CAGE BIRDS.

No. 78.

WIRE GUARDS FOR FOUNTAIN.

Sent by W. EARP, Remenham Hill, Henley-on-Thames.

I have to use glass fountains a great deal in my aviaries and flight cages. I used to find that the birds were always bathing in the zinc bottoms, so I had these wire guards made to my own pattern, which are easily placed on, or taken off. The birds can still reach



the water, but cannot soil it by bathing in it, which soon empties a fountain. They are made of fine wire, soldered together, and cost about 4d. each. No. II. in sketch requires a small piece of wire in each corner to keep it in position. Fanciers who use them will find them very efficient in every way. They save time and trouble, besides keeping water clean. —W. EARP.

THE YOUNG NATURALIST.

Prizes of 1s. and two of 6d. each will be given for respectively the best and two second best cuttings or original bits about birds. Competitors must be children under sixteen years of age. All efforts must be briefly and clearly written, and ON ONE SIDE OF THE PAPER ONLY.

Two stars indicate the Winning Contribution; one Star the runners up.

There are two very well known and beautiful pheasants which Uncle Peter's nephew has not mentioned in his list. He must have seen the birds, but perhaps he did not recognise them as pheasants, although Uncle Peter hopes that every young reader of this column is trying to remember how all the birds he sees and hears about are arranged in systematic groups. Without some such arrangement it would be impossible to recollect all we learn about the many different kinds of birds. Well, the two pheasants Uncle Peter means are the Peacock and the Guinea Fowl, both handsome and striking birds, though the Peacock, in his brilliant metallic coat of many colours, is very different from the Guinea Fowl, in his plain grey, beautifully spotted with white. Both birds have strange voices; the Peacock's is loud and wild, and is said to predict rain. The Guinea Fowl seems to call out, "Come back, come back, come back." Like the common Pheasant of our preserves, both these birds are very good to eat. They are not indigenous in this country, though they are acclimatised and domesticated and breed freely with us. The Peacock was imported from India, and the Guinea Fowl from Africa.

*Our Polly.

In August, 1903, my father purchased three young Blue-fronted Amazon Parrots. These birds inhabit Southern and Central Brazil, Paraguay, Argentina. They are the most freely imported of all the Amazons, and are very long lived and excellent talkers, in fact, they can nearly equal the Grey Parrots. Well, these three Parrots came in a very low, oblong cage, with a slated bottom. When they arrived two birds emerged from the packing-case, into the required space, but one was very wild, and would not move from the corner. My father then put his hand in to move it, and succeeded in doing so, but received a very severe bite on the finger. Two of them were very strong, but one was rather delicate. We fed them at first on boiled maize, fruit, dry canary, hemp and sunflower seed, and they all progressed well. After some time we disposed of two of them, keeping the weakly one for ourselves because she became the tamest. You cannot imagine how tame she is. She will take food from our mouths, perch on our finger, or anything. When she was thoroughly tame she was allowed her liberty all day during the summer, until she began to bite the bark off the fruit trees. When the fruit is ripe she will come to anyone who will take her to the currants, and, when she is put in the bushes she will bite anyone who tries to take her away. She can now call us all by name, and say almost anything.—Sent by HAROLD RUDKIN (aged 13), Belton, Uppingham.

*Birds in our Aviary.

We have eight birds in our aviary. There are three Missel Thrushes and two Song Thrushes. There are also two Blackbirds and a Starling. The Missel Thrushes are a great deal like the Song Thrushes only very much larger. They are a rich brown on their back, and cream, with very dark brown spots, on their breasts. The old Blackbird is quite black, but the young one is a dark brown. The Starling is very pretty indeed, for its breast is black and covered with beautiful white spots, and it also sings very sweetly, and papa likes it very much. I have also a Lark of my own. It is only a young one, but it is very pretty. We have also a Jay, and papa sometimes lets it into the aviary, but it does not interfere with the other birds.—I am, yours truly, MAY IVES (aged 9), 15, Dartmouth Road, Bournbrook, Birmingham.

*Flight of Birds.

Few people have any idea of the remarkable power of flight which birds possess, or the speed which some of them attain. Swallows fly at an average speed of 100 miles an hour, but they soon grow weary, and it is among ocean birds that one sees the most wonderful exhibitions of sustained flight. Sea-gulls frequently accompany a ship the whole distance across the Atlantic, though they drop down, now and then, to take a nap on the heaving surface of the tumbling sea. All birds which have great power of flight have long wings with sharply-pointed ends.—ERNEST WHITE (aged 13 years), Leigh Terrace, Park Road, Cowes, I.O.W.

Cuckoo.

Here is a bird whose mellow voice we are all glad to hear. It makes us feel very joyful when the Cuckoo calls out his own name, as if to say, "Here I am again! Winter is gone, and a good time is coming. Be merry like me!" He calls out as he is flying sometimes, but oftener he sits on a branch to make his pleasant music, and as he shouts aloud he turns his head and body from side to side, so that the sound he makes is thrown to the right and left. You cannot tell where he is sitting, and often you would guess quite wrong, although you may hear him crying "Cuckoo, Cuckoo," quite near as it seems. It is wise of him to do this, for he wishes to be hidden.—Sent by ELSIE HUMPHRIES (age 11 years), 74, Cedar Street, Bootle, Liverpool.

All communications for this column should be written on one side of the paper only, duly authenticated with the name and address of the writer, not necessarily for publication, and sent to H. Norman, Editor, "Wild Bird Life," "Eastcote," Alma Road, Carshalton, Surrey, by Monday in each week. Original observations and records invited.

A COUNTRY WALK IN WINTER TIME.

By JOHN S. CRAWFORD,
A Well-known Glasgow Naturalist.

I started early, with the intention of walking in a circle of about fifteen miles area. How cold it was that morning as I stepped out of the house into several inches of snow, and I was nigh turning back into the warmth of the house again, but, drawing my coat tighter about me, I plodded on, determined to see how it fared with my feathered friends.

LITTLE TYRANTS.

Shortly after I came across a small company of Sparrows, making a meal from a handful of crumbs, which some kind friend of the little tyrant had placed on their doorstep, and which I feel sure was greatly appreciated by that common, but nevertheless beautiful, little chirper that morning. Angry though they compel one to feel at times with their endless depredations, I somehow felt compassion on them that morning; it was so cold, and they seemed so hard set for a meal, and yet through it all they prove themselves hardy little nippers, and multiply two-fold year by year, and perhaps a word or two here as to Sparrow clubs would not come amiss. It is believed by farmers, and shared by others, that it is owing to the Wild Bird Protection Acts, and the Gun License Act, that Sparrows, Rooks, and other birds which harry the fields and do so much harm in orchards multiply, and do more damage year by year, but in this they are wrong, and I would point out that it is owing to the mildness of the last three or four winters that these pests have become so numerous, and that if a severe winter be encountered they will soon be thinned down to reasonable numbers. One cannot deny the damage these feathered pests do, but to include such birds as the Lark, Rook, Chaffinch, and some others, is altogether wrong, and should be thoroughly dealt with; and it is not our residential Woodpigeons, Rooks, etc., which do most damage, but Foreign birds, and if farmers would only take the advice of experienced naturalists on the matter it would go better with some of our so-called bird vermin. But, to return to my story. Shortly after passing the Sparrows I came across a Song Thrush dead, and, to all outward appearances, from sheer starvation.

HARDY BOB.

While looking down on the dead songster I heard a sharp, cheery note, and, looking up, espied a few yards further on, perched on the stump of an oak, a little Robin singing cheerily. What a contrast! One naturally wonders how this large, strong-looking bird, measuring, as it does, 8½ ins. to 9 ins. in length, should be lying dead and this perky little Redbreast, whose size is only about half as many inches, should be there singing so cheerily. This is not an individual case, but is only too true that if severe winter weather be encountered you may find many of these beautiful and handsome musicians lying frozen among the snow. How very sad it seems, yet it is Dame Nature who thus allows the Thrush to so fall a victim to Giant Winter, and blesses our little redbreasted friend with a more plentiful store of its necessities of life.

THE PRETTY LITTLE SISKIN.

A little later, while passing a small belt of trees, I caught sight of that small, trim, yellow-breasted songster, the Siskin. This is a very pretty little bird, and much in demand by keepers of British birds as a cage bird, being very docile and having a pleasing ditty, and may be seen at a good many bird shows throughout the country. It is a winter visitant to this country only, returning to its arctic home in the summer to breed, but its nest is often found in the north of Scotland, and I have seen its nest there on a few occasions, containing eggs, both of which (nest and eggs) resemble those of the Greenfinch, though smaller in size. I also came across a few Redwings. This is a very shy visitor, generally found in the company of Fieldfares, Missel Thrush, and the like.

THE BIRDS THAT WERE NUMEROUS.

A flock of Chaffinches also flashed past me, and appeared to be males. Redpolls, Twites, Linnets, and Bramblefinch, or Bramblings, were also numerous, but the latter bird only visits us in numbers when severe winter weather drives them south in search of food. Crows and Rooks were in numbers too, and I happened to see a Pied specimen, which is occasionally met with. Of Lapwings there were many, twisting and curving in mid-air, all the time giving out their mournful cry "Pee-weet," so familiar. As to the Waterfowl, while passing a small pond, then under Jack Frost's icy hand, I observed huddled together a small company of Waterhen or Moorhen, and it is, indeed, strange that these birds, which are mostly found singly, should be standing banded like this. Weather as we are having, when the ground is covered with snow, is of service to gamekeepers and others, as they can easily trace stoats and other vermin who have been harrying their beloved game to their hidden homes by means of the tracks they leave in the snow, and while passing along that day I could make out many lines of tracks made by rabbits, and it needed no Redskin to lead one to their warrens.

BIRD FROLICS.

On my return journey I called on a friend, and spent quite a time watching the antics of the Tits, Sparrows, Starlings, and similar garden visitors, round a large nut hung out in the lawn for their benefit, and while sitting with my friend the scarcity of the Landrail or Corncrake came up, and one reason my friend heard was owing to the introduction of the sowing machine, but it would be interesting to hear from other naturalists what their opinion was, and we may come to the reason by that method. Swallows I have noticed have been a little scarce also this summer.

Bidding my friend good-bye, I hurried home and was soon enjoying a hearty repast after my cold, though not uninteresting country walk. In penning these few lines my object is to point out that, though winter may be cold and dreary, there is plenty to see and interest one in a good walk into the country, if they only be prepared to face the cold and the blast.

Notes and Queries.

The Birds which Visited our Garden.

During the late severe weather, when the snow was on the ground, our garden was visited by a large number of birds. I then made up my mind to save all the eatable bits I could get hold of for them. I was able to get a good many, and fed the birds twice a day. They were always ready for the food I gave them, and some of them would wait on the ground for it. Among the birds which visited our garden was a Chaffinch (a bird which is very rarely seen in the middle of the town). The Chaffinch came for two or three days, and then I never saw it again. There were also several Robins among the rest, and a few Thrushes and Blackbirds were to be seen. One day three Seagulls came, but they did not have a peaceful time, for the other birds chased them away. The Seagulls were very graceful, and it was quite a treat to watch them glide up and down and feed. Those birds have a great many hardships to go through during the snow and the frost, and they are nearly starved to death. They are ready to pick up a crumb anywhere. As the warm weather comes they begin to build their nests and lay their eggs. It is very interesting to see them gathering bits of straw, etc., for their nests, and they are very busy during the breeding season. If people were to study the birds instead of stealing their eggs it would be far nicer for them and for the birds too!—WALTER E. HALSALL.

The Golden Crested Wren.

Whilst in my garden this morning (Feb. 4th), about ten o'clock, I saw, very busy amongst the fruit trees, a golden-crested Wren. I have been in Hessle over 30 years, and this is the first time I have seen this little stranger. The last one, and the only one I ever saw alive, was on the borders of Brocklesby Park in 1866. It will be interesting to know if this, the smallest of British birds, is common in any part of Yorkshire. JOHN STOW (Hessle).

PARROT LOVERS

Should send post-card immediately for our new enlarged book entitled "Parrot Prattle" (registered copyright, infringers and imitators will be proceeded against). This book contains 120 pages of very interesting facts, and gives valuable advice and hints to all parrot buyers. Full details of our original system of selling Parrots on four week's trial, at our risk, which we were the first to introduce. We sell Parrots of all descriptions on four weeks' trial, at our risk, before settlement. Cheapest and best in the Kingdom, and any Parrot sold by us, and not giving full satisfaction, will be exchanged any time within twelve months. Remember we lead and others try to follow. Write to other dealers as well as us, and judge for yourselves. Lists of Parrots for sale and above book post free on receipt of postcard.

ALWAYS USE OUR

DEPOSIT SYSTEM.

We are not responsible for the statements made in advertisements, nor for the *bona-fides* of either buyers or sellers. In all transactions the adoption of our Deposit System should be insisted upon.

IMPORTANT.

SEND THE FULL COMMISSION.—If the full commission does not accompany the deposit, the vendor will not be notified of its receipt until the amount deficient, plus the extra postage incurred, has been paid to us.

HOW TO REMIT.—Under no circumstances will Cheques or Post-dated Money Orders be accepted as deposits. Uncrossed Postal Orders must be sent and the numbers taken for safety.

RULES.

1.—PROCEDURE.—The intending purchaser should send to this office the amount of the purchase (our deposit fee included), and at the same time he should communicate with the seller, stating what it is he requires sent on approval. We acknowledge receipt of the deposit to both parties. In all cases the depositor should give his name and address, and also that of the vendor, and must write same clearly and distinctly.

2.—END OF TRANSACTION.—The deposit is retained by us until we hear from *both* parties that the transaction has been completed. If a sale has been effected, we hand the amount deposited to the seller. If a sale has *not* been effected, we return the amount to the depositor. The transaction must be conducted by the parties themselves. We merely hold the deposit.

3.—AMOUNT OF COMMISSION.—The fee is 6d. for each £1, or fraction of £1, and it must he sent at same time as the deposit.

4.—IMPORTANT POINTS.—The depositor must decide withiu forty-eight hours of the receipt of the goods whether he will keep or return the same, unless, that is, some other period of approval (of which we must he advised) is agreed upon by both parties. The depositor must at the same time notify us of the fact that he has returned the goods. If the goods are not returned within the said forty-eight hours, we reserve the right to send the deposit to the seller after the expiration of that period. Aud should the seller fail within three days to notify us of the receipt of his goods back again, the transaction will be treated as ended, and the deposit he returned to the depositor.

5.—A SATISFACTORY PURCHASE.—When a transaction has been completed to the satisfaction of both depositor and seller, both parties must at once return the deposit receipts as a guarantee of its completion. The depositor must at the same time instruct us to pay over the deposit to the seller.

6.—GOODS ALREADY SOLD.—If the goods are sold before our deposit note reaches the seller, or, if for any other reason he declines to do business, he must at once return the deposit note to us. Failing its receipt, we reserve the right to return the deposit to the sender after the expiration of three days.

7.—FRESH TRANSACTION.—In case no sale he effected, a deposit is available for purposes of a fresh transaction, provided another deposit fee he paid.

8.—GOODS IN TRANSIT.—Goods in transit are at the seller's risk, and any damage or loss sustained on the journey must be borne by the seller. But goods not approved of must be properly packed and returned by the same means as were used in sending the same.

9.—PAYMENT OF CARRIAGE.—The payment of carriage must be a matter for arrangement hetween the vendor and depositor. We do not undertake to settle disputes affecting questions of carriage. But in the absence of other arrangements the purchaser is liable for the carriage of the goods, and if the goods are sent on approval and returned, each party pays the carriage one way.

10.—DISPUTES.—In case of a dispute, the decision of the Editor is final.

PREPAID ADVERTISEMENTS

UNDISPLAYED.—Three Words a Penny up to eighteen words, MINIMUM Fourpence. One Halfpenny per Word for each word over eighteen.

IMPORTANT NOTE.—Two or more Advertisements coming from the same advertiser, even if sent in different names, are reckoned together and counted as one Advertisement.

Headlines or Footlines 6d., 9d., 1/-, 1/6, according to size.

Postal Orders must be sent as far as possible. All moneys should be made payable to F. CARL. Advertisements close Tuesdays first post in each week, and should bo sent to the Advertisement Manager, CAGE BIRDS, 154, Fleet Street, London. Terms for Display Advertisements on application.

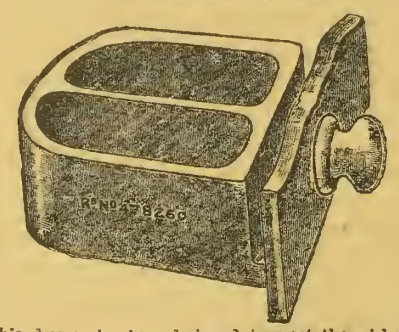
PARR'S POTTERY

NEST PANS, DRINKERS, FOUNTAINS, BATHS (Oval, Round and Square).

"Duplex"

Cut Partition Drawer.



This drawer has been designed to meet the wishes of Breeders so the foods can be separated instead of mixing together. Thus having one drawer instead of two. Made in two sizes.

Mr. C. A. House, Claude St. John and J. North all say it is a good idea.

Wire door falls into the groove and is not in contact with food.

Seen It ?

MY NEW POST FREE CATALOGUE.

32 Pages without Cover, with One Hundred & Six Illustrations

Of Aviaries, Cages, and all Appliances for the Birdroom, together with Foods, Medicines and all Seeds, etc., suitable for all Cage Birds. If you have not already sent for one DO SO AT ONCE, it will save you money, vexation, disappointment, it being an up-to-date Catalogue, and not a three or four page circular bill (the so-called illustrated lists and catalogues).

W. RUDD, The Bird Specialist, Norwich.

IMPROVED PUNCHED BAR FRONTS.
Sizes stocked.—12 by 12, 3d.; 14 by 12, 3½d.; 16 by 12, 4d.; 18 by 12, 4½d.; 20 by 12, 5d.; Other sizes equally cheap. Neatly made and finished in first-class style. Satisfaction guaranteed, or money returned in full. Wholesale prices sent on application.—T. A. Fox, 7, Liverpool Road, St. Helens.

BREEDING CAGES WITH LOOSE FRONTS.
First-class breeding cages, made of sound pine boards, loose fronts, sand trays, etc., 18 by 16 by 9, 2/9; 20 by 18 by 9, 3/3; 24 by 18 by 11, 3/9; double, 36 by 18 by 9, 6/6; ditto, 36 by 18 by 11, 8/6; any size to order. Note: These cages are made of best pine boards, not soap boxes.—Address, Bird and Appliance Stores, 32, Clowes-st., West Gorton.

TRY OUR BARGAIN PARCEL, 2s. LOT.
Boards for cage making, 6 ft. long, 11 in. wide, 18 by 12 front, seed hopper, packet medicated fibre and cow hair, egg pan, white clay nest pan and bracket, dozen perches and dozen metal red mite traps and perch holders, 2/- the lot; boards 11 in. broad, 1½ ft., punched bar fronts, 5d. foot; mahogany stain, 6d. pint; sanitary colourine, 6d. pint; enamel, all colours, 8d. tin; dozen perches, 3d.; Crystal Palace aviary, 3 ft. by 3 ft., 8/6, carriage paid; state requirements.—Ross, Cage Maker, Forres, N.B.

MY SELF-ACTING SPRING NET TRAPS: catch birds of every description without any attention, price 1s. 6d.; larger size 2s.; carriage paid. I have received hundreds of testimonials stating they are worth double the money of any trap advertised. Read two, and beware of cheaper imitations that are not worth the cost of carriage. "Sir,—I received the net trap; it is honestly worth a dozen of some of the nets advertised. I tried it this afternoon, and caught more birds in two hours than I have caught in other net traps in two months.—G. Matthews, 37, Myrtle Street, Stockport." "Sir,—Trap arrived safe. It is far superior to all others. I have to-day caught fifteen Linnets, six Redpolls, four Chaffinches, three Greenfinches. J. Scragg, The Brewery, Armitage Road, Rugeley." Patent self-setting trap, Patent 23,927, warranted to catch birds and re-set without attention, 1s. 6d.; call cages, 4d. each; trap cages, single 5d., double 8d., treble 1s. 3d.; birdlime, best and strongest in England, 1s. 6d. lb., 10d. ½lb.; send for sample tin, 3d. post free. Loose netting made from the best thread obtainable, ¾-in. mesh, 6-ft. wide, 3d. yard, 9-ft. wide, 4d.; Lark netting, 1½-in. mesh, 5 yards wide, 6d. yard, post free.—Henry Morris, The Aviaries, Cape Hill, Birmingham.

CAGES. CAGES.
All our cages are properly finished and fitted complete, and fit for any room, all made by practical workmen. Deposit with Editor and see what you are getting. Single breeding cages, 3/6; double breeders, 6/6 and 7/6; flight cages, 5/6; Thrush or Blackbird cages, 3/6; Lark cages, 1/6 and 2/-; Linnet cages, 9d. and 1/6; box cages, 1/6, 2/-, 2/6, 3/-; Goldfinch and Bullfinch cages, 2/6; banging cages, 3/-; brass, 5/6, 7/6, 8/6, 9/6, 12/6.—West Riding Aviaries, Castleford.

IMPROVED WIRE FRONTS.
Sizes stocked:—12 by 10 or 12, 3d. each; 14 by 12, 3½d.; 16 by 12, 4d.; 18 by 12, 4½d.; 20 by 12, 5d.; 24 by 14, 6d.; other sizes to order, same rate of price; large Fronts, about 3d. per square foot, according to strength; Yorkshire Show, 15s. dozen; Baths, Seed Boxes, etc. Please note.—These fronts are made by experienced workmen, sliding door and seed holes in ready for use.—E. Bunner and Sons, Cage Makers, Copperas Hill, Liverpool.

3/- DOZEN.
The original challenge Canary nest pan, which has been on the market for the past 16 years, and has also been a pattern for others to work from. Have sold more pans than any other man living. Used and recommended by Mr. John Robson, and the only pan to-day that is sent out properly lined, made of white ware, swansdown lined, with wire bracket and screw hooks, all complete, and carriage paid, 3/- dozen, 1/9 half dozen, large or small size. Trade supplied. Tom Thomas, Bird Dealer, Neath.

BREEDING CAGES.
Now is the time to order your cages. We make best quality only, and fully guarantee all cages sent out. Mahogany stained and polished, sliding divisions, with arrangement for feeding young birds, loose wire fronts, fitted with sand trays and seed hoppers, single, 20 in., 2/6, 24 in., 3/6; double, 24 in., 4/-, 30 in., 5/-, 36 in., 6/- each. Don't be misled with common rubbish. It pays to buy the best; satisfaction guaranteed or money refunded; new list now ready.—The Sheffield Wire and Cage Co., 47, Surrey-st., Sheffield.

WRIGGLESWORTH & SONS

PUNCHED BAR AND CAGE WIRE.
Best polished tinned bar, any mesh, 16 or 14 wire gauge, 36 in., **10d.**; 40 in., **1/-**; 48 in., **1/3** dozen. Best straightened tinned cage wire, **4d.** lb., 7 lb. **2/-**.

PUNCHED BAR CAGE FRONTS.
Our fronts are made on a much improved principle, doing away with soldering and the objectionable acid used. Best quality only, ½ in. or ⅝ in. mesh, size 12 in. × 12 in., **5d.**; 14 in. × 12 in., **6d.**; 16 in. × 12 in., **7d.**; 18 in. × 12 in., **8d.**; 21 in. × 14 in., **9d.**; 24 in. × 14 in. **1/-** each. Special low price for dozen lots. All fronts above 12 in. high four crossbars. We shall be pleased to quote for any special size or mesh required. Enamelled black **1d.** per square foot extra.

SANITARY NEST PANS, LININGS, ETC.
Try our "Perfect" earthenware nest pan with strong iron bracket, 2/3 dozen. Complete sample, **5d.** post free. Special thick blocked felt linings, fit any pan, **10d.** dozen, post paid. Best Swansdown Linings **1/-** dozen, free. China Nest Eggs, **5d.** doz., post free.

NURSERY CAGES. EGG MILLS.
Try our combination Nursery Cage, light and roomy, **1/9** each. Our perfect Egg and Biscuit Mill should be in all bird rooms, large size, **2/6**; medium, **1/6** each.

CAGES, SEED BOXES, BATHS, ETC.
Black japanned seed boxes, glass fronts, best quality, 3 in. **3d.** each, **2/6** dozen; 4 in. **4d.** each, **3/-** dozen; 6 in. **5d.** each, **4/6** dozen. Breeders' Bird Baths, punched bar tops, enamelled bottoms, large size, **1/-** each; medium, **9d.** Postage 2d. extra. Bone knobs for cage drawers, **10d.** doz. post paid. Perches, **9d.** per dozen yards. Best planed boards for cage making, 11 in. by ⅜in. 2d. per foot. We shall be pleased to quote you for special cut lengths. Hygienic Cage Enamel, a specially prepared flat-drying Blue Enamel (not paint) for breeding cages, etc., in tins, **6d.**, **1/-**, and **2/-**. Send for our Illustrated List of Breeding and Flight Cages. White Sanitary Earthenware Pottery. Bird Glasses, Sprays, etc. Wholesale to the trade only. Telephone 111 Y.

Price 1/1, post free from CAGE BIRDS Offices,
154, FLEET STREET, LONDON, E.C.
OPINIONS OF THE PRESS.
LANCET: "This little book will be welcomed by all lovers of birds, whether ornithologists, aviculturists, or the owners of a single pet songster. The author deals with his subject in a thoroughly practical and scientific manner, and the results of his experiments prove the fallacy of some rule-of-thumb theories. . . . The book is well illustrated."
COUNTRY LIFE: " . . . a surprising amount of really valuable advice for all who keep small birds, whether in cages or aviaries. . . . Those who approach the subject with an open mind must admit the cogency of the author's arguments; and these, backed by a very wide experience at first hand, will prove hard nuts to crack for many of the champions of the 'good old methods.' . . . We venture to think that his experience will pave the way for a revolution in the methods of bird keeping in the near future."

MEDICINES.
DIARRHŒA, inflammation cure, nothing like it for hens during first nest, 7d. per ounce free.—Mather, 65, Albert-rd., Widnes.

PANNASSINA.
A medicinal preparation for Canaries and all kinds of cage birds, prevents and cures asthma, wheezing, loss of song and all diseases caused through damp and cold; is an excellent stimulant, and takes the birds easily through their moult. This speciality has built up a 30 years' reputation entirely on its own merits, invariably effecting a cure after every other remedy has failed. In 6d. and 1s. tins, postage 1d. extra. If you cannot obtain it from your tradesman, apply direct to W. J. Hammond, 19, Anstey Road, Coldharbour Lane, Camberwell, London, S.E. Agents wanted.

IMPORTANT NOTE.
Two or more Advertisements coming from the same advertiser, even if sent in different names, are reckoned together and counted as one advertisement.

HARRY ALLEN.

What, again! 1st, 2nd, and 3rd prizes twice in two days! It seems impossible, but it is true, and no wonder I win all before me with the kind of birds I keep and send out. I have the finest lot of Linnets in England, impossible to get better, and hard work to get birds as good. Big fine healthy cock Linnets, well pencilled, stand well, 2/- and 2/6; extra picked birds, sure mulers, and very tame, 3/- and 3/6 each. Remember the record 60 Mules, bred by three Linnets sold by me to Sergeant Smith. Good cock Linnets, singing grand, in a polished singing contest cage, with a packet of my special mixture and instruction how to feed, 4/6 the lot. Young house moulted Linnets, singing hard, finger tame, and taught by my champions, 7/6 and 8/6 each, with singing cage, real bargain; these birds are also fit for show, and sure mulers, can recommend them to anyone. Contest cages, 1/6 and 2/- each; 4 packets of my special mixture, 1/-. To encourage Linnet singing, I have had some books printed which tell you how to make Linnets sing at one another with their wings down, how to moult, and how to train for contests; anyone who gets this book will soon have some good birds, and will also see how easy it is to do the hat trick; send stamped envelope for particulars, the price is next to nothing, very near.—"114, Herne Hill-rd., London. Dear Sir,—I beg to inform you that I received the bird this morning (Friday) 10 a.m. quite safe. I am very well pleased with it. As you say in your advert., 'Still winning, but it is nothing surprising with the kind of birds I keep and send out.' Well, it is not at all surprising if the bird you have sent me is a sample. You can depend on doing good business with me.—Yours truly, H. Moss to H. Allen."—See singing results and last week's testimonials.—Harry Allen, 42, Brown Hill-cres., Harehills-lane, Leeds.

EXHIBITORS AND MULE BREEDERS.

Linnets! Linnets!! Twites! Twites!! I have a few extra large cock brown Linnets, well pencilled, with good brown backs, 1/-; special birds, 1/6; also a few extra large cock Twites, good shape, well marked, with nice thigh markings, 1/-; special birds 1/6; also a few Bullfinches, deep blood red-breast, good cap, large birds, 3/6; also a few Peartree Goldfinches, deep square blaze, extra large, well-buttoned, 4/-; special birds, 4/6; also a few large good-coloured Bramblefinches, Chaffinches, Greenfinches, hen Bullfinches, hen Goldfinches, cock Yellowhammers, 1/-; specials 1/6; and a few extra large brown Linnets, blood-red breast, in song, for muling, 1/- each. All these birds are well on seed, and are sent on three days' approval, cash or deposit. Buy from the catcher for best selected birds.—Matthews, Birdcatcher, 44, George-st., Hyde, Cheshire.

THERE ARE TWO WAYS

of buying birds. One is by sending away your money and having to put up with what you get in exchange for it, and the other is by buying from a man who sends his birds on approval, and refunds your money in full if you are not perfectly satisfied. I was the originator of this approval system in connection with wild birds, and am still the only one who sends wild birds on approval all the year round. Splendid large Worcestershire cock Goldfinches, in pink of health and condition, 2/6 each, three 6/6. Specially selected larger birds, to moult for exhibition or muling, 3/-, 4/-, and 5/- each. Hen Goldfinches, 1/- and 1/6 each. Cage moulted cock Goldfinch, in splendid song, just right for muling, 5/-. Grand large cock Siskins, very steady and full song, 3/6 each. Cock Bullfinches, splendid health and condition, 2/- and 2/6 each. Grand country-caught cock Linnets, with nut brown backs and red breasts, 1/- each, three 2/6, six 3/6. Few very large and warranted in song, 1/6 each, three 4/-. These Linnets are exactly the same as those supplied by me to the Linnet singers of "Leeds," "Hull," "Bolton," "Durham," "Leigh," etc., etc., and I have sold hundreds of contest winners during the past 16 years. Cock Goldfinch Mules, pure Finch song, 5/-, 6/-, and 7/6 each. Two real stormers, used to catching and sing anywhere, 10/- each. Hen Mules, 1/6 each. Cock Greenfinch Mules, Canary song, 4/-, 5/-, and 6/- each. Hens, 1/6 each. Muling hen Canaries, splendid large birds, 3/- and 4/- each. One two-year-old, hand-reared Lark, in full song, sing anywhere and anytime, a veritable street ringer and contest winner, 20/- lowest. Every description of cages in stock, from 3d. to £5. Dealers should send stamp for full trade list of sizes and price of cages. Self-acting spring net traps, warranted to catch and hold any bird, from Wren to Rook, 24in. loug, 1/- each, 18in. long, 9d. each. These net traps are by far the largest and best traps on the market; they have entirely superseded the old-fashioned ones, and are being used by all the leading Nightingale catchers. Patent self-setting and self-acting trap cages, 1/6 each. Clap nets of all sizes in stock. Send stamp for full printed list of all catchers' appliances, as used by all professional catchers throughout United Kingdom and many of the Colonies. Thousands of testimonials published in this paper alone, and piles of them open for inspection. Visitors to Birmingham are requested to call and inspect stock, open from 9 a.m. to 9 p.m. daily. Please note new address, by far the largest best stocked, and only centrally situated stores in Birmingham.

W. GORE, 131, GOOCH ST., BIRMINGHAM.

LATEST OPINION OF MACKLEY BROS.' BIRDS. ☞

"High Street, Uppingham, Rutland. Jan. 12th, 1907. Dear Sirs,—The two Birds arrived safe, in the PICTURE OF HEALTH; they are the BEST TYPE of Norwich Plainhead I ever saw. I am HIGHLY DELIGHTED with them. I shall certainly recommend you to all I have the opportunity of so doing. I never had the favour done me from any one FIRM but yours by sending birds on approval without the Deposit System. Trusting the Firm of MACKLEY BROS. may live and reign for the sake of their customers.—Yours faithfully, J. Waddingham to Mackley Bros."

Postal and Telegraphic Address: **MACKLEY BROS., (Jacob Mackley), NORWICH.**

FOR Sale, Norwich Plainheads.—Ritchie, Montrose-st., Brechin, Scotland.

GRAND yellow Norwich cocks, also buffs, 5/6 upwards; buff hens, 2/6, cold room bred, 1906.—Ashwell, Styvechale, Coventry.

LARGE variegated buff Norwich cock, 5/6; clear yellow hen, 3/6, 1906 bred; approval.—Wm. Reeder, Swan-st., Fakenham, Norfolk.

T. & E. WRIGHT, Tunn-st., Fakenham, Norfolk, have some good Norwich for sale; cocks from 7/6; hens from 3/6; all 1906; approval, deposit.

FOUR splendid clear Norwich cocks, full song, sell 5/6 each, 21/- the four; approval, deposit.—Arnsby, Finedon, Wellinboro'.

GOOD pairs, now breeding, to part with, 12s. 6d., 17s. 6d., 25s.; cocks from 8s. 6d.; hens 4s. 6d.; 1906 birds; approval.—Schofield, Saddler, Ipswich.

TWO 1906 Norwich hens, yellow 3/-, varicgated 2/6, very healthy.—Mrs. Griffiths, Oak Cottage, Horsham.

TEN pairs of Norwich, some fit to show, from 8/6, natural and colour fed.—Miss Sawbridge, Lutterworth, Leicestershire. x268

NORWICH buff cock, winner, with yellow hen, 32/6, worth 50/-; yellow cock, winner, with large buff hen, 22/6; cheap at £2; approval.—W. Palmer, Newby-st., Ripon.

LARGE clean yellow cock, Baker's strain, stout, and full of quality, sired many great winners, 1905 bred, price only 21/-, dirt cheap, cost treble.—Geo. Cubley, 3, Standard-ter., Long Sutton, Lincs.

NOW is the time.—I have some good Norwich hens, 4/-, 5/-, 6/-, and upwards; some good marked birds, cocks and hens; also Crested hens, good, at low prices; all on approval; state wants to F. J. Yallop, 23, Alexandra-rd., Norwich.

MR. BROWN has two yellow hens, 12/6 and 15/-; also two buff hens, 12/6; one buff cock, 20/-; one yellow, 25/-; these are grand birds, short and typical. —Brown, 62, Long-lane, Moldgreen, Huddersfield. (See Yorkshires.)

MR. HULSE has the yellow cock, second Coventry, for sale, 50/-; unflighted buff, third Cheltenham, 25/-, and a few others at 10/-, good size, quality, and colour; see Palace, Malvern, Cheltenham reports.—73, Chatsworth-st., Leicester.

PRIZE-BRED Plainhead Norwich cock Canaries, large buffs or yellows, 7/6, 8/6, 9/-, 10/- each; buffs and variegated hens, 3/6, 4/- each; good yellows, 4/-, 5/-, 6/- each; approval anywhere.—Walter Wells, Toftwood Aviaries, Dereham.

GRAND yellow cock, third special (Paisley), two years bred, 35/-; two monster variegated buff hens, 1904, 1905, 15/- each, worth double; stamp; approval. —H. Merchant, 2, Macdonald-st., Rutherglen, Glasgow.

PRIZE-BRED Norwich Plainheads, same strain as my winners at Norwich, all in open competition; grand cocks, 5s. 6d., 7s. 6d. upwards; matched pairs, 8s. 6d., 10s. 6d., to 40s.; hens, 3s. 6d., 5s. 6d.; approval.—Geo. Wright, 51, Silver Street, Norwich.

HIGH-CLASS Norwich cocks, 4s. 6d. 5s. 3d., 6s., 8s., hens 2s., 2s. 6d., 3s.; prize bred cocks, 10s., 12s., 15s.; hens, 4s., 5s.; guaranteed healthy; not suited, money returned.—Alfred Riley, grocer, Lower Church Gate, Leicester.

NORWICH Canaries, matched pairs, 10/-, 12/-, 14/-; also Cinnamons, 10/-, 12/-; Crest and Crestbred, same strain as my winner, Coventry, only time shown, 12/-, 14/-, 16/-, cocks 10/-, 12/-, worth double, all cold room bred.—W. Taylor, Station-rd., Hinckley.

GRAND buff cock, 12/6; one, 10/-; hens, 3/-, 4/-, 5/-; large double breeding cages, carpenter made, fitted with nest pans, ready for use, nearly new, 4/-; each bird approval, deposit CAGE BIRDS.—T. Robson, 58, Dale-rd., Gospel Oak, London.

I INVITE you to call and inspect my Crested, Crestbred, and Norwich, buff and yellow, Plainheads, all at workmen's prices; any birds sent on seven days' approval.—Marsh, Freemasou's Arms, Merceron-st., Brady-st., Whitechapel-rd.

SHORTLY removing, are obliged to sell more stock than at first intended; good stock buff cocks, from 15/-; hens, 7/6; good pairs, 15/-, Ambrose, Stoke Newington, strain direct, Bermondsey Challenge Cup winners, etc.—Lupton and Jordan, 10, Curlew-st., Horselydown London S.E. (Genuine.)

HAIGH & SON have a few good birds for sale, mostly yellow cocks and buff hens, matched pairs from 20/- to 40/, one of the oldest and most reliable strains in the world, cannot be beaten for type and quality; inspection invited.—10, Fairfield-rd., Buttershaw, Bradford.

POWICK'S Champion Norwich, the same strain as the winners at all leading shows, cocks 7s. 6d., 10s. 6d.; hens 5s. 6d., 7s. 6d. each; pairs, mated to breed winners, 10s. 6d., 15s. 6d., and 20s. per pair; no rubbish; ten days' approval.—Wm. Powick, Eastfield House, Dewsbury, Yorks.

HEALTHY Norwich plainheads, matched pairs, 7s. 6d., 8s. 6d., 10s., 15s., upwards; cocks, 5s. 6d., 7s. 6d., 10s. upwards; hens, 3s. 6d., 5s., 7s. 6d., upwards; special terms to dealers; inquiries invited; cold-room bred; approval.—S. Roberts, 39, Gloucester Street, Unthank Road, Norwich.

TWO grand evenly marked Norwich cocks, yellow and buff, colour fed, 10/-, 8/6; one extra large, typical Bullfinch type, buff Norwich hen, 5/6; grand Goldfinch Mule, full song, 4/6; approval with pleasure, cash or deposit; stamp reply.—Freeman, 2½, Chapel-st., Birmingham.

LARGE Norwich yellow cock Canaries, 7/6; buff cocks, 5/6; yellow hens, 4/-; buff bens, 2/6; splendid cock Goldfinch Mules, good songsters, 7/-; bens, 1/-; cock Goldfinches, 3/-; Sib bred hens, 4/-; Cheveral cock Goldfinch, 10/-.—J. Green, Tailor, Dereham.

GOOD Norwich cocks, in full song, 5s. 6d., 6s. 6d., 7s. 6d., 10s., 12s. 6d., 15s. 6d., 20s. each; hens, 3s. 6d., 4s. 6d., 5s. 6d., 7s. 6d., 10s. each; pairs, matched for breeding, 8s., 9s., 10s. 6d., 12s., 15s., 20s. pair; stamp, reply.—Stewart Brothers, Surrey Street, Norwich. x266

SPECIAL Notice.—Must sacrifice, to make room for breeding, a lot of my large typical really good Norwich Plainheads, 1906, buffs, yellows, and variegated hens, 4/- and 6/-; cocks, 7/6 and 10/6; also few good buff Yorkshires equally cheap; approval anywhere; inspection by appointment.—Miss Mountney, Ivy Cottage, Mill Hill, N.W.

SPECIAL! Special!! Really good selection of high-class Plainheads, healthy and typical, judiciously matched prize-bred pairs, 8/6, 10/-, 12/6, 15/-, 20/-, 30/- upwards; odd hens and cocks, on song, reasonable, all cold room bred, and willingly on approval anywhere; highest satisfaction guaranteed with birds that will tempt purchasers to give me further orders. H. Amiss, 69, Ashby-st., Norwich.

WILLIAM JUDD, Midland Counties' Aviaries, 120, Belgrave-gate, Leicester. The largest stock of high-class Norwich Canaries in the Midlands. Cocks, in full song, 4/6, 5/6; Orange Yellows, 7/6 and 10/- each; good healthy hens for this year's breeding, 2/6, 3/-; Orange Yellows, 4/- and 5/- each; pairs properly mated for this year's breeding, unrelated, 7/-, 8/-, 10/6, and 15/- pair. Most of these birds have been bred in outdoor aviaries. This is no flattering advertisement, but genuine, with 20 years' references. With my business extending so much I had to take larger and more convenient premises. Please note the change of address.

WINNERS. WINNERS.

To Exhibitors and Breeders.—I have four pairs of Norwich, cocks all winners, matched to hens all first-prize bred, £2 per pair; those were selected for my own breeding, selling through ill-health.—R. Alston, 3, Inkerman-rd., Sudbury, Suffolk. (See Breeder's Card, "Cage Birds' Annual."

WILLIAM BOWYER,

Gladstone-st., Leek, successful exhibitor close upon 40 years, winner all principal shows, including Palace many times, can spare two buff and three yellow unflighted cocks, 15/- each; not half value; few useful yellow cocks, 10s.; no better blood in Fancy; several Crest and Crestbred cocks, 10/-, worth double; approval.

WRIGHT & SON,

84, Heath Road, Norwich, for Show and prize-bred Norwich Plainheads winners of hundreds of money prizes, also medals, etc., in open competition at Crystal Palace and leading shows. Show birds, 15s., 20s. upwards; pairs, 8s. 6d., 10s. 6d. upwards; grand song and stock birds, cocks, 5s. 6d., 7s. 6d., 10s. 6d.; hens, 3s. 6d., 5s. 6d. upwards; approval.

CHAMPION NORWICH.

A grand stock of Plainhead Norwich, fed to perfection, pairs from 10/-, cocks from 6/6, hens from 4/-, also a few cinnamons; approval; inspection invited.—W. Growdridge, Clarendon-rd., Hinckley.

CHAMPION NORWICH BREEDING HENS.

Extra large, stout, clear buff hen, 1905 bred, bred several winners last season, rare colour, wings, and tail carriage, a topper, Beardall's strain, price 10/6; another real good one, same strain, price 7/6; clinking good clear yellow hen, rare size, and very stout for a yellow, 1905 bred; two birds bred from her recently sold for £4 each; Baker's strain; price 12/6, not one-third cost price. Also good ticked yellow hen, Bishop's stain, 1906 bred, full of colour, rare size and quality, price 10/6. First orders secures them. Note.—Such breeders and exhibitors as Messrs. Miles, Barnwell, Isom, Woollett, Hutchison, Towers, Baker, and many more, have had Norwich from me lately. Numerous testimonials can be seen by appointment.—Geo. Cubley, 3, Standard-ter., Long Sutton, Lincs.

100 NORWICH CANARIES.

Splendid 1906 cock Canaries, in full song, price 5/-, 6/-, and 7/- each, bens 2/6 and 3/- each.—J. Thorn, 37, Plumstead-rd., Woolwich.

CHAMPION NORWICH.

Having selected my breeding stock, have a few choice buff hens and buff cocks for disposal; hens from 6/- upwards; cocks from 8/- upwards; stamp reply.—R. Seed, 23, Linton-st., Preston.

JOHN C. BARNES.

Having selected my own breding stock, can spare few choice birds, well up in substance, true type, and of grand depth of colour, winner of silver cups 1901, 1902, 1904, 1905, 1906., price reasonable; approval; inspection cordially invited; stamp reply; pairs properly matched.

149, Duncombe Street, Walkley, Sheffield.

FANCIERS WANTING

Genuine birds, please note this week's prices. Large typical Norwich cocks, splendid songsters, 7/6, 8/6, 10/6, 12/6; smart healthy hens, in breeding condition, 3/9, 4/6, 5/6, 6/6; splendid matched pairs, ready for immediate breeding, 10/6, 12/6, 15/-, 20/-; long racy Yorkshires same prices as Norwich; approval anywhere, deposit; best value ever offered at prices, hundreds of testimonials which I hold prove that; inspection invited; illustrated list free.—R. Hanford, Osmaston-rd., Derby.

CHAMPION NORWICH.

Having selected my breeding stock, will sell the emainder as follows, cheap:—

W. RUDD,
The Bird Specialist,
NORWICH.

A. C. BURN,

14, Fablan-rd., Fulham, London, has a few Norwich Plainheads, clear, and variegated, buff hens and cocks, at 10/- to 25/-, also few matched pairs, 20/-, 25/-, 30/-, 35/-, all bred from winning strain; can be inspected, or sent on approval, cash or deposit.

CHAMPION PLAINHEAD CRESTS.

I earnestly ask you for trial order to prove satisfaction. Sent on week's approval at my own risk; cash or deposit. I claim to have best collection in West England, and sold most premier on show bench, which win challenge cups and gold medals. This strain has won 200 prizes. Norwich cocks, Bullfinch type, 6/6, 7/6, 8/6, 10/6, 12/-, 15/-, 20/-; hens, 3/6, 4/6, 5/6, 6/6, 7/6, 10/6, 12/-; Crest and Crestbreds, large big birds, broad-skulled, pleuty of feather, reach end beak, cocks, 6/6, 7/6, 8/6, 10/6, 12/-, 15/-, 20/-; Crestbred hens, 3/6, 4/6, 5/6, 6/6, 7/6, 10/6, 12/6; Crest hens, 5/6, 6/6, 7/6, 8/6, 10/6, 12/6; pairs, matched to produce winners, 8/6, 10/6, 12/-, 15/-, 20/-.—C. Baker, Herbert-st., Bedminster.

WICKS BROS., NORWICH,

offer grand pairs Norwich Plainheads, selected and matched for immediate breeding, 8/6, 10/6, 12/6, 15/-, 21/- upwards; ditto, cocks, 5/6, 6/6, 7/6, 10/6 upwards; hens, 3/-, 4/-, 5/-, 7/6 upwards. All on approval; quality unequalled compared with prices. Send for current price list and catalogue of live stock and all appliances, post free. Postal and Telegraphic Address: Wicks Bros., Norwich.

CHAMPION NORWICH.

I have a few good birds for sale, large Bullfinch type, good heads and feather, best strain in England; many winners sold; approval.—T. Billington, 220, Colwick-rd., Nottingham.

CHAMPION NORWICH.

Having selected my breeding stock, I have a few pairs to part with, cheap, 10/6, 12/6; pair odd cocks, 8/6, 10/6; odd bens, 4/6, 5/6; Yorkshire cocks, 7/6.—Matt Hopkins, 38 and 41, Fylde-st., Preston, Lancashire.

DISSATISFACTION.

Dissatisfaction is unknown to all my customers. From me you get the birds that you require. I send you any Canary you require carriage paid, upon seven days' approval, at my risk during the time of approval. I have some of the best Norwich in England, including many winners and matched pairs for breeding winners, all at reasonable prices; state requirements. I offer exceptional good value in typical cocks at 6/6, 7/6, 8/6, 10/6, 12/6, 15/-, 20/- each; hens 3/6, 4/6, 5/6, 6/6 to 15/- each; matched pairs from 8/6, 9/6, 10/6, 12/6, 15/- upwards. See what customers say:—"North View, Farnham, February 16th, 1907. Norwich cock to hand. I am well satisfied with bargain. I have instructed Editor to pay you the money.—A. Fay, to Miss Storey." "Six Row, Asbington, February 16, 1907. I am well pleased with the bird. I have been an exhibitor many years, and have never seen such value from any other dealer as the good quality you send at a reasonable price.—J. Smith, to Miss Storey." "115, Middle-st., Pontypridd, February 16th, 1907. The two Canaries arrived in splendid condition. I can strongly recommend you to all my friends, as I am sure they are bound to get every satisfaction with the quality of birds you supply, and your method of doing business.—A. Moon, to Miss Storey." "Midland-rd., Barnsley, February 15th, 1907. Received the bird, and I must say that I am more than satisfied. Several friends have seen it, and they all with me think it a beauty. Wishing you every success.—R. Williams, to Miss Storey." "18, Frias-st., Long Eaton, February 16th, 1907. Received bird in good condition. Many thanks for same. I am highly satisfied. Wishing you every success.—J. Parker, to Miss Storey." "Main-rd., Masbro, Rotherham, February 15th, 1907. Received birds safe. Am highly satisfied with them. J. Bradley, to Miss Storey." I have thousands similar to the above open for inspection. New illustrated Price List post free. Travelling cages, 2d. each; all Canaries sent carriage paid on seven days' approval at my risk.—Miss E. L. Storey, Crowle, Doncaster.

CHAMPION NORWICH.

E. CODLEY, Rishton, nr. Blackburn,

Breeder & Exhibitor, has a few choice birds for sale. Also **Cinnamons.**

W. RUDD, The Bird Specialist, **NORWICH**

SILK'S CHAMPION NORWICH.

My name and fame as breeder of Norwich Plainheads is so well known to every fancier that my birds need no paper recommendation. I breed to sell. Most of the leading champions have been bred and sold by me, my vast business having been built purely upon recommendation, not on paper bounce. If you were disappointed last year with Norwich purchased elsewhere, try a pair from a strain of many years' standing. Success certain. Every pair on approval, money returned if unsatisfactory, or deposit with Editor. Satisfaction guaranteed. Champion pairs, 15s. 6d., 20s. 6d., 25s. 6d., 30s. 6d. per pair; some tip-top cocks and hens, yellow or buff, 7s. 6d., 10s. 6d., 12s. 6d., 15s. 6d. each. Don't risk unreliable strains, but send to the fountain head, or a season's work may be wasted. Remember, all on approval, willingly.

Judge A. E. Silk, *THE AVIARIES,* **Whitstable.**

PAYNE & BENNETT.

All Norwich Canaries exhibited by us at the late Crystal Palace Show were claimed, thus showing the full value we are offering. Well selected stock pairs from own prize strain, from 8/6, 10/6, 20/-, and upwards; Buff Hens 3/-, 4/-, 5/-, and upwards. Yellow 4/-, 5/-, 6/-. Orests, Cocks or Hens 12/6, 15/-, 20/-, upwards. Crestbreds, Cocks or Hens, 7/6, 10/6, 20/-, upwards. Give us a visit or trial order.

All Birds on approval or Deposit,
Satisfaction Guaranteed.

73. KNOWSLEY ROAD, NORWICH.

EXCEPTIONAL FINE *Norwich Plainheads.*

Matched pairs, true type and full of quality, 50/- per pair upwards. Grand typical Norwich Plainhead hens, 30/- each upwards, sent on approval. Prize bred pairs from 15/6. Approval.

NOT WHAT WE SAY, BUT WHAT OUR CUSTOMERS WRITE.

Recommended by Mrs. Lewer and Mr. Robson.

Langdon Villa, West-st., Bromley, Kent. February 19th, 1907.—Please find enclosed postal orders. I want you to send me a pair of prize-bred Norwich Plainheads. This is my first transaction with you, but I understand from Mrs. Lewer and Mr. Robson that I can safely put myself in your hands as to selection and fair treatment. Let the bird be as typical as possible.—Yours faithfully, F. E. Wright to Mackley Bros.

AFTER ORDER EXECUTED.

Langdon Villa, West-st., Bromley, Kent. February 22nd, 1907.—The pair of birds arrived safely yesterday morning. I must congratulate you upon the exceptionally fine way in which you have turned them out, and thank you for your very kind and courteous letter, advice, and general treatment of the transaction. I like your method of business, and it is a pleasure to find someone in Norwich who is not too busy to attend to his customers in a kind and courteous spirit. It goes a very long way, at any rate with me, and I shall not overlook you when I am buying again.—Yours faithfully, F. E. Wright to Mackley Bros.

All Fanciers should write for our Catalogue, sent post free.

ROLLERS & SINGING CANARIES—continued

Hummel Rollers.

Finest Rollers imported. To speak well of the Hummel is to gild refined gold. Testimonials from customers who say the Hummel is still singing as sweetly as when purchased four, five, six, and seven years ago. All Hummels have delightful, deep, delicate bow roll, hollow roll, hollow bow roll, dn pipe, hollow bell roll, grand round bass roll, vibrating hollow roll, and charming water bubble roll; one price only, 12s. 6d.; no fancy prices; Hummel hens, 3s. each; a beautiful pair of Hummels for 15s. St. Andreasberg Rollers, 5s. and 7s. 6d. each. Hummel Schoolmasters, 20s. each, better than can be obtained elsewhere at treble the price. Thousands of testimonials have been published by me in CAGE BIRDS from satisfied customers. I guarantee strictly honourable trading and satisfaction to all.—Varney, sole proprietor and importer of this remarkable Roller Canary. Twenty years advertiser.—Varney, Stratford, London. Export a speciality. "The Schools, Overton, Ellesmere.—Hummel arrived, it at once commenced to sing—yes, a song worth listening to. It is the most exquisite songster I ever heard—decidedly a perfect Roller. I may say I never expected such perfection; they are worth all you charge for them. I must thank you for your courtesy, and shall be able to recommend your firm to those who require birds and not rubbish."—F. Robbins, to Varney, Stratford, London, Sole Proprietor and Wholesale Roller Canary Importer and Dealer.

MANY PEOPLE RUN

Away with the idea that to get a tip-top Roller Canary one has to pay a big price. That this is an erroneous idea a perusal of this advertisement and a trial of my birds will prove. I import all my Rollers direct, and by purchasing large quantities at rock-bottom prices for spot cash, and by so doing am enabled to retail them at lower prices than others can buy at. I have an enormous stock of pure St. Andreasberg hollow Rollers, all in full song, day and gaslight, with long hollow and double rolls, sweet, silvery trills, water-bubble runs, soft roulades, hollow bell rolls, deep bass rolls, Nightingale jug-jug, harp, gong, and dau-dau pipes, etc., etc., and warranted free from any harsh or objectionable notes whatever, price 7/- and 8/- each. Real Bandmasters, which excel in the deep bass rolls and hollow tours, 10/- each. Also a few premier Contest Masters, which have been specially selected from song boxes for me and are now fit to win contests immediately, 15/- each. Pure Roller hens, warranted same strain as above cocks, 3/- each, two 5/6. Ordinary loud, free singing Hartz cocks, in full song, day and gaslight, 6/- each, two 11/-. Hartz hens, 2/6 each, two 4/6. Singing box cages, 1/- and 1/3 each. Roller song cabinets, with folding doors, made specially for my Rollers, 2/3 each. Do you happen to know any of the following persons? If so, kindly ask them what they think of my Rollers, full name and address, given in every instance. "23, Cotlands-rd., Bournemouth, Feb. 12th. Sir,—Miss Craddock received Roller safely this evening. Bird has only just been unpacked, and has started to sing already." "42, Wood-st., Cheapside, London, Feb. 13th. Sir,—Many thanks for birds, which arrived safely this morning. Mr. Schoolmaster sang his arrival soon as unpacked. I think he is worth double the price I paid. If you send to all your customers such Canaries, I think you ought to charge something more for each bird. Please accept my thanks.—Yours, B. C. Gonsalues." "82, Pagett-st., Loughborough, Feb. 16th. Sir,—Bird arrived safely. I am quite satisfied with it. It is a real gem.—Yours, Harry Berry." "5, Thomas-st., Prospect-row, Sunderland, Feb. 15th. Sir,—Birds arrived in grand condition, and I am highly satisfied.—Yours, R. Mitchinson." "22, Crown-st., Silverdale, Feb. 17th. Sir,—I have had the Bandmaster ten days, and am highly satisfied with same. Please forward another. P.O. enclosed.—Yours, Tom Barratt." "132, Avenue-rd., Gosport, Feb. 18th. Sir,—Received Roller quite safe, and am very pleased with it. It is a beautiful songster, and I am delighted.—Yours, J. H. Constable." "Feathers Hotel, Hall-st., Rhos, Feb. 18th. Sir,—Roller arrived in good form, and I am highly pleased with same. He sang as soon as unpacked.—Yours, W. Price." "11, Bryn-rd., Llanelly, Feb. 20th. Sir,—Received Roller hens quite safe, and am well pleased; they are two beauties. I have dealt with you for past four years, and am glad to say shall always send to you for all my birds.—Yours, David John." "98, Wingrove-gdns., Newcastle-on-Tyne, Feb. 23rd. Sir,—Schoolmaster I got off you last October is singing grand. Please send following.—Yours, R. Swan." "6, Richmond-st., Neath. Sir,—Received birds Saturday, and am well pleased. Thanks very much.—Yours, A. Jutsum." "15, Deckham-ter., Gateshead, Feb. 23rd. Sir,—Received bird safe, and I like it very much indeed. Thanking you.—Yours, W. Gladman." "40, Rydal-st., West Hartlepool. Sir,—Received Roller hens all right, and am quite satisfied. I won't forget you when I want anything else.—Yours, S. Steel." "67, Victoria-st., Newtown, Wigan, Feb. 25th. Sir,—Received bird on Friday, and is a splendid bird for the money. Thanks for prompt attention.—Yours, Thos. Kay." Piles upon piles of similar letters to above all open for inspection any time. Please note all Canarics (cocks and hens) are sent on full week's approval at my risk, either cash or 'deposit' system of CAGE BIRDS, and money freely and fully refunded if every expectation is not realised. All imported direct from Leipzig, and stamped on wing, "Hans Weber, Leipzig." I am under special contract to take the whole of these birds, and if you would be sure of getting one you must purchase from me as no other dealer can get one feather of this strain unless he purchases from me. If you are still in doubt as to who has best strain of Rollers extant, try one of mine and one from elsewhere at any higher price, and keep the one which suits you best. This is constantly being done, and it's a significant fact that I am being continually informed that my birds always come out of the trial best. Inspection cordially invited any time.

W. GORE, Direct Importer,
131, Gooch Street, Birmingham.

J. SANDIFORD, BIRD SPECIALIST, PRESTON, LANCS.

HARTZ Mountain Roller Cocks,

ALL IN FULL SONG,

and Hens, both imported and Home-bred, in the finest breeding condition. I have the Largest Collection of **Choice Pedigree Roller Hens** ever got together in one lot. They comprise pure Seifert and Trute Hens, and I can honestly recommend these to all breeders wanting Reliable Breeding Stock to produce the best money can buy. You can give 10/6 or more, and cannot get better blood or stock. Can be seen.

IMPORTED—Trained Cocks, 8/6, 10/6, 12/6, 15/-, 20/- and upwards; Hens, same strain, 3/6 and 5/- each, pairs 10/6, 15/-, 20/- All on seven days' approval, cash or deposit.

HARTZ SINGING, NOT TRAINED, COCKS, 5/6 each. Extra selected, with better notes, 6/6; Pairs, 8/6. Strong Hens, 2/3 each.

Home-bred (guaranteed) Trained Trute and Seifert Cocks 10/6, 12/6, 15/-, and 20/- each; Hens, guaranteed same strains, strong, healthy, and in the best of breeding condition, 4/6, 5/- each. These have been purchased direct from the breeder and trainer, and can be recommended. Remember, it is no use breeding from good Cocks and common Hens if you want good results.

Untrained—Strains unknown, Cocks 5/6, 6/6, 7/6; Hens, 3/6.

Full printed Instructions, how to keep in health and song, sent with every bird as for the past 30 years. Beware of copyists and their "catch" methods.

36, Cherry Orchard-rd., Croydon. February 21st, 1907.—I received the bird quite safely, and it is singing beautifully. This is the third one we have had from you, and all have given satisfaction.—H. Harris to W. Rudd.

71, Duncombe-rd, Hornsey Rise, London, N. February 23rd, 1907.—I received the Roller safe this morning, and I think it is fine. You will hear from me again. Thanking you for your kindness.—H. E. Crew to W. Rudd.

Naas. February 18th, 1907.—I received the Roller, and am very pleased indeed with it.—C. Brumby to W. Rudd.

Plaistow, Essex. February 19th, 1907.—Bird arrived safely, and started singing a quarter-of-an-hour after arrival. Thanks for promptness.—R. Scott to W. Rudd.

If you want to know about these beautiful and interesting songsters, send for my book

MISS STOREY.

Miss Storey has the finest and purest collection of genuine trained Rollers in England, every bird in full song by day and artificial light, singing their pure Roller song. Every bird is cold room bred and kept. These are the genuine Rollers (not cross-bred rubbish). My stock consists of high-class British bred Rollers, bred from and related to the best of contest singers and winners. Cocks, in full song, 15/6, 17/6, 20/-, 23/-, 30/-. A few extra special at 40/-, 50/-, and 60/-. Hens to match same, 4/6, 5/6, 6/6 each. Genuine trained St. Andreasberg Rollers, with full change of song by day and artificial light (no common German rubbish these), 8/6, 10/6, 12/6, 15/-. Pure Roller hens, 3/-, 3/6 each. Hartz Mountain Roller cocks, in full song by day and gaslight, very loud free songsters, 6/-, 6/6, 7/- each. Matched pairs for breeding songsters, 8/6, 9/6. The quality of my birds speaks for itself. I have many thousands of testimonials open for inspection, of which the following are a sample:—"Crushier, co. Clare, Ireland, February 16th, 1907. Received Roller safe. He commenced to sing the same day. I am awfully thankful for such a good bird.—P. Greelish, to Miss Storey." "23, Travess-st., St. Helens, February 15th, 1907. Bird arrived safe. The time for approval is up, and I am keeping the bird, as it is a little marvel at singing. Would not take twice the amount I paid you for him. Will give you more orders.—J. Lawton, to Miss Storey." "115, Middle-st., Pontypridd, February 16th, 1907. The St. Andreasberg Roller you sent me is a most beautiful songster. It is all that you claim for your birds in the papers.—A. Moon, to Miss Storey." "8, Long-row, Coalville, February 16, 1907. I thank you very much for the bird, which gives every satisfaction; it is an excellent songster. I could not wish for a better.—J. Wilkins, to Miss Storey." "The Square, Dalry, February 15th, 1907. I am very pleased with the birds. The Roller is a beauty. I am sending you more orders now I know the honest way you have of dealing, and the splendid singers you supply.—A. Gray, to Miss Storey." "41, Six-row, Ashington, February 16th, 1907. I consider the bird you sent me the best value I have ever seen for the money I sent.—J. Smith, to Miss Storey." "62, Longcoastway, Perth, February 17th, 1907. Bird received all right. I am well pleased with it. It is singing nicely, and has a very good full note.—R. Taylor, to Miss Storey." "22, Sligo-st., Lumphinman, February 16th, 1907. I am highly pleased with the Roller; it is a real first-class songster. Many of my friends are sending you their orders for birds like mine.—J. Walker, to Miss Storey." If you want further proof, allow me to send you the birds you require, carriage paid, on seven days' approval at my risk. Illustrated list free.—Miss E. L. Storey, Crowle, Doncaster.

Scotch Fancies.

WANTED, buff or pied first cross hen; approval.—Penaluna, William-st., Blackwood.

COLD-ROOM bred, long, typical Yorkshires, related winners Palace, Reigate, Walthamstow, etc., pairs, properly matched on points and pedigree, from 15/-; 7in. cocks from 10/-; approval.—Hall, 134, Branksome-rd., Brixton.

AFTER pairing my birds up, have the following birds to part with:—Yellow cock, 6/6; buff hen, 5/-; buff cock, 7/6; yellow hen, 5/-; foul green cock, yellow, 7/6; all bred from winners.—4, Aire Viewter., Skipton, Yorkshire.

HIGH-CLASS Yorkshire hens, splendid length, type, and quality, grand buff hens from 4/-, few typical cocks from 6/-; approval anywhere; satisfaction guaranteed.—Greenwood, Colne-rd., Cross hills, Keighley. x269

HAVING selected my breeding stock, have 20 pairs of grand long upstanding birds, smooth as glass, matched for breeding cinnamon marks; pairs 10/6, 12/6, 15/-; approval.—Dearden, Spring-st., Brighouse, Yorkshire.

YORKSHIRE cocks, 2nd Brislington, 12/-; the Kingswood, 10/6; he, Bristol, 10/6; three others, 8/6 each; four grand hens, 7/- each; all long slim prize-bred birds, best blood; approval.—W. Older, 64, Kingsland-rd., Bristol.

JOHN C. BARNES.—Having selected my own breeding stock, can spare few grand birds, feathered like wax, very lengthy, perfect position and well on leg, price reasonable; approval; stamp reply.—149, Duncombe Street, Walkley, Sheffield.

IF you want Yorkshires to breed winners, buy from the breeder; best blood in the Fancy; cold room bred, smart, stylish cocks (full song), 5/6, 6/6, 7/6, 10/6; hens, 3/6, 4/6, 5/6; seven days' approval.—W. H. Berry, Ingrow, Keighley.

EXCHANGE pair of Crests, value £1 5/-, and Goldfinch and Bullfinch, bred Hybrids, 10/-, and cash for two yellow Yorkshire hens, 1906; no rubbish required.—Brooks, Hairdresser, Stockbridge, Sheffield.

MR. H. HURRELL, 14, Burnwells, Thackley, Bradford, Yorkshire, has some typical hens, clear buffs, greens, variegated, and Cinnamon marks, 8/- and 10/- each, all from exhibition strains, cold-room bred and colour-fed; also few singing cocks, the progeny of same strains, 6/- each.

CHAMPION leggy, upstanding Yorkshires, all cold room kept, and bred from best winning blood in Yorkshire, cocks, 7/6, 8/6, 10/6, 12/6; hens 7/6, 8/6, 10/6; properly mated pairs, 15/-, 17/6, 20/-; approval cash or deposit; 21 years breeder.—Frank Stevens, Great Ayton, Yorkshire.

EXHIBITION, one yellow, one buff, Yorkshire cocks, long, slim, typical birds, 10/- each; also four buff hens, 5/- each; exchange phonograph and records, or rabbits; must be able to win in open competition; no rubbish.—Taylor, 22, Morpeth-st., Burnley.

GRAND long slim pair Yorkshires, fit for breeding, £1, or exchange loud good noted Linnets, must be loud continuous songsters; also exchange very long buff Yorkshire cock for Goldfinch Mule, must be pure Goldfinch noted; approval.—C. Brown, 7, Seymour-st., Portsmouth.

POWICK'S champion Yorkshires in all classes, the same strain as the winners at all leading shows, cocks, 7s. 6d., 10s. 6d.; hens 5s. 6d., 7s. 6d. each; pairs mated to breed winners, 12s. 6d., 15s. 6d., and 20s. per pair; no rubbish; ten days' approval.—Wm. Powick, Eastfield House, Dewsbury, Yorkshire.

NOTICE.—Buy from the breeder. We still have a few pairs left at 8/-; selected matched pairs at 15/- and 20/-; some grand hens at 5/-, 6/-, 7/6; stock cocks, 10/6, 12/6; P.O. or deposit; approval. Fanciers, note new address; larger premises.—Y. Leach and Son, 41 and 42, Market-pl., Keighley, Yorkshire.

YORKSHIRES

3 FIRSTS, 4 SECONDS and 6 THIRDS.

This testimonial should prove at once the quality and fair dealings you will receive if you place a trial order with me. From "11, Ashwell Street Leighton Buzzard, Feb. 2nd 1907.—Just a few lines to inform you that the Yorkshire Cock you sent me has won 3 Firsts, 4 Seconds, and 6 Third Prizes, in good competition. Thanking you for your honest dealings. F. Collyer to J. Taylor, Frizinghall, Bradford." Fine, long, thin, racy, yellow Yorkshire Cocks, 6/6, 7/6, 8/6, 10/6, 12/6, 15/- each. Some slashing Buff Cocks, full of quality, at 5/6, 6/6, 7/6, 8/6, 10/6, 12/6 each. All on full song and standard length (some over). Grand matched pairs for breeding winners at 8/6, 10/6, 12/6, 15/-, 20/-, 25/- per pair. Clears, Ticked, Green Marked, Cinnamon Marked and Clear Pink Eyed. Champion lengthy Yellow Hens at 4/-, 5/-, 6/-, 7/-, 8/6 each. Buff Hens at 3/-, 4/-, 5/-, 6/-, 7/6 each. All in the best of health and feathered like glass. Cold-room bred and kept. Inspection invited at any time. Best and largest stock in Bradford. Seven days approval at my risk.

CRESTS & NORWICH.

If you want Crests or Crestbreds with plenty of head feather, size, and proper shape, you cannot do better than give me a trial. They are "Joyce's," "Barnett's," etc., strains. Large Crestbred Cocks, well brawed, and head feather to beak end, at 8/6, 10/6, 12/6, 15/-, 20/- each. Crested Cocks, 8/6, 10/6, 12/6, 15/-, 20/- each with large well centred crests on. Grand accurately matched pairs for breeding, at 12/6, 15/-, 18/-, 20/-, 25/-, 30/- per pair. Large Crested Hens, 7/-, 8/6, 10/6, 12/6, 15/- each. Crestbred Hens at 6/6, 8/6, 10/6, 12/6, 15/- each. All cold-room bred and kept, and on 7 days approval at my risk. Also large Bullfinch type Buff Norwich Plainheads, Cocks at 6/-, 7/-, 8/6, 10/6, 12/6 each. Yellow Norwich Cocks at 7/6, 8/6, 10/6, 12/6, 15/- each. Properly matched pairs, to breed winners, at 8/6, 10/6, 12/6, 15/-, 20/- per pair. Some very large Buff Hens at 4/-, 5/-, 6/-, 7/6 each. Yellow Hens 5/-, 6/-, 7/-, 8/-, 10/- each. Clears, Ticked and Variegated. Seven days approval. Illustrated Price List post free.

EASY PAYMENT SYSTEM.

I can supply Yorkshires, Norwich and Crests, Cocks or Hens, on the Easy Payment System. Birds sent off at once on receiving first payment. Send stamp for full particulars and terms. State wants. All birds sent on 7 days approval at my risk. Only and original address.

J. TAYLOR,
9, Northdale Road, Frizinghall, BRADFORD.

THE old Yorkshire breeder's birds are best of quality, cold room bred, clears, ticked, yellows, or buffs, cocks, full song, 6/6, 8/6, 10/6; hens 3/6, 4/6, 5/6, 6/6; pairs, properly matched for breeding, 10/6, 12/6, 15/-; seven days' approval, cash or deposit.—Pickles, 5, Wardman-st., Keighley, Yorkshire. x268

CHAMPION Yorkshires.—Those requiring stock birds of the highest type and quality, I guarantee to please you. Four buff cocks, 12/-, 15/- each; also three yellow hens, two buff, 8/- each; all unflighted birds and related to my winners at all the leading shows. This is a chance that is seldom met with.—Willie Wadsworth, Skelmanthorpe, Huddersfield, Yorks.

MURGATROYD AND SON, breeders 21 years, runners up for Yorkshire Amalgamation 25 guineas Challenge Trophy, 1906, also winners Yorkshire Amalgamation Challenge Cup, 1905 and 1906. This is proof that this strain is one of the best. We have a few for disposal, cocks, long and stylish, hens, feathered to perfection; prices reasonable; four days' approval; stamp reply.—35, Lytton-rd., Girlington, Bradford.

AMBLER'S Champion Yorkshires.—Having selected our breeding stock, we offer for sale the choicest stock of Yorkshires in the Fancy. Long, racy cocks, perfect type and quality, hens of wonderful length and style, feathered like marble, just the sort that breed champions. We have sold more noted and championship winners than any firm in the world for over 20 years, including six of the best Yorkshires living this season, which have won all before them. This is a chance seldom met with to secure such quality at the price; stamp particulars; satisfaction guaranteed; approval.—17, Lytton-rd., Bradford.

CHAMPION YORKSHIRES.

Kindly read this testimonial from Zan-y-lan, Craig, Morriston, Feb. 25th, 1907.

"Birds to hand, I am well pleased with them, the cock sang as soon as I put him in cage. Some friends of mine saw them and greatly admired them. You shall have all my future orders. Thanking you for your prompt and kind attention to my order.—W. J. Lewis to J. B. Rees."

Fine typical birds, Cocks, 6/6, 7/6, 8/6, 10/6, 12/6. Hens, 3/6, 4/6, 5/6, 7/6. Norwich, same prices as Yorkshires. Grand matched pairs 9/6, 10/6, 12/6, 15/-. I have 15 Yorkshire Green Cocks, 8/6, 10/6, 12/6. No Hens. Honestly worth double. Must clear to make room for breeding. Seven days' approval on all birds.

J. B. REES, GLANTAF, ABERCANAID, MERTHYR.

YORKSHIRES.

First Prize and Three Specials.

"6, Market Street, Blackhill, co. Durham.—The pair of Yorkshires I got last March from you, bred me 14 young ones. I also showed the Cock bird, he took 1st and 2 specials, and special for Best Yorkshire in Show (Member's Class), yours truly, J.T."—**Matched pairs, 8/6, 10/6, 12/6, 15/-, £1; Buff Cocks, 5/6, 6/6, 8/6, 10/-; Yellow Cocks, 6/6, 7/6, 8/6, 10/6; Hens 3/-, 4/-, 5/-, 7/6. 7 days' approval.**

ARTHUR THOMPSON,
97, Bradford Rd., Frizinghall, BRADFORD

Extraordinary Value.

GRAND TYPICAL YORKSHIRES,
From 15/6 per pair upwards.

Single Birds supplied, all on approval.

EVIDENCE OF QUALITY.

"17, Ford-lane, Crewe. February 15th, 1907. I am pleased to say that I received Third Prize and V.H.C. in keen competition against such birds catalogued at £25 and £30 each with the two Yorkshire Hens you supplied me a few days ago. I am highly delighted with them, and I cannot say too much in your praise for the straightforward dealings and the quality of your birds.—Yours truly, J. Southam to Mackley Bros."

All Fanciers should write for our Catalogue, sent post free.

W. RUDD, The Bird Specialist,
NORWICH.

BOUGHT by JUDGMENT.

E. TAYLOR, BIRD SPECIALIST,

3 & 7, Thornton Road, BRADFORD.

I have no hesitation in asserting that **ALL** who read my advertisements with care and intelligence will find that, to follow them up, and test their truth by prompt purchase, will mean that they have acted with the most commendable judgment in so doing. At the present date my stock of Birds is of an exceptionally advantageous description, amply suiting the requirements of **ALL** patrons, whether professional dealers or otherwise. The Birds shown by **E. TAYLOR** are never a losing or disappointing investment for the public—the fact that they emanate from **E. TAYLOR'S** establishment being **always** a sound and ample guarantee to buyers, that the money paid for them has been wisely spent. The compass of an ordinary advertisement gives **NO IDEA WHATEVER** of the range and variety of **E. TAYLOR'S** wide-reaching and varied selections. You want, for **that** purpose, to consult **E. TAYLOR'S ILLUSTRATED CATALOGUE,** which is well worth your close scrutiny, and will be sent to all enquirers on receipt of two penny stamps to cover postage. Please note my first initial.

E. TAYLOR, Bird Specialist, 3 & 7, Thornton Rd., BRADFORD.
